

UNITED STATES OF AMERICA
THE PRESIDENT'S MANAGEMENT ADVISORY BOARD

+ + + + +

PUBLIC MEETING

+ + + + +

FRIDAY
SEPTEMBER 23, 2011

+ + + + +

The Board met via teleconference at
10:30 a.m. Jeff Zients, Chairman, presiding.

PMAB MEMBERS PRESENT:

SAM GILLILAND, Sabre Holdings
JEFF KINDLER, Pfizer
DEBRA LEE, BET Networks
SHANTANU NARAYEN, Adobe
ENRIQUE SALEM, Symantec
TIM SOLSO, Cummins
RON WILLIAMS, Aetna

ADMINISTRATION MEMBERS:

JEFF ZIENTS, Chairman
STEVE BROCKELMAN, Designated Federal Officer
STEVE VanROEKEL, Federal Chief Information
Officer

JOHN BERRY, Director, Office of Personnel
Management

SETH HARRIS, Deputy Secretary, Department of
Labor

DAVID HAYES, Deputy Secretary, Department of
Interior

TONY MILLER, Deputy Secretary, Department of
Education

	- IT Vendor Management
	- IT Portfolio Management
	NEXT STEPS. 48
	ADJOURNMENT 49

1 P-R-O-C-E-E-D-I-N-G-S

2 (10:34 a.m.)

3 CHAIRMAN ZIENTS: Hi, everybody.

4 This is Jeff Zients. We're going to start the
5 meeting. I think we have everybody on now.

6 And I'm going to start just by thanking
7 everybody for joining.

8 The purpose of today is to pull
9 everybody together for an update, and also to
10 make some formal recommendations as to how we
11 move forward. So, we're going to spend the
12 bulk of our time listening to the
13 Subcommittee's report on what they found, and
14 their recommended paths going forward. And
15 then we'll just make sure that on each one we
16 formally decide whether or not to move forward
17 with that recommendation to a vote.

18 I'm on Slide 2 of the deck. I
19 think we have everybody on the call at this
20 point.

21 I want to introduce a new member
22 of our team, Steve VanRoekel, who joined us

1 about a month ago. He was 15 years at
2 Microsoft, including a period of time where he
3 was Bill Gates' right-hand person, had a great
4 career at Microsoft and joined the federal
5 government at the beginning of the
6 Administration working as the COO at the FCC
7 under Chairman Genachowski. And we're lucky
8 to have him as Vivek's replacement as our new
9 Federal Chief Information Officer. Given that
10 a fair amount of PMAB's focus is on IT, Steve
11 will be a very active participant.

12 Steve, do you want to say a word?

13 MR. VanROEKEL: Thank you, Jeff. I
14 look forward to working with all of you. And
15 I think the perspective that you can bring,
16 much like my private sector experience, has
17 lent itself well to the model that is
18 government, and I'm excited to partner on kind
19 of bridging that gap and taking your
20 recommendations forward. So, thanks for all
21 your help.

22 CHAIRMAN ZIENTS: Quickly, on Slide

1 3, I think I've largely covered the purpose,
2 but just to remind folks that this is also
3 open to the public in a listen-only mode.

4 The purpose is for the
5 Subcommittees to provide a progress update on
6 their work and present recommendations, and
7 that the recommendations are intended to
8 support government initiatives and reforms
9 going forward.

10 As to the agenda, we're going to
11 start with our SES Subcommittee
12 recommendations and discussion, which falls
13 under two areas, the performance appraisal
14 process, and executive development. Then
15 we'll switch over to IT, again two areas; IT
16 Vendor Management and IT Portfolio Management.
17 And then we'll close with some next steps.

18 So, with that why don't I hand it
19 over to Steve to just quickly navigate the SES
20 terrain.

21 MR. VanROEKEL: Actually, I'm going
22 to turn it directly to Sam to take us through

1 the Performance Appraisal recommendations.

2 MEMBER GILLILAND: All right.

3 Well, thanks everybody, and good morning,
4 everyone.

5 I'm going to move us to page 4
6 here. Our Subcommittee focused on two areas,
7 Executive Performance Appraisal and Executive
8 Development. And I'm just going to cover the
9 first one here.

10 I thought the first thing I should
11 do is certainly express the appreciation of
12 our Subcommittee to John Berry and his team in
13 the Office of Personnel Management. Very
14 helpful in gathering information around this
15 particular initiative.

16 As you'll see here on page 4 in
17 the top section, we did identify several major
18 opportunities for improving the SES
19 Performance Appraisal process. You'll note
20 there the inventory of 40 plus SES Performance
21 Appraisals across government, certainly with
22 different standards and definitions.

1 That's obviously led to an
2 inconsistent approach to performance ratings,
3 accountability, and even a perception around
4 issues of fairness.

5 And as you'll see there on the
6 third sub-bullet, about 49 percent of SES
7 personnel receive the top performance rating,
8 so a Level 5 rating in 2009, 41 percent in the
9 next highest rating. So almost 90 percent, if
10 you do the quick math, in the top two boxes.

11 And, certainly, as we've been
12 thinking about this, we're not debating the
13 fact that we have very good people in SES, and
14 certainly we do. We've met a number of them.

15 As you'll see, we think there's an
16 opportunity to redefine the rating system to
17 more closely reflect what we found to be
18 successful in the private sector, and allow
19 for some better differentiation of
20 performance.

21 There is an initiative underway to
22 establish a single performance appraisal

1 system for all of SES and the federal
2 government, as you see there. So, what we did
3 as a Subcommittee, and working with OMB, and
4 again with John Berry's team, gathered leading
5 practices from private sectors. So, time
6 spent with both the CEOs that are represented
7 on this Committee, and also our HR executives
8 again from the companies and organizations
9 that we represent.

10 You'll see there the four trends
11 that emerge from that. Certainly, one is that
12 it's important within an organization, and we
13 think broadly across federal government, to
14 have a single performance appraisal system;
15 that there be a standard set of competencies
16 that all executives are assessed against, and
17 an expectation of a result achievement, and
18 demonstration of leadership behaviors. Last
19 is strong involvement of senior leadership in
20 performance management and executive
21 appraisal.

22 And, particularly, I think as each

1 of us in the private sector think about
2 succession management, we find it really
3 important to be very much involved in the
4 performance management process, matching
5 skills to the initiatives and objectives of
6 our respective companies and organizations.

7 So that leads us fairly nicely,
8 then, into the next page, page 5, which is the
9 recommendations of our Subcommittee. And
10 you'll see the three major recommendations.
11 And I'll touch lightly on a few of the sub-
12 bullets, as well.

13 But that we develop -- the
14 recommendations are, obviously, that we
15 develop a new Executive Performance Appraisal
16 system with clearly defined competencies,
17 again balancing achievement of results and
18 leadership behavior. So how you get it done
19 matters, as well. So it's important that as
20 we redefine this that we emphasize that point.

21 And then the last point, an intent
22 to prevent grade inflation through strongly

1 written and enforced performance criteria that
2 set mid-level ratings as the norm, and top-
3 level ratings as truly exceptional.

4 So, I guess the point here is to
5 strengthen, to clarify, to enforce performance
6 ratings across SES. And I think underpinning
7 this is the requirement to redefine and very
8 clearly communicate. And I think many of us
9 have been through this in the private sector
10 where you do have this grade inflation that
11 occurs.

12 It takes an awful lot of work to
13 redefine the ratings. And what I mean by that
14 is the Level 3 rating really should reflect
15 very solid performance, while a Level 5 is
16 reserved for truly extraordinary results. So,
17 again, back to my earlier comment, providing
18 more differentiation across the rating system.

19 The second recommendation is to do
20 this through a phased implementation. And I
21 won't get into a lot of specifics here. You
22 can read what we've set forth, but I think the

1 idea is that we would pilot this new
2 performance appraisal system with a few
3 agencies first, and then roll it out across
4 all agencies over a two-year period.

5 And there are various logistical
6 reasons and approvals that we have to go
7 through that really drive us to that. But I
8 do think it makes a lot of sense; even in
9 private sector oftentimes we'll pilot with
10 certain parts of the organization, then move
11 forward more broadly once we feel good about
12 the results.

13 The last point, and I touched on
14 this as I talked about our findings, as well.
15 And that is that there is, certainly, a really
16 important role for agency leadership to play
17 here. I think in every case, the CEOs that are
18 part of this Committee are heavily involved in
19 the Executive Performance Appraisal process,
20 so we really need the support of the Deputy
21 Secretaries. And I think we have it, as we
22 spent time with them, to be sponsors of the

1 new system in partnership with their heads of
2 human resources.

3 You'll see the last bullet here,
4 this requirement that Deputy Secretaries
5 review and approve all SES performance
6 appraisals for their agency annually. And we
7 had some debate about this one. In fact, I
8 might even ask the Deputy Secretaries on the
9 call to weigh in a bit.

10 I think the importance of this
11 point is simply that the SES managers know
12 that the Deputy Secretaries place huge
13 emphasis on quality performance -- on a
14 quality performance review process. How to do
15 that? One way is by reviewing all the
16 performance appraisals. Another might be a
17 random sampling. But, certainly, in any case
18 strong communications and emphasis with
19 managers within SES that the new performance
20 appraisal system and performance appraisals
21 themselves are really important and need to be
22 high quality.

1 So, those are the recommendations
2 that we're setting forth. I'd certainly be
3 interested in any feedback from the Deputy
4 Secretaries. I know we spent some time with
5 you already. If you have comments or other
6 insights that you'd like to share.

7 CHAIRMAN ZIENTS: John Berry, do
8 you want to respond, and then if any other Dep
9 Secs or any members of PMAB want to jump in?

10 DIRECTOR BERRY: Thanks, Jeff, and
11 thank you, Sam. It's been a wonderful
12 partnership, and we appreciate so much not
13 only your, but all of the members of the PMAB
14 making your professional staff available to
15 work with us on this issue. It's made a huge
16 difference.

17 The only caution, and I suspect
18 you'll hear more from the Dep Secs, especially
19 for our larger agencies, and that's why on the
20 last point that we were talking about of
21 having the Dep Secs review and approve all of
22 them. Some of our larger departments that

1 would involve, you know, over 500 people, so
2 we'll just have to be aware of the constraints
3 at some point, and refine that as we go. But
4 I think broadly the point is well taken of
5 having senior engagement.

6 CHAIRMAN ZIENTS: Anyone else?
7 Comments, questions here?

8 MEMBER WILLIAMS: Yes, this is Ron
9 Williams speaking. A couple of quick
10 questions. One is, in the performance
11 management approach was there thought given to
12 rating people on their leadership skills as
13 well as rating them on their results as two
14 separate vectors, if you will, that come
15 together in the overall rating?

16 MEMBER GILLILAND: Yes, and I can
17 jump in on that, Ron. This is Sam, again.
18 Certainly, there was specific emphasis placed
19 on the fact that the new rating system had to
20 balance both results with the leadership
21 behavior, so as I mentioned a little bit
22 earlier, how you get it done really does

1 matter. And I think we've all found that in
2 the private sector, I'm sure it's true in
3 government, as well, but we wanted to make
4 sure that the rating system emphasized both.

5 DEPUTY SECRETARY HARRIS: It's Seth
6 Harris. I thought I would jump in on that
7 point and one or two others.

8 Leadership is an element of the
9 SES review for us, and I suspect for the other
10 agencies, as well. I think that's a very
11 important point. And the more we can add
12 clarity to what we mean by leadership, I think
13 the better off we're going to be. So, I want
14 to -- I agree with the previous two comments.

15 With respect to the Deputy
16 Secretary review, there is a slight technical
17 complexity with that. And that is, I am the
18 appeal official for a number of my SESs when
19 their agency had -- rates them in a way that
20 they find objectionable. I question what
21 effect it would have if I were involved in the
22 decision with respect to their rating and

1 still preserve a genuine appeal process for
2 those SES.

3 The final point I would make,
4 though, is I am now involved with my agency
5 heads in a pre-review process where I'm
6 talking with each of them about every SES in
7 the organization, because we have a smaller
8 SES core than say the Department of Defense,
9 or the Department of Veterans Affairs. So,
10 I'm involved in that process, so it may be
11 better to structure it as a pre-review
12 discussion, rather than a review of -- an
13 analysis and assessment of the reviews after
14 they're already made.

15 So, I think it's a great idea.
16 It's just a question of how do we -- where do
17 we position the Deputy Secretary in the
18 discussion?

19 MEMBER GILLILAND: Okay. That's
20 helpful, Seth. I appreciate the feedback.

21 DIRECTOR BERRY: I think we -- this
22 is Steve. I think we can probably reword that

1 recommendation to broaden it a little bit to
2 take into account some of this input, so that
3 the Dep Secs are involved, and there's a
4 message sent to the reviewing managers that
5 they're accountable for those reviews, but we
6 don't do it in a way that's too burdensome.

7 CHAIRMAN ZIENTS: So, with the
8 assumption that that last bullet point is
9 broadened and maybe made a little more
10 flexible, if you will, is everybody -- just
11 given that we're not in person, let's do the
12 votes. Is anyone not in favor of moving
13 forward on this set of recommendations as to
14 SES Executive Performance Appraisal?

15 (No response.)

16 CHAIRMAN ZIENTS: Good. All right.
17 Let's consider that done.

18 Debra, Slide 6?

19 MEMBER LEE: All right. I will move
20 on to Slide 6, which is the second part on the
21 performance overview.

22 As Sam said, we had extensive

1 conversations with the CEOs on the
2 Subcommittee, and our HR folks, and the
3 government officials. So, when we looked at
4 Executive Development in general for the SES,
5 we learned several things.

6 One, that there is a big hole
7 coming up because in the next five years half
8 of the SES are eligible to retire. So,
9 there's going to be a great need for
10 development among the new executives coming
11 into the SES. So, that was one concern.

12 Second, we discovered that SES
13 members in general receive limited
14 development. According to a survey done in
15 2008, 37 percent of all SES reported they had
16 not really had any development activity during
17 their entire tenure, so that was of concern to
18 us.

19 Then we found that there was no
20 government-wide on-boarding training for the
21 SES, that there existed a two-day introductory
22 session, but that was primarily orientation

1 for the members and not really in-depth skills
2 development.

3 And we found that the SES members
4 as a whole had few opportunities to network
5 with each other, among -- in different
6 agencies, and there was no opportunity or
7 limited opportunity for collaboration.

8 None of these items are really
9 surprising because I think it's fair to say
10 that some of these issues exist in the private
11 sector, that a lot of companies mistake
12 orientation for development. And one thing I
13 know we've learned at Viacom and at BET is
14 that you really do have to develop executives
15 over the years. You can't wait until there's
16 a problem and then try to exit people out of
17 the company, that development is really
18 important.

19 So, as we discovered these issues,
20 the Subcommittee decided to focus on several
21 areas in the development area. One, we wanted
22 to help on-board new SES members, so that was

1 the first priority. Really, supplementing
2 OPM's existing on-boarding process.

3 We wanted to provide skill-based
4 classroom training as opposed to just
5 orientation. And we wanted to encourage
6 networking across the SES members and across
7 agencies. We also wanted to make training --
8 the training available to all agencies. And
9 we wanted to focus on three skill areas; one,
10 strategic thinking; two, managing staff; and
11 three, change management. So, we thought
12 those were the most important areas to focus
13 on.

14 So, coming out of that finding
15 these particular issues, we came up with
16 several recommendations by the Subcommittee
17 that I want to walk you through right now.

18 The first is that we wanted to
19 pilot an on-boarding training program for new
20 SES members across agencies. We wanted it to
21 be more centralized, and we wanted it to have
22 an immediate cross-agency impact. So, that's

1 the first area we wanted to look at.

2 Second, we wanted to make sure it
3 was a public-private partnership. We wanted
4 to take advantage of the training resources at
5 the companies that are part of PMAB. We have
6 great CEOs from great companies that have
7 dealt with these issues already, so we thought
8 that we could have the PMAB companies
9 contribute their existing training curriculum
10 and expertise to really serve as a basis for
11 the new training program. But also have these
12 experts work with the federal training experts
13 to make sure the curriculum works with the
14 agency content. I mean, we didn't want to
15 develop a program that didn't have application
16 to what the SES members were dealing with on
17 a day-to-day basis.

18 So, the third recommendation is
19 that we create a dynamic learning environment
20 between the public and private sector trainers
21 to give the participants a variety of
22 viewpoints. And there's no one way to manage,

1 there's no one way to develop leaders, or
2 teach strategic thinking. So, we wanted to
3 take the best practices of the companies and
4 the existing federal trainers and come up with
5 a group of, one, federal agency leaders; two,
6 facilitators with applicable experience; and
7 three, SES members.

8 And, four, the fourth
9 recommendation is that we develop training
10 modules that particularly address the skill
11 gaps for new executives. And, again, those
12 were -- we wanted to focus on strategic
13 thinking, managing, talent, and changed
14 leadership. So, we thought that was a good
15 number to start with, and those were issues
16 that we knew the SES members would face. So,
17 those are the three that we want to start
18 with.

19 And, finally, we wanted to have as
20 much impact as possible across the SES, but we
21 wanted to also have opportunities for small
22 group learning. So, if there are close to 100

1 SES members, they can participate in the three
2 training sessions over a three to four month
3 period, but also within those training
4 sessions you can incorporate small group
5 learning opportunities, and have various
6 facilitators participate in each session.

7 So, we're very excited about this
8 approach, especially about using the PMAB CEOs
9 and expertise to supplement what the
10 government is doing already. And we think
11 this is an approach that would really help
12 develop the SES members and really make a
13 difference in how they manage from day-to-day,
14 and how they deal with issues, and how they
15 deal particularly with a changing environment.
16 As we know, things change in the government
17 quite often, so we wanted this to be an
18 ongoing program that would provide expertise
19 to the members of the SES.

20 So, with that I'll stop and open
21 it up, if there are any Subcommittee members
22 that want to add anything, or if there are

1 questions from PMAB or from the Deputy
2 Secretaries.

3 CHAIRMAN ZIENTS: Thanks, Debra.
4 Questions?

5 DIRECTOR BERRY: I'm sorry. John
6 Berry. I just wanted to thank you again, one,
7 for the generosity of sharing the curriculum.
8 I think that's going to be a phenomenal asset
9 for us in this regard. And two, I think
10 you've really nailed the right focal areas.
11 And I think together that's going to allow us
12 to really get moving quickly.

13 MEMBER LEE: Terrific. I mean,
14 we've -- you know, this is not something that
15 private companies have nailed down perfectly,
16 so I don't want to give that impression, but
17 I think a lot of us have been through it
18 recently. And as we try to develop our own
19 executives as leaders and as managers, I think
20 it's exciting that we'll be able to share that
21 with the SES. So, thank you.

22 DIRECTOR BERRY: Yes. And then

1 personally committing to help us with the CEO
2 engagement and involvement, I think is going
3 to really lift the focal area of our senior
4 executives to the right plane, and that's an
5 amazingly generous offer, as well.

6 MEMBER LEE: Oh, great.

7 MEMBER WILLIAMS: Can I ask just a
8 question for me. How do we propose figuring
9 out the group that will get this leadership
10 development, the talent development? Because
11 one of the things that we found -- we've got
12 about just under 200 Vice Presidents, and then
13 you go down to the Senior Directors. It's a
14 fairly large number, so we had to over time,
15 because we can't spend the same amount of time
16 and effort with everybody, so even inside of
17 our senior leaders that we want to continue to
18 develop, we try to have some process for
19 figuring out where are we going to put more
20 attention and focus, potentially more
21 coaching, mentoring, external resources, small
22 group meetings.

1 So, is there any thought to how
2 do, you inside of the bigger group, a
3 selection process to say who do we focus on
4 inside of the greater SES?

5 CHAIRMAN ZIENTS: Well, the thought
6 here is that we start by piloting, and the
7 pilot is focused on new members as part of
8 their on-boarding. I think that's a really
9 important question that you're raising, as we
10 begin this pilot and plan for success, because
11 I think this will be quite successful. How
12 can we triage? I mean, do we continue to
13 focus primarily on those first couple of years
14 for, as Debra pointed out, there will be many
15 new members of the SES. Do we do some basic
16 triaging based on those who are in larger
17 management positions who need help?

18 It's a good question. I don't
19 think - Steven and others jump in here - I
20 don't think we've really tackled that yet, but
21 we should begin to do that because this is
22 going to be a successful pilot, and we're

1 going to want to ramp this up.

2 MEMBER WILLIAMS: Yes, I think I
3 agree with you. I think you will be
4 successful. It sounds like a -- any time you
5 focus on leadership development you get a
6 group focused like Debra has outlined, I think
7 you will make progress.

8 So, if I can suggest, though, you
9 really -- even beyond the folks that are
10 coming in, you should try to find those two,
11 or three, or four folks that you can spend a
12 little more time with, because I guarantee you
13 there's a set of people who will make the
14 biggest impact if we can develop them a little
15 further.

16 CHAIRMAN ZIENTS: I think you're
17 raising a good question. I think it's work
18 that we should begin to tackle.

19 MEMBER WILLIAMS: Okay.

20 MEMBER LEE: Yes, I agree.

21 CHAIRMAN ZIENTS: Any other
22 questions before we vote on this set of

1 recommendations?

2 (No response.)

3 CHAIRMAN ZIENTS: Okay, same
4 technique here. Anyone have any -- anyone
5 against this set of recommendations, having
6 reservations?

7 (No response.)

8 CHAIRMAN ZIENTS: Okay, hearing
9 none we'll assume that these are done.

10 Let's now switch gears to IT, page
11 8. Enrique.

12 MEMBER SALEM: Great. So, our
13 Subcommittee focused on the area of IT Vendor
14 Management. And let me give you some
15 background.

16 We in the federal government spend
17 about \$80 billion a year, and historically
18 what's happened -- and this is an industry-
19 wide statistic. What you've got is less than
20 5 percent of projects are done on-budget on
21 time, and on-functionality. So, when you think
22 about that what happens inside of every

1 discipline that runs projects or IT projects,
2 is you focus on the side of project
3 management. How do we get this project to be
4 done on time, or on budget, or with the right
5 functionality? And what gets ignored, or not
6 ignored -- is you don't spend as much time on
7 is this notion of how do you manage the people
8 providing some of the key services to make
9 those projects successful? So, our focus
10 really became looking at how do we do a better
11 job on the Vendor Management side?

12 What's happened inside of the
13 government that we've noticed is that there's
14 a very -- because of the siloed nature of a
15 lot of the structure, you've got lots of
16 different systems. So, you get lots of
17 redundant technologies, and the numbers that
18 we've quoted here, obviously, you've got over
19 500 HR systems, 500 financial management
20 systems, 260 project management systems, and
21 on, and on, and on.

22 So, the point being that this

1 isn't about the project management side. This
2 is something that we feel is important to
3 manage the vendors, to make sure that they are
4 delivering what is initially contracted with
5 them.

6 And so this separates, in some
7 ways, project management from vendor
8 management, because a lot of times the issues
9 are not necessarily just related to the
10 project. It's how do we get the best value for
11 the money we're putting into the vendor side?

12 With that said, what we then did
13 is we looked at a number of best practices
14 that are being used in the private sector,
15 specifically around this whole notion of
16 creating a vendor management office, and what
17 were some of the effective models. So, we
18 obviously worked with companies like Aetna,
19 and Ron and Meg McCarthy with Adobe, with
20 Symantec, with a number of other companies to
21 study what are they doing in this area of
22 vendor management.

1 So, what we found and what we
2 think is the appropriate recommendation for
3 PMAB and this Subcommittee to make is, let's
4 go ahead and pilot an IT Vendor Management
5 Office within several agencies. So, what that
6 means is that we want to dedicate a VMO
7 function to drive real improvements in
8 quality, consistency, and the objectivity of
9 managing those vendors to make sure that
10 they're ultimately complying with the
11 contracts that have been put in place.

12 What we think is important is that
13 this function work in conjunction with
14 procurement. So, it's not to replace the
15 acquisition or procurement function, it's more
16 about the ongoing management of that vendor.
17 So, what we want to do is define the rules,
18 make it very clear that it's complementary to
19 both the project function and the acquisition
20 function. It's not about interfering with
21 either of those, it's about really managing
22 the vendor.

1 What we think needs to happen is
2 implement a consistent agency-wide approach
3 that will drive a standard set of metrics,
4 methodologies, process, and make sure that,
5 more importantly, beyond the initial contract
6 being signed, that we're ongoing monitoring
7 and proactively identifying what are the key
8 issues where vendors are potentially
9 underperforming. And I guarantee you what
10 we've learned in the private sector is that
11 oftentimes you get under-performance, and you
12 are not holding that vendor accountable. So,
13 we think the VMO is pretty critical to doing
14 that.

15 The other things we recommend is
16 obviously creation of some standards and
17 templates around Statements of Work, what are
18 the corporate SLAs, how are we doing on the
19 risk management side of dealing with the
20 vendors.

21 What we also find to be important
22 is that you've got to get people who are

1 managing these vendors to have specific
2 subject matter expertise. So, if you're going
3 to go and work in the telecommunication space,
4 the person who is in the VMO needs to have
5 some expertise in that area, because that's
6 the way you're going to do a better job of
7 managing the vendor that is providing the
8 service.

9 So our recommendation is that, as
10 we do this pilot, that we find a couple of
11 areas or a couple of verticals where we will
12 bring in that expertise and make sure that
13 they are able to hold the vendor accountable.

14 Lastly, we think it's important
15 that no matter what you do, given the scale of
16 budget that we're dealing with, that we have
17 very clear cost-saving goals that we are able
18 to track and drive towards achieving, and
19 ultimately we think that's possible.

20 What we've seen in the private
21 sector repeatedly is that in many cases
22 there's -- the goals that we set are actually

1 -- could be even higher, because once you get
2 a focus on this area, it's amazing the -- how
3 rapidly you are able to squeeze some savings
4 out of the vendor side, once you drive this
5 process effectively. So, ultimately, clear
6 goals, clear accountability on the vendor side
7 drives real cost-savings.

8 So, what we want to recommend is
9 that we conduct a couple of site visits, have
10 the agencies conduct a couple of site visits
11 out to a number of private sector companies,
12 look at how the process has worked, probably
13 bring back some best practices and
14 implementation guides, and then again pilot it
15 inside a couple of agencies. And our goal
16 would be that this is something that we could
17 move on very quickly and get started, and
18 drive some meaningful cost-savings during the
19 next 12 to 24 months.

20 If an agency -- just a footnote
21 that you see down at the bottom of the slide.
22 The bottom line is, if somebody's constrained,

1 budget constrained, which you know is a real
2 issue, that we still look at implementing the
3 processes and leveraging the best practices.
4 But, ultimately, we do believe that this will
5 drive meaningful savings on the IT side. So,
6 that's our recommendation.

7 CHAIRMAN ZIENTS: Thank you. Ron,
8 I know you worked actively as part of this
9 subgroup. Do you want to weigh in here?

10 MEMBER WILLIAMS: Yes. Well, I
11 think it's an extremely important
12 recommendation. And I think one of the things
13 that this will do is it gives you a cross-
14 project view of how the vendor is performing
15 in the organization. So, systemic problems
16 that manifest themselves can really get
17 identified and addressed much, much sooner.
18 So, I think it's a huge opportunity for the
19 government.

20 I think it also is a strong link
21 back to the architecture of the enterprise, so
22 that the solutions that are being implemented

1 don't deviate from the Statement of Work in
2 ways that cause trouble in terms of the
3 architecture within the enterprise. So, I
4 think it's a great recommendation that will
5 pay big dividends.

6 CHAIRMAN ZIENTS: Steven, others?

7 MR. VanROEKEL: Yes, this Steve
8 VanRoekel, Federal CIO. I'm really excited
9 about this one, in particular, in thinking
10 through the possibilities. There's a few
11 agencies that do little pieces of this fairly
12 well, and you can clearly see in their results
13 and tracking the work that they do that they
14 outperform other agencies. So, I think it's
15 a nice thing to mention.

16 I think the other thing to think
17 about is sort of two-fold. One is, senior
18 leadership's role in this in kind of getting
19 behind it. The second is starting to take
20 this view and think about it in the context of
21 shared services, as well. If we set up central
22 bodies that have this expertise that we share

1 across agencies, I think the potential could
2 scale more quickly, kind of on point that you
3 made at the bottom there, thinking about what
4 to do.

5 I also think this point relates
6 very much so to the next set of things you're
7 going to be talking about on kind of IT
8 oversight, and that sort of stuff, I think it
9 would be great to force savings from better
10 oversight back into an effort like this to
11 really yield great long-term benefits.

12 DEPUTY SECRETARY HAYES: This is
13 David Hayes from Interior. I just wanted to
14 jump in and thank you, Enrique, for your
15 leadership on this. And we're very excited
16 about this. And thank you for meeting with
17 Rhea Suh and Andrew Jackson, when I got
18 hurricaned out of visiting with you.

19 As you know, we are working to do
20 an IT transformation effort here at Interior,
21 and I think this is a brilliant way to help
22 communicate to our siloed organizations about

1 some of the obvious advantages of having a
2 centralized look-see at what's going on.

3 We are finding, as you would
4 expect, that the absence of consistent
5 approaches on issues like data ownership and
6 other implementation issues are hurting us,
7 and no doubt we are being taken advantage of
8 by vendors by virtue of the fact that we don't
9 have that bird's eye view across our
10 enterprise.

11 So, it fits -- the timing is
12 fabulous for us, and we're really looking
13 forward to continuing to work with the
14 Committee on how to implement it. And you
15 have a willing guinea pig in the Department of
16 the Interior, Enrique.

17 MEMBER SALEM: Thank you very much.
18 We look forward to working with you.

19 CHAIRMAN ZIENTS: Any other
20 questions before we go to the recommendations
21 in the Investment Review Boards?

22 (No response.)

1 CHAIRMAN ZIENTS: Okay. Hearing
2 none, is anyone not in favor of the set of
3 recommendations on IT Vendor Management?

4 (No response.)

5 CHAIRMAN ZIENTS: It sounds like
6 everybody is on board.

7 Shantanu, on Slide 10.

8 MEMBER NARAYEN: Sure, great. And,
9 in effect, the recommendations that I'll
10 present that we worked on as a team with folks
11 from your group, Jeff, really build on what
12 Enrique and Debra have talked about, because
13 once you have the right people and you have
14 the right vendors, the issue that we tried to
15 tackle was how to deal with IT Portfolio
16 Management.

17 Enrique mentioned that we are
18 spending \$80 billion as a government, so the
19 real issue here is to make sure that we focus
20 our efforts on how we can get bang for the
21 buck. And what happens once these projects
22 are started.

1 A couple of things that we found
2 as we focused our efforts on this issue, which
3 is approximately 30 percent, and that's a
4 large number, \$16 billion of these projects
5 were flagged as needing further oversight.
6 And some of this is natural. And we find this
7 in the private sector, as well, because these
8 projects are long, these projects are complex.

9 But, also, a little bit more
10 troublesome was that a number of these
11 projects, as people reviewed them, had
12 significant concerns once they were started.
13 So, you know, what we really spent some time
14 thinking about was as it related to the IRBs,
15 what could we recommend to make sure that a
16 project started off effectively, and then
17 during the entire process that they ran
18 effectively.

19 A couple of things that we found.
20 First is, virtually everybody talked about the
21 relationship between the business partners and
22 the IT as being critical to successful

1 projects, because the more up front planning
2 happens in terms of what the business benefits
3 are of IT projects, whether they be cost-
4 savings, whether they be risk reduction,
5 whether it be customer satisfaction, and the
6 clearer the metrics were up front, the more
7 likely the projects were going to be in order
8 to be successful down the line. But that
9 relationship between the agency leaders, the
10 internal business partners and the IT were
11 going to be critical, but we found that once
12 projects were started, that the agency leaders
13 were not necessarily as involved as they
14 needed to be.

15 The other issue that we found was
16 that as these projects get off track, was
17 there a process by which the clear authority
18 was issued in terms of who could stop these,
19 or redirect them, or say that they were out of
20 bounds.

21 So, those were a couple of the
22 things that we found. And we really focused

1 a lot on what could we learn from some of the
2 successful projects that were being undertaken
3 within the government, as well as from the
4 private sector.

5 So, moving to the recommendations
6 based on some of these learnings, I think the
7 biggest thing that we learned was to recommend
8 that when you start an IT project you really
9 need both the relationship between the senior
10 business unit sponsor, as well as the IT, in
11 order to build a successful project. What the
12 key business -- KPIs were, how we were going
13 to ongoing track the project. And the
14 valuation model that allows for, you know, as
15 you do IT investments, which were the IT
16 investments that provided the best return,
17 whether that be customer satisfaction, whether
18 that be updating architecture. And what were
19 the resource plans that were required, because
20 I think in a number of projects otherwise you
21 have to add resource projects along the way.

22 So, the up front planning and

1 getting that right was one of the
2 recommendations from us, as we looked at how
3 we reform IRBs to make sure that that
4 happened.

5 The second thing that we talked
6 about was that the agency business unit heads
7 at the IT really need to work hand in hand
8 through the entire process. That's in, you
9 know, reviewing process, in rescoping and
10 terminating. It was the relationship between
11 the business unit heads and the IT that was
12 going to be absolutely critical. And we also
13 recommended that you have a dashboard, a
14 quarterly report to really identify IT
15 projects that were off track along the way.

16 And, you know, frankly, any IT
17 project above a certain dollar threshold, any
18 IT project that needed to be rescoped, that
19 you have a real thorough review associated
20 with it to understand root causes so that you
21 can both prevent them from happening in the
22 future, and adjust accordingly.

1 And the last recommendation we
2 also made as to just make sure that, I think,
3 both private sector and public sector could
4 learn from each other. So, much like Enrique
5 said, how can we conduct site visits so that
6 we present some IT portfolio management
7 practices. These exist in a number of places,
8 but having a common methodology, having a
9 common vocabulary I think across government
10 would also help review projects across boards.

11 So those were our recommendations.
12 And last but not least, we emphasize the need
13 for an architecture review board during the
14 entire process so that there's a common target
15 architecture to avoid overlap, to avoid
16 conflict as these large, complex systems were
17 put together.

18 CHAIRMAN ZIENTS: Questions,
19 reactions?

20 MEMBER SALEM: Just to follow-on
21 Shantanu's comments. You know, one of the
22 things I know Shantanu, you and the team, and

1 I think we all see is, is just getting the
2 real buy-in on the importance of the IT
3 function and technology, because for companies
4 like Adobe and ours, obviously technology is
5 such a central theme. And I know part of this
6 is really getting that executive sponsorship
7 that really says technology is a
8 differentiator and can make a big impact. It's
9 a mind-set change I know is going to be part
10 of this -- for this effort.

11 MEMBER WILLIAMS: Yes, this is Ron
12 Williams. I think this is an excellent set of
13 recommendations here.

14 I guess the one question I have is
15 for executives who have not been accustomed to
16 actively engaging and participating in this,
17 what kind of support, orientation, role-
18 modeling would we envision to really help them
19 step up to and commit to the role?

20 MEMBER NARAYEN: Ron, I think
21 that's an excellent observation. And I think
22 it actually is related to some of the SES

1 recommendations that were being made. But I
2 think learning best practices, sharing what's
3 happening in private sector, and enabling that
4 networking that was also discussed I think is
5 going to be crucial, because you're right.
6 There's a learning curve associated with the
7 business unit leaders understanding what the
8 right questions are to ask, and how do you
9 provide that oversight along the way.

10 MEMBER WILLIAMS: The second point
11 I would add is that while we focus on the
12 leadership at this point, one of the things we
13 found was effective was that as a requirement
14 for promotion that people develop a competency
15 in this domain. And that they had to take a
16 project and really participate in it, and
17 guide it from beginning to end. And that that
18 was one of the tickets that had to be punched
19 in order to ascend to the next level.

20 CHAIRMAN ZIENTS: That's great. I
21 like that a lot. Steven, do you want to say -
22 -

1 MR. VanROEKEL: Yes, I think this
2 is great. And I think for the last couple of
3 years the IT function in government has been
4 increasingly more and more important with the
5 connectivity of Americans and the
6 cybersecurity pressures, and the demands --
7 the more recent demands to do more with less.
8 And I think this methodology is a great way to
9 think about the way we invest.

10 I think there's been a good
11 emphasis the last couple of years kind of
12 given all those pressures to kind of look at
13 the project level, and to dive into some of
14 the more troublesome multi-year projects, and
15 all that. I think taking that to the portfolio
16 level, putting good tools -- and I think I'll
17 go back to my point on shared services. I
18 think we can actually do shared centers of
19 excellence across government to think about
20 how to track this stuff. And to your
21 architecture point, build common systems that
22 can actually be utilized so we're actually

1 looking kind of at the portfolio level, but
2 also realizing what stuff can we shift to
3 commodity, what stuff can we think about from
4 a shared level. I think that's all -- all this
5 stuff and the SES performance metrics and all
6 that all dovetail nicely into kind of a
7 complete package to transform the way we think
8 about government IT.

9 So, thank you for doing this work.
10 Of all the points, I think this is one of the
11 ones I'm most excited about jumping on board
12 and helping shepherd along.

13 CHAIRMAN ZIENTS: Any other
14 questions on IT Portfolio Management? Okay.
15 Anyone have any reservations?

16 (No response.)

17 CHAIRMAN ZIENTS: Hearing none,
18 we'll assume this set of recommendations is
19 also complete and approved.

20 Quickly, just closing on next
21 steps. We've been working hand-in-hand with
22 the President's Management Council so there's

1 a lot of buy-in on pilots and taking these
2 recommendations and implementing them. We'll
3 continue to make sure Deputy Secretaries and
4 other leaders across government are involved
5 and ready to jump on implementation.

6 We are together next November 4th
7 here in Washington, so we'll get all the
8 logistics nailed down on that. We anticipate
9 again a morning session and having you out of
10 here just after lunchtime, but if we are not
11 already, we'll be in touch with your offices
12 just to finalize logistics.

13 Any questions or concerns before
14 we break?

15 (No response.)

16 CHAIRMAN ZIENTS: Thank you
17 everybody, great meeting.

18 (Whereupon, the above-entitled
19 matter went off the record at 11:20 a.m.)
20
