**For Full Agenda (Subject to Change) please see:** <http://www.whitehouse.gov/ostp/pcast>

PCAST is an advisory group of the nation's leading scientists and engineers who directly advise the President and the Executive Office of the President. PCAST makes policy recommendations in the many areas where understanding of science, technology, and innovation is key to strengthening our economy and forming policies that work for the American people. PCAST is administered by the Office of Science and Technology Policy (OSTP). OSTP was created by Congress in 1976 to serve as a source of scientific and technological analysis and judgment for the President with respect to major policies, plans, and programs of the federal government. For more information, visit [www.whitehouse.gov/ostp](http://www.whitehouse.gov/ostp).
