

Hello,

I write in response to the Federal Register document [FR Doc No: 2011-28623] issued by the Office of Science and Technology Policy entitled "Request for Information: Public Access to Peer-Reviewed Scholarly Publications Resulting From Federally Funded Research".

Given previous NIH and other mandates for open access to federally funded research, it is wildly unwise to undercut or back away from this policy. It will cause much chaos in the scientific community around the world and hamper future research immeasurably. I gladly offer my tax dollars to such a beneficial policy as open access for government funded projects.

Please count me in favor of continuing this policy.

Respectfully,
Johannah White
