I understand the draw of the Orphan Works Act as the current copyright laws lobbied by Disney and sponsored by Rep. Bono are far aggressive.

The one thing that I think would make a lot of visual artists happy would be make anything registered with the copyright office exempt from the act. Or, make the copyright registration database searchable based on image (much like www.tineye.com) and anything that was registered would be exempt from the Orphan Works Act, or at the very least allow the searcher to be connected with the visual artist.

Thanks for your time!
