- A president who frequently expresses his distaste for bleeding women but has yet to express his opposition to Russian interference in American elections
- Massive purges of voter registration rolls without due process
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse
- The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society
- Voter suppression efforts targeted at voters of color, the working poor, and students
- Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails
- A Federal Elections Commission - our democracy's watchdog - that is toothless by design
- The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined
- An antiquated Electoral College system that enables minority rule
- An advisory committee on election integrity led by a notorious champion of voter suppression

Above I have listed my concerns regarding the integrity of elections in the United States. The evidence of Russian interference in the American election process is incontrovertible, and yet money and energy is being wasted on this bullshit exercise of ineligible voters participating in elections. **NOT NEARLY AS CONCERNING TO MOST AMERICANS AS RUSSIAN PLANS FOR FUTURE CYBER ATTACKS ON US.** Please address that issue, and then we can worry about the 200 people across the US who may have been ineligible to vote.

Sincerely,

Marilyn Ronnei

Dear Mr. Kobach,

I am merely a citizen of Arizona, not its Secretary of State, but I'm grateful for the opportunity to respond to your recent call for views on "laws, rules, policies, activities, strategies, and practice that [...] undermine the American people's confidence in the integrity of federal election processes."

As a regular voter I am, in general very confident of the election processes used by my state, county and city. My confidence is, however undermined by:

- A president who frequently expresses his distaste for bleeding women but has yet to express his opposition to Russian interference in American elections
- Massive purges of voter registration rolls without due process
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse and in the case of Arizona, my home state, going to the courts to try to undo a voter referendum requiring a bipartisan committee to redistrict
- The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society
- Voter suppression efforts targeted at voters of color, the working poor, and students
- Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails

The items above are the culmination of many years of disenfranchising voters. Now you want to publish my social security number too? Isn't that a little bit drastic?

Subject: What undermines my confidence in the integrity of federal elections processes
Date: Wednesday, July 5, 2017 4:11:22 PM

Dear Mr. Kobach:

You recently asked the secretaries of state for the various United States for input regarding what undermines the American people's confidence in the integrity of federal elections processes. While I'm certainly not a secretary of state, I am nonetheless most certainly a member of the American people. Accordingly, I'll offer you some of my answers to your question regarding what undermines my confidence in the integrity of the federal elections process:

- A president who during his campaign repeatedly described the election as "rigged", yet has expressed no concern about probable Russian interference in American elections
- Massive purges of voter registration rolls without due process
- Legislators who craft gerrymandered redistricting maps, enabling politicians to choose their voters rather than the reverse
- The Supreme Court's decision in *Shelby County v. Holder*, gutting the protections of the Voting Rights Act under the conspicuously false rationale that America is today a post-racial discrimination society
- Voter suppression efforts targeted at voters of color, the working poor, and students
- Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails
- A Federal Elections Commission (FEC) - our democracy's watchdog - that is, by design, toothless
- The Supreme Court's decision in *Citizens United v. FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined
- An Electoral College system that enables minority rule
- An advisory committee on election integrity led by a notorious champion of voter suppression

It is my hope that these answers will assist in clarifying your thinking regarding the integrity of the federal elections process, and send you in a different direction than pursuit of the chimera of massive in-person fraudulent voting, leading to a preordained conclusion that even more voters must be disenfranchised in order to solve the virtually nonexistent "problem".

Sincerely,

Keith Baldwin

Dear Mr Kris Kobach,

I am an American citizen concerned about the integrity of our federal elections processes.

Here are my concerns listed:

Everyone's vote should count equally. The urban vote is under represented in federal elections.

Now we have a president who has yet to express his opposition to Russian interference in American elections, even though before the vote he was claiming that if he lost, the election was rigged.

Massive purges of voter registration rolls without due process, when there has been virtually no proven in-person voter fraud done.

Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse.

The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society.

Voter suppression efforts targeted at the elderly, voters of color, the working poor, and students.

Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails.

A Federal Elections Commission - our democracy's watchdog - that is toothless by design.

The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined.

An antiquated Electoral College system that enables minority rule

An advisory committee on election integrity led by a notorious champion of voter suppression. Keep in mind that people do have memories of you.

Dear Mr, Kobach,

As an American citizen, I feel obligated to respond to the call you office has put out regarding the integrity of elections in the USA. I am hopeful that the secretary of state in my home state of Montana resists your efforts at coercing the disclosure of voter information.

As an American voter that has not missed an election since I got the right to vote in 1980, I would like to share why my confidence in our election process is undermined:

- Efforts by republican operatives to undermine confidence in the vote (illegal voters, illegal immigrants voting, etc) while tacitly approving the meddling in our elections of a foreign power and enemy of this country.
- Massive purges of voter registration rolls without due process
- Voter suppression efforts targeted at voters of color, the working poor, and students
- A narcissist president that only cares about himself, his public profile, and his money and doesn't seem to understand the importance of his position in this country and the world
- A president who doesn't understand the difference between honesty and being a blatant liar
- A president more interested in denigrating critics and the free press, yet at the same time is unwilling to express his opposition to Russian interference in American elections
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse
- The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society
- Antiquated voting systems vulnerable to hacking that conveniently producing no paper trails
- A toothless Federal Elections Commission - that flags misdeeds after the election is over and then the offenders may only have to pay a \$1000 fine for their illegal voter suppression activities (that might sound familiar to you)
- The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined
- An antiquated Electoral College system that enables minority rule

These are MUCH more important issues than the false charges made to set up your commission. I truly hope that your commission is stonewalled by every elected official in this country and your disgusting efforts at voter suppression ahead the 2020 federal elections are a complete and utter failure.

Here's hoping to your abject failure!

- An antiquated Electoral College system that enables minority rule
- An advisory committee on election integrity led by a notorious champion of voter suppression.

I would add to this list that my confidence in our election process is undermined when candidate Hillary Clinton WINS the election by almost 3 million votes, but through a combination of collusion with Russians interfering with our elections, unprecedented efforts by the FBI to smear one candidate and protect another, and voter suppression that illegally deprived thousands of Americans their right to vote, Donald Trump squeaks through by margin of fewer than 80,000 votes spread across three states (the size of ONE mid-sized city) and is given the Electoral College votes he needs to steal the election from the proper winner.

I agree with the following critique of the horrible job that Kris Kobach and his commission are doing. We will fight the voter suppression that the Republicans are trying to implement.

As a voter, my confidence in our election process is undermined by the following:

- A president who frequently expresses his distaste for bleeding women but has yet to express his opposition to Russian interference in American elections
- Massive purges of voter registration rolls without due process
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse
- The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society
- Voter suppression efforts targeted at voters of color, the working poor, and students
- Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails
- A Federal Elections Commission - our democracy's watchdog - that is toothless by design

- The Supreme Court's decision in Citizens United v FEC, granting the wealthy few a louder voice in political campaigns than all other citizens combined
- An antiquated Electoral College system that enables minority rule
- An advisory committee on election integrity led by a notorious champion of voter suppression.

We read with horror that you are demanding sensitive voter information from our Secretary of State. Our information will not be useful in determining which 3,000,000 of Hillary Clinton's popular votes were "fraudulent". The individual States are doing whatever is necessary to prevent voter fraud, and the fact that the 7-year old in the White House just cannot cope with the truth that he LOST the popular vote is none of our concern.

The other truth you need to understand is that our sensitive information is NONE OF YOUR BUSINESS. We do not register to vote with (heaven forbid!!) you and you do not determine our eligibility for the franchise. GO AWAY. Stroke Trump's ego some other way.

If Mr. Kobach's history is any indication, what he means by "voting integrity" is really voter suppression.

As an American Citizen, I object to Mr. Kobach's request for information, and firmly believe his intent is to continue to rig elections.

I am encouraging my SOS to reject his request.

What I object to:

- A president who frequently expresses his distaste for bleeding women but has yet to express his opposition to Russian interference in American elections
- Massive purges of voter registration rolls without due process

As an American citizen, I feel that it would be good for me to answer your question about this issue since the Attorney General of the State of Washington works for me. I believe he and I are on the same page, but I thought you would appreciate hearing directly from me. Below is a *partial* list of things that cause me concern. It is based on someone else's list, but it speaks to my concerns and I have edited it to make it more personal. Please do whatever you can to make the system work properly for ALL Americans.

- The fact that many (not all) elected representatives in the Senate and the House are not treating the interference in the 2016 elections with the seriousness that is required for such an egregious breach.
- A president who frequently expresses his distaste for women who are menstruating, older, or not his type, but has yet to express his opposition to Russian interference in American elections
- Massive purges of voter registration rolls without due process
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse

5. Voter suppression efforts targeted at voters of color, the working poor, and students.
6. Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails.
7. A Federal Elections Commission - our democracy's watchdog - that is toothless by design.
8. The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined.
9. An antiquated Electoral College system that enables minority rule.
10. An advisory committee on election integrity led by a notorious champion of voter suppression.

Mr. Kobach, let's be honest here. There is no voter fraud. We both know that. It is merely a boogeyman created by conservative politicians fearful of a democratic vote. After all, if elections are truly free, you stand a real chance of losing your position and therefore your power. You and other vote suppressors like yourself are cowards, as all bullies are, afraid of their fellow Americans. You being in charge of this pointless advisory committee is what shakes my confidence in the integrity of federal elections.

Sincerely,
Mike Dungan

Dear Mr. Kobach,

I am not a governor, lieutenant governor, secretary of state or other high elected official. I am merely an American citizen, a veteran, and a voter. I appreciate the opportunity to respond to your recent request for feedback on "laws, rules, policies, activities, strategies and practices that [...] undermine the American people's confidence in the integrity of federal elections processes."

As a voter, my confidence in the integrity of federal election processes is undermined by the following:

1. A president who has yet to express his opposition to Russian interference in American elections.
2. Massive purges of voter registration rolls without due process.
3. Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse.
4. The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society.
5. Voter suppression efforts targeted at voters of color, the working poor, and students.
6. Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails.
7. A Federal Elections Commission - our democracy's watchdog - that is toothless by design.
8. The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined.
9. An antiquated Electoral College system that enables minority rule.
10. An advisory committee on election integrity led by a notorious champion of voter suppression.

Kris Kobach
Vice Chair
Presidential Advisory Commission on Election Integrity

Dear Sir:

I am an American citizen who is happy to respond to the Commission's call for input from citizens on our sacred elections. My concerns are as follows:

- A president who frequently expresses his distaste for any journalism that does not shower him in effusive and unearned praise, but has yet to express his opposition to Russian interference in American elections, despite all of our professional Intelligence Community conclusions that there was such interference
- Massive purges of voter registration rolls without due process and often without notice to those being purged
- Legislators who craft gerrymandered redistricting maps enabling politicians to choose their voters rather than the reverse, thereby undermining our representative democracy
- The Supreme Court's decision in *Shelby County v Holder*, gutting the protections of the Voting Rights Act under the obviously false rationale that America is today a post-racial society, when, in fact the law should be extended to the entire United States
- Voter suppression efforts targeted at voters of color, the working poor, and students
- Antiquated voting systems vulnerable to state-sponsored tampering and conveniently producing no auditable paper trails, as in my home state of Georgia, where tampering has already been found
- A Federal Elections Commission - our democracy's watchdog - that is toothless by design
- The Supreme Court's decision in *Citizens United v FEC*, granting the wealthy few a louder voice in political campaigns than all other citizens combined, turning our country into a plutocracy, which, I assume is a feature, not a bug
- An antiquated Electoral College system that enables minority rule and utterly failed in its one job; to prevent an unfit demagogue from becoming President
- An advisory committee on election integrity led by a notorious champion of voter suppression, that being yourself, as recently determined by a court of law

I am sure you will give my concerns a great deal of thought and reach your own conclusion. As is usual with this administration, I am also sure that you have already come to that conclusion

and that you and the administration will seek to apply the same Machiavellian rules to the nation that you did in Kansas. God help America.
