

**EXECUTIVE OFFICE OF THE PRESIDENT  
OFFICE OF MANAGEMENT AND BUDGET  
WASHINGTON, D.C. 20503**

Statement from Acting OMB Director Russ Vought:

**Budgetary Impact Analysis for Executive Order Entitled  
“Enhancing the Effectiveness of Agency Chief Information Officers”**

This executive order ensures that agency Chief Information Officers (“CIOs”) have adequate visibility into, and control over, their agencies' information technology (“IT”) resources, to avoid duplication, waste, and poor service delivery, and it better positions agencies to modernize their IT systems, execute IT programs more efficiently, reduce cybersecurity risks, and serve the American people well, among other things. Implementing this executive order would have a *de minimis* impact on costs and revenues to the Federal Government. The benefits of this executive order include empowering agency CIOs to ensure that agency IT systems are secure, efficient, accessible, and effective, and that such systems enable agencies to accomplish their missions; modernizing IT infrastructure within the executive branch and meaningfully improve the delivery of digital services; and improving the management, acquisition, and oversight of Federal IT. Implementing this executive order would have a *de minimis* impact on mandatory and discretionary obligations and outlays, as well as on revenues to the Federal Government, in the 5-fiscal year period beginning in fiscal year 2018. The agencies anticipated to be impacted by this executive order include all agencies listed in 31 U.S.C. § 901(b), other than the Department of Defense or any agency considered to be an “independent regulatory agency” as defined in 44 U.S.C. § 3502(5).
