

Full Stack Developer

The ideal candidate will build and deploy scalable, mission-critical web applications that will be accessed by millions of Americans. You will also optimize and build new features to provide an optimal end user experience.

Key Functions:

- Develop and prototype web applications using various technologies
- Collaborate with different stakeholders and contractors
- Support and perform daily management and monitoring of the cloud infrastructure
- Evaluate and deploy necessary security and other updates

Qualifications:

- 3+ years of experience in developing and deploying highly scalable web applications, preferably using WordPress
- At least 2+ years of implementing cloud solutions AWS, Google Cloud, Azure, or Heroku
- Experience with REST APIs
- Experience with PHP, Python, JavaScript, HTML, and CSS
- Experience with a modern JavaScript framework—React, Angular, Vue, or Node
- Experience with computer networking and information security
- Strong verbal and written communication skills with the ability to collaborate with developers and stakeholders
- Must be a U.S. citizen
