

Technical Director

The ideal candidate will have the opportunity to create modern and highly accessible digital platforms that reflect the policies of the Administration. You will also manage a portfolio of digital projects and will be responsible for defining technical requirements. You will collaborate with technical teams, develop overarching product direction, and coordinate with internal stakeholders to ensure technical solutions support wider communications and policy goals.

Key Responsibilities:

- Guide the product vision and direction of White House digital platforms, including WhiteHouse.gov
- Lead product development, design, and release of digital projects
- Lead and manage both onsite and remote technical teams
- Develop and maintain custom digital products
- Work with stakeholders to determine product road maps and schedules
- Manage project timelines, milestones, and project delivery on time and within budget

Qualifications:

- At least 7 years of digital and technical experience
- Experience working with Drupal or WordPress
- Experience with management and development of high traffic/high volume websites through their entire lifecycle
- Experience with AWS, Google Cloud, or Microsoft Azure
- Strong communication skills and ability to communicate complex solutions to stakeholders
- Ability to work in a fast-moving environment and comfort with taking initiative
- Must be a U.S. citizen
