

Cloud Infrastructure Engineer

The ideal candidate will design, build, and implement cloud infrastructure solutions. You will be owning and facilitating architecture development, providing feedback on application designs, and supporting product development teams and contractors.

Key Responsibilities:

- Lead deployment, management, and operation of scalable, highly available, and fault tolerant cloud infrastructure
- Leverage cloud technologies to optimize performance
- Continuously research and determine new technologies to deal with large data sets

Qualifications:

- At least 5 years of experience in maintaining, deploying, and supporting web applications in a Cloud environment
- At least 3 years of experience implementing applications on AWS, Google Cloud, or Azure
- Experience in operating and maintaining MariaDB and MySQL
- Experience in CI/CD
- Experience with Drupal and WordPress
- Experience with CDN services such as CloudFlare, Akamai CDN, Fastly
- Ability to work in a fast-moving environment and comfort with taking initiative
- Must be a U.S. citizen
