The mission of U.S. Citizenship and Immigration Services (USCIS) is to adjudicate and grant immigration and citizenship benefits, provide accurate and useful information to applicants and petitioners, and promote an awareness and understanding of citizenship in support of immigrant integration, while also protecting the integrity of our Nation's immigration system. USCIS approves millions of immigration benefit applications each year, ranging from work authorization and lawful permanent residency to asylum and refugee status. The Budget continues to invest in technology to improve and automate business operations, eliminate paper-based processing, improve information sharing, and enhance USCIS' ability to identify and prevent immigration benefit fraud.

The Budget assumes that USCIS will continue to be funded primarily through fees on the applications and petitions it adjudicates.

Within USCIS' appropriated funding, Operations and Support funds necessary operations, mission support, and associated management and administration costs, including for the E-Verify program, application processing, backlog reduction efforts, and refugee affairs.

The Federal Law Enforcement Training Centers (FLETC) serves as an interagency law enforcement training organization for over 100 participating organizations, providing the necessary facilities, equipment, and support services to conduct basic, advanced, specialized, and refresher training for Federal law enforcement personnel. FLETC personnel conduct the instructional programs for basic law enforcement recruits and some advanced training based on agency requests. Additionally, FLETC provides advanced training tuition-free, or at a reduced cost, to State, local, rural, tribal, and territorial law enforcement officers at all four of its campuses, through export training deliveries, and through distance learning on a space-available basis. In cooperation with the Department of State, FLETC delivers training at International Law Enforcement Academies (ILEA) in Gaborone, Botswana; Bangkok, Thailand; Budapest, Hungary; Roswell, New Mexico; San Salvador, El Salvador; and the Regional Training Center in Accra, Ghana. Additionally, FLETC holds the Director position managing the ILEA in Gaborone, Botswana. FLETC provides other training and assistance internationally in collaboration with and in support of U.S. embassies. FLETC also hosts authorized and vetted international students for training programs at FLETC facilities in the United States on a space-available and fully reimbursable basis.

FLETC's Operations and Support account funds necessary operations, mission support, and associated management and administrative costs. In addition, this account includes the funding and activities that are associated with minor construction, maintenance, and improvement projects.

The Budget provides \$30.4 billion for the Tenant-Based Rental Assistance (TBRA) program (also known as the Housing Choice Voucher program), which is the Federal Government's largest income-targeted rental assistance program. With this funding, the Housing Choice Voucher program will provide housing assistance to around 2.5 million extremely low- to very low-income families to rent decent, safe, and sanitary housing in the private market. About 2,200 state and local Public Housing Authorities (PHAs) administer the Housing Choice Voucher program.

The Budget provides \$25.0 billion in contract renewals to continue to assist families in calendar year 2022. This includes \$50 million for the Rental Assistance Demonstration to further long-term financial stability and promote the energy efficiency or climate resilience of properties that convert to Project-Based Vouchers.

The Budget also includes \$508 million for the renewal of Section 811 mainstream housing vouchers for persons with disabilities, including the first-time renewal of new mainstream vouchers allocated in 2021, and associated administrative fees, as well as a new set-aside to provide adjustments to PHAs as a result of significant increases in mainstream renewal

## TENANT BASED RENTAL ASSISTANCE—Continued

costs resulting from unforeseen circumstances and to prevent the termination of assistance for mainstream families should there be insufficient funding.

In addition, the Budget requests the following: \$2.8 billion in PHA administrative fees to support core functions such as admitting households, conducting housing quality inspections, and completing tenant income certifications; \$100 million for tenant protection vouchers, which are provided to families who may have to relocate due to actions beyond their control, such as a public housing demolition or redevelopment, and when private owners of multi-family developments choose to leave the project-based program or convert to long-term Section 8 contracts; and up to \$5 million for the renewal of vouchers by Tribes under the Tribal Housing and Department of Housing and Urban Development and Department of Veterans Affairs Supportive Housing program, to serve Native American veterans who are homeless or at risk of homelessness and living in and around designated tribal areas. The Budget includes \$1.6 billion for new incremental vouchers for 200,000 additional households, including those who are experiencing or at risk of homelessness or fleeing or attempting to flee domestic violence, dating violence, sexual assault, or stalking. The Budget also includes \$491 million for Mobility Services, which will provide funding for services to better enable families with children that are living in areas of extreme poverty to move to areas of higher opportunity.

Until 2005, the Housing Certificate Fund provided funding to both the project-based and tenant-based components of the Section 8 program. Project-Based Rental Assistance (PBRA) and Tenant-Based Rental Assistance are now funded in separate accounts. The Housing Certificate Fund retains and recovers balances from the previous years' appropriations and uses those balances to support PBRA contract renewals, amendments, and administration.

The Budget requests \$1 billion for the Native American Programs account, which supports a wide range of affordable housing activities in Indian Country through grants and loan guarantees to recipients representing almost 600 Indian Tribes. The Budget requests \$823 million for the Indian Housing Block Grant program (\$723 million for formula grants and \$100 million for competitive grants); \$70 million for the Indian Community Development Block Grant program; and \$7 million for training and technical assistance. As part of Department-wide climate efforts, the Budget also requests \$100 million to make homes in Indian Country more energy efficient and further climate resilience. The Budget also supports up to \$50 million in new loan guarantees for affordable housing construction and related community development projects through the Title VI program. Due to the availability of unobligated credit subsidy, the Title VI program does not require additional authority for new loan guarantees in 2022.

The Native Hawaiian Housing Loan Guarantee program (also known as the Section 184A program) provides access to private mortgage financing to Native Hawaiian families who are eligible to reside on Hawaiian home lands and would otherwise face barriers to acquiring such financing because of the unique legal status of the Hawaiian home lands. Since 2017, this program has operated on a negative subsidy basis, but the Budget requests \$28 million in loan guarantee commitment authority to continue supporting these loans.

The Community Development Fund account contains the following programs:

**Community Development Block Grant (CDBG).**—The CDBG program provides formula grants to States, local governments, and Insular Areas to benefit mainly low- to moderate-income persons, and support a wide range of community and economic development activities, such as public infrastructure improvements (which account for approximately 36 percent of all CDBG funds), housing rehabilitation and construction (approximately 24 percent of funds), job creation and retention, and public services. Seventy percent of CDBG formula grants are distributed to mainly urban areas (entitlement communities), and 30 percent are distributed to States (non-entitlement communities). The Budget requests a total of \$3.77 billion, of which \$3.45 billion in funding is for the CDBG formula program, and \$295 million is for targeted CDBG activities to revitalize neighborhoods and communities that experience persistent or concentrated poverty.

**Indian Community Development Block Grant (ICDBG).**—The Budget requests ICDBG in the Native American Programs account.

**CDBG Disaster Recovery (CDBG-DR).**—This account also contains a substantial amount of appropriated CDBG-DR funding provided to communities impacted by major disasters.

**Recovery Housing (SUPPORT).**—The Budget provides \$25 million for activities authorized under the SUPPORT for Patients and Communities Act. This formula program is allocated to states to provide temporary housing for individuals recovering from substance abuse disorders, including opioids.

The Budget requests \$1.85 billion for the HOME Investment Partnerships program (HOME). The HOME program provides annual formula grant assistance to States and units of local government to increase the supply of affordable housing and expand homeownership for low-income persons through the acquisition, new construction, and rehabilitation of affordable

renter- and owner-occupied housing, as well as the provision of tenant-based rental assistance. Over time, the requested HOME funding is estimated to result in the production of approximately 35,000 units of affordable housing and support over 14,000 low-income households with tenant-based rental assistance. In addition, the request includes a \$100 million set-aside for a FirstHOME Downpayment initiative to States and insular areas to better ensure sustainable homeownership.

The Homeless Assistance Grants account provides funds for the Emergency Solutions Grant (ESG) and Continuum of Care (CoC) programs. These programs, which award funds through formula and competitive processes, enable localities to shape and implement comprehensive, flexible, coordinated approaches to address the multiple issues of homelessness, including chronic homelessness, veteran homelessness, and homelessness among families and youth.

The Budget provides a total of \$3.5 billion for a wide range of activities to assist homeless persons and prevent future occurrences of homelessness. The Budget supports \$3.1 billion for the CoC program to fund competitive renewals, of which not less than \$52 million for rapid re-housing projects

and other assistance to serve people fleeing domestic violence; \$290 million for ESG formula funding for communities to address emergency needs such as emergency shelter, street outreach, essential services, homelessness prevention, and rapid rehousing; not less than \$82 million to implement projects serving homeless youth; and \$7 million for the National Homeless Data Analysis Project.

The Budget provides \$450 million for the Housing Opportunities for Persons With AIDS (HOPWA) program. HOPWA funding provides States and localities with resources to devise long-term comprehensive strategies for providing housing and supportive services to meet the housing needs of persons living with HIV/AIDS and their families.

Ninety percent of HOPWA funds are distributed to States and eligible metropolitan areas according to a formula, and the remaining ten percent are awarded competitively to States, local governments, and private non-profit entities. The HOPWA formula, which was updated in 2016, allocates funds based on cases of persons living with HIV/AIDS and is adjusted for an area's fair market rent and poverty rates to further ensure HOPWA funds are focused on areas that have the most need. The updated formula, which became effective in 2017, will be fully implemented in 2022 after a five-year stop-loss/stop-gain period, meant to help avoid volatile shifts in funding, ends in 2021. HUD continues to work closely with formula grantees through a comprehensive technical assistance initiative to develop community-wide strategies for managing the changes. The Budget also proposes to not prioritize renewals in its competition so that funds are able to better support more evidence-based service delivery models to address current community needs.

The Budget requests \$14.1 billion for Project-Based Rental Assistance (PBRA), of which \$400 million is requested as an advance appropriation to become available in 2023. The PBRA program assists approximately 1.2 million extremely low- to low-income households in obtaining decent, safe, and sanitary housing in private accommodations. PBRA serves families, elderly, and disabled households and provides transitional housing for the homeless. Through this funding, the Department of Housing and Urban Development (HUD) supports approximately 17,200 contracts with private owners of multifamily housing by paying the difference between a portion of a household's income and the approved market-based rent for a housing unit. The Budget continues to support the program's calendar year funding cycle and provides 12 months of funding for all contracts.

Program activities include the following:

**Contract Renewals and Amendments.**—These activities provide funding for HUD to renew expiring contracts and amend contracts that have not expired but require additional funding for HUD to meet remaining payment obligations. Appropriations for these activities are supplemented with recoveries of excess balances remaining on expired contracts that utilized less than anticipated resources during their initial terms. This includes \$50 million for the Rental Assistance Demonstration to further long-term financial stability and promote the energy efficiency or climate resilience of properties that convert to Project-Based Rental Assistance.

**Contract Administrators.**—The Budget requests \$355 million for contract administration. This activity funds the local level administration of the program through HUD agreements with performance-based contract administrators or other supportive services contractors.

**Tenant Information and Outreach.**—The Budget requests up to \$10 million for technical assistance to tenant groups, nonprofit groups, and public entities to support tenants of troubled properties and improve tenant access to community services in order to support self-sufficiency.

The Other Assisted Housing Programs account contains the programs listed below:

**Rent Supplement.**—Rent Supplement assistance payments support assisted units for qualified low-income tenants.

**Section 235.**—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98–181) authorized a restructured Section 235 (Homeownership Assistance) program that provided homeowners a ten-year interest reduction subsidy on their mortgages.

**Section 236.**—The Housing and Urban Development Act of 1968, as amended, authorized the Section 236 Rental Housing Assistance Program, which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants. Some Section 236 properties also have

rental assistance contracts with the Department of Housing and Urban Development (HUD) through the Rental Assistance Payment (RAP) program.

HUD has converted the last remaining Rent Supplement and RAP properties to long-term, project-based Section 8 contracts, using the Rental Assistance Demonstration program. Therefore, HUD does not require funding in this account.

The Flexible Subsidy Fund assisted financially troubled subsidized projects under certain Federal Housing Administration (FHA) authorities. The subsidies were intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants. Priority was given to projects with Federal insurance-in-force and then to those with mortgages that had been assigned to the Department.

The Green and Resilient Retrofit Program would provide funding to owners of Multifamily-assisted properties to rehabilitate these properties to be more energy efficient, healthier, and more resilient to extreme weather events. This increased investment will improve the stock of affordable housing available to many low- and extremely low-income families, often from marginalized communities. This program would support climate resilience and energy efficiency and would reduce the likelihood of catastrophic damage from future disasters. In addition, the program would yield additional savings by reducing energy and water consumption and it would improve indoor air quality. The Budget requests \$250 million for grants and loans for properties currently assisted under Project-Based Rental Assistance, Housing for the Elderly, and Housing for Persons with Disabilities.

The Housing Counseling Assistance Program provides: 1) comprehensive housing counseling services to eligible homeowners and tenants through grants, oversight, and technical assistance; and 2) training to housing counselors and staff of government or non-profit entities that participate in Department of Housing and Urban Development's (HUD) Housing Counseling program. Eligible Housing Counseling program services include group education and individualized housing counseling on pre- and post-purchase homeownership budgeting and financial management, reverse mortgage counseling, homelessness prevention, rental counseling, and avoiding discrimination, foreclosure, and eviction. The objectives of the Housing Counseling program include overcoming barriers to stable and affordable housing; expanding sustainable homeownership and rental opportunities; preventing foreclosure and eviction; and deterring discrimination, scams, and fraud.

The Budget includes \$85.9 million for this program, of which \$61.4 million is intended to fund grants to HUD-approved Housing Counseling agencies for direct services and to develop training for HUD-approved housing counselors. In addition, the Budget continues the program from the 2021 enacted appropriations that directs \$20 million for legal services to help low-income families avoid eviction.

The Federal Housing Administration (FHA) provides mortgage insurance for the purchase, refinance and rehabilitation of single-family homes. FHA mortgage insurance is designed to encourage lenders to make credit available to borrowers whom the conventional market does not adequately serve, including first-time homebuyers, minorities, lower-income families and residents of underserved areas (central cities and rural areas). Historically, FHA has also provided countercyclical support in times of economic crisis. For budgetary purposes, the Mutual Mortgage Insurance (MMI) Fund is separated into three risk categories: forward loans, Home Equity Conversion Mortgages (HECMs), and a proposed Home Equity Accelerator Loan (HEAL) pilot. Forward programs guarantee loans for standard single-family purchases and refinances (Section 203(b) program), home improvements (Section 203(k) program) and condominiums. HECMs, also known as reverse mortgages, enable elderly homeowners to borrow against the equity in their homes without having to make repayments during their lifetime. HEAL, a new positive subsidy pilot, would offer loan products designed to lower barriers to homeownership for first-time, first-generation homebuyers.

The Budget requests \$180 million for the MMI Program Account. This includes \$150 million in administrative expenses to support a range of FHA functions, such as loan underwriting, claims processing and risk monitoring. Additionally, the Budget provides \$30 million in credit subsidy for the new HEAL pilot and a temporary expansion of the Good Neighbor Next Door program.

The Budget also requests a limitation of \$400 billion on loan guarantees for the MMI Fund. The Budget projects insurance of \$247 billion in forward

mortgages, \$15.9 billion in HECMs, and \$1.2 billion in HEAL pilot loans, with additional commitment authority available in case these amounts are exceeded during execution.

The Capital Reserve account is the ultimate depository for all net budgetary resources collected by the Mutual Mortgage Insurance (MMI) Fund programs. Negative credit subsidy receipts from new loan guarantees and downward reestimates, as well as interest earnings on Treasury investments, are recorded in this account. This account has no authority to obligate funds, but transfers balances of budget authority as necessary to the MMI Program Account for the cost of upward credit subsidy reestimates and the MMI Liquidating Account for obligations of that account.

The HOPE for Homeowners program was created by the Housing and Economic Recovery Act of 2008 to help homeowners at risk of default and foreclosure refinance into affordable, sustainable loans. Under the program, eligible homeowners refinanced their current mortgage loans into a new mortgage insured by Federal Housing Administration. The program ended on September 30, 2011. In 2016, excess HOPE Bond proceeds in the amount of \$455 million were transferred to the HOPE Reserve Fund, and used to retire the HOPE Bonds. Remaining HOPE Bond activity is shown in the HOPE Reserve Fund.

The Federal Housing Administration's General Insurance and Special Risk Insurance (GI/SRI) programs provide mortgage insurance for a variety of purposes, including financing for the development and rehabilitation of multifamily housing, residential care facilities, and hospitals. The Budget requests a limitation of \$30 billion on loan guarantees for the GI/SRI Fund. GI/SRI's mortgage insurance programs are designed to operate without the need for subsidy appropriations, with fees set higher than anticipated losses. Therefore, the Budget does not request an appropriation of new credit subsidy funds.

GI/SRI programs guarantee loans at 100 percent, with three exceptions where other parties guarantee a portion of the loan: Housing Finance Agency Risk Sharing, Qualified Participating Entity Risk Sharing, and Federal Financing Bank Risk Sharing.

The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes the development and enforcement of appropriate standards for the construction, design, installation, and performance of manufactured homes to assure their quality, durability, affordability, and safety. All manufactured homes produced since the standards took effect in 1976 must comply with Federal construction and safety standards. Fees are charged to the manufacturers for each transportable section produced to offset the expenses incurred by the Department in carrying out the responsibilities under the authorizing legislation. The Budget proposes to fully fund the \$14 million cost of authorized activities with these fees.

Thirty-three States participate in the program under Department of Housing and Urban Development (HUD) approved State compliance plans and are reimbursed by HUD for their activities. HUD administers a compliance program for the remaining 17 States. HUD coordinates the Manu-

factured Housing Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards and regulations. HUD also develops and implements model standards for installation of manufactured housing, as well as an installation enforcement program. HUD administers installation enforcement programs in 14 States and oversees HUD-approved programs in 36 States. Finally, HUD administers a dispute resolution program for manufactured housing homeowners, retailers, installers, and manufacturers in 25 States and oversees HUD approved dispute resolution programs in 25 States.

This mandatory account earns interest on Treasury investments and is the eventual depository for all budgetary resources collected by the Government National Mortgage Association (GNMA), including negative subsidy receipts from new security guarantees, downward reestimates, and loan repayments from the Financing Account. This account has no authority to obligate funds but transfers resources to the GNMA Program and Pass-Through Assistance Accounts as necessary for mandatory spending authorized in those accounts.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the Department of Housing and Urban Development's (HUD) mission. These functions are carried out by HUD's Office of Policy Development and Research (PD&R) through in-house analysis by staff; contracts with industry, nonprofit research organizations, and educational institutions; and cooperative agreements with educational, governmental, and philanthropic entities. In addition, centralized technical assistance for the Department is supported through this account; these funds enable HUD to support its partners with better coordinated, cross-program technical assistance rather than conventional, program-specific assistance.

The Budget requests \$145 million for HUD's Research and Technology (R&T) program. R&T investments support HUD's enterprise-wide commitment to integrate evidence and cross-disciplinary intelligence throughout program policy, management, and operations. The request consists of \$65 million for core research support, surveys, data infrastructure, and knowledge management (i.e., research dissemination); \$25 million for research, evaluations, and demonstrations; and \$50 million for technical assistance. The request also includes \$5 million to be used to fund collaborative research in climate adaptation and resilience with the new Advanced Research Projects Agency for Climate (ARPA-C).

The Budget requests \$85 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$25 million is for the Fair Housing Assistance Program (FHAP); \$56 million is for the Fair Housing Initiatives Program (FHIP); \$3 million is for the National Fair Housing Training Academy (NFHTA); and \$1 million is for the Limited English Proficiency Initiative (LEPI).

FHAP provides funding to State and local agencies to assure prompt and effective processing of complaints under substantially equivalent State and local fair housing laws. To be eligible for assistance through FHAP, an agency must administer a fair housing law that HUD has certified as substantially equivalent to the Federal Fair Housing Act.

FHIP provides funding to States and local governments, and to public and private non-profit organizations, that administer programs to prevent or eliminate discriminatory housing practices through enforcement, education, and outreach. These grants allow the organizations to provide fair housing enforcement through testing in the rental and sales markets, to file fair housing complaints to HUD, and to conduct investigations. Further, the education and outreach activities these organizations conduct also help to educate the public, housing providers, and local governments about their rights and responsibilities under the Fair Housing Act.

The NFHTA provides comprehensive fair housing and civil rights training for investigators, local agencies, educators, attorneys, industry representatives, and other housing industry professionals.

LEPI provides funds for oral interpretation and written translation services, which help make HUD programs and activities accessible to people who are not proficient in English.

The primary purpose of the Lead-Based Paint Hazard Control Grant program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program plays a critical role in addressing the number one environmental disease impacting children: lead poisoning. The Budget requests \$400 million, including \$305 million for the Department of Housing and Urban Development's (HUD) Lead Hazard Control Grants and Lead Hazard Reduction Demonstration Program; \$85 million for the Healthy Homes Program, of which \$10 million will be for safety and functional home modification repairs and renovations for low-income elderly homeowners; \$5 million for a radon testing and mitigation demonstration program; and \$5 million for lead-based paint technical studies and support. The Budget includes an appropriations provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed competitive programs to other competitive programs experiencing oversubscription.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$5 million to State and local governments and Indian Tribes for control of lead-based paint hazards in pre-1978 private unassisted rental and owner-occupied housing of low-income families. The grants are also designed to facilitate the development of a housing maintenance and rehabilitation workforce trained in lead-safe work practices and a certified hazard evaluation and control industry. In awarding grants HUD promotes the use of new low-cost approaches to hazard control that can be replicated across the nation.

The Healthy Homes program enables HUD to assess and control housing-related hazards that contribute to diseases and injuries of children and other vulnerable populations. With funding from this program, grantees implement and evaluate methods for controlling two or more housing-related diseases through a single intervention. Healthy Homes funding is also used to provide technical support and training and assist in the completion of national surveys and other studies. In addition, the program conducts education and outreach to help State, local and non-governmental agencies, housing industry stakeholders, and the public understand the health and housing relationship and identify and address housing-related health and safety hazards.

In addition, the Budget is proposing a new demonstration for \$5 million for radon testing and remediation in public housing.

The Office of Lead Hazard Control and Healthy Homes will continue its lead-based paint technical studies and support activities, which include public education; support for State and local agencies, private property owners, HUD programs and field offices, and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards, technical guidance, regulations, and improved testing and hazard control methods.

## LAND AND MINERALS MANAGEMENT

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on more than 245 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of on-shore Federal mineral estate underlying the BLM and other surface ownerships. In addition, the BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by the BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of the BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

This appropriation provides for the acquisition of lands or interests in lands, by purchase, easement or exchange, when necessary for public access and recreation use, preservation of open space, resource protection, and/or other purposes related to the management of public lands. Beginning in 2021, BLM land acquisition is funded with permanent appropriations through the Land and Water Conservation Fund. The 2022 budget invests funding in projects that substantially conserve or protect against threats to resources, improve public access to outdoor recreation opportunities, and have strong local partner engagement and support.

The Bureau of Land Management will continue to seek new opportunities to recover costs of services provided to benefiting public land users to reduce the need for direct appropriations from the Treasury.

## Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair the Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect rental charges from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—The Forest Ecosystems Health and Recovery Fund was established as a permanent appropriation in the FY 1993 Interior Appropriations Act (Public Law 102-381). This authority was subsequently amended to temporarily expand the use of the Fund to cover additional forest health and recovery activities. A five-year reauthorization of the FEHRF was included in the FY 2015 Consolidated and Further Continuing Appropriations Act (Public Law 113-235) and expired at the end of FY 2020. The Consolidated Appropriations Act, 2021 (Public Law 116-260) included a one-year extension of the authority for the FEHRF to continue to be used for the broader forest health and

recovery activities. The FY 2022 President's budget proposes a one-year extension of this authority (through September 30, 2022). Without this reauthorization, funds in the FEHRF could only be used for the limited purposes provided for in the original FEHRF authorization. Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to Public Law 102–381, as amended, this account was established to allow the BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including vegetation and density control treatments.

*Timber sale pipeline restoration fund.*—This Fund provides for the deposit and use of fees collected by the BLM for sales of timber authorized by section 2001(k) of Public Law 104–19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by the BLM, and 25 percent is to be used to address recreation projects on the BLM lands.

*Stewardship contract product sales.*—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. With stewardship contracting, the BLM may apply the value of timber or other forest products removed as an offset against the cost of services received, and monies from a contract may be retained by the BLM. These monies are available for expenditure without further appropriation at project sites.

*Expenses, road maintenance deposits.*—Users of certain roads under the BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. All recreation fee receipts collected under this authority at BLM sites are deposited in the Recreation Fee account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The budget proposes appropriations language to extend the program through October 1, 2023.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to the Southern Nevada Public Land Management Act (SNPLMA) (Public Law 105–263), 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

*Lincoln County Land Sales Act.*—Public Law 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an interest bearing account available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*White Pine County Land Sales Act.*—Public Law 109–432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an account available for expenditure without further appropriation for the management of

archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No 2.*—The 2005 Energy Policy Act established this Fund for environmental investigation and restoration on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account. In 2008, it was certified that sufficient funds had been collected to cover the cost of the cleanup and other expenses and no more deposits were to be made to the Fund. New revenue from site operations is distributed under the Mineral Leasing Act.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act, as amended by the National Defense Authorization Act for Fiscal Year 2015, established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this Fund and used to facilitate the BLM oil and gas permit processing in these pilot offices. In addition, in 2016 through 2026, fees collected for processing applications for permits to drill will be deposited to this Fund and available for Federal oil and gas permitting activities.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, Public Law 106–248 (114 Stat. 613), provided authority for the BLM to sell public lands classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior and the U.S. Forest Service. The Federal Land Transaction Facilitation Act was permanently reauthorized by Public Law 115–141, the 2018 Consolidated Appropriations Act.

*Owyhee Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1039), provides that the Secretary may sell public land located within the Boise District of the BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to certain wilderness areas.

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land, in or adjacent to certain wilderness areas.

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1114), requires Carson City, Nevada to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse the BLM for administrative expenses.

*Ojito Land Acquisition.*—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

## Miscellaneous permanent payments include:

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (as amended by P.L. 116-93, the Further Consolidated Appropriations Act, 2020), provides annual revenue sharing payments to the 18 O&C counties. These payments are derived from revenues from Federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The reauthorization of these payments by Title III of P.L. 116-93 authorizes SRS payments for 2019 and 2020. In the absence of this authority, eligible counties will receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75 percent of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc., public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc., public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau of Land Management (BLM), 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent).

Public Law 105–263, as amended by Public Law 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and the BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region, Incorporated Account.*—This account received funding appropriated by section 9102 of the 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

*State 5 Percent Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86–777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), Public Law 104–273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of 2014. The Helium Stewardship Act of 2013 (HSA), Public Law 113–40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium will be reserved for Federal users. Additionally, HSA directs BLM to transfer all assets for disposal to the General Services Administration (GSA) by September 30, 2021. The GSA, following its disposal process, will complete marketing, asset valuation, and dispose of all assets on or before September 30, 2023.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). BOEM's work supports Administration efforts to create good paying jobs as the Nation transitions to a clean energy future. BOEM oversees development of renewable energy resources such as offshore wind, wave and ocean currents; vast deposits of oil and natural gas; and non-energy minerals. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. To carry out this mission, BOEM: supports renewable energy leasing and development; provides OCS oil and gas planning, leasing and oversight, including inventories of oil and gas reserves, resource and economic evaluation, review and administration of oil and gas exploration and development plans, geological and geophysical (G&G) permitting, and financial assurance and risk management; conveys sand and gravel resources; and conducts National Environmental Policy Act (NEPA) analysis and environmental studies.

The Ocean Energy Management account includes the following budget activities: Renewable Energy, Conventional Energy, Marine Minerals, Environmental Programs, and Executive Direction.

**Renewable Energy.**—Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; competitive and noncompetitive leasing actions; review of site assessment plans, and construction and operations plans; and consultation with State and local governments, Federal agencies, and other stakeholders.

**Conventional Energy.**—Manages OCS oil and gas development in line with the requirements of Executive Orders 13990 and 14008. This includes: developing the National OCS Oil and Gas Leasing Program; implementing the lease sale process; administering leases; protecting the Federal Government from financial risks related to natural resource development; reviewing exploration and development plans and geological and geophysical permit applications; developing and maintaining the OCS cadastre; and conducting technical and economic resource evaluation and fair market value determination.

**Marine Minerals.**—Manages non-energy minerals on the OCS and conveys, on a noncompetitive basis, the rights to those resources to Federal, State, and local government agencies for shore protection, beach and wetlands restoration projects, or for use in construction projects funded or authorized by the Federal Government. Funding supports mineral resource exploration and leasing activities, coordination with governmental partners, engagement of stakeholders, and scientific research to improve decision making and risk management.

**Environmental Programs.**—Informs decision-makers and the public about the potential impacts of OCS energy and mineral activities on the marine, coastal, and human environment. Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with

the National Environmental Protection Act, the OCS Lands Act, and numerous other environmental statutes, regulations, and executive orders. Funding supports scientific research needed to inform policy decisions regarding energy and mineral development on the OCS.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communication strategies, outreach, and regulatory development. This includes budget management, administrative services management, bureau-wide information technology management and governance, congressional and public affairs, policy analysis, regulations, overseeing official documents, international affairs, and Freedom of Information Act activities.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to ensure the safe and environmentally responsible exploration, development, production, and conservation of the Nation's offshore energy resources. The Bureau continues to improve its mission processes and staff capabilities to keep pace with the continued innovation in Outer Continental Shelf (OCS) energy exploration and production. To fulfill its mission, BSEE must adapt and respond to changes in both the renewable energy and oil and gas sectors throughout the lifecycle of offshore energy development. BSEE is committed to the continual advancement of the effectiveness of its safety management systems program and compliance assurance functions such as the inspection program, enhancing its permitting processes around greater quality assurance and consistency, ensuring high levels of preparedness in the event of oil spills, and addressing requirements for an expanded OCS renewable energy program. BSEE's work supports Administration efforts to create good paying jobs as the Nation transitions to a clean energy future. The Offshore Safety and Environmental Enforcement (OSEE) account is BSEE's primary operating account and funds the following activities: Operations, Safety, and Regulation; Environmental Enforcement; Administrative Operations; Executive Direction; and Offshore Decommissioning.

**Operations, Safety, and Regulation.**—Funds OCS oil and gas permit application reviews and offshore wind industry submittals; inspections of OCS facilities, including critical high-risk activities; offshore operator oil spill planning and preparedness compliance; investigations; enforcement; audit programs; annual operator performance reviews; verification of oil and gas production levels to help ensure the public receives a fair return; research supporting the analysis of emerging technologies, standards and regulatory review and development activities; and technical training.

**Environmental Enforcement.**—Funds environmental compliance staff and operational support required to: manage compliance verification and enforcement of environmental standards placed on OCS operations; ensure BSEE's compliance with NEPA, the Endangered Species Act (ESA), and the National Historic Preservation Act (NHPA) for Bureau permitting; conduct specialized inspections of air and water quality requirements, and other environmental mitigation measures; and oversee coordination and engagement for Tribal consultation requirements, and other environmental Acts, regulations, and policies.

**Administrative Operations.**—Funds general administration programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. BSEE also provides administrative services, such as human resources, procurement, and finance, to the Bureau of Ocean Energy Management (BOEM) and other entities within the Department on a reimbursable basis.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. This includes functions such as budget, congressional and public affairs, and policy and analysis.

**Offshore Decommissioning.**—Supports according to regulatory standards, the proper maintenance, monitoring, and decommissioning of orphaned wells, pipelines, and structures left on the OCS for which there is no remaining liable party.

**Environmental protection.**—This activity funds functions that directly contribute to ensuring the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs in States without their own regulatory program and on Federal and Indian lands, as well as Federal oversight of the State regulatory programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides training and technical tools, such as the Coal Information Management System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

**Financial management.**—This activity provides resources for managing, accounting, processing collections, and pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations. This activity also includes accounting for and reporting on grants awarded to States and Tribes for regulatory purposes.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

**Environmental restoration.**—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects and for the evaluation of State and tribal reclamation programs that now receive mandatory funding for reclamation activities. This activity also provides for the operation of Federal reclamation programs for activities in those States without their own reclamation programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills States and Indian Tribes need to operate their reclamation programs. The Office of Surface Mining Reclamation and Enforcement (OSMRE) provides training and technical assistance on mining and reclamation-related problems.

**Financial management.**—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. The OSMRE seeks to maximize voluntary compliance with the Surface Mining Control and Reclamation Act's reclamation fee provisions. This activity also includes accounting for and reporting on grants awarded to States and Tribes for reclamation activities.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

Funds in this account support the Administration's efforts to address the needs of coal communities by reclaiming formerly mined lands so that they can be repurposed for beneficial economic uses, providing local, good-paying union jobs for skilled technicians and operators in some of the hardest hit communities in the Nation. The Budget provides an additional \$50 million for the AML Economic Revitalization grant program to support Appalachian States with AML reclamation in conjunction with economic and community development activities.

## WATER AND SCIENCE

## BUREAU OF RECLAMATION

Appropriations to Reclamation are made from the General Fund and from certain special funds in the Treasury. Projects funded from the General Fund include the Colorado River Basin Project and the Colorado River Storage Project, among others. Special funds include the Reclamation Fund, the Central Valley Project Restoration Fund, the Colorado River Dam Fund, and the Recreation, Entrance, and User Fee account. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act.

Of the Bureau's special funds, the Reclamation Fund consists of repayments and other revenues from water and power users; receipts from the sale, lease, and rental of Federal lands; and certain oil and mineral revenues. It can finance program activities authorized under "Reclamation Law" that directly benefit the 17 Western States. The Central Valley Project Restoration Fund consists of revenues from project beneficiaries. The Colorado River Dam Fund generates revenue from the sale of Boulder Canyon power.

The Water and Related Resources account supports the development, management, and restoration of water and related resources in the 17 Western States. The account includes funds to operate, maintain, and rehabilitate existing water and power facilities; protect public safety; conduct studies on ways to improve the reliability of water and related resources; and cover expenses associated with Indian water rights settlements. The account will support environmental justice for communities that have been left behind.

Work is done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.

## WATER AND RELATED RESOURCES

(Legislative proposal, not subject to PAYGO)

The Administration proposes legislation to provide full funding for currently enacted Indian water rights settlements. The Department proposes to reclassify as mandatory funding the amounts necessary to meet Federal commitments for existing enacted Indian water rights settlements. The Budget continues the current discretionary funding for Indian water rights settlements for FY 2022. This reclassification to mandatory funding would take effect for FY 2023 and thereafter.

One of the goals of the President's American Jobs Plan is to make infrastructure more resilient, adapting to climate challenges that we face as a nation. This includes the drought in the western United States. The President's American Jobs Plan provides funding for the western drought crisis by investing in water efficiency and recycling programs, Tribal water settlements, and dam safety.

## BLACKFEET WATER SETTLEMENT IMPLEMENTATION FUND

(Legislative proposal, not subject to PAYGO)

The Administration proposes legislation to provide full funding for currently enacted Indian water rights settlements. The Department proposes to reclassify as mandatory funding the amounts necessary to meet Federal commitments for existing enacted Indian water rights settlements. The Budget continues the current discretionary funding for Indian water rights settlements for FY 2022. This reclassification to mandatory funding would take effect for FY 2023 and thereafter.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the settlement

for the National Resources Defense Council et al. v. Rodgers lawsuit. The settlement's two primary goals are: 1) to restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) to reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The Utah Reclamation Mitigation and Conservation account was established under Title IV of Public Law 102–575 for contributions from the State of Utah, the Federal Government (through the Secretary of the Interior and the Western Area Power Administration), and project beneficiaries (the Conservancy District). The requirement for contributions from the State, the Secretary, and the Conservancy District ended in 2001. The requirement for contributions from the Western Area Power Administration ended in 2013. Funds are deposited into the account as principal and may not be expended for any purpose. Interest earned annually on the account is available for expenditure, without further appropriations, by the Utah Reclamation Mitigation and Conservation Commission, which has the option to use the funds for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources, or to reinvest the funds into the account as principal.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior (Interior) and its science requirements. The USGS also works in collaboration with other Federal, State, tribal, and municipal cooperators to conduct research and provide scientific data and information concerning natural hazards and natural resource issues, including the water, land, geologic, and biological resources of the Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

**Ecosystems.**—The USGS Ecosystems Mission Area is the biological research arm of Interior and provides science to help America achieve sustainable management and conservation of biological resources in wild and urban spaces. Scientists examine the consequences of climate and environmental change, effects of management actions on communities, lands and species, and risks and solutions to harmful invasive species, wildlife diseases, and contaminants in the environment.

**Energy and Mineral Resources.**—The USGS Energy and Mineral Resources mission area is the Nation's primary source of impartial scientific information on domestic and global geologic resources and the strength of their supply chains. The Nation relies on a variety of energy and mineral resources to power homes and businesses and to manufacture products and technologies from phones to vehicles. The mission area conducts research on the full life cycle of these resources, including the Nation's domestic resources and global trade relationships; carbon storage potential and critical mineral supply chains essential for the transition to clean energy; environmental and socioeconomic effects of geologic resource occurrence, extraction, use, wastes, and demands on water supplies; and supply, demand, and trade of mineral commodities. The science provided by the mission area is used to inform strategic economic, technological, and geopolitical decisions and sustainable natural resource management.

**Natural Hazards.**—The USGS plays a critical role in providing policy-makers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for improving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, geomagnetic storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize potential impacts on human activity and health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change, and vulnerability.

**Water Resources.**—The USGS is the primary Federal science agency providing information about water resources. To fulfill this responsibility,

the USGS Water Resources mission area monitors and assesses the amount and characteristics of the Nation's water resources, assesses sources and behavior of contaminants in the water environment, and develops tools to improve management and understanding of water resources. This work supports Federal, State, tribal, and municipal government decisions in managing water resources for domestic, agricultural, commercial, industrial, recreational, and ecological uses; protects and enhances water resources for human health, aquatic health, and environmental quality; minimizes loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributes to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

**Core Science Systems.**—The USGS Core Science Systems mission area leads the bureau's mission as the civilian mapping agency for the Nation—a 142 year legacy since its establishment in 1879. The USGS conducts detailed surveys and distributes the resulting high-quality and highly-accurate topographic, geologic, hydrographic, and biogeographic maps and remotely-sensed data and analyses to the public. Mapping accuracy enabled by cutting-edge technologies allows precise planning for recreational use on public lands; collaborative conservation with Interior partners; critical minerals assessments; energy development; transportation and pipeline infrastructure projects; urban planning and development; land change and flood prediction at regional, local, and neighborhood scales; emergency response; and hazards mitigation. The USGS Core Science Systems mission area is the Federal steward of this high-quality geospatial and remote sensing data, and provides access to the public through The National Map, the National Land Cover Database, the National Geologic Map Database, the USGS Earth Explorer, and the National Biogeographic Map. The USGS also operates Landsat satellites and data systems necessary to understand, monitor, and detect changes that affect the Nation's natural and agricultural resources, economy, public safety and national security, and historical heritage.

**Science Support.**—The USGS Science Support program funds essential science leadership as well as critical functions such as: scientific integrity processes; sharing and communicating science findings; purchasing science equipment and field supplies; executing science agreements with partners; contracting for support scientists and researchers; safety training; hazardous waste management; succession planning and execution; and information technology, which supports the scientific process and information management of scientific data. Science Support also provides bureau-wide executive direction and coordination, business administration, and financial management.

**Facilities.**—The USGS Facilities program provides safe, functional workspace, laboratories, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and deferred maintenance and capital improvement for owned assets.

**Reimbursable Program.**—This program includes reimbursements from non-Federal sources (States, Tribes, and municipalities) for cooperative efforts; proceeds from the sale of copies of photographs and records and the sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. The USGS also receives reimbursements from other Federal agencies for mission-related work performed at the request of the financing agency.

As part of the President's American Jobs Plan, USGS will increase support for digital high-resolution elevation collection mapping within the 3D Elevation program (3DEP). 3DEP works collaboratively with state and private partners to improve elevation maps of the United States. Improved elevation maps are essential for hazard planning, including informing flood risk or mudslide risk. This improved mapping will support climate resilience as communities plan for infrastructure improvements that will be resilient in the face of a changing climate.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species listed under the Endangered Species Act and work to make the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize potential conflicts between development projects and imperiled species.

**Habitat Conservation.**—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the Nation's coastal

## RESOURCE MANAGEMENT—Continued

trust resources is accomplished through collaboration with others on public and private lands.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 568 refuges, waterfowl production areas in 210 counties managed by 38 wetland management districts, 49 wildlife coordination areas, and seven national monuments. The National Wildlife Refuge System administers this network of lands and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

**Conservation and Enforcement.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fish and Aquatic Conservation.**—The Fish and Aquatic Conservation Program consists of a network of 70 National Fish Hatcheries, one historic National Fish Hatchery, six Fish Health Centers, seven Fish Technology Centers, 51 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Cooperative Landscape Conservation.**—The Cooperative Landscape Program works with States to deliver conservation on a landscape scale and build collaborative approaches to conservation through coalitions with States and other partners.

**Science Support.**—Science Support provides funding for applied science directed at high impact questions of concern to management of fish and wildlife resources. This science provides information to inform resource management decisions to best manage species at healthy and sustainable levels.

**General Operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

Funding requested in this account will complement the Civilian Climate Corps called for in the President's American Jobs Plan, and will develop the next generation of conservation workers and create a new pathway to good-paying jobs.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. The U.S. Fish and Wildlife Service is not requesting discretionary funding for this account.

The Great American Outdoors Act (P.L. 116-152) makes funds deposited into the Land and Water Conservation Fund available for expenditure without further appropriation or fiscal year limitation while providing that the U.S. Fish and Wildlife Service shall submit to Congress detailed account, program, and project allocations made available under the statute.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113–264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. Territories for species and habitat conservation actions on non-Federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account have been financed by both the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the Cooperative Endangered Species Conservation Fund are subject to annual appropriations from Congress. The Great American Outdoors Act, enacted in 2020, provides mandatory funding for this Fund from the Land and Water Conservation Fund. The 2022 President's Budget also includes discretionary appropriations from the Land and Water Conservation Fund to this Fund for land acquisition programs.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located, from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. The 2022 Budget does not propose to supplement revenues with discretionary funding.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program supports user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student intern and various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. Section 423 of Division G of the Consolidated Appropriations Act, 2021 (P.L. 116–260) extended FLREA

through 2022. The 2022 budget includes appropriations language to extend FLREA through October 1, 2023.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Target Practice and Marksmanship Training Support Act (P.L. 116–17) amends the Pittman-Robertson Wildlife Restoration Act to define a public target range and offers States alternatives for funding specific activities related to public target ranges.

The Energy Policy Act (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed each year to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In 2011, administration of this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides

## SPORT FISH RESTORATION—Continued

funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

*The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.).*—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

*Boating Safety Programs.*—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

*Boating Infrastructure Improvement.*—Four percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer, or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the four percent shall be available for grants under either of the award processes referenced in this paragraph.

*National Outreach and Communications Programs.*—Two percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

*Grants to States.*—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The National Park Service administers 423 units and over 85 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of funds for repair and rehabilitation, cyclic maintenance, cooperative restoration of the Everglades, and uses authorized by section 101122 of title 54, United States Code, which are available for two years. The 2022 Budget proposes all appropriations in this account be made available for two years. This account contains reimbursable activity such as recovery of costs associated with special use permits. Funding requested in this account will complement the Civilian Climate Corps called for in the President's American Jobs Plan, and will develop the next generation of conservation workers and create a new pathway to good-paying jobs.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

**Resource stewardship.**—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

**Visitor services.**—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

**Park protection.**—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

**Facility operations and maintenance.**—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

**Park support.**—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

**Cultural Programs.**—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; and advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training. This program activity also supports the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, the Native American Graves Protection and Repatriation Grants program, the 9/11 Memorial Act Grants program, and the American Indian and Native Hawaiian Art & Culture Grants. This activity also includes relevant grant administration funding. .

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities:

**Line item construction.**—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

**Special programs.**—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

**Construction planning.**—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

**Construction program management and operations.**—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

**Management planning.**—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses permanent funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The Great American Outdoors Act (P.L. 116–152) makes funds deposited into the Land and Water Conservation Fund available for expenditure without further appropriation or fiscal year limitation while providing that the National Park Service shall submit to Congress detailed account, program and project allocations made available under the statute.

In addition, the Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from certain oil and gas leases in the Gulf of Mexico Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Consolidated Appropriations Act, 2021 (P.L. 116–260) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration per the statute.

The Land Acquisition and State Assistance program is composed of the following budget activities:

**Federal land acquisition.**—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System.

**State conservation grants.**—Provides matching grants to States and local units of government for the acquisition and development of land and facilities that provide the public access to new opportunities to engage in outdoor recreation. The program includes both traditional formula and competitive grant programs for States.

**American Battlefield Protection Program.**—The American Battlefield Protection Program awards grants for the acquisition, modernization and restoration of American battlefields. The program supports the protection of battlefield lands associated with the Revolutionary War, the Civil War, and the War of 1812 and it aids State and local governments and non-profit organizations acquire or otherwise preserve these important cultural resources for recreational access and education.

**Recreation Fee Program.**—The National Park Service (NPS) and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). Section 423 of Division G of the Consolidated Appropriations Act, 2021 (P.L. 116–260) extended FLREA through 2022. The 2022 Budget includes appropriations language to extend authority for FLREA through October 1, 2023.

Net proceeds are used to provide benefits and services to the visitor throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Service-wide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation, and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108–447. The National Park Service Centennial Act (P.L. 114–289) established in the National Park Foundation, a Second Century Endowment for NPS projects and activities, funded through offsetting collections from the first \$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105–391.

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d–3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, Indian Tribes, and Historically Black Colleges and Universities. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks, and grants to preserve the sites and stories of the Civil Rights Movement.

**Park concessions franchise fees.**—Franchise fees for concessioner activities in the National Park System (NPS) are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The National Park Service Centennial Act (P.L. 114-289), establishes a new concessions contracting authority within NPS, which is described under the Visitor Experience Improvements Fund account.

**Concessions improvement accounts.**—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

**Park buildings lease and maintenance fund.**—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

**Operation and maintenance of quarters.**—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

**Filming and photography special use fees.**—In limited circumstances, the National Park Service may issue permits and retain associated fees to use park lands and facilities for commercial filming, still photography, and similar activities.

**Contributions to U.S. Park Police annuity benefits.**—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

**Delaware Water Gap, Route 209 Operations.**—The Delaware Water Gap National Recreation Area Improvement Act, section 4(b) of Public Law 109-156, as amended by Public Law 115-101, directs the Department of the Interior to establish a fee and permit program for the use of Highway 209 by commercial vehicles. All fees received are set aside in a special account, and made available for the administration and enforcement of the program, including registering vehicles, issuing permits and vehicle identification stickers, and personnel costs. The FY 2022 Budget proposes further amending section 4(b) of Public Law 109-156 by extending statutory authority through FY 2022.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to federally recognized Indian Tribes, Alaska Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust and treaty responsibilities and support tribal self-determination. The Budget reflects broad increases within this account, including to empower tribal communities, address the impacts of climate change, create economic opportunities, enhance public safety, and advance environmental justice for tribal communities that have been left behind. Funding requested in this account will also complement the Civilian Climate Corps called for in the President's American Jobs Plan, and will develop the next generation of conservation workers and create a new pathway to good-paying jobs.

This account covers expenses associated with the following activities:

**Tribal Government.**—This activity promotes the sovereignty of federally recognized Indian Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity

## OPERATION OF INDIAN PROGRAMS—Continued

also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

**Human Services.**—This activity provides funding for social services, welfare assistance, and Indian Child Welfare Act programs. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to help protect children, the elderly, and disabled from abuse and neglect.

**Trust: Natural Resources Management.**—This activity provides for the management, development, and protection of Indian trust land and natural resource assets and related treaty rights. This activity also provides funding to address the impacts of climate change. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks, and minerals and mining.

**Trust: Real Estate.**—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

**Public Safety and Justice.**—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; implementation of the Violence Against Women Act; and facilities maintenance.

**Community and Economic Development.**—This activity promotes the economic vitality of American Indians and Alaska Natives through job placement and training, economic development, and community development programs.

**Executive Direction and Administrative Services.**—This activity supports the management of finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of General Services Administration rentals and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with federally recognized Indian Tribes to run tribal and Federal programs. Funding also supports BIA or Bureau of Indian Education oversight and technical assistance for these activities in the central and regional offices.

INDIAN LAND AND WATER CLAIM SETTLEMENTS AND MISCELLANEOUS PAYMENTS TO  
INDIANS

(Legislative proposal, not subject to PAYGO)

The Administration proposes legislation to provide full funding for currently enacted Indian water rights settlements. These enacted settlements improve the quality of life for Tribal members on several Indian reservations by bringing critical infrastructure to provide safe drinking water and support economic development activities, such as the development of hydroelectric power, agriculture improvements, and water marketing.

The Department proposes to reclassify as mandatory funding the amounts necessary to meet Federal commitments for existing enacted Indian water rights settlements in the Indian Land and Water Claim Settlements and Miscellaneous Payments account (14X2303) within the Bureau of Indian Affairs (BIA), with authority to transfer funding to the Bureau of Reclamation as needed. This proposal would provide a comprehensive funding source for enacted settlements that are not fully funded with other sources of funding. For example, BIA has access to mandatory funding for a portion of the Confederated Salish and Kootenai Tribes settlement, but estimates an additional need of \$1.5 billion between FY 2023 and FY 2031 for settlements.

The Budget continues the current discretionary funding for Indian water rights settlements for FY 2022. This reclassification to mandatory funding would take effect for FY 2023 and thereafter meet the gap between existing sources of funding for water rights settlements and the estimated need. Across the Department, this is estimated to be \$2.57 billion from FY 2023–2031.

This appropriation was established in 1999 and received appropriations between 1999–2010 to fund a program to consolidate fractional interests in Indian lands. Funds were used to purchase small interests in parcels of land from willing individual Indian landowners and convey those interests to the Tribe on whose reservation the land is located. Current funding activity in this account reflects ongoing legacy activities funded through reimbursable work. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), the American Indian Probate Reform Act of 2004 (P.L. 108–374) and other authorities.

*Indian Land Consolidation.*—The 2022 Budget proposes to reestablish the Indian Land Consolidation Program with modifications. The reestablished program will consolidate fractional interests in Indian lands. Funds will be used to purchase small interests in parcels of land from willing individual Indian landowners and convey those interests to the Tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's cost for managing Indian lands and promote conservation on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), the American Indian Probate Reform Act of 2004 (P.L. 108–374), and other authorities. This program is independent of the Land Buy Back Program for Tribal Nations, and any provision of the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462) that requires or otherwise relates to application of a lien shall not apply to the acquisitions funded by this account.

The Selis-Quispe Ksanka Settlement Trust Fund was established in the Montana Water Rights Protection Act (P.L. 116-260). The Act settles claims to water rights in Montana for the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation. The Act authorizes annual payments of \$90,000,000 to the Trust Fund out of any Funds in the Treasury not otherwise appropriated starting in fiscal year 2021 through fiscal year 2030 for a total of \$900,000,000. The Act also authorizes discretionary appropriations of \$1,000,000,000 for deposit in the Trust Fund. The 2022 budget request includes funding for this settlement in the Indian Land & Water Claims Settlements and Miscellaneous Payments to Indians account in the Bureau of Indian Affairs. Consistent with P.L. 116-260, appropriated funds will be transferred to the Trust Fund. The Trust Fund includes two accounts: the Salish and Kootenai Compact Account and the Salish and Kootenai Settlement implementation Account. Funds deposited into the account are adjusted to reflect fluctuations in costs occurring after the date of enactment of the act up to the day of deposit to the Fund. The Trust Fund is interest bearing.

#### ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs and the Bureau of Indian Education may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding Public Law 87-279 (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or the Bureau of Indian Education for central office oversight and Executive Direction and Administrative Services (except Executive Direction and Administrative Services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or the Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs or the Bureau of Indian Education, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public

schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education, or more than one grade to expand the elementary grade structure for Bureau-funded schools with a K-2 grade structure on October 1, 1996. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: *Provided*, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction, or other facilities-related costs for such assets that are not owned by the Bureau: *Provided further*, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Funds made available for Tribal Priority Allocations within Operation of Indian Programs and Operation of Indian Education Programs may be used to execute requested adjustments in tribal priority allocations initiated by an Indian Tribe. (*Department of the Interior, Environment, and Related Agencies Appropriations Act, 2021.*)

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established a new trust land consolidation Fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The Fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the Fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), and the American Indian Probate Reform Act of 2004 (P.L. 108–374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement. This account is managed by the Bureau of Trust Funds Administration.

**INDIAN EDUCATION SCHOLARSHIP HOLDING FUND**

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established this Fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests would be quite low in many cases. Program contributions reached the maximum of \$60 million in 2017 and were transferred from the Trust Land Consolidation Fund to this Fund for higher education scholarships for American Indians and

Under the Mineral Leasing Act (MLA), States receive fifty percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State. Separate statutes cover revenue sharing payments from the National Petroleum Reserve-Alaska and the 1002 Area of the Arctic National Wildlife Refuge, where the traditional MLA fifty-percent state share applies. To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act of 2013 permanently amended the MLA to deduct two percent from the required payments to States under the Act. These payments are administered by Interior's Office of Natural Resources Revenue.

According to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.), 75 percent of revenue collected in the Treasury from the leasing of lands acquired by the United States for flood control, navigation, and allied purposes, is to be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

Since May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105–83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the Fund, subject to appropriation. At this time, no budget authority is requested.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99–239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003 (P.L. 108–188), continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as Public Law 99–658, and was implemented on October 1, 1994. Financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, however, under the 2010 Compact Review Agreement (CRA) the United States agreed to provide continued economic assistance to the Government of Palau through 2024.

The Indian Gaming Regulatory Act (IGRA) established the National Indian Gaming Commission (NIGC) as an independent Federal regulatory agency within the Department of the Interior. The purpose of the IGRA and the NIGC is to support and promote tribal economic development, self-sufficiency and strong tribal governments through the operation of gaming on Indian lands. The Commission collaborates with Tribes to monitor and regulate gaming activities conducted on Indian Lands to ensure that gaming operations are conducted with integrity and that Tribes are the primary beneficiaries of gaming revenues. IGRA authorizes the Commission to assess and collect fees on tribal gaming revenues to cover agency operating costs.

Public Law 94–565 (31 U.S.C. 6901–07), as amended, authorizes Payments in Lieu of Taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the

Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

From the inception of the PILT program in 1977 through 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008–2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112–141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113–79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113–235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114–113) provided discretionary PILT funding within the Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The Consolidated Appropriations Act, 2017 (P.L. 115–31) provided discretionary PILT funding within Department-wide Programs. Congressional appropriations for 2018 (P.L. 115–141), 2019 (P.L. 116–6), 2020 (P.L. 116–94), and 2021 (P.L. 116–260) each provided PILT funding at the full authorized levels. The 2022 Budget proposes discretionary funding for PILT payments within Department-wide Programs.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the Act of July 27, 1990 (16 U.S.C. 1911 et seq.). Since 1992, amounts received by the United States and its State and tribal co-trustee partners from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

**Preparedness.**—Funds the non-emergency and predictable aspects of the Department of the Interior's (DOI) wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—Funds the emergency and unpredictable aspects of DOI's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. This activity includes emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage. Generally, emergency stabilization actions may be performed within one year of containment of a fire; however, exceptions to this time limit are allowed under certain circumstances. In fiscal years 2010 through 2017, funding for the ten-year average of inflation-adjusted suppression obligations was split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The 2022 Budget request fully funds suppression operations at the ten-year average of obligations as reported in the 2015 President's Budget, in accordance with the Consolidated Appropriations Act, 2018 (P.L. 115–141). This Act also amended the Balanced Budget and Emergency Deficit Control Act to provide additional new budget authority for fiscal years 2020 through 2027. This additional budget authority is provided in the Wildland Fire Suppression Operations Reserve Fund account, and made available subject to the requirements in P.L. 115–141. This additional new budget authority will help ensure that adequate resources are available to the Departments of the Interior and Agriculture to fight wildland fires, protect communities, and safeguard human life during the most severe wildland fire seasons. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Fuels Management.**—Funds the application of fuels treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. This activity may also conduct treatments that improve the integrity and resilience of our forests and rangelands. The Fuels Management activity will contribute to community adaptation to fire and improve the ability to safely and appropriately respond to wildfire. Funding for the Fuels Management activity covers the planning, operational aspects, and monitoring of fuels treatments. The program will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

**Other Operations.**—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and fuels management activities. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years, or up to five years under certain circumstances, following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied re-

search to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

#### FLAME WILDFIRE SUPPRESSION RESERVE FUND

In 2010 through 2017, amounts in the FLAME Fund included the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary is authorized to permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event DOI has exhausted its suppression resources due to an active fire season. Funds have not been appropriated to the FLAME account since 2017, and remaining FLAME balances were transferred to the Wildland Fire Management account in 2018.

The Great American Outdoors Act (P.L. 116–152) established the National Parks and Public Land Legacy Restoration Fund to reduce deferred maintenance at the Department of the Interior and the U.S. Forest Service. The Fund supports restoration of deteriorating assets through an allocation of 70 percent to the National Park Service, 5 percent to the U.S. Fish and Wildlife Service, 5 percent to the Bureau of Land Management, 5 percent to the Bureau of Indian Education, and 15 percent to the U.S. Forest Service.

## NATIONAL PARKS AND PUBLIC LAND LEGACY RESTORATION FUND—Continued

The Fund is supported by the deposit of 50 percent of all Federal energy development revenue from the prior year that would otherwise be credited or deposited as miscellaneous receipts to the Treasury, subject to an annual limit of \$1.9 billion for five years (2021–2025). The Departments of the Interior and Agriculture annually submit projects to Congress, execute projects, and monitor results/program performance. This Fund makes a significant investment in the facilities which support the important missions of the Department of the Interior and the U.S. Forest Service and help maintain America's national treasures for future generations.

The 2022 budget proposes to establish the Energy Community Revitalization Program (ECRP) designed to support Executive Order 14008 and complement the American Jobs Plan. The ECRP will provide grants to States and Tribal communities impacted by abandoned hard rock mining and orphaned oil and gas wells. The program will provide resources to States and Tribes to address the sites where the companies that created them have left and are no longer viable to address the needed cleanup and closure. This program will create jobs in these communities to repair the damage from these legacy activities and in doing so, improve the environment, restore water quality, and make the community safer.

In addition, the ECRP will provide critical funding to the Department of the Interior to address the hundreds of thousands of abandoned hardrock mines and orphan oil and gas wells scattered across Interior managed lands. The Federal program will assist Interior bureaus to inventory, assess, and prioritize these sites for cleanup. The primary focus will be to remediate abandoned mines and identify and plug orphan oil and gas wells posing the highest risks to the environment and physical safety on Department lands. Many of these sites also are associated with cultural and natural resources which need to be evaluated and addressed in a holistic approach.

The President's American Jobs Plan will put the energy industry to work plugging orphan oil and gas wells and cleaning up abandoned mines. Hundreds of thousands of former orphan oil and gas wells and abandoned mines pose serious safety hazards, while also causing ongoing air, water, and other environmental damage. Many of these old wells and mines are located in rural communities that have suffered from years of disinvestment. The plan includes an immediate up-front investment of \$16 billion that will put hundreds of thousands to work in union jobs plugging oil and gas wells and restoring and reclaiming abandoned coal, hardrock, and uranium mines. In addition to creating good jobs in hard-hit communities, this investment will reduce the methane and brine that leaks from these wells, just as we invest in reducing leaks from other sources like aging pipes and distribution systems.

The Justice Information Sharing Technology (JIST) appropriation provides resources to the Department of Justice (DOJ) Chief Information Officer (CIO) to ensure progress towards DOJ's strategic goals in supporting agents, attorneys, analysts, and administrative staffs across the world in support of their missions. The CIO is also responsible for ensuring these and other IT investments align with DOJ's overall IT strategy, as well as its technical reference and enterprise architectures. JIST resources will fund the following programs in FY 2022: cybersecurity, IT transformation, IT architecture and oversight, and innovation engineering.

Cybersecurity: Enhancing DOJ's cybersecurity posture remains a top priority for the Department and its leadership, as DOJ supports a wide range of missions, including national security, law enforcement investigations, prosecution, and incarceration. The systems supporting these critical missions must secure sensitive information, enable critical mission workflows, and protect the integrity of data and information guiding vital decisions.

IT Transformation: IT transformation is an ongoing commitment to evolve DOJ's IT environment by driving toward shared commodity infrastructure services and seeking simplified design and implementation of tools to advance the mission. These efforts allow DOJ to shift from custom, government-owned solutions, to advanced industry-leading offerings at competitive pricing. The OCIO recognizes modernization as an ongoing activity, requiring IT strategies to adapt as technology changes.

IT Architecture and Oversight: OCIO provides guidance on IT objectives and serves as a central aggregation point for reporting on activities from across components to help ensure compliance with enterprise architecture (EA) requirements from OMB and the Government Accountability Office. OCIO provides support to a wide range of IT planning, governance, and oversight processes such as IT investment management and Capital Planning and Investment Control (CPIC), as well as the DOJ Investment Review Council and Investment Review Board, which allow OCIO to ensure alignment of investments across the Department. The EA repository contains information on all departmental system, aligns investments to these systems, and maintains the Department's IT asset inventory in compliance with OMB Circular A-130. Oversight of the DOJ's IT environment by the CIO is vital given the role of technology in supporting DOJ's varied legal, investigative, and administrative missions. JIST resources fund the DOJ-wide IT architecture governance and oversight responsibilities of the OCIO. These efforts support the CIO's responsibilities in complying with FITARA, the Clinger-Cohen Act, and other applicable laws, regulations and Executive Orders covering Federal information technology management.

Innovation Engineering: OCIO facilitates adoption of new and innovative technologies to support DOJ mission requirements. By creating partnerships with DOJ components, Federal agencies, and industry for the exploration of these new technologies, OCIO is responsible for leading the ideation, design, planning, and execution of enterprise-wide IT innovations to enhance DOJ user experiences, while ensuring alignment with DOJ architectures and strategic priorities.

The Executive Office for Immigration Review (EOIR) was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 70 Immigration Courts nationwide, the BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit Division is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit Division also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations Division investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This Division also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections Division conducts program and management reviews that involve on-site inspection, statistical analysis, and other

techniques to review Department programs and activities and makes recommendations for improvement.

The Oversight and Review Division investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning Division provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, telecommunications, records management, quality assurance, internal controls, and general support.

The Information Technology Division executes the OIG's IT strategic vision and goals by directing technology and business process integration, network administration, implementation of computer hardware and software, cybersecurity, applications development, programming services, policy formulation, and other mission-support activities.

The United States Parole Commission is responsible for 1) making parole release and revocation decisions for all parole-eligible Federal and District of Columbia Code offenders; 2) setting and enforcing the conditions of supervised release for District of Columbia Code offenders; 3) making release decisions for United States citizens convicted of a crime in another country who voluntarily return to the United States for service of sentence; 4) performing parole-related functions for certain military and State offenders; and 5) exercising decision-making authority over State offenders who are on the State probation or parole, and are transferred to Federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers, and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105–33).

The following Department legal activities are financed from this appropriation:

**Supreme Court proceedings and appellate matters.**—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

**General tax matters.**—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

**Criminal matters.**—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

**Claims, customs, and general civil matters.**—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

**Environment and natural resource matters.**—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

**Legal opinions.**—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

**Civil rights matters.**—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations. The 2021 Budget is not requesting an appropriation for the Community Relations Service (CRS), and instead proposes to consolidate those functions within the Civil Rights Division (CRT). This consolidation would appropriately rightsize the Federal role in local conflict resolutions, while eliminating duplicative functions and improving efficiency. The Budget provides \$5 million and 15 positions to CRT to support this proposal.

**INTERPOL Washington.**—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian, and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts; and coordinating and integrating information for investigations of an international nature.

**Office of The Pardon Attorney.**—The Office of the Pardon Attorney (OPA) receives and evaluates clemency petitions for federal crimes and prepares letters of advice for the President for each application with approval from the Deputy Attorney General. In addition, OPA responds to inquiries concerning executive clemency petitions and the clemency process from applicants, their legal representatives, members of the public, and Members of Congress; prepares all necessary documents to effect the President's decision to grant or deny clemency; and provides advisory services to White House Counsel concerning executive clemency procedures.

**Office for Access to Justice.**—The proposed Office for Access to Justice helps the justice system efficiently deliver outcomes that are fair and accessible to all, irrespective of wealth and status by working with Federal agencies and state, local, and tribal justice system stakeholders to increase access to legal assistance and to improve the justice delivery systems that serve people who are unable to afford lawyers.

**Reimbursable programs.**—This reflects reimbursable funding for the following:

## SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES—Continued

**Civil Division.**—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

**Criminal Division.**—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

**Environment and Natural Resources Division.**—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency for Superfund enforcement litigation; and,

**Civil Rights Division.**—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department of Justice Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino fees, are collected by the FTC and split evenly between the two agencies. In 2022, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners, and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for protected witnesses' security and relocation, the Organized Crime Drug Enforcement Task Forces Program for multi-agency drug investigations, and the Department of Health and Human Services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

For 2022, the USMS requests program increases totaling \$85.3 million. To strengthen judicial security, the USMS requests \$33.5 million to increase protection capacity, threat investigation and mitigation capabilities; and improve the USMS ability to keep pace with an ever-evolving threat landscape. For technical and tactical operations that support the fugitive apprehension mission, the USMS requests \$20.2 million to upgrade electronic surveillance equipment, \$12.2 million to provide a rapidly deployable tactical resource by transitioning the Special Operations Group from col-

lateral duty assignments to full-time dedicated positions, \$4.4 million to implement a video management solution for Task Force Officer Body Worn Cameras, and \$3.0 million to support the rising cost of returning international fugitives to the United States for judicial proceedings. The USMS remains integral in the Administration's push to reduce violent crime and human trafficking. To enhance these efforts, the USMS requests \$3.3 million to expand its support for missing child investigations as authorized by the Justice for Victims of Trafficking Act. Finally, the USMS requests \$8.7 million to provide temporary duty personnel to facilitate the expected transfer of felony cases from Oklahoma court to Federal courts due to the Supreme Court decision in *McGirt v. Oklahoma*.

The Federal Prisoner Detention (FPD) appropriation is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD appropriation provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

The Federal Government utilizes various methods to house detainees. The USMS acquires detention bed space for Federal detainees through several means, using the most appropriate method to maximize efficiency and effectiveness for the Government:

- 1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility, funded through the Federal Bureau of Prisons (BOP) appropriation;
- 2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized via a negotiated daily rate paid to those jurisdictions; and
- 3) Private performance-based contract facilities, where an individual daily rate or contract minimum rate is paid. In response to the President's Executive Order (EO) 14006, "Reforming Our Incarceration System to Eliminate the Use of Privately Operated Criminal Detention Facilities," the USMS began the process of discontinuing its private detention facility contracts in March 2021.

Over 80 percent of the USMS's Federally-detained population will be housed in State and local facilities.

For 2022, the USMS requests program increases totaling \$87.9 million. Within that funding, the USMS requests \$677,000 for seven new positions to expand oversight and internal controls to ensure that State and local facilities meet established standards of confinement when providing detention bedspace through IGAs. The USMS requests \$12.2 million and two new positions to develop and integrate technology solutions that modernize detention-related systems. Finally, the USMS requests \$75.0 million to continue implementation of EO 14006.

The USMS will continue to identify cost reduction and avoidance opportunities through process and infrastructure improvements. The costs associated with these efforts are funded from the FPD appropriation. In recent years, the USMS has successfully implemented a number of efficiency initiatives, including:

- 1) eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP;
- 2) core-rate IGA, which standardizes the pricing strategy for paying for non-Federal detention space in order to control costs;

3) the Quality Assurance Review Program, which ensures non-Federal facilities' housing meet Department of Justice requirements for safe, secure and humane confinement; and

4) increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention such as electronic monitoring, halfway house placement, and drug testing and treatment.

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111–347) reopened the September 11th Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107–42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts.

P.L. 111–347 made \$2.775 billion available for the settlement of claim determinations issued on or before December 17, 2015. After all claims in this group were resolved, roughly all remaining funds (\$813 million) became available in the new Victims Compensation Fund. The Victims Compensation Fund is available for the settlement of claim determinations issued after December 17, 2015.

Public Law 114–113 provided \$4.6 billion starting in 2017 for the settlement of claims related to the September 11th attacks. Per Section 410, a new Treasury account was established called the "Victims Compensation Fund." This fund is available for the settlement of claim determinations issued after December 17, 2015. After all claims in the September 11th Victim Compensation Fund were resolved, \$813 million in remaining funding became available in the new Victims Compensation Fund.

On July 29, 2019, the President signed into law the Never Forget the Heroes: James Zadroga, Ray Pfeifer, and Luis Alvarez Permanent Authorization of the September 11th Victim Compensation Fund, Public Law 116–34. The Act extends the VCF's claim filing deadline to October 1, 2090, and appropriates such funds as may be necessary in each fiscal year through fiscal year 2092 to pay all eligible claims.

The United States Trustee Program (USTP or Program) supervises the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigates against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (P.L. 99-554) expanded the pilot trustee program to a 21 region, nationwide program encompassing 88 judicial districts (bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts). The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005, (P.L. 109-8) expanded the Program's responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. The August 2019 enactment of the Small Business Reorganization Act (P.L. 116-54) gave the Program additional responsibilities regarding small business debtors.

USTP appropriations are offset primarily by revenues deposited into the United States Trustee System Fund from filing fees paid by consumer and business debtors as well as quarterly fees based on disbursements made by most chapter 11 debtors. In October 2017, the Bankruptcy Judgeship Act of 2017 (P.L. 115-72) was enacted, adjusting quarterly fees for the largest chapter 11 debtors beginning January 1, 2018 and through September 30, 2022, depending on the balance of the Fund. Following the enactment of the Bankruptcy Administration Improvement Act (BAIA),

(P.L. 116-325) in January 2021, quarterly fees were further amended beginning April 1, 2021 through December 31, 2025. The BAIA reduces quarterly fees paid in almost all chapter 11 cases, does not increase quarterly fees for any case, and simplifies the fee structure. Under the new law, the USTP's FY 2022 appropriation is anticipated to be fully offset by bankruptcy fees collected and on deposit in the United States Trustee System Fund. Further, the law continues funding for bankruptcy judgeships and uses surplus fees for additional private chapter 7 bankruptcy trustee compensation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal detainees and prisoners in the custody of the United States Marshals Service or the Bureau of Prisons. JPATS transports both sentenced prisoners and pretrial detainees via coordinated air and ground systems without sacrificing the safety of the public, Federal employees, or those in custody. JPATS also transports prisoners and detainees on a reimbursable space-available basis for the Department of Defense, other participating Federal departments, and State and local agencies. Customers are billed based on the number of flight hours and the number of seats used to move their prisoners/detainees.

The Interagency Crime and Drug Enforcement (ICDE) account funds the Organized Crime Drug Enforcement Task Forces (OCDETF) program. OCDETF combines the resources and expertise of 11 Federal law enforcement agency members, the Department of Justice's Criminal Division, United States Attorneys' Offices, and State and local law enforcement. OCDETF's mission is to identify, disrupt, and dismantle the major domestic and transnational criminal organizations (TCO) that engage in the drug trafficking, violence, and money laundering activities that threaten the public safety and economic and national security of the United States.

The OCDETF Program performs the following activities:

**Investigation.**—This activity includes resources for the direct investigative, intelligence, and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major TCOs. This activity also includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center which analyzes fused law enforcement financial and human intelligence information, and produces actionable intelligence for use by OCDETF member agencies to disrupt and dismantle major criminal organizations and their supporting financial structures. In addition, the OFC creates strategic intelligence products to enhance TCO threat analyses and support the national strategic efforts against transnational organized crime. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, U.S. Secret Service, U.S. Postal Inspection Service, and Homeland Security Investigations. OCDETF also maintains 18 Co-Located Strike Forces. The ICDE account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2). IOC-2 is a multi-agency intelligence center with a mission to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple Federal agencies participate in IOC-2 activities and related investigations.

**Prosecution.**—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest levels of drug trafficking, violence, and money laundering by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys and the Department of Justice's Criminal Division.

The mission of the Federal Bureau of Investigation (FBI) is to protect the American people and uphold the Constitution of the United States.

The FBI's enterprise strategy includes several integrated components. The vision outlines the FBI's desired strategic position, which it aims to accomplish by continuously evolving to mitigate existing threats and anticipate future threats. To focus efforts across the enterprise, the FBI developed strategic objectives, operational mission priorities, through its Integrated Program Management process.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, DC, provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and 350 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates 63 Legal Attache offices and 29 sub-offices in 73 foreign countries around the world. Additionally, there are several specialized facilities and analytical centers within the FBI that are located across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Terrorist Explosive Device Analytical Center and Hazardous Devices School in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are carried out on reimbursable bases. For example, the FBI is reimbursed for its participation in the Organized Crime Drug Enforcement Task Force program and by other Federal agencies for certain intelligence and investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-Federal agencies.

For 2022, the FBI is requesting \$10.214 billion in Salaries and Expenses funding. Specifically, the FBI requests program increases of \$45.0 million to counter domestic terrorism, \$25.5 million to address its increased responsibilities in Oklahoma stemming from the Supreme Court's recent *McGirt v. Oklahoma* decision, \$40.0 million to bolster its cyber investigative program, \$18.8 million to address threats posed to the Nation by foreign intelligence actors, \$6.2 million to store data from the body-worn cameras of Federal task force officers, and \$15.2 million to defend the organization against cybersecurity threats.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply, including heroin. DEA also considers it a high priority to target the financial infrastructure of major drug trafficking organizations, and members of the financial community who facilitate the laundering of their proceeds. In 2020, DEA denied drug traffickers \$4.1 billion in revenue through the seizure of both assets and drugs. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 238 domestic offices organized in 23 divisions throughout the United States. Internationally, DEA has 91 offices in 69 countries and is responsible for coordinating and pursuing U.S. drug investigations abroad. Federal, State, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 43 years, DEA has led a task force program that today includes nearly 3,000 task force officers participating in 398 task forces. DEA's Special Operations Division and the El Paso Intelligence Center are vital resources for Federal, State, and local law enforcement. Additionally, through the Office of National Security Intelligence, DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, State and local task forces, other Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. DEA's objectives for Domestic Enforcement include:

—Identifying and targeting the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

—Systematically disrupting or dismantling targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

—Working with international offices to dismantle domestic organizations directly affiliated with Transnational Criminal Organizations

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. DEA's objectives for International Enforcement include:

—Identifying and targeting the most significant international drug and chemical trafficking organizations;

—Disrupting and dismantling the networks, financial infrastructures, operations, and resource bases of targeted international drug and chemical trafficking organizations; and

—Preventing drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—DEA provides clandestine laboratory training and meets the hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports State and local law enforcement with assistance and training so that State and local agencies can better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. As a result, DEA's nationwide contracts, container program, and established training programs allow DEA to provide State and local clandestine lab cleanup and training assistance in a cost-effective manner. In 2021, DEA received expanded authority to support state and local agencies in addressing additional illicit hazardous environments where controlled substances are clandestinely processed, such as fentanyl. Due to the differing natures of the various hazards associated with clandestine processing of many different controlled substances, DEA is currently updating the training courses and guidance documents to ensure proper waste handling and the safety of the state and local law enforcement working within the agreed upon parameters of the Container Program. Strategic implementation is planned for 2022 to allow for a controlled and safe expansion.

For 2022, DEA requests \$3.7 million to expand Operation Engage, the DEA's community outreach and drug prevention program; \$2.7 million to provide additional staffing support to the DEA's Tulsa, Oklahoma, Resident Office in response to the Supreme Court's decision in *McGirt v. Oklahoma* revoking the State of Oklahoma's law enforcement jurisdiction on certain tribal lands; and \$2.0 million to provide software and storage to store data and video from the body worn cameras of the DEA's Federally deputized Task Force Officers.

Public Law 102–395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration (DEA) under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific,

industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. The registrant community, physicians, prescribers, and pharmacists, can be seen as the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of abuse and illicit use. Investigations conducted by the Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. DEA's objectives for diversion control include:

—Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support, and assistance from the regulated industry;

—Educating the public on the dangers of prescription drug abuse and proactive enforcement measures to combat emerging drug trends; and,

—Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

This appropriation will provide for the custody and care of a projected average daily population of nearly 143,000 offenders, and for the maintenance and operation of 122 penal institutions, regional offices, and a central office located in Washington, D.C. The appropriation also finances the incarceration of sentenced Federal prisoners in State and local jails and other facilities for short periods of time. An average daily population of about 22,500 prisoners will be in contract facilities in 2022. The Federal Prison System (FPS) also receives reimbursements for the daily care and maintenance of State and local offenders, for utilities used by Federal Prison Industries, Inc., for staff housing, and for meals purchased by FPS staff at institutions.

**Inmate Care and Programs.**—This activity covers the costs of all food, medical supplies, clothing, welfare services, release clothing, transportation, gratuities, staff salaries (including salaries of Health Resources and Services Administration commissioned officers), and operational costs of functions directly related to providing inmate care. This decision unit also finances the costs of GED classes and other educational programs, vocational training, drug treatment, religious programs, psychological services, and other inmate programs such as Life Connections.

**Institution Security and Administration.**—This activity covers costs associated with the maintenance of facilities and institution security. This activity finances institution maintenance, motor pool operations, power-house operations, institution security, and other administrative functions.

**Contract Confinement.**—This activity provides for the confinement of sentenced Federal offenders in a Government-owned, contractor-operated facility, and State, local, and private contract facilities. It also provides for the care of Federal prisoners in contract community residential centers and covers the costs associated with management and oversight of contract confinement functions.

**Management and Administration.**—This activity covers all costs associated with general administration and provides funding for the central office, regional offices, and staff training centers. Also included are oversight functions of the executive staff and regional and central office program

managers in the areas of: budget development and execution; financial management; procurement and property management; human resource management; inmate systems management; safety; legal counsel; research and evaluation; and systems support.

For 2022, the BOP requests a total of \$409 million in base funding to continue robustly implementing the First Step Act. The full and timely implementation of the First Step Act remains a priority for the BOP. Building on the bipartisan FSA, the Budget also incorporates \$267 million in estimated savings from reductions in the Federal prison population achieved through criminal justice reform measures. Savings further reflect reductions in the BOP's inmate population over time.

Federal Prison Industries, Inc. (FPI), was created by the Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self-sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal Departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112-55), FPI received two new authorities to increase inmate employment. The first enables FPI to recapture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program, which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2022 Budget requests \$86 million for the Office of Justice Programs (OJP) Research, Evaluation, and Statistics appropriation. This appropriation provides nationwide support for criminal justice professionals and decision-makers through programs that provide grants, contracts, and cooperative agreements for research, development, and evaluation, and support development and dissemination of quality and relevant statistical and scientific information. The information and technologies developed through OJP's research and statistical programs improve the efficiency and effectiveness of criminal justice programs at all levels of government.

**Research, Development, and Evaluation Program.** - The 2022 Budget proposes a total of \$41 million for the National Institute of Justice (NIJ)

to support high- quality research, development, and evaluation in the forensic, social, and physical sciences. Of this funding, at least \$1 million will be dedicated to school safety research and \$10 million will support research on domestic radicalization.

**Criminal Justice Statistics Program.** - The 2022 Budget proposes \$45 million for the Bureau of Justice Statistics (BJS) to carryout national statistical collections supporting data-driven approaches to reduce and prevent crime and to assist state, local and tribal governments in enhancing their statistical capabilities, including improving criminal history records and information systems. Current programs provide statistics on: victimization, corrections, law enforcement, Federal justice systems, prosecution and adjudication (courts), criminal histories and recidivism, and tribal communities.

**2% Research, Evaluation and Statistics Set Aside.** - The 2022 Budget requests a set-aside of up to two percent for research, evaluation, and statistics. The set-aside amount from OJP discretionary programs supports the base programs for NIJ and BJS.

**Management and Administration.** - The 2022 Budget proposes a total Management and Administration funding level of \$261 million for OJP, supporting 665 total FTE.

The 2022 Budget requests \$2.049 billion for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. State, local, and tribal law enforcement and criminal justice professionals are responsible for the majority of the Nation's day-to-day crime prevention and control activities. The programs supported by this account help OJP partners throughout the Nation to advance work that promotes civil rights, increases access to justice, supports crime victims, protects the public from crime and evolving threats, and builds trust between law enforcement and the community. These programs include a combination of formula and

discretionary grant programs, coupled with robust training and technical assistance activities designed to address the most pressing crime-related challenges of confronting the criminal justice system. Priority programs in the 2022 Budget will promote criminal justice system reform, support efforts to prevent and reduce gun violence, combat the addiction crisis, address the issue and impact of unsubmitted sexual assault kits, and help victims of crime. They include:

*Byrne Justice Assistance Grants (JAG).* - The Byrne Justice Assistance Grants program awards grants to state, local, and tribal governments to support a broad range of activities that prevent and control crime, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2022 Budget proposes \$513.5 million for this program. Included in this amount is \$20 million for a training on racial profiling, duty to intervene, and de-escalation tactics, \$10 million for training to improve police-based responses to people with mental illness, \$7 million for an initiative to address violent crime in rural areas, \$20 million for Project Safe Neighborhoods, and \$13 million for VALOR. In addition to JAG, the Budget proposes funding for other important law enforcement assistance programs, including the Bulletproof Vest Program (\$30 million) and the Emergency Federal Law Enforcement Assistance Program (\$10 million).

*Promoting Criminal and Juvenile Justice System Reform and Enhancing Civil Rights.* - The 2022 Budget directs funding to criminal justice system reform efforts, including efforts to address systemic bias in the criminal justice system. The 2022 Budget supports a wide range of programs addressing these issues, including a new Public Defender Improvement Program (\$25 million) and a new Legal Representation for Immigrant Children and Families pilot program (\$15 million). The Budget also requests funding for the Hate Crimes Prevention Training Program (\$9 million) to provide law enforcement with resources to respond and investigate hate- and bias-motivated crimes and support non-profit organizations outreach efforts to communities affected by hate crimes.

*Preventing and Reducing Gun Violence.* - The 2022 Budget invests in proven strategies that will reduce gun violence while respecting the rights of law-abiding gun owners. The 2022 Budget proposes new programs to incentivize states to implement red flag and gun licensing laws (\$40 million) and support local gun buyback and relinquishment efforts (\$10 million). The 2022 Budget also proposes a new community violence intervention initiative (\$100 million), complementing a similar Department of Health and Human Services program for a government-wide total of \$200 million in discretionary resources for the initiative in 2022.

*STOP School Violence Act Program.* - This program aims to prevent or mitigate incidents of school violence. It supports training for teachers and education for students with the intent to prevent school violence, as well as specialized training for school officials in responding to related mental health crises that may precipitate violent attacks on schools. The program also promotes state, local, and tribal efforts to improve school security through evidence-based school safety programs making use of physical security measures, technology, and coordination with local law enforcement. The 2022 Budget proposes \$82 million for this program.

*Comprehensive Addiction Recovery Act (CARA).* - The 2022 Budget includes \$418 million for programs authorized by the Comprehensive Addiction Recovery Act, including \$190 million for OJP's Comprehensive Opioid and Stimulant and Substance Abuse Program (COSSAP), which aims to reduce substance abuse and the number of overdose fatalities. The Budget requests \$95 million for the Drug Court Program, which provides an alternative to incarceration to addicted offenders who enter the criminal justice system, addressing their addiction through treatment and recovery support services and subsequently reducing re-

cidivism. The 2022 Budget requests funding for other CARA-authorized programs: Veterans Treatment Courts (\$25 million), Residential Substance Abuse Treatment (\$35 million), Justice and Mental Health Collaborations (\$40 million), and the Prescription Drug Monitoring Program (\$33 million).

**Second Chance Act Program.** - This program provides grants to establish and expand various adult and juvenile offender reentry programs and funds related research. Successful reintegration will reduce rates of criminal recidivism, thus increasing public safety. The 2022 Budget proposes \$125 million for this program. Of this total, \$8 million is to help states, localities, and tribes develop comprehensive, innovative probation and parole supervision programs and \$5 million is for the Children of Incarcerated Parents Demonstration Grant Program.

**Combating Sexual Assault and Human Trafficking.** - The FY 2022 Budget expands several programs that assist state, local, and tribal governments in improving their response to sexual assault and eliminating forensic evidence analysis backlogs related to these cases. The Budget requests \$100 million for the Sexual Assault Kit Initiative and \$20 million for a new regional training program to improve investigation of and response to sexual assault. The Budget also requests \$90 million to support human trafficking grant programs, including support for comprehensive and specialized services for human trafficking victims.

The Community Oriented Policing Services (COPS) Office advances the practice of community policing by the Nation's state and local law enforcement agencies through information sharing and grant resources. COPS develops programs that respond directly to the emerging needs of law enforcement agencies to shift focus from reacting to preventing crime and disorder.

To advance this mission, COPS develops training and technical assistance to enhance law enforcement officers problem-solving and community interaction skills, promotes collaboration between law enforcement and community members to develop innovative initiatives to prevent crime, and provides cost-effective service delivery to grantees to support community policing. COPS awards grants to hire community policing professionals, develop and test innovative policing strategies, and provide training and technical assistance to community members, local government leaders, and all levels of law enforcement. Since 1994, the COPS Office has invested more than \$14 billion to help advance community policing, supporting over 13,000 of the Nation's 18,000 law enforcement agencies.

The 2022 Presidents Budget requests \$651 million for COPS programs, including \$537 million for the COPS Hiring Program. Within this amount, \$40 million is for tribal law enforcement; \$35 million is for Community Policing Development; \$20 million is for collaborative reform; and \$6 million is for the Tribal Access Program.

The Budget additionally proposes to implement reforms that seek to more closely align the COPS Hiring program with evidence-based strategies to reduce violent crime in partnership with communities. This includes new priorities for jurisdictions that support Community Violence Intervention (CVI) programs, for jurisdictions that seek to hire officers to engage directly with CVI teams and other community stakeholders to ensure those groups are involved in strategic operations and planning, and for jurisdictions seeking to implement hiring practices to help agencies mirror the racial diversity of the communities that they serve.

The mission of the Office on Violence Against Women (OVW) is to provide Federal leadership in developing the Nation's capacity to reduce domestic violence, dating violence, sexual assault, and stalking through the implementation of the Violence Against Women Act (VAWA).

Since its inception in 1995, OVW has awarded over \$8.6 billion in grants and cooperative agreements, and has launched a multifaceted approach to implementing VAWA. By forging state, local, and tribal partnerships among police, prosecutors, judges, victim advocates, health care providers, faith leaders, organizations that serve culturally specific and underserved communities and others, OVW grant programs help provide victims with the protection and services they need to pursue safe and healthy lives, while simultaneously enabling communities to hold offenders accountable for their violence.

The 2022 Budget proposes \$1 billion for OVW, including \$435 million from the Crime Victims Fund (CVF) to support OVW activities and programs.

The 2022 Budget requests \$796 million for the Office of Justice Programs (OJP) Juvenile Justice Programs for programs that support State, local, tribal, and community efforts to develop and implement effective crime and delinquency prevention programs, develop and implement effective and innovative juvenile justice programs, ensure fairness and equitable treatment for all juveniles in contact with the justice system, provide appropriate reentry services for youth returning to their communities after detention in secure correctional facilities, and effectively address crimes against children and young people.

The 2022 Budget requests \$250 million for the Part B: Formula Grants Program. Part B is the core program that supports State, local, and tribal efforts to improve the fairness and responsiveness of the juvenile justice system and to ensure appropriate accountability of the juvenile offender. The Budget also requests \$40 million for the Improving Juvenile Indigent Defense Program to improve access to high quality defense and reentry legal services for juveniles across the Nation. In support of juvenile justice system reforms and to reduce the number of incarcerated youth, the Budget requests \$100 million to establish a new program to encourage community-based alternatives to youth incarceration. Additionally, the Budget requests \$120 million for the Missing and Exploited Children Program (MECP), including Internet Crime Against Children (ICAC) task forces. Other major programs funded by this appropriation include Youth Mentoring (\$120 million), Delinquency Prevention (\$100 million), Victims of Child Abuse Act (\$50 million), a new Community Violence Intervention initiative for youth (\$10 million), and Child Abuse Training for Judicial Personnel (\$6 million).

The 2022 Budget requests \$226.8 million for the Office of Justice Programs' Public Safety Officers' Benefits (PSOB) Program, of which \$192 million is a mandatory appropriation for death benefits and \$34.8 million is a discretionary appropriation for disability and education benefits. This appropriation supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a partnership

between the Department of Justice, national public safety organizations, and public safety agencies at the state, local, and tribal levels. The PSOB program oversees three types of benefits:

**Death Benefits.** - This program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

**Disability Benefits.** - This program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

**Education Benefits.** - This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

The Crime Victims Fund provides formula grants to states and territories to support compensation and services for victims of crime. CVF funding also supports training, technical assistance, and demonstration grants designed to improve the capabilities and capacity of victims services providers throughout the Nation. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2022 Budget proposes to provide \$2.650 billion from collec-

tions and balances for crime victim compensation, services, and related needs. Of this amount, the Budget also proposes to use \$50 million to establish a new victim advocate program.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good

jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

*Adult employment and training activities.*—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

*Youth activities.*—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

*Dislocated worker employment and training activities.*—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. Includes competitive grants for POWER+, which will support community-led workforce transition, layoff aversion, job creation, and other strategic initiatives designed to ensure economic prosperity for workers and job seekers in the coal, oil, and gas industries.

*Reentry Employment Opportunities.*—Supports activities authorized under section 169 of the WIOA to help individuals exiting incarceration make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department also provides competitive grants for a range of young adults who have been involved with the criminal justice system or who left high school before graduation, particularly those in high-poverty, high-crime areas, with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for serving individuals leaving incarceration. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out this program.

*Apprenticeship.*—Activities that support and expand Registered Apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

*YouthBuild.*—Grants to provide academic training and occupational skills training, mentoring, and supportive services to eligible at-risk youth, with a specific focus on attaining construction skills through building or rehabilitating affordable housing for low-income or homeless families in their own neighborhoods

*Indian and Native American Program.*—Grants to provide employment, education, intensive training, and supportive services to tribes, tribal consortia, and nonprofit Indian organizations.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113–128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military. Job Corps participants must be economically disadvantaged youth, between the ages of 16–24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture.

**Unemployment compensation.**—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claim workloads increase above levels specified in the appropriations language.

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well as for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

**EMPLOYMENT SERVICE PROGRAM STATISTICS**

	2019 actual	2020 est.	2021 est.	2022 est.
Number of Participants Served .....	3,409,790	3,340,260	3,350,260	3,494,310

**Foreign Labor Certification.**—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or tem-

porary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, CW-1 temporary, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

**Federal Administration.**—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

**State grants.**—State grants provides grants to State workforce agencies in 50 States and 5 U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Activities include State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

**American Job Centers.**—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under the Workforce Innovation and Opportunity Act. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

**National Agricultural Workers Survey fee.**—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews.

The American Jobs Plan invests in proven workforce development programs targeted to underserved groups and getting students on paths to careers before they graduate from high school. Within the State UI and Employment Service Operations account, the plan includes an investment of \$8 billion over ten years for Expanded Career Services. The funding will greatly expand access to intensive, staff-assisted career services offered through the Employment Service network, doubling the number of people who receive career services through the public workforce system.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs, or to the Extended Unemployment Compensation Account or the Federal Unemployment Account in the UTF for benefit costs.

The Coronavirus, Aid, Relief, and Economic Security Act (Public Law 116–136) provided as an incentive for states to enact state Short-Time Compensation (STC) programs and promote the use of STC, 100 percent reimbursement of STC benefit costs paid under state law for weeks ending on or before December 31, 2020. The Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116–260) extended the 100 percent STC reimbursements to include weeks of unemployment ending on or before March 14, 2021, and the American Rescue Plan Act (Public Law 117–2) further extended the 100 percent STC reimbursements to include

weeks of unemployment ending on or before September 6, 2021. Grant funding was also available to states whose permanent STC laws meet the Federal definition.

This account provides mandatory general revenue funding for Federal Pandemic Unemployment Compensation (FPUC), a temporary program established under the Coronavirus Aid, Relief, and Economic Security Act (Public Law 116–136). This program paid a supplement of \$600 on every week of unemployment compensation through July 31, 2020. It was then reauthorized by the Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116–260) and modified to provide \$300 per week in supplemental benefits for weeks of unemployment beginning after December 26, 2020, and ending on or before March 14, 2021. The Amer-

ican Rescue Plan Act (Public Law 117–2) extends the FPUC program at \$300 per week through the week ending on or before September 6, 2021.

**ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS**

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110–343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance (TAA) for Workers program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the UTF. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA if it runs short of funds, and the borrowing authority will enable the ESAA to cover its obligations despite seasonal variations in the account's receipts.

The Department estimates that \$33 billion will be borrowed during fiscal year 2021 and an additional \$7 billion will be borrowed in fiscal year 2022.

## ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS—Continued

Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF or the BLDTF.

To address the potential need for significant and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2022 request continues this authority.

## PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, **[\$108,674,000]** \$144,497,000, together with not to exceed **[\$49,982,000]** \$67,006,000 which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund. The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has two accounts for the railroad unemployment insurance system but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 states, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands) and four federal accounts. The state and jurisdiction accounts receive funds from a state unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts — the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA) — while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employee Compensation Account (FECA), are revolving accounts.

Except for FECA balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. The FUTA payroll tax is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to the EUCA which pays for certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) from the FUA to States and jurisdictions when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable and nonrepayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse the FECA for benefits paid to their former employees. The FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's accounts in the UTF to meet expenses.

The Bipartisan Budget Act of 2018 (P.L. 115–123) amended the Social Security Act and permanently authorized the Reemployment Services and Eligibility Assessments (RESEA) program, authorizing \$117 million in annual base funding, plus an allocation adjustment level, previously referred to as a discretionary cap adjustment. The allocation adjustment level provides for an increasing level of funding up to a specified amount each year. Multiple research studies have found that the RESEA service delivery model leads to reduced unemployment insurance durations, and thereby benefit savings, among other improvements in employment outcomes.

The FY 2022 President's Budget includes projected savings generated by the allocation adjustment funding from the operation of RESEA. These savings are based on the projected reduction in claimant durations due to the RESEA provisions and the associated benefits savings due to fewer weeks paid. The savings also indirectly impact state unemployment tax revenues, as state tax collections are largely determined by benefit outlays and trust fund reserves, and lower benefit outlays translate into slightly lower tax rates and collections over the 10-year projection period.

The Pension Benefit Guaranty Corporation (PBGC) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned

by over 34,000,000 of America's workers and retirees participating in more than 24,500 private-sector defined benefit pension plans. The Single-Employer Program protects about 23,500,000 workers and retirees in about 23,200 pension plans. The Multiemployer Program protects about 10,900,000 workers and retirees in about 1,400 pension plans. Operations are financed by insurance premiums set by Congress and paid by sponsors of defined benefit plans, investment income, assets from pension plans trusted by PBGC, and recoveries from the companies formerly responsible for the plans.

PBGC is requesting \$472,955,000 in spending authority for administrative purposes in 2022. The request includes spending authority of \$4,600,000 for Modernizing Enterprise Risk Management Capabilities and Strengthening Internal Controls, \$4,921,933 for Mission Critical and Mandatory Personnel Compensation and Benefits (PC&B) costs, \$144,067 for Office of the Inspector General (OIG) Mandatory PC&B Cost Increases, and (-\$2,000,000) program decrease for a one-time cost to upgrade Oracle's Federal Financial eBusiness Suite applications.

**Plan Preservation Efforts.**—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year, PBGC encouraged companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In 2020, PBGC:

—Paid \$173,000,000 in financial assistance to 95 insolvent multiemployer plans, including one facilitated merger; and

—Performed audits of eight multiemployer plans covering more than 5,500 people to evaluate the timeliness and accuracy of benefit payments to all participants, compliance with laws and regulations, and the effectiveness and efficiency in management of the remaining assets in terminated and insolvent plans.

**Stepping in to Insure Pensions When Plans Fail.**—When plans do fail, PBGC steps in to ensure that basic benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 people in more than 4,900 failed plans. In 2020, PBGC:

—Paid \$6,100,000,000 in benefits to 984,000 retirees in single-employer plans; and

—Performed standard termination audits of single-employer plans that resulted in additional payments of \$1,900,000 to 1,909 people.

**Single-employer benefit payments.**—Through its Single-Employer Program, PBGC is directly responsible for the benefits of about 1,500,000 current and future retirees in trustee pension plans. The Single-Employer Program covers defined benefit pension plans that generally are sponsored by a single employer. When an underfunded single-employer plan terminates, PBGC steps in to pay participants' benefits up to legal limits set by law. This typically happens when the employer sponsoring an underfunded plan goes bankrupt, ceases operation, or can no longer afford to keep the plan going. PBGC takes over the plan's assets, administration, and payment of benefits up to the legal limits. In some instances, plans can choose to voluntarily terminate by filing a standard termination if the plan has enough money to pay all benefits owed to participants. In FY 2020, PBGC:

—Took responsibility for 69 single-employer plans that provide the pension benefits to an additional 56,405 workers and retirees;

—Protected 127,000 single-employer plan participants from employers emerging from bankruptcy.

**Multiemployer financial assistance.**—The Multiemployer Program covers about 10,900,000 participants in about 1,400 insured plans. A multiemployer plan is a pension plan sponsored by two or more unrelated employers under collective bargaining agreements with one or more unions. Multiemployer plans cover most unionized workers in the trucking, retail food, construction, mining, garment, and other industries. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, PBGC provides insolvent multiemployer plans with financial assistance, in the statutorily required form of loans, sufficient to pay PBGC guaranteed benefits and reasonable administrative expenses.

The American Rescue Plan Act (ARPA), enacted March 11, 2021, created a new, separate role for PBGC with respect to certain financially troubled multiemployer plans. Under ARPA, Congress established a Special Financial Assistance (SFA) program under which PBGC will provide one-time payments to eligible plans to enable them to pay benefits at the plan level. The new SFA program is funded entirely by general taxpayer money.

**Investment management fees.**—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are driven by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

**Consolidated Administrative Budget.**—PBGC's administrative budget comprises all expenditures and operations that support:

- Benefit payments to pension plan participants;
- Financial assistance to distressed multiemployer pension plans; and
- Stewardship and accountability.

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering procurement, financial management, human resources, facilities management, communications, legal support, and information technology infrastructure. These funds support the operations of the Participant and Plan Sponsor Advocate. They also support the required functions and efforts of the Office of the Inspector General including training and participation in the Council of the Inspectors General on Integrity and Efficiency (CIGIE) activities.

*Federal Employees' Compensation Act benefits.*—The Federal Employees' Compensation Act (FECA) program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2022 the FECA program projects to create 100,000 cases for Federal workers or their survivors; 15,600 Federal employees are projected to submit initial wage-loss claims; and 37,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

The remainder is provided from the Special Workers' Compensation Fund, which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

*Energy Employees Occupational Illness Compensation Act of 2000 (EEOICPA) benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses. This program is EEOICPA Part B.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program Part E, to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107–275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of

Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The Black Lung Disability Trust Fund (BLDTF) consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on coal mined and used domestically. These monies are used to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the BLDTF pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. Because excise tax receipts were insufficient to cover the BLDTF's expenses, the fund borrowed monies necessary to meet the shortfall from the U.S. Treasury, subject to repayment with interest. This led to the fund accumulating a large amount of debt. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

*Note.—Between January 1, 2019 and December 31, 2019, the coal excise tax rates on underground-mined coal were \$0.50 per ton or 2 percent of the sales price (whichever is lower) and \$0.25 per ton or 2 percent of the sales price (whichever is lower) on surface-mined coal. Congress restored the tax rates on underground-mined coal of \$1.10 per ton or 2 percent of the sales price (whichever is lower) and \$0.55 per ton or 2 percent of the sales price (whichever is lower) on surface-mined coal from January 1, 2020 to December 31, 2021 in the Further Consolidated Appropriations Act, 2020 and the Consolidated Appropriations Act, 2021.*

The trust fund consists of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

The trust fund is available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), and the Employee Polygraph Protection Act (EPPA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect over 148 million workers in more than 10.2 million establishments throughout the United States and its territories.

The Wage and Hour Division has traditionally had responsibility for enforcing certain worker protections provisions of the Immigration and Nationality Act, specifically the H-2A and H-1B temporary non-immigrant foreign worker programs. Pursuant to an Interagency Agreement (IAA) between the U.S. Department of Homeland Security (DHS) and the U.S. Department of Labor (DOL) and section 214(c)(14)(B) of the Immigration and Nationality Act (INA), 8 U.S.C. 1184(c)(14)(B), DOL and WHD have been delegated the enforcement authority located at section 214(c)(14)(A)(i) of the INA, 8 U.S.C. 1184(c)(14)(A)(i) for enforcing the H-2B temporary non-immigrant foreign worker program. Under section 524 of H.R. 3288, the Secretary of Labor may use one-third of the H-1B and L Fraud Prevention and Detection fee account for enforcement of these temporary worker program provisions and for related enforcement activities.

The Office of Labor-Management Standards (OLMS) administers the Labor-Management Reporting and Disclosure Act (LMRDA) and related laws. The LMRDA was enacted to protect union members by ensuring that they have the transparency, democracy, and financial integrity they need to

make informed decisions about their membership in a union as well as its operations and to ensure that members and employees who are engaged in organizing activities know the sources of their employers' messages urging them not to organize. These laws were enacted to strengthen labor unions by protecting union members from individuals, organizations, and/or influences that do not function in their best interests. While the vast majority of America's labor unions and their leaders operate for the benefit of the hard working people who comprise their membership, OLMS is tasked with protecting the union members by administering the LMRDA. OLMS also administers employee protections under various federally sponsored transportation programs that require fair and equitable protective arrangements for mass transit employees when federal funds are used to acquire, improve, or operate a transit system.

The FY 2022 funding request is to restore the core enforcement program and adds 38 positions: 32 in the Agency's field offices across the country, 2 in the Division of Enforcement, 2 in the Division of Interpretations and Standards, and 2 in the Office of Field Operations.

**Safety and Health Standards.**—This activity provides for the protection of workers' safety and health through the development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is cost effective when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) process, that small business concerns are taken into account in the process of developing standards.

**Federal Enforcement.**—This activity provides for the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to a focus on specific high-hazard industries and worksites. Enforcement is prioritized by the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards.

**Whistleblower Programs.**—This activity provides for the enforcement of 25 whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of 24 other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities, tax, antitrust, and anti-money laundering laws.

**State Programs.**—This activity supports states that assume responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities. There are 28 approved State Plans.

## SALARIES AND EXPENSES—Continued

**Technical Support.**—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or manmade disasters. This activity also provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a broad range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employer and employee stakeholder groups to share compliance assistance information, resources, and tools, and to plan, coordinate, and participate in meetings, conferences, training events, and outreach activities in support of the agency's key initiatives, including enforcement and rulemaking activities, outreach campaigns, and other priority initiatives. OSHA also works with employers and employees through cooperative programs, such as the Voluntary Protection Programs to recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships, which commit organizations to proactively collaborate with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including online.

**State Compliance Assistance: Consultation Grants.**—This activity supports OSHA's On-Site Consultation Program, which offers no-cost and confidential occupational safety and health services to small- and medium-sized businesses in all 50 states, the District of Columbia, and several U.S. territories, with priority given to high-hazard worksites. On-Site Consultation services are separate from enforcement and do not result in penalties and citations. Consultants from state agencies or universities work with employers to identify workplace hazards, provide advice for compliance with OSHA standards, and assist in establishing and improving safety and health programs. Designated state agencies or universities enter into cooperative agreements to provide 90 percent federal funding.

**Training Grants.**—This activity supports safety and health grants to organizations that provide face-to-face training, education, technical assistance, and develop educational materials for employers and employees. These grants address education needs for workers with limited access to occupational safety health training, including young workers, temporary, minority, low literacy, domestic, limited English speaking, or other hard-to-reach workers; and specific high-risk topics and industries identified by the agency.

**Safety and Health Statistics.**—This activity supports the agency's information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These services are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive Direction and Administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2022 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners.

**Standards.**—This activity develops standards and regulations for the mining industry that protect the safety and health of miners.

**Office of Assessments.**—This activity assesses and collects civil monetary penalties for violations of safety and health standards and manages MSHA's accountability, special enforcement, and investigation functions.

**Educational Policy and Development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry.

**Technical Support.**—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical Support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

**Program Evaluation and Information Resources (PEIR).**—This activity provides program evaluation and information technology resource management services for the agency.

**Program Administration.**—This activity performs general administrative functions and is responsible for meeting performance requirements and developing MSHA's performance plan and Annual Performance Report.

**Program Direction and Support.**—Provides leadership and direction for all programs and functions assigned to the Department of Labor (DOL).

## SALARIES AND EXPENSES—Continued

Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker, achieving better employment and earnings, promoting productivity and economic growth, safety, equity and affirmative action in employment, and collecting and analyzing statistics on the labor force.

**Legal Services.**—The Office of the Solicitor (SOL) provides the Secretary of Labor and departmental program officials with the legal services required to accomplish the Department's mission. SOL litigates worker protection enforcement and other cases in Federal and other tribunals, including bankruptcy courts and various administrative forums throughout the nation. SOL has direct civil litigation authority in most programs, but there are occasions where SOL works hand-in-hand with DOJ; and SOL plays a significant role in the development of many criminal investigations referred to DOJ. SOL's legal services are significant to the Department's rulemaking efforts, both in the development and then the defense of rules. SOL provides legal advice to the Department's agencies, including orders, written interpretations, opinions and legislation, as well as legal services to Departmental management with respect to issues like appropriations, procurement, data privacy, FOIA, ethics, and employment law. SOL also supports the Department's enforcement efforts by providing legal advice on individual investigations of labor violations.

**International Labor Affairs.**—The Bureau of International Labor Affairs (ILAB) advances worker rights and promotes a fair global playing field by enforcing trade commitments, strengthening compliance with labor standards, and combating international child labor, forced labor, and human trafficking. ILAB combines monitoring and enforcement of labor provisions in U.S. trade agreements and preference programs, bilateral and multilateral engagement, research, and technical cooperation to carry out the international responsibilities of the Department of Labor.

**Administration and Management.**—Exercises leadership in all departmental administrative and management programs and services and ensures efficient and effective operation of Departmental programs; provides policy guidance on matters of personnel management, information resource management and procurement; and provides for consistent and constructive internal labor-management relations throughout the Department.

**Adjudication.**—Renders timely decisions on appeals of claims filed before four different components, which include the Office of Administrative Law Judges, the Administrative Review Board, the Benefits Review Board, and the Employees' Compensation Appeals Board.

**Women's Bureau.**—Serves as the only Federal agency mandated by Congress to work exclusively on issues that affect women in the workplace and to represent the needs of wage-earning women in the public policy process. The Women's Bureau deploys its research, statistics, advocacy and grantmaking capacity to advising the Secretary, the Administration, and sister DOL agencies on policy and regulatory issues facing working women.

**Civil Rights.**—Ensures compliance with certain Federal civil rights statutes and Executive Orders, and their implementing regulations, including Titles VI and VII of the Civil Rights Act of 1964, Sections 504 and 508 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, Section 188 of the Workforce Investment Act of 1998, and Section 188 of the Workforce Innovation and Opportunity Act. These laws apply to and protect Department of Labor (DOL) employees, DOL applicants for employment, and individuals who interact with DOL programs and activities.

**Chief Financial Officer.**—Created as a result of the CFO Act of 1990, provides financial management leadership and direction to all DOL program agencies on financial matters arising from legislative and regulatory mandates such as the CFO Act, GMRA, FFMIA, FMFIA, Clinger-Cohen, The Reports Consolidation Act, IPIA, Treasury Financial Manual guidance and OMB Circulars.

**Program Evaluation.**—The Office of the Chief Evaluation Officer is charged with coordinating and overseeing rigorous evaluations of the De-

partment of Labor's programs, ensuring high standards in evaluations undertaken and funded by the Department, and in leading implementation of the Department's evidence-building agenda. Through its development and dissemination of rigorous scientific knowledge, the office builds evaluation capacity and expertise to ensure that evaluation and research findings are available and accessible for policy and program decision-makers in a timely and user-friendly way.

*Jobs for Veterans State grants.*—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, grants are allocated to the States according to the statutory formula to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representative (LVERs) staff.

DVOP specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment. LVER staff (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

**Transition Assistance Program (TAP).**—(10 U.S.C. 1144, 38 U.S.C. 4113) This program provides employment workshops for separating service members and their spouses to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to facilitate the transition from military to civilian employment. VETS coordinates with Federal agencies including the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. The 2019 National Defense Authorization Act instructed responsible agencies to improve TAP and directed DOL to deliver a mandatory one-day employment planning workshop for all transitioning service members, as well as optional days of instruction on general employment preparation and Vocational Training for transitioning service members interested in apprenticeship opportunities and technical careers.

**National Veterans' Training Institute (NVTI).**—NVTI develops and supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

**Homeless Veterans' Reintegration Program (HVRP).**—HVRP (38 U.S.C. 2021, 2021A and 2023) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grantees operate employment programs to assist homeless veterans reintegrate into meaningful employment and stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

**Federal management.**—VETS' Federal management budget activity supports the Federal administration of 38 U.S.C. 41, 42, and 43. This allows VETS to carry out programs and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). This activity provides for the salary and benefits, travel, and training for all VETS' current staff in the national office, six regional offices, and offices in each state, the District of Columbia, and Puerto Rico. In addition, this activity provides for outreach and engagement with Federal, state, and local governments; private sector employers and trade associations; institutions of higher learning; non-profit organizations; and Veteran Service Organizations to help service members, returning veterans, and families reintegrate into the workforce.

It also enables VETS to discharge its responsibilities to administer, interpret, and help enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. 4301–4335, by providing technical assistance and investigating complaints received from veterans and service members who believe their employment and reemployment rights were violated. This budget activity enables VETS to investigate complaints received from veterans who claim a violation of their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment

Opportunities Act of 1998 (VEOA), 5 U.S.C. 3330a. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. 4212. These responsibilities involve the administration of a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans.

Resources under the Federal management activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration (38 U.S.C. 2021). VETS personnel provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

Federal management supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). Through outreach and education efforts, such as job fairs, VETS staff raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported through this budget activity. **Financing.**—The Working Capital Fund is funded by the agencies and organizations for which centralized services are performed at rates that return in full all expenses of operation, including reserves for accrued annual leave.

Diplomatic Programs (DP) is financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which are to remain available until expended. DP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2022 request includes base funding for the State Department operations in Iraq, Afghanistan, Pakistan, and other High Threat Posts (HTP).

Funds are requested in the following categories:

**Human Resources.**—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

**Overseas Programs.**—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2022 will support 276 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings, and other multilateral activities in the United States and abroad. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

**Diplomatic Policy and Support.**—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Funds to support the work of the Global Engagement Center (GEC) are also included in this category. The GEC's mission is to direct, lead, synchronize, integrate, and coordinate efforts of the Federal Government to recognize, understand, expose, and counter foreign state and foreign non-state propaganda and disinformation efforts aimed at undermining or influencing the policies, security, or stability of the United States, United States allies, and partner nations. Resources also fund the management

of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in DP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

**Security Programs.**—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, H and L Visa Fraud Prevention and Detection Fees, Affidavit of Support fees, use of J Waiver Fees starting in FY 2021, and full use of Expedited Passport Fees (EPF) starting in FY 2022. In FY 2017 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The Consolidated Appropriations Act of FY 2017 enacted a new standalone account to display fee-funded consular programs independent of the larger Diplomatic Programs (formerly Diplomatic and Consular Programs) account that began in FY 2019. This change enables the Department to provide greater transparency and accountability in financial reporting on these fees and surcharges, facilitate budget estimates for these fees and surcharges, and more easily make the information available to users of budget information and other stakeholders.

Section 7024(j)(1) of the general provisions provides a new permanent extension of the Western Hemisphere Travel Initiative Surcharge. Section 7065 provides legislative language expanding the authorities of the Border Crossing Card and Passport Security Surcharge. Finally, Section 7052 provides the ability to use the Fraud Prevention and Detection fees for the costs of providing consular services.

These consular fees and surcharges support an array of activities that are vital to ensuring strong U.S. border security, including routine and emergency services for U.S. citizens overseas; the issuance of secure passports to U.S. citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides for the conduct or supervision of all audits, investigations, and inspections of the Department's programs and operations as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office of the Inspector General are to: improve the economy, efficiency, and effectiveness of the Department's operations; detect and prevent fraud, waste, abuse, and mismanagement; and evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The Office also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's Inspector General also serves as Inspector General of the U.S. Agency for Global Media, as mandated by law. In addition, this appropriation funds the Office of the Special Inspector General for Afghanistan Reconstruction (SIGAR). SIGAR provides independent oversight of programs and operations funded with amounts made available for the reconstruction of Afghanistan. SIGAR performs this oversight through audits, field inspections and investigations of potential waste, fraud and abuse in coordination with, and receiving the cooperation of, the Inspectors General of the Department of State, Depart-

ment of Defense and the United States Agency for International Development.

This appropriation provides funding to the Bureau of Educational and Cultural Affairs (ECA) for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, security policy objectives and to advance U.S. influence overseas. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Beginning in FY 2020, resources in this appropriation also support the conduct of a select group of international information programs of the United States previously reflected in the Diplomatic Programs appropriation (American Spaces, U.S. Speakers and TechCamp programs). Additional programs under this appropriation include:

**Academic Programs.**—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

**Professional/Cultural Exchanges.**—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of

foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

**Youth Leadership Initiatives.**—Includes programs targeting young private, public, and civil sector leaders in Africa, Southeast Asia, and the Americas.

**Program and Performance.**—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

**Exchanges Support.**—Includes all domestic staff, overseas Regional Language Officers and support costs managed by ECA; as well as government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific

program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2022, the Department will manage the eighteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM appropriations, interagency contributions, and consular fee revenues.

The 2022 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. MCS and CSCS are funded within a combined \$2.2 billion program in FY 2022.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2022 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSNDCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, which is available without fiscal year limitations and is authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool, operations and dispatch agencies operations, inter-agency co-operative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

The International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998 using the Working Capital Fund. ICASS allows more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The Foreign Service Retirement and Disability Fund (FSRDF) was established in 1924 to provide pensions to retired and disabled members of the Foreign Service. The FSRDF's revenues consist of contributions from active participants and their U.S. Government agency employers; appropriations; and interest on investments. Monthly annuity payments are made to eligible retired employees or their survivors. The FSRDF includes the operations of two separate retirement systems—the Foreign Service Retirement and Disability System (FSRDS) and the Foreign Service Pension System (FSPS). This appropriation provides mandatory funding for the Foreign Service Retirement and Disability Fund (FSRDF) as prescribed in the Foreign Service Act of 1980 as authorized in Section(s) 821 and 822.

This appropriation provides the United States' treaty mandated assessments and expenses to 19 international commissions and organizations including three bilateral commissions (the Great Lakes Fisheries Commission, the International Pacific Halibut Commission, and the Pacific Salmon Commission), nine multilateral bodies, two marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The first phase of the President's Emergency Plan for AIDS Relief (PEPFAR), from 2004 to 2008, was the largest ever global public health initiative by a single country to fight the HIV/AIDS epidemic. Funding was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.
