The need for action in Tennessee is clear and recently released state-level data demonstrates that the Infrastructure Investment and Jobs Act will deliver for Tennessee. For decades, infrastructure in Tennessee has suffered from a systemic lack of investment. The historic Infrastructure Investment and Jobs Act will make life better for millions of Tennessee residents, create a generation of good-paying union jobs and economic growth, and position the United States to win the 21st century. Specifically, the Infrastructure Investment and Jobs Act will:

- **Repair and rebuild our roads and bridges with a focus on climate change mitigation, resilience, equity, and safety for all users, including cyclists and pedestrians.** In Tennessee there are 881 bridges and over 270 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in Tennessee and on average, each driver pays $209 per year in costs due to driving on roads in need of repair. Based on formula funding alone, Tennessee would expect to receive $5.8 billion for federal-aid highway apportioned programs and $302 million for bridge replacement and repairs under the Infrastructure Investment and Jobs Act over five years. Tennessee can also compete for the $12.5 billion Bridge Investment Program for economically significant bridges and nearly $16 billion of national funding in the bill dedicated for major projects that will deliver substantial economic benefits to communities.

- **Improve healthy, sustainable transportation options for millions of Americans.** Tennesseans who take public transportation spend an extra 67.9% of their time commuting and non-White households are 5.6 times more likely to commute via public transportation. 21% of transit vehicles are past useful life. Based on formula funding alone, Tennessee would expect to receive $630 million over five years under the Infrastructure Investment and Jobs Act to improve public transportation options across the state.

- **Build a network of EV chargers to facilitate long-distance travel and provide convenient charging options.** The U.S. market share of plug-in electric vehicle (EV) sales is only one-third the size of the Chinese EV market. The President believes that must change. The bill invests $7.5 billion to build out the first-ever national network of EV chargers in the United States and is a critical element in the Biden-Harris Administration’s plan to accelerate the adoption of EVs to address the climate crisis and...

support domestic manufacturing jobs. **Under the Infrastructure Investment and Jobs Act, Tennessee would expect to receive $88 million over five years to support the expansion of an EV charging network in the state***. Tennessee will also have the opportunity to apply for the $2.5 billion in grant funding dedicated to EV charging in the bill.

- **Help connect every American to reliable high-speed internet.** 5.9% of Tennesseans live in areas where, under the FCC’s benchmark, there is no broadband infrastructure. Even where infrastructure is available, broadband may be too expensive to be within reach. 17% of Tennessee households do not have an internet subscription. **Under the Infrastructure Investment and Jobs Act, Tennessee will receive a minimum allocation of $100 million to help provide broadband coverage across the state, including providing access to the at least 402,000 Tennesseans who currently lack it.** And, under the Infrastructure Investment and Jobs Act, 2,009,000 or 30% of people in Tennessee will be eligible for the Affordability Connectivity Benefit, which will help low-income families afford internet access.

- **Prepare more of our infrastructure for the impacts of climate change, cyber attacks, and extreme weather events.** From 2010 to 2020, Tennessee has experienced 40 extreme weather events, costing the state up to $20 billion in damages. **Under the Infrastructure Investment and Jobs Act, based on historical formula funding levels, Tennessee will expect to receive $17 million over five years to protect against wildfires and $21 million to protect against cyberattacks. Tennesseans will also benefit from the bill’s historic $3.5 billion national investment in weatherization which will reduce energy costs for families.**

- **Deliver clean drinking water to every American and eliminate the nation’s lead service lines and pipes.** Currently, up to 10 million American households and 400,000 schools and child care centers lack safe drinking water. **Under the Infrastructure Investment and Jobs Act, based on the traditional state revolving fund formula, Tennessee will expect to receive $697 million over five years to improve water infrastructure across the state and ensure that clean, safe drinking water is a right in all communities.**

- **Improve our nation’s airports.** The United States built modern aviation, but our airports lag far behind our competitors. **Under the Infrastructure Investment and Jobs Act,**

airports in Tennessee would receive approximately $300 million for infrastructure development for airports over five years\textsuperscript{4}.

Over the coming days and weeks, we will expect to receive additional data on the impact of the Infrastructure Investment and Jobs Act in Tennessee.

\textsuperscript{4} Precise allocations would change each year because the formulas use current passenger boarding and cargo data, and this estimate is based on 2019 data.
