The Budget provides \$32.1 billion for the Tenant-Based Rental Assistance (TBRA) program (also known as the Housing Choice Voucher program), which is the Federal Government's largest income-targeted rental assistance program. The program currently provides housing assistance to around 2.3 million extremely low- to very low-income families to rent decent, safe, and sanitary housing in the private market. About 2,100 state and local Public Housing Authorities (PHAs) administer the Housing Choice Voucher program.

The Budget provides \$26.2 billion in contract renewals to continue to assist families in calendar year 2023. This includes \$50 million for the Rental Assistance Demonstration to further long-term financial stability and promote the energy or water efficiency, climate resilience, or preservation of properties that convert to Project-Based Vouchers.

The Budget includes \$667 million for the renewal of Section 811 mainstream housing vouchers for persons with disabilities, including the first-time renewal of new mainstream vouchers allocated in 2022, and associated administrative fees, as well as a new set-aside to provide adjustments to PHAs as a result of significant increases in mainstream renewal costs resulting from unforeseen circumstances and to prevent the termination of assistance for mainstream families should there be insufficient funding.

The Budget also requests the following: \$3.0 billion in PHA administrative fees to support core functions such as admitting households, conducting housing quality inspections, and completing tenant income certifications; \$220 million for tenant protection vouchers, which are provided to families who may have to relocate due to actions beyond their control, such as a public housing demolition or redevelopment, and when private owners of multi-family developments choose to leave the project-based program or convert to long-term Section 8 contracts, including up to \$20 million that may be used to assist low-income tenants referred by the Secretary of the Department of Agriculture (USDA) when section 521 assistance is no longer available to protect tenants due to the maturity, prepayment, or foreclosure of a section 514 or 515 loan, as part of the Budget's proposal to decouple USDA section 521 rental assistance from section 514 or 515 mortgage loans; and up to \$5 million for the renewal of vouchers by Tribes under the Tribal Housing and Department of Housing and Urban Development and Department of Veterans Affairs Supportive Housing program, to serve Native American veterans who are homeless or at risk of homelessness and living in and around designated tribal areas.

In addition, the Budget includes \$1.6 billion for new incremental vouchers for 200,000 additional households, including those who are experiencing or at risk of homelessness or fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking, or human trafficking. The Budget also includes \$445 million for Mobility Services, which will provide funding for services to better enable families with children to move to areas of higher opportunity.

Until 2005, the Housing Certificate Fund provided funding to both the project-based and tenant-based components of the Section 8 program. Project-Based Rental Assistance (PBRA) and Tenant-Based Rental Assistance are now funded in separate accounts. The Housing Certificate Fund retains and recovers balances from the previous years' appropriations and uses those balances to support PBRA contract renewals, amendments, and administration.

(2) \$25,000,000 shall be available to the Secretary to allocate pursuant to a need-based application process notwithstanding section 203 of this title and not subject to such Operating Fund formula to public housing agencies that experience, or are at risk of, financial shortfalls, as determined by the Secretary: Provided, That after all such shortfall needs are met, the Secretary may distribute any remaining funds to all public housing agencies on a pro-rata basis pursuant to such Operating Fund formula;

(3) \$3,200,000,000 shall be available to the Secretary to allocate pursuant to the Capital Fund formula at section 905.400 of title 24, Code of Federal Regulations: Provided, That from the funds made available under this paragraph, the Secretary shall provide bonus awards in fiscal year 2023 to public housing agencies that are designated high performers;

(4) \$40,000,000 shall be available for the Secretary to make grants, notwithstanding section 203 of this title, to public housing agencies for emergency capital needs, including safety and security measures necessary to address crime and drug-related activity, as well as needs resulting from unforeseen or unpreventable emergencies and natural disasters excluding Presidentially declared emergencies and natural disasters under the Robert T. Stafford Disaster Relief and Emergency Act (42 U.S.C. 5121 et seq.) occurring in fiscal year 2023: Provided, That of the amount made available under this paragraph, not less than \$20,000,000 shall be for safety and security measures: Provided further, That in addition to the amount in the previous proviso for such safety and security measures, any amounts that remain available, after all applications received on or before September 30, 2024, for emergency capital needs have been processed, shall be allocated to public housing agencies for such safety and security measures;

(5) \$25,000,000 shall be for competitive grants to public housing agencies to evaluate and reduce lead-based paint hazards in public housing by carrying out the activities of risk assessments, abatement, and interim controls (as those terms are defined in section 1004 of the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. 4851b)): Provided, That for purposes of environmental review, a grant under this paragraph shall be considered funds for projects or activities under title I of the United States Housing Act of 1937 (42 U.S.C. 1437 et seq.) for purposes of section 26 of such Act (42 U.S.C. 1437x) and shall be subject to the regulations implementing such section;

(6) \$60,000,000 shall be available for competitive grants to public housing agencies to evaluate and reduce housing-related hazards including carbon monoxide, radon and mold in public housing: Provided, That for purposes of environmental review, grants under this paragraph shall be considered funds for projects or activities under title I of the United States Housing Act of 1937 (42 U.S.C. 1437 et seq.) for purposes of section 26 of such Act (42 U.S.C. 1437x) and shall be subject to the regulations implementing such section: Provided further, That amounts made available under this paragraph shall be combined with any amounts remaining from amounts made available under this paragraph for Healthy Homes Initiative grants in prior Acts and shall be used in accordance with the purposes and requirements under this paragraph;

(7) \$45,000,000 shall be to support the costs of administrative and judicial receiverships and for competitive grants to PHAs in receivership, designated troubled or substandard, or otherwise at risk, as determined by the Secretary, for costs associated with public housing asset improvement, in addition to other amounts for that purpose provided under any heading under this title;

(8) \$50,000,000 shall be to support ongoing public housing financial and physical assessment activities; and

(9) \$300,000,000 shall be available to improve the energy or water efficiency or climate resilience of public housing, including for competitive grants to public housing agencies for capital improvements to achieve such purposes: Provided, That for purposes of environmental review, grants under this paragraph shall be considered funds for projects or activities under title I of the United States Housing Act of 1937 (42 U.S.C. 1437 et seq.) for purposes of section 26 of such Act (42 U.S.C. 1437x) and shall be subject to the regulations implementing such section: Provided further, That of the amounts made available under this paragraph, up to \$24,000,000 shall be available for utility benchmarking, including research and evaluations, technical assistance, and contracts, of which up to \$9,000,000 may be transferred to and merged with amounts made available under the heading "Information Technology Fund" to develop systems and tools necessary to collect and analyze PHA utility benchmarking data;

The Budget requests \$250 million for Choice Neighborhoods to continue the transformation of neighborhoods of concentrated poverty into sustainable, mixed-income neighborhoods with well-functioning services, schools, public assets, transportation, and access to jobs. The goal of the program is to transform distressed neighborhoods and improve the quality of life of current and future residents by coordinating and concentrating neighborhood investments from multiple sources. HUD will allocate up to \$5 million for 10 to 12 Planning Grants and the remaining \$235 million will fund four to six Implementation Grants.

In addition, the Budget includes \$10 million under Choice Neighborhoods to fund the pilot Revitalization and Empowerment of Communities near Contaminated Lands through Assistance, Investment, and Mitigation (RECLAIM) program. The program will support community-driven efforts to revitalize distressed neighborhoods that contain public and/or HUD-assisted housing and are located on or near Superfund sites. RECLAIM leverages a coordinated interagency effort to identify, cleanup, and improve these sites by concentrating Federal resources. HUD will provide planning and implementation grants for pilot communities to improve health and safety, generate economic opportunities, and preserve or create affordable housing.

The HOPE VI program has accomplished its goal of contributing to the demolition of approximately 100,000 severely distressed Public Housing units. The Budget proposes no additional funds for this program. Instead, the Budget builds on the success of HOPE VI with the Choice Neighborhoods program, which makes a broad range of transformative investments in high-poverty neighborhoods where Public Housing and other HUD-assisted housing is located.

The Native Hawaiian Housing Loan Guarantee program (also known as the Section 184A program) provides access to private mortgage financing to Native Hawaiian families who are eligible to reside on Hawaiian home lands and would otherwise face barriers to acquiring such financing because of the unique legal status of the Hawaiian home lands. Since 2017, this program has operated on a negative subsidy basis, but the Budget requests \$28 million in loan guarantee commitment authority to continue supporting these loans.

The Community Development Fund account contains the following programs:

**Community Development Block Grant (CDBG).**—The CDBG program provides formula grants to States, local governments, and Insular Areas to benefit mainly low- to moderate-income persons, and support a wide range of community and economic development activities, such as public infrastructure improvements (which account for approximately 36 percent of all CDBG funds), housing rehabilitation and construction (approximately 24 percent of funds), job creation and retention, and public services. After \$7 million is allocated to Insular Areas, seventy percent of CDBG formula grants are distributed to mainly urban areas (entitlement communities), and 30 percent are distributed to States (non-entitlement communities). The Budget requests a total of \$3.77 billion, of which \$3.55 billion is funding for the CDBG program, and \$195 million is for targeted CDBG activities aimed at removing barriers to revitalization in approximately 100 of the most underserved neighborhoods in the United States.

**Indian Community Development Block Grant (ICDBG).**—The Budget requests ICDBG in the Native American Programs account.

**CDBG Disaster Recovery (CDBG-DR).**—This account also contains a substantial amount of appropriated CDBG-DR funding provided to communities impacted by major disasters.

**Recovery Housing (SUPPORT).**—The Budget requests \$25 million for activities authorized under the SUPPORT for Patients and Communities Act. This formula program is allocated to states and the District of Columbia to provide temporary housing for individuals recovering from substance use disorders, including opioids.

The Budget requests \$1.95 billion for the HOME Investment Partnerships program (HOME). The HOME program provides annual formula grant assistance to States and units of local government to increase the supply of affordable housing and expand homeownership for low-income persons through the acquisition, new construction, and rehabilitation of affordable renter- and owner-occupied housing, as well as the provision of tenant-based rental assistance. Over time, the requested HOME funding is estimated to result in the production of approximately 41,000 units of affordable

housing and support over 15,000 low-income households with tenant-based rental assistance. In addition, the request includes a \$100 million set-aside for a FirstHOME Downpayment initiative to States and insular areas to better ensure sustainable homeownership.

The Homeless Assistance Grants account provides funds for the Emergency Solutions Grant (ESG) and Continuum of Care (CoC) programs. These programs, which award funds through formula and competitive processes, enable localities to shape and implement comprehensive, flexible, coordinated approaches to address the multiple issues of homelessness, including chronic homelessness, veteran homelessness, and homelessness among families and youth.

The Budget provides a total of \$3.576 billion for a wide range of activities to assist homeless persons and prevent future occurrences of homelessness. The Budget supports \$3.197 billion for the CoC program to fund competitive renewals and new projects for target populations, including not less than \$52 million for rapid re-housing projects and other assistance to serve people fleeing domestic violence, dating violence, sexual assault, stalking, or human trafficking. The Budget also provides \$290 million for ESG formula funding for communities to address emergency needs such as emergency shelter, street outreach, essential services, homelessness prevention, and rapid rehousing; not less than \$82 million to implement projects serving homeless youth; and \$7 million for the National Homeless Data Analysis Project.

The Budget provides \$455 million for the Housing Opportunities for Persons With AIDS (HOPWA) program. HOPWA funding provides States and localities with resources to devise long-term comprehensive strategies for providing housing and supportive services to meet the housing needs of persons living with HIV/AIDS and their families.

Ninety percent of HOPWA funds is distributed to States and eligible metropolitan areas according to a formula, and the remaining ten percent is awarded competitively to States, local governments, and private nonprofit entities. The HOPWA formula, which was updated in 2016, allocates funds based on cases of persons living with HIV/AIDS and is adjusted for an area's fair market rent and poverty rates to further ensure HOPWA funds are focused on areas that have the most need. The updated formula became effective in 2017 with a five-year stop-loss/stop-gain period and is fully implemented as of fiscal year 2022. HUD continues to work closely with formula grantees through a comprehensive technical assistance initiative to support communities in implementing the local strategies developed during that five-year phase-in period to manage HOPWA formula changes. The Budget also proposes to not prioritize renewals in its competition so that funds are able to better support more evidence-based service delivery models, address current community needs, and fund innovative projects that support the administration's goals of ending the HIV epidemic by 2030.

The Budget requests no funding for the Brownfields Economic Development Initiative (BEDI), which was a competitive grant program designed to assist cities with the redevelopment of brownfield sites for the purposes of economic development and job creation. The Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113-235) rescinded all unobligated balances of BEDI as of the end of fiscal year 2016.

The Budget does not provide funding for the Rural Housing and Economic Development (RHED) program. RHED was created to support housing and economic development activities in rural communities. The Consolidated Appropriations Act, 2016 (Public Law 114-113) rescinded all unobligated balances of RHED funds remaining in the account as of the end of 2016.

## REVOLVING FUND (LIQUIDATING PROGRAMS)

The Revolving Fund (liquidating programs) was established by the Independent Offices Appropriations Act of 1955 for the efficient liquidation of assets acquired under a number of housing and urban development programs, all of which are no longer active. For example, the Section 312 loan program portfolio, which provided first and junior lien financing at below market interest rates for the rehabilitation of homes in low-income neighborhoods, constituted a large portion of the account activities but has not originated new loans for over 20 years. The operational expenses are financed from a permanent, indefinite appropriation to administer the remaining repayments of loans, recaptures, and lien releases in the portfolio. Any remaining unobligated balances in the account are returned to the Treasury annually.

The Housing Trust Fund was authorized by section 1131 of the Housing and Economic Recovery Act of 2008 (Public Law 110-289), which directed the account to be funded from assessments on Fannie Mae and Freddie Mac. The Budget estimates that \$393 million will be allocated in 2023 to the Housing Trust Fund to provide grants to States to increase and preserve the supply of affordable rental housing and homeownership opportunities for extremely low-income families. Funds will be distributed by formula to States to be used primarily for the construction, preservation, and rehabilitation of affordable rental housing for extremely low-income families, with up to ten percent of the funding available for similar eligible activities that support homeownership, and up to ten percent available for grantee administrative costs.

The Budget requests \$15 billion for Project-Based Rental Assistance (PBRA), of which \$400 million is requested as an advance appropriation to become available in 2024. The PBRA program assists approximately 1.2 million extremely low- to low-income households in obtaining decent, safe, and sanitary housing in private accommodations. PBRA serves families, elderly, and disabled households and provides transitional housing for the homeless through the McKinney-Vento SRO program. Through this funding, the Department of Housing and Urban Development (HUD) supports approximately 17,200 contracts with private owners of multifamily housing by paying the difference between a portion of a household's income and the approved market-based rent for a housing unit. The Budget continues to support the program's calendar year funding cycle and provides 12 months of funding for all contracts.

Program activities include the following:

**Contract Renewals and Amendments.**—These activities provide funding for HUD to renew expiring contracts and amend contracts that have not expired but require additional funding for HUD to meet remaining payment obligations. Appropriations for these activities are supplemented with recoveries of excess balances remaining on expired contracts that utilized less resources than anticipated during their initial terms. This appropriation includes \$60 million for the Rental Assistance Demonstration to further long-term financial stability and promote the energy or water efficiency or climate resilience of properties converting to project-based assistance.

**Contract Administrators.**—The Budget requests \$375 million for contract administration. This activity funds the local level administration of the

program through HUD agreements with performance-based contract administrators or other supportive services contractors.

**Rent Adjustments for Select Properties.**—For at-risk post-Mark to Market Section 8 properties and other PBRA properties with health and safety deficiencies, the budget includes \$275 million to allow budget-based rent adjustments to facilitate rehabilitation and sustainable operation of the properties, consistent with program requirements that the property rents remain at or below comparable market rents.

**Service Coordinators.**—This budget includes \$31 million to support budget based rent increases to cover the costs of service coordinators to help elderly residents stay healthy and age in place.

#### HOUSING FOR THE ELDERLY (INCLUDING TRANSFER OF FUNDS)

The Other Assisted Housing Programs account contains the programs listed below:

**Rent Supplement.**—Rent Supplement assistance payments support assisted units for qualified low-income tenants.

**Section 235.**—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181) authorized a restructured Section 235 (Homeownership Assistance) program that provided homeowners a ten-year interest reduction subsidy on their mortgages.

**Section 236.**—The Housing and Urban Development Act of 1968, as amended, authorized the Section 236 Rental Housing Assistance Program, which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants. Some Section 236 properties also have rental assistance contracts with the Department of Housing and Urban Development (HUD) through the Rental Assistance Payment (RAP) program.

In 2019, HUD converted the last remaining Rent Supplement and RAP properties to long-term, project-based Section 8 contracts, using the Rental Assistance Demonstration program.

The Flexible Subsidy Fund assisted financially troubled subsidized projects under certain Federal Housing Administration (FHA) authorities. The subsidies were intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source

of housing for low- and moderate-income tenants. Priority was given to projects with Federal insurance-in-force and then to those with mortgages that had been assigned to the Department.

The Green and Resilient Retrofit Program would provide funding to owners of Multifamily-assisted properties to rehabilitate these properties to be more energy and water efficient, healthier, and more resilient to extreme weather events. This increased investment will improve the stock of affordable housing available to many low- and extremely low-income families, often from marginalized communities. This program would support climate resilience, reduce the likelihood of catastrophic damage from future disasters, reduce energy and water consumption, and improve indoor air quality. The Budget requests \$250 million for grants and loans for properties currently assisted under Project-Based Rental Assistance, Housing for the Elderly, and Housing for Persons with Disabilities, including \$31.5 million for data collection and utility consumption benchmarking of properties across multifamily housing.

The Housing Counseling Assistance Program provides: 1) comprehensive housing counseling services to eligible homeowners and tenants through grants, oversight, and technical assistance; and 2) training to housing counselors and staff of government or non-profit entities that participate in HUD's Housing Counseling program. Eligible Housing Counseling program services include group education and individualized housing counseling on pre- and post-purchase homeownership budgeting and financial management, reverse mortgage counseling, homelessness prevention, rental counseling, and avoiding discrimination, foreclosure, and eviction. The objectives of the Housing Counseling program include overcoming barriers to stable and affordable housing; expanding sustainable homeownership and rental opportunities; preventing foreclosure and eviction; and deterring discrimination, scams, and fraud.

The Budget includes \$65.9 million for this program, of which \$61 million is intended to fund grants to HUD-approved Housing Counseling agencies for direct services and to develop training for HUD-approved housing counselors.

The Federal Housing Administration (FHA) provides mortgage insurance for the purchase, refinance and rehabilitation of single-family homes. FHA mortgage insurance is designed to encourage lenders to make credit available to borrowers whom the conventional market does not adequately serve, including first-time homebuyers, minorities, lower-income families and residents of underserved areas (central cities and rural areas). Historically, FHA has also provided countercyclical support in times of economic crisis. For budgetary purposes, the Mutual Mortgage Insurance (MMI) Fund is separated into three risk categories: forward loans, Home Equity Conversion Mortgages (HECMs), and a proposed Home Equity Accelerator Loan (HEAL) pilot. Forward programs guarantee loans for standard single-family purchases and refinances (Section 203(b) program), home improvements (Section 203(k) program) and condominiums. HECMs, also known as reverse mortgages, enable elderly homeowners to borrow against the equity in their homes without having to make repayments during their lifetime. HEAL, a new positive subsidy pilot, would offer loan products designed to lower barriers to homeownership for first-generation and/or low-wealth first-time homebuyers.

The Budget requests \$165 million for the MMI Program account. This includes \$150 million in administrative expenses to support a range of FHA functions, such as loan underwriting, claims processing and risk

monitoring. Additionally, the Budget provides \$15 million in credit subsidy for the new HEAL pilot.

The Budget also requests a limitation of \$400 billion on loan guarantees for the MMI Fund. The Budget projects insurance of \$225 billion in forward mortgages, \$26.4 billion in HECMs, and \$3.4 billion in HEAL pilot loans, with additional commitment authority available in case these amounts are exceeded during execution.

The Capital Reserve account is the ultimate depository for all net budgetary resources collected by MMI Fund programs. Negative credit subsidy receipts from new loan guarantees and downward reestimates, as well as interest earnings on Treasury investments, are recorded in this account. This account has no authority to obligate funds, but transfers balances of budget authority as necessary to the MMI Program account for the cost

of upward credit subsidy reestimates and the MMI Liquidating account for obligations of that account.

The HOPE for Homeowners program was created by the Housing and Economic Recovery Act of 2008 to help homeowners at risk of default and foreclosure refinance into affordable, sustainable loans. Under the program, eligible homeowners refinanced their current mortgage loans into a new mortgage insured by FHA. The program ended on September 30, 2011. In 2016, excess HOPE Bond proceeds in the amount of \$455 million were transferred to the HOPE Reserve Fund, and used to retire the HOPE Bonds. Remaining HOPE Bond activity is shown in the HOPE Reserve Fund.

The Federal Housing Administration's General Insurance and Special Risk Insurance (GI/SRI) programs provide mortgage insurance for a variety of purposes, including financing for the development and rehabilitation of multifamily housing, residential care facilities, and hospitals. The Budget requests a limitation of \$35 billion on loan guarantees for the GI/SRI Fund. GI/SRI's mortgage insurance programs are designed to operate without the need for subsidy appropriations, with fees set higher than anticipated losses. Therefore, the Budget does not request an appropriation of new credit subsidy funds.

GI/SRI programs guarantee loans at 100 percent, with three exceptions where other parties guarantee a portion of the loan: Housing Finance Agency Risk Sharing, Qualified Participating Entity Risk Sharing, and Federal Financing Bank Risk Sharing.

to offset the expenses incurred by the Department in carrying out the responsibilities under the authorizing legislation. The Budget proposes to fully fund the \$14 million cost of authorized activities with these fees.

Thirty-three States participate in the program under Department of Housing and Urban Development (HUD) approved State compliance plans and are partially reimbursed by HUD for their activities. HUD administers a compliance program for the remaining 17 States. HUD coordinates the Manufactured Housing Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards and regulations. HUD also develops and implements model standards for installation of manufactured housing, as well as an installation enforcement program. HUD administers installation enforcement programs in 14 States and oversees HUD-approved programs in 36 States. Finally, HUD administers a dispute resolution program for manufactured housing homeowners, retailers, installers, and manufacturers in 24 States and oversees HUD-approved dispute resolution programs in 26 States.

To address the critical shortage of affordable housing in communities throughout the Nation, the Budget proposes \$50 billion in mandatory funding and additional Low-Income Housing Tax Credits to address market

gaps, increase housing supply, and help to stabilize housing prices over the long-term. In HUD specifically, the proposal includes a new \$35 billion Housing Supply Fund. The Fund will contain \$25 billion for affordable housing production grants to state and local housing finance agencies and their partners to provide grants, revolving loan funds, and other streamlined financing tools. The Fund will also provide \$10 billion in grants to advance state and local jurisdictions' efforts to remove barriers to affordable housing development, including funding for housing-related infrastructure.

**GOVERNMENT NATIONAL MORTGAGE ASSOCIATION**

The Government National Mortgage Association (GNMA) was established by Federal charter in 1968. It is a wholly-owned Government corporation within HUD. It was established to support Federal housing initiatives by providing liquidity to the secondary mortgage market and to attract capital from the global capital markets for the Nation's mortgage markets. Its primary function is to guarantee the timely payment of principal and interest on mortgage-backed securities (MBS) that are backed by loans insured or guaranteed by FHA, the Department of Veterans Affairs, Rural Development in the Department of Agriculture, and HUD's Office of Public and Indian Housing.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the Department of Housing and Urban Development's (HUD) mission. These functions are carried out by HUD's Office of Policy Development and Research (PD&R) through in-house analysis by staff; contracts with industry, nonprofit research organizations, and educational institutions; and cooperative agreements with educational, governmental, and philanthropic entities. In addition, centralized technical assistance for the Department is supported through this account; these funds enable HUD to support its partners with better coordinated, cross-program technical assistance rather than conventional, program-specific assistance.

The Budget requests \$145 million for HUD's Research and Technology (R&T) program. R&T investments support HUD's enterprise-wide commitment to integrate evidence and cross-disciplinary intelligence throughout program policy, management, and operations. The request consists of \$70 million for core research support, surveys, data infrastructure, and knowledge management (i.e., research dissemination); \$25 million for research, evaluations, and demonstrations; and \$50 million for technical assistance.

The Budget requests \$86 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$26 million is for the Fair Housing Assistance Program (FHAP); \$56 million is for the Fair Housing Initiatives Program (FHIP); \$3 million is for the National Fair Housing Training Academy (NFHTA); and \$1 million is for the Limited English Proficiency Initiative (LEPI).

FHAP provides funding to State and local agencies to assure prompt and effective processing of complaints under substantially equivalent State and local fair housing laws. To be eligible for assistance through FHAP, an agency must administer a fair housing law that HUD has certified as substantially equivalent to the Federal Fair Housing Act.

FHIP provides funding to States and local governments, and to public and private non-profit organizations, that administer programs to prevent or eliminate discriminatory housing practices through enforcement, education, and outreach. These grants allow the organizations to provide fair housing enforcement through testing in the rental and sales markets, to file fair housing complaints to HUD, and to conduct investigations. Further, the education and outreach activities these organizations conduct also help to educate the public, housing providers, and local governments about their rights and responsibilities under the Fair Housing Act.

The NFHTA provides comprehensive fair housing and civil rights training for investigators, local agencies, educators, attorneys, industry representatives, and other housing industry professionals.

LEPI provides funds for oral interpretation and written translation services, which help make HUD programs and activities accessible to people who are not proficient in English.

The primary purpose of the Lead-Based Paint Hazard Control Grant program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program plays a critical role in addressing the number one environmental disease impacting children: lead poisoning. The Budget requests \$400 million, including \$305 million for the Department of Housing and Urban Development's (HUD) Lead Hazard Control Grants and Lead Hazard Reduction Demonstration Program; \$85 million for the Healthy Homes Program, of which \$10 million will be for safety and functional home modification repairs and renovations for low-income elderly homeowners; \$5 million for a radon testing and mitigation demonstration program; and \$5 million for lead-based paint technical studies and support. The Budget includes an appropriations provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed competitive programs to other competitive programs experiencing oversubscription.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$5 million to State and local governments and Indian Tribes for control of lead-based paint hazards in pre-1978 private unassisted rental and owner-occupied housing of low-income families. The grants are also designed to facilitate the development of a housing maintenance and rehabilitation workforce trained in lead-safe work practices and a certified hazard evaluation and control industry. In awarding grants HUD promotes the use of new low-cost approaches to hazard control that can be replicated across the nation.

The Healthy Homes program enables HUD to assess and control housing-related hazards that contribute to diseases and injuries of children and other vulnerable populations. With funding from this program, grantees implement and evaluate methods for controlling two or more housing-related diseases through a single intervention. Healthy Homes funding is also used to provide technical support and training and assist in the completion of national surveys and other studies. In addition, the program conducts education and outreach to help State, local and non-governmental agencies, housing industry stakeholders, and the public understand the health and housing relationship and identify and address housing-related health and safety hazards.

The Office of Lead Hazard Control and Healthy Homes will continue its lead-based paint technical studies and support activities, which include public education; support for State and local agencies, private property owners, HUD programs and field offices, and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards,

technical guidance, regulations, and improved testing and hazard control methods.

*SEC. 204. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of the Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal Home Loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1).*

*SEC. 205. Corporations and agencies of the Department of Housing and Urban Development which are subject to the Government Corporation Control Act are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accordance with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of such Act as may be necessary in carrying out the programs set forth in the budget for 2023 for such corporation or agency except as hereinafter provided: Provided, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriations Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government.*

*SEC. 206. *(b) PHASED TRANSFERS.—Transfers of project-based assistance under this section may be done in phases to accommodate the financing and other requirements related to rehabilitating or constructing the project or projects to which the assistance is transferred, to ensure that such project or projects meet the standards under subsection (c).*

*(c) The transfer authorized in subsection (a) is subject to the following conditions:*

*(1) NUMBER AND BEDROOM SIZE OF UNITS.—*

(8) If the transferring project meets the requirements of subsection (d)(2), the owner or mortgagor of the receiving project or projects shall execute and record either a continuation of the existing use agreement or a new use agreement for the project where, in either case, any use restrictions in such agreement are of no lesser duration than the existing use restrictions.

(9) The transfer does not increase the cost (as defined in section 502 of the Congressional Budget Act of 1974 (2 U.S.C. 661a)) of any FHA-insured mortgage, except to the extent that appropriations are provided in advance for the amount of any such increased cost.

The Secretary is authorized to transfer up to 10 percent or \$5,000,000, whichever is less, of funds appropriated for any office under the headings "Administrative Support Offices" or "Program Offices" to any other such office: Provided, That the Secretary shall provide notification to the House and Senate Committees on Appropriations three business days in advance of any such transfers: Provided further, That no appropriation for any such office shall be increased or decreased by more than 10 percent or \$5,000,000, whichever is less, unless such Committees are notified in writing ten business days in advance of any such transfers.

(c)

(1) Within 15 days of the issuance of the Real Estate Assessment Center ("REAC") inspection, the Secretary shall provide the owner with a Notice of Default with a specified timetable, determined by the Secretary, for correcting all deficiencies. The Secretary shall provide a copy of the Notice of Default to the tenants, the local government, any mortgagees, and any contract administrator. If the owner's appeal results in a UPCS score of 60 or above, the Secretary may withdraw the Notice of Default.

(2) At the end of the time period for correcting all deficiencies specified in the Notice of Default, if the owner fails to fully correct such deficiencies, the Secretary may—

(A) require immediate replacement of project management with a management agent approved by the Secretary;

(d) The Secretary shall take appropriate steps to ensure that project-based contracts remain in effect, subject to the exercise of contractual abatement remedies to assist relocation of tenants for major threats to health and safety after written notice to the affected tenants. To the extent the Secretary determines, in consultation with the tenants and the local government, that the property is not feasible for continued rental assistance payments under such section 8 or other programs, based on consideration of—

(1) the costs of rehabilitating and operating the property and all available Federal, State, and local resources, including rent adjustments under section 524 of the Multifamily Assisted Housing Reform and Affordability Act of 1997 ("MAHRAA"); and

(2) environmental conditions that cannot be remedied in a cost-effective fashion, the Secretary may contract for project-based rental assistance payments with an owner or owners of other existing housing properties, or provide other rental assistance.

(e) The Secretary shall report quarterly on all properties covered by this section that are assessed through the Real Estate Assessment Center and have UPCS physical inspection scores of less than 60 or have received an unsatisfactory management and occupancy review within the past 36 months. SEC. 234. MARK-TO-MARKET AMENDMENTS. The Multifamily Assisted Housing Reform and Affordability Act of 1997 (42 U.S.C. 1437f note) is amended—

(a) in section 515, by adding at the end the following new subsection:

"(d) RENT ADJUSTMENTS AND SUBSEQUENT RENEWALS. After the initial renewal of a section 8 contract pursuant to this section and notwithstanding any other provision of law or contract regarding the adjustment of rents or subsequent renewal of such contract for a project, including such a provision in section 514 or this section, in the case of a project subject to any restrictions imposed pursuant to sections 514 or this section, the Secretary may, not more often than once every 10 years, adjust such rents or renew such contracts at rent levels that are equal to the lesser of budget-based rents or comparable market rents for the market area upon the request of an owner or purchaser who—

"(1) demonstrates that—

"(A) project income is insufficient to operate and maintain the project, as determined by the Secretary; or

"(B) the rent adjustment or renewal contract is necessary to support commercially reasonable financing (including any required debt service coverage and replacement reserve) for rehabilitation necessary to ensure the long-term sustainability of the project, as determined by the Secretary; and

"(2) agrees to—

"(A) extend the affordability and use restrictions required under 514(e)(6) for an additional twenty years; and

"(B) enter into a binding commitment to continue to renew such contract for and during such extended term, provided that after the affordability and use restrictions required under 514(e)(6) have been maintained for a term of 30 years:

"(i) an owner with a contract for which rent levels were set at the time of its initial renewal under section 514(g)(2) shall request that the Secretary renew such contract under section 524 for and during such extended term; and

"(ii) an owner with a contract for which rent levels were set at the time of its initial renewal under section 514(g)(1) may request that the Secretary renew such contract under section 524.";

(b) in section 524, by adding at the end the following new subsection:

"(h) RENT ADJUSTMENTS TO ADDRESS DISTRESS. In the case of a section 8 contract that will be eligible for renewal under this section when it expires or terminates, notwithstanding any provision of contract or law regarding the adjustment of rents, including such a provision in this section, the Secretary may adjust such rents, subject to the availability of funds for such rent adjustments, to rent levels that are equal to the lesser of budget-based rents or comparable market rents for the market area at the request of an owner or purchaser who demonstrates that such rent adjustment is needed to address project health and safety deficiencies and that—

"(1) project income is insufficient to operate and maintain the project, as determined by the Secretary; or

"(2) the rent adjustment is necessary to support commercially reasonable financing (including any required debt service coverage and replacement reserve) for rehabilitation necessary to ensure the long-term sustainability of the project, as determined by the Secretary."; and

(c) in section 579, by striking "October 1, 2022" each place it appears and inserting in lieu thereof "October 1, 2027".

SEC. 235. Notwithstanding any other provision of law, if the Secretary determines, for any prior formula grant allocation administered by the Secretary under a program under the headings "Public and Indian Housing", "Community Planning and Development", or "Housing Programs" in this title, that a recipient received an allocation greater than the amount such recipient should have received for a formula allocation cycle pursuant to applicable statutes and regulations, the Secretary may adjust for any such funding error in the next applicable formula allocation cycle by—

(a) offsetting each such recipient's formula allocation (if eligible for a formula allocation in the next applicable formula allocation cycle) by the amount of any such funding error; and

(b) reallocating any available balances that are attributable to the offset to the recipient or recipients that would have been allocated additional funds in the formula allocation cycle in which any such error occurred (if such recipient or recipients are eligible for a formula allocation in the next applicable formula allocation cycle) in an amount proportionate to such recipient's eligibility under the next applicable formula allocation cycle formula;

Provided, That all offsets and reallocations from such available balances shall be recorded against funds available for the next applicable formula allocation cycle: Provided further, That the term "next applicable formula allocation cycle" means the first formula allocation cycle for a program that is reasonably available for correction following such a Secretarial determination: Provided further, That if, upon request by a recipient and giving consideration to all Federal resources

available to the recipient for the same grant purposes, the Secretary determines that the offset in a next applicable formula allocation cycle would critically impair the recipient's ability to accomplish the purpose of the formula grant, the Secretary may adjust for the funding error across two or more formula allocation cycles.

SEC. 236. Public housing agencies may not renew rental assistance contracts under the moderate rehabilitation program under section 8(e)(2) of the United States Housing Act of 1937 (42 U.S.C. 1437f(e)(2)) or the moderate rehabilitation single room occupancy program under section 441 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11401) after September 30, 2027.

## LAND AND MINERALS MANAGEMENT

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on approximately 245 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of on-shore Federal mineral estate underlying the BLM and other surface ownerships. In addition, the BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by the BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of the BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

**Land resources.**—Provides for the integrated management of public land resources, including forestry, rangeland, and cultural resources, as well as wild horses and burros.

**Wildlife and aquatic habitat management.**—This activity encompasses programs that provide for the maintenance, improvement, or enhancement of wildlife habitats; the protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species; as well as the management of water resources and riparian and wetlands areas, as part of the management of public lands and ecosystems.

**Recreation management.**—Provides for management and protection of recreational resource values, designated and potential wilderness areas, visitor services, and collection and expenditure of recreation user fees.

**Energy and minerals management.**—Provides for the management of: onshore oil, gas, and coal in line with the requirements of Executive Orders 13990 and 14008; renewable energy resources such as wind, solar, and geothermal energy; other leaseable minerals and mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. These programs also address needed remediation and reclamation of abandoned or orphaned oil and gas wells on BLM lands. The 2023 Budget continues to fund oil and gas management activities through a combination of direct appropriations and permanent appropriations authorized by the National Defense Authorization Act of 2015. The 2023 Budget proposes to offset the costs of oil and gas inspection activities through revenue from new inspection fees similar to those already in place for offshore operations.

**Realty and ownership management.**—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands.

**Communication site management.**—This program grants and administers authorizations for communications sites; develops site management plans to guide users and analyze the impacts of communication structures on the sites and the surrounding lands; and conducts facility compliance inspections. Program costs are expected to be fully offset by site rental fees in 2023.

**Resource protection.**—Provides for management of the land use planning and National Environmental Policy Act processes, including assessment and monitoring activities. Also ensures the health and safety of users of the public lands through remediation of abandoned mine lands and protection from criminal and other unlawful activities; mitigation of the effects of hazardous material and/or waste and physical safety hazards.

**Transportation and facilities management.**—Provides for construction and maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment. The Bureau of Land Management funds all construction and deferred maintenance projects from this activity, including those on the Oregon and California grant lands.

**National Conservation Lands.**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations in the National Conservation Lands. The program provides for the recurring operational (base) budgets of these units.

**Workforce and organizational support.**—Provides for the management of bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, information technology, and fixed costs.

**Mining law administration.**—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2023.

Funding requested in this account will complement the Civilian Climate Corps and will develop the next generation of conservation workers and create a new pathway to good-paying jobs.

**Western Oregon resources management.**—Provides for the management of approximately 2.4 million acres of lands that are primarily forested ecosystems in western Oregon. These lands support a number of resource activities including timber management, grazing management, and recreation management. In support of these activities, the Bureau of Land Management (BLM) is involved in improving critical watersheds, restoring wildlife and fish habitat, providing recreation opportunities, and preserving cultural resources.

**Western Oregon information and resource data systems.**—Provides for the acquisition, operation, and maintenance of the automated data support systems and spatial data systems required for management of the Oregon and California programs.

**Western Oregon transportation and facilities maintenance.**—Provides for annual maintenance activities of the transportation system, office buildings, warehouse and storage structures, shops, greenhouses, and recreation sites necessary to assure public safety and effective management of the lands in western Oregon. The BLM funds deferred maintenance projects on Oregon and California Grant Lands from the Management of Lands and Resources appropriation.

**Western Oregon acquisition.**—Provides for the necessary acquisition of easements and road-use agreements to facilitate timber sale and administrative site access for general resource management purposes and for monitoring and fee collection of timber hauling on government controlled roads. This activity also provides for transportation planning, survey, and design of access and other resource management roads.

**Western Oregon National Conservation Lands.**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations on the National Conservation

Lands. The program provides for the recurring operational (base) budgets of these National Conservation Lands units.

Beginning in 2021, BLM land acquisition is funded with permanent appropriations through the Land and Water Conservation Fund. The 2023 budget invests funding in projects that substantially conserve or protect against threats to resources, improve public access to outdoor recreation opportunities, and have strong local partner engagement and support.

## Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair the Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect rental charges from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—The Forest Ecosystems Health and Recovery Fund was established as a permanent appropriation in the FY 1993 Interior Appropriations Act (Public Law 102–381). This authority was subsequently amended to temporarily expand the use of the Fund to cover additional forest health and recovery activities. A five-year reauthorization of the FEHRF was included in the FY 2015 Consolidated and Further Continuing Appropriations Act (Public Law 113–235) and expired at the end of FY 2020. The Consolidated Appropriations Act, 2021 (Public Law 116–260) included a one-year extension of the authority for the FEHRF to continue to be used for the broader forest health and recovery activities. The FY 2023 President's budget proposes a one-year extension of this authority (through September 30, 2023). Without this

reauthorization, funds in the FEHRF could only be used for the limited purposes provided for in the original FEHRF authorization. Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to Public Law 102–381, as amended, this account was established to allow the BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including vegetation and density control treatments.

*Timber sale pipeline restoration fund.*—This Fund provides for the deposit and use of fees collected by the BLM for sales of timber authorized by section 2001(k) of Public Law 104–19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by the BLM, and 25 percent is to be used to address recreation projects on the BLM lands.

*Stewardship contract product sales.*—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. With stewardship contracting, the BLM may apply the value of timber or other forest products removed as an offset against the cost of services received, and monies from a contract may be retained by the BLM. These monies are available for expenditure without further appropriation at project sites.

*Expenses, road maintenance deposits.*—Users of certain roads under the BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. All recreation fee receipts collected under this authority at BLM sites are deposited in the Recreation Fee account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The budget proposes appropriations language to extend the program through October 1, 2024.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to the Southern Nevada Public Land Management Act (SNPLMA) (Public Law 105–263), 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

*Lincoln County Land Sales Act.*—Public Law 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an interest bearing account available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*White Pine County Land Sales Act.*—Public Law 109–432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an account available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, pre-

paration of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No 2.*—The 2005 Energy Policy Act established this Fund for environmental investigation and restoration on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account. In 2008, it was certified that sufficient funds had been collected to cover the cost of the cleanup and other expenses and no more deposits were to be made to the Fund. New revenue from site operations is distributed under the Mineral Leasing Act.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act, as amended by the National Defense Authorization Act for Fiscal Year 2015, established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this Fund and used to facilitate the BLM oil and gas permit processing in these pilot offices. In addition, in 2016 through 2026, fees collected for processing applications for permits to drill will be deposited to this Fund and available for Federal oil and gas permitting activities.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, Public Law 106–248 (114 Stat. 613), provided authority for the BLM to sell public lands classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior and the U.S. Forest Service. The Federal Land Transaction Facilitation Act was permanently reauthorized by Public Law 115–141, the 2018 Consolidated Appropriations Act.

*Owyhee Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1039), provides that the Secretary may sell public land located within the Boise District of the BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to certain wilderness areas.

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land, in or adjacent to certain wilderness areas.

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1114), requires Carson City, Nevada to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse the BLM for administrative expenses.

*Ojito Land Acquisition.*—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

## Miscellaneous permanent payments include:

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (as amended by P.L. 116–93, the Further Consolidated Appropriations Act, 2020), provides annual revenue sharing payments to the 18 O&C counties. These payments are derived from revenues from Federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The Infrastructure Investment and Jobs Act, P.L. 117–58, amended the Secure Rural Schools and Community Self-Determination Act to extend SRS payments through 2023, with the final payment in 2024. In the absence of this authority, eligible counties would receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute would be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and would be roughly 75 percent of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc., public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc., public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within

grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau of Land Management (BLM), 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent).

Public Law 105–263, as amended by Public Law 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and the BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region, Incorporated Account.*—This account received funding appropriated by section 9102 of the 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

*State 5 Percent Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86–777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), Public Law 104–273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of 2014. The Helium Stewardship Act of 2013 (HSA), Public Law 113–40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium will be reserved for Federal users. Additionally, pursuant to HSA BLM transferred all assets for disposal to the General Services Administration (GSA) at the end of FY 2021. The GSA, following its disposal process, will complete marketing, asset valuation, and dispose of all assets on or before September 30, 2023.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). BOEM's work supports Administration efforts, including creating good paying jobs as the Nation transitions to a clean energy future, advancing energy security, and supporting economic prosperity and the reliability and affordability of domestic clean energy. BOEM oversees development of renewable energy resources such as offshore wind, wave and ocean currents; vast deposits of oil and natural gas; and non-energy minerals. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. To carry out this mission, BOEM: supports renewable energy leasing and development; provides OCS oil and gas planning, leasing and oversight, including inventories of oil and gas reserves, resource and economic evaluation, review and administration of oil and gas exploration and development plans, geological and geophysical (G&G) permitting, and financial assurance and risk management; conveys sand and gravel resources; and conducts National Environmental Policy Act (NEPA) analysis and environmental studies.

The Ocean Energy Management account includes the following budget activities: Renewable Energy, Conventional Energy, Marine Minerals, Environmental Programs, and Executive Direction.

**Renewable Energy.**—Supports the Administration's commitment to deepen and diversify the Nation's energy portfolio by accelerating offshore renewable energy production in response to EO 14008. Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; competitive and noncompetitive leasing actions; review of site assessment plans, and construction and operations plans; and consultation with Tribal Nations, State and local governments, Federal agencies, and other stakeholders.

**Conventional Energy.**—Manages OCS oil and gas development in line with the requirements of Executive Orders 13990 and 14008. BOEM activities include: developing the National OCS Oil and Gas Leasing Program; implementing the lease sale process; administering leases; protecting the Federal Government from financial risks related to natural resource development; reviewing exploration and development plans and geological and geophysical permit applications; developing and maintaining the OCS cadastre; and conducting technical and economic resource evaluation and fair market value determination. In conducting these activities, BOEM fosters environmental justice; actively involves Tribal Nations, the public and stakeholders; and addresses the challenges posed by climate change.

**Marine Minerals.**—Manages non-energy minerals on the OCS and conveys, on a noncompetitive basis, the rights to those resources to Federal, State, and local government agencies for shore protection, beach and wetlands restoration projects, or for use in construction projects funded or authorized by the Federal Government. Facilitates access to and manages these crucial OCS resources to support resilient coasts, natural disaster preparedness, and protection of shoreline infrastructure vital to the Nation's security, economy, and ecosystems. Funding supports mineral resource exploration and leasing activities, coordination with governmental partners, engagement of stakeholders, and scientific research to improve decision-making and risk management.

**Environmental Programs.**—Advances Administration priorities by ensuring that science and environmental protection are foremost considerations

in BOEM decision-making, fostering conservation of natural and cultural resources, combating climate change, and advancing environmental justice. Informs decision-makers and the public about the potential impacts of OCS energy and mineral activities on the marine, coastal, and human environment. Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with the National Environmental Protection Act, the OCS Lands Act, and numerous other environmental statutes, regulations, and executive orders. Funding supports scientific research needed to inform policy decisions regarding energy and mineral development on the OCS.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communication strategies, outreach, and regulatory development. This includes budget management, administrative services management, bureau-wide information technology management and governance, congressional and public affairs, policy analysis, regulations, overseeing official documents, international affairs, and Freedom of Information Act activities.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to ensure the safe and environmentally responsible exploration, development, production, and conservation of the Nation's offshore energy resources. BSEE uses its full range of authorities, policies, and tools to ensure safety, oil spill preparedness, environmental stewardship, and appropriate development of offshore oil, natural gas, and renewable energy resources. The Bureau continues to improve its mission processes and staff capabilities to keep pace with the continued innovation in Outer Continental Shelf (OCS) exploration and production. To fulfill its mission, BSEE must adapt and respond to changes in both the renewable energy and oil and gas sectors throughout the lifecycle of offshore energy development. BSEE is committed to continually improving the effectiveness of its safety management systems program and compliance assurance functions such as the inspection program, enhancing its permitting processes around greater quality assurance and consistency, ensuring high levels of preparedness in the event of oil spills, and addressing requirements for an expanded OCS renewable energy program. BSEE's work supports Administration efforts to create good paying jobs as the Nation transitions to a clean energy future. The Offshore Safety and Environmental Enforcement (OSEE) account is BSEE's primary operating account and funds the following activities: Operations, Safety, and Regulation; Environmental Enforcement; Administrative Operations; Executive Direction; and Offshore Decommissioning.

**Operations, Safety, and Regulation.**—Funds reviews of OCS oil and gas permit applications and offshore wind industry submittals; inspections of OCS facilities, including critical high-risk activities; offshore operator oil spill planning and preparedness compliance; investigations; enforcement; audit programs; annual operator performance reviews; verification of oil and gas production levels to help ensure the public receives a fair return; research supporting the analysis of emerging technologies, standards and regulatory review and development activities; and technical training.

**Environmental Enforcement.**—Funds environmental compliance staff and operational support required to: manage compliance verification and enforcement of environmental standards placed on OCS operations; ensure BSEE's compliance with NEPA, the Endangered Species Act (ESA), and the National Historic Preservation Act (NHPA) for Bureau permitting; conduct specialized inspections of air and water quality requirements, and other environmental mitigation measures; and oversee coordination and engagement for Tribal consultation requirements, and other environmental Acts, regulations, and policies.

**Administrative Operations.**—Funds general administration programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. BSEE also provides administrative services, such as human resources, procurement,

and finance, to the Bureau of Ocean Energy Management (BOEM) and other entities within the Department on a reimbursable basis.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. This includes functions such as budget, congressional and public affairs, and policy and analysis.

**Offshore Decommissioning.**—Funds according to regulatory standards, the proper maintenance, monitoring, and decommissioning of orphaned wells, pipelines, and structures left on the OCS for which there is no remaining liable party.

**Environmental protection.**—This activity funds functions that directly contribute to ensuring the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs in States without their own regulatory program and on Federal and Indian lands, as well as Federal oversight of the State regulatory programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides training and technical tools, such as the Coal Information Management System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

**Financial management.**—This activity provides resources for managing, accounting, processing collections, and pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations. This activity also includes accounting for and reporting on grants awarded to States and Tribes for regulatory purposes.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

**Environmental restoration.**—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects and for the evaluation of State and tribal reclamation programs that now receive mandatory funding for reclamation activities. This activity also provides for the operation of Federal reclamation programs for activities in those States without their own reclamation programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills States and Indian Tribes need to operate their reclamation programs. The Office of Surface Mining Reclamation and Enforcement (OSMRE) provides training and technical assistance on mining and reclamation-related problems.

**Financial management.**—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. The OSMRE seeks to maximize voluntary compliance with the Surface Mining Control and Reclamation Act's reclamation fee provisions. This activity also includes accounting for and reporting on grants awarded to States and Tribes for reclamation activities.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

Funds in this account support the Administration's efforts to address the needs of coal communities by reclaiming formerly mined lands so that they can be repurposed for beneficial economic uses, providing local, good-paying union jobs for skilled technicians and operators in some of the hardest hit communities in the Nation. The Budget provides \$115 million for the AML Economic Revitalization grant program to support Appalachian States and qualified Tribes with AML reclamation in conjunction with economic and community development activities.

The Surface Mining Reclamation and Enforcement Act of 1977 (30 U.S.C. 1243), as amended by the Tax Relief and Health Care Act of 2006 (Public Law 109–432), the Bipartisan Miners Act of 2019 (Division M of Public Law 116–94), and the American Miner Benefits Improvement Act of 2020 (Division Y of Public Law 116–260), authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, and to the 1974 UMWA Pension Plan, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the health benefit plans; unobligated balances in the Fund are used to generate interest for this purpose.

## WATER AND SCIENCE

## BUREAU OF RECLAMATION

Appropriations to the Bureau of Reclamation are made from the General Fund and from certain special funds in the Treasury. Projects funded from the General Fund include the Colorado River Basin Project and the Colorado

River Storage Project, among others. Special funds include the Reclamation Fund, the Central Valley Project Restoration Fund, the Colorado River Dam Fund, and the Recreation, Entrance, and User Fee account. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act.

Of the Bureau's special funds, the Reclamation Fund consists of repayments and other revenues from water and power users; receipts from the sale, lease, and rental of Federal lands; and certain oil and mineral revenues. It can finance program activities authorized under "Reclamation Law" that directly benefit the 17 Western States. The Central Valley Project Restoration Fund consists of revenues from project beneficiaries. The Colorado River Dam Fund generates revenue from the sale of Boulder Canyon Project power.

The Water and Related Resources account supports the development, management, and restoration of water and related resources in the 17 Western States. The account includes funds to operate, maintain, and rehabilitate existing water and power facilities; protect public safety; conduct studies and perform work to improve the reliability of water and related resources; and provide financial assistance for various projects, water conservation, and fish and wildlife activities. Work funded through the account will support environmental justice for communities that have been left behind.

Work is done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.

The 2023 President's Budget Request proposes legislation to address the ongoing Operation, Maintenance, and Repair requirements associated with four enacted Indian Water Rights Settlements managed by the Bureau of Reclamation. These annual requirements are associated with the Ak Chin Indian Water Rights Settlement Project, the Animas-La Plata Project (Colorado Ute Settlement), the Columbia and Snake River Salmon Recovery Project (Nez Perce Settlement), and the Navajo-Gallup Water Supply Project.

The proposal provides \$34.0 million annually over ten years to cover these requirements. Funds would be deposited into the Indian Water Rights Settlement Completion Fund and shall transfer to the Bureau of Reclamation for implementation.

This fund was established to carry out the provisions of the Central Valley Project Improvement Act—to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley Project area of California. Resources are derived from donations, revenues from voluntary water transfers, and tiered water pricing. The account is also financed through additional mitigation and restoration payments collected on an annual basis from project beneficiaries.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the settlement for the National Resources Defense Council et al. v. Rodgers lawsuit. The settlement's two primary goals are: 1) to restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) to reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The U.S. Geological Survey (USGS) monitors, analyzes, and predicts current and evolving Earth-system interactions and delivers actionable information at scales and timeframes relevant to decision makers. USGS provides science about natural hazards, natural resources, ecosystems and environmental health, and the effects of climate and land-use change.

**Ecosystems.**—The USGS Ecosystems Mission Area is the biological research arm of Interior and provides science to ensure America's ecosystems are managed sustainably and biological resources in wild and urban spaces are conserved now and into the future. Scientists examine the consequences of climate and environmental change, effects of management actions on communities, lands and species, and risks of and solutions to harmful invasive species, wildlife diseases, and contaminants in the environment.

**Energy and Mineral Resources.**—The USGS Energy and Mineral Resources Mission Area is the Nation's primary source of impartial scientific information on domestic and global geologic resources and their supply chains. The Nation relies on a variety of energy and mineral resources to power homes and businesses and to manufacture products and technologies from phones to vehicles. The mission area conducts research on the full life cycle of these resources, including the Nation's domestic resources and global trade relationships; carbon storage potential and critical mineral supply chains essential to sustainable energy transitions; environmental and socioeconomic effects of geologic resource occurrence, extraction, use, wastes, and demands on water supplies; and supply, demand, and trade of mineral commodities. The mission area provides science to inform economic, technological, national security, and geopolitical strategies and decisions, as well as sustainable natural resource management and the development of infrastructure and new technologies.

**Natural Hazards.**—The USGS Natural Hazards Mission Area plays a critical role in providing policymakers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for improving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, geomagnetic storms, tsunamis, and wildfires. This mission area also includes USGS activities that characterize and assess coastal and marine hazards, processes, conditions, change, and vulnerability. The USGS Natural Hazards mission area works with partners and stakeholders to define and mitigate hazards risks,

build an understanding of natural hazard processes, and characterize potential impacts on human activity and health, the economy, and the changing environment.

**Water Resources.**—The USGS Water Resources Mission Area is the Nation's primary Federal source of information about water resources. To fulfill this responsibility, the USGS Water Resources mission area monitors and assesses the amount and characteristics of the Nation's water resources, assesses sources and behavior of contaminants in the water environment, and develops tools to improve management and understanding of water resources. This work supports Federal, State, tribal, and municipal government decisions in managing water resources for domestic, agricultural, commercial, industrial, recreational, and ecological uses; protects and enhances water resources for human health, aquatic health, and environmental quality; minimizes loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributes to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

**Core Science Systems.**—The USGS Core Science Systems Mission Area fulfills the USGS' role as the National civilian mapping agency—a 143 year legacy since its establishment in 1879. The USGS conducts detailed surveys and distributes high-quality and highly accurate topographic, geologic, hydrographic, and biogeographic maps and remotely sensed data and analyses to the public. Mapping accuracy enabled by cutting-edge technologies allows precise planning for: recreational use on public lands; collaborative conservation with Department of the Interior partners; critical mineral resource assessments; renewable energy development; transportation and pipeline infrastructure projects; urban planning and development; land change and flood prediction at regional, local, and neighborhood scales; emergency response; and hazards mitigation. The USGS Core Science Systems Mission Area is the Federal steward of this high-quality geospatial and remote sensing data, and provides access to the public through The National Map, the Federal GeoPlatform, the National Land Cover Database, the National Geologic Map Database, the USGS Earth Explorer, and the National Biogeographic Map, and the Protected Areas Database of the United States. The USGS also operates Landsat satellites and data systems necessary to understand, monitor, and detect changes that affect the Nation's natural and agricultural resources, economy, public safety and national security, and historical heritage.

**Science Support.**—The USGS Science Support Mission Area provides functions essential to support the USGS mission such as: scientific integrity processes; sharing and communicating science findings; purchasing science equipment and field supplies; executing science agreements with partners; contracting for support scientists and researchers; budget formulation; human resources; safety training; hazardous waste management; and information technology, which supports the scientific process and information management of scientific data. Science Support also provides bureau-wide executive direction and coordination, communication, business administration, and financial management.

**Facilities.**—The USGS Facilities Mission Area provides safe, functional workspace, laboratories, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and deferred maintenance and capital improvement for owned assets.

**Reimbursable Program.**—This program includes reimbursements from non-Federal sources (States, Tribes, and municipalities) for cooperative efforts; proceeds from the sale of copies of photographs and records and the sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. The USGS also receives reimbursements from other Federal agencies for mission-related work performed at the request of the financing agency.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species listed under the Endangered Species Act and work to make the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize potential conflicts between development projects and imperiled species.

**Habitat Conservation.**—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the Nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 567 refuges, waterfowl production areas in 212 counties managed by 38 wetland management districts, 49 wildlife coordination areas, and seven national monuments. The National Wildlife Refuge System administers this network of lands and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

**Conservation and Enforcement.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fish and Aquatic Conservation.**—The Fish and Aquatic Conservation Program consists of a network of 71 National Fish Hatcheries, one historic National Fish Hatchery, six Fish Health Centers, seven Fish Technology Centers, 51 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Cooperative Landscape Conservation.**—The Cooperative Landscape Program works with States to deliver conservation on a landscape scale and build collaborative approaches to conservation through coalitions with States and other partners.

**Science Support.**—Science Support provides funding for applied science directed at high impact questions of concern to management of fish and wildlife resources. This science provides information to inform resource management decisions to best manage species at healthy and sustainable levels.

**General Operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

## RESOURCE MANAGEMENT—Continued

Funding requested in this account will complement the Civilian Climate Corps and will develop the next generation of conservation workers and create a new pathway to good-paying jobs.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories, and to federally-recognized Tribes to stabilize, restore, enhance, and protect species and their habitats that are of conservation concern. For States, this is primarily through a formula-based apportionment. Additionally, a competitive program for States uses a merit-based process to fund outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. The Tribal Wildlife Grant program supports federally-recognized Tribes in the development and implementation of conservation programs for the benefit of wildlife and their habitats, including species of Tribal cultural or traditional importance.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. The U.S. Fish and Wildlife Service is not requesting discretionary funding for this account.

The Great American Outdoors Act (P.L. 116–152) makes funds deposited into the Land and Water Conservation Fund available for expenditure without further appropriation or fiscal year limitation while providing that the U.S. Fish and Wildlife Service shall submit to Congress detailed account, program, and project allocations made available under the statute.

**LANDOWNER INCENTIVE PROGRAM**

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113-264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation

of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. Territories for species and habitat conservation actions on non-Federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account have been financed by both the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the Cooperative Endangered Species Conservation Fund are subject to annual appropriations from Congress. The Great American Outdoors Act, enacted in 2020, provides mandatory funding for the Land and Water Conservation Fund (LWCF). The 2023 President's Budget proposes to allocate mandatory LWCF to support land acquisition activities associated with this program.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located, from the revenues resulting from the sale of products from

Service lands, less expenses for producing the revenue and activities related to revenue sharing. The 2023 Budget does not propose to supplement revenues with discretionary funding.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005.

Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program supports user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student intern and various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. Section 423 of Division G of the Consolidated Appropriations Act, 2021 (P.L. 116–260) extended FLREA through 2022. The 2023 budget includes appropriations language to extend FLREA through October 1, 2024.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Target Practice and Marksmanship Training Support Act (P.L. 116–17) amends the Pittman-Robertson Wildlife Restoration Act to define a public target range and offers States alternatives for funding specific activities related to public target ranges.

The Energy Policy Act (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed each year to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In 2011, administration of this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

*The Coastal Wetlands Planning, Protection, and Restoration Act* (16 U.S.C. 3951 et seq.).—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

*Boating Safety Programs.*—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

*Boating Infrastructure Improvement.*—Four percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer, or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the four percent shall be available for grants under either of the award processes referenced in this paragraph.

*National Outreach and Communications Programs.*—Two percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

*Grants to States.*—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The Infrastructure Investment and Jobs Act (P.L. 117-58) amends Section 3 and 4 of the Federal Aid in Sport Fish Restoration Act, changing the amounts available for administration and extending the funding authorization for Coastal Wetlands Planning, Protection, and Restoration Act, Boating Infrastructure Improvement, and the National Outreach and Communications program through FY 2026.

The National Park Service administers 423 units and over 85 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of funds for repair and rehabilitation, cyclic maintenance, cooperative restoration of the Everglades, and uses authorized by section 101122 of title 54, United States Code, which are available for two years. The FY 2023 Budget proposes all appropriations in this account be made available for two years. This account contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

**Resource stewardship.**—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

**Visitor services.**—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

**Park protection.**—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

**Facility operations and maintenance.**—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

**Park support.**—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The Visitor Experience Improvements Authority (VEIA) Revolving Fund provides for the administration of commercial services contracts, and related professional services contracts, for the operation and expansion of commercial visitor facilities and visitor services programs. This includes expenses necessary for the management, improvement, enhancement, operation, construction, and maintenance of commercial visitor services facilities. Funds will also be used to make payments for possessory interest and leasehold surrender interest in existing commercial services contracts awarded under separate authorities. VEIA is designated as a revolving fund pursuant to Title VII of the National Park Service Centennial Act of 2016 (P.L. 114-289). The authority provides the National Park Service with the tools to improve commercial visitor facilities and services. The Visitor Experience Improvement Authority expires on December 16, 2023. In order to continue executing the program, which was paused due to the impacts of the COVID-19 pandemic on the hospitality industry, the FY 2023 Budget proposes to extend the authority by two years to implement new regulations being promulgated by the NPS and to enter into and execute contracts.

The National Recreation and Preservation appropriation covers a broad range of activities relating to preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and guidelines; and the administration of technical and financial assistance to international, Federal, State, and local governments and private organizations. This appropriation is comprised of the following five budget activities:

**Natural Programs.**—Increases river and trail opportunities through Rivers, Trails, and Conservation Assistance, State and local technical assistance and Chesapeake Bay Gateways and Water Trails grants; creates river conservation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; manages the National Natural Landmark program; and provides technical assistance to State and local governments and transfers surplus real property to local governments for recreation uses.

**Cultural Programs.**—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; and advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training. This program activity also supports the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, the Native American Graves Protection and Repatriation Grants program, the 9/11 Memorial Act Grants program, and the American Indian and Native Hawaiian Art & Culture Grants. This activity also includes relevant grant administration funding.

**Environmental Compliance and Review.**—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

**International Park Affairs.**—Coordinates international assistance programs and the exchange and support functions that complement the Service's domestic role.

**Heritage Partnership Programs.**—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources.

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities:

**Line item construction.**—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

**Special programs.**—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

**Construction planning.**—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

**Construction program management and operations.**—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

**Management planning.**—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses permanent funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The Great American Outdoors Act (P.L. 116–152) makes funds deposited into the Land and Water Conservation Fund available for expenditure without further appropriation or fiscal year limitation while providing that the National Park Service shall submit to Congress detailed account, program and project allocations made available under the statute.

In addition, the Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from certain oil and gas leases in the Gulf of Mexico Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Consolidated Appropriations Act, 2021 (P.L. 116–260) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration per the statute.

## LAND ACQUISITION AND STATE ASSISTANCE—Continued

The Land Acquisition and State Assistance program is composed of the following budget activities:

**Federal land acquisition.**—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System.

**State conservation grants.**—Provides matching grants to States and local units of government for the acquisition and development of land and facilities that provide the public access to new opportunities to engage in outdoor recreation. The program includes both traditional formula and competitive grant programs for States.

**American Battlefield Protection Program.**—The American Battlefield Protection Program awards grants for the acquisition, modernization and restoration of American battlefields. The program supports the protection of battlefield lands associated with the Revolutionary War, the Civil War, and the War of 1812 and it aids State and local governments and non-profit organizations acquire or otherwise preserve these important cultural resources for recreational access and education.

**Recreation fee program.**—The National Park Service (NPS) and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). Section 423 of Division G of the Consolidated Appropriations Act, 2021 (P.L. 116–260) extended FLREA through 2022. The FY 2023 Budget includes appropriations language to extend authority for FLREA through October 1, 2024.

Net proceeds are used to provide benefits and services to the visitor throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Service-wide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation, and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108–447. The National Park Service Centennial Act (P.L. 114–289) established in the National Park Foundation, a Second Century Endowment for NPS projects and activities, funded through offsetting collections from the first \$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105–391.

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d–3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, Indian Tribes, and Historically Black Colleges and Universities. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks, and grants to preserve the sites and stories of the Civil Rights Movement.

*Park concessions franchise fees.*—Franchise fees for concessioner activities in the National Park System (NPS) are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The National Park Service Centennial Act (P.L. 114–289), establishes a new concessions contracting authority within NPS, which is described under the Visitor Experience Improvements Fund account.

**Concessions improvement accounts.**—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

**Park buildings lease and maintenance fund.**—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105–391.

**Operation and maintenance of quarters.**—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

**Filming and photography special use fees.**—In limited circumstances, the National Park Service may issue permits and retain associated fees to use park lands and facilities for commercial filming, still photography, and similar activities.

**Contributions to U.S. Park Police annuity benefits.**—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

**Delaware Water Gap, Route 209 Operations.**—The Delaware Water Gap National Recreation Area Improvement Act, section 4(b) of Public Law 109–156, as amended by Public Law 115–101, directs the Department of the Interior to establish a fee and permit program for the use of Highway 209 by commercial vehicles. All fees received are set aside in a special account and made available for the administration and enforcement of the program, including registering vehicles, issuing permits and vehicle identification stickers, and personnel costs. The FY 2023 Budget proposes to further amend section 4(b) of Public Law 109–156 by extending statutory authority through FY 2023.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to federally recognized Indian Tribes, Alaska Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust and treaty responsibilities and support tribal self-determination. The Budget reflects broad increases within this account, including to empower tribal communities, address the impacts of climate change, create economic opportunities, enhance public safety, and advance environmental justice for tribal communities that have been left behind.

This account covers expenses associated with the following activities:

**Tribal Government.**—This activity promotes the sovereignty of federally recognized Indian Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

**Human Services.**—This activity provides funding for social services, welfare assistance, and Indian Child Welfare Act programs. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to help protect children, the elderly, and disabled from abuse and neglect.

**Trust: Natural Resources Management.**—This activity provides for the management, development, and protection of Indian trust land and natural resource assets and related treaty rights. This activity also provides funding to address the impacts of climate change. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks, and energy and minerals.

**Trust: Real Estate.**—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

**Public Safety and Justice.**—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; implementation of the Violence Against Women Act; and facilities maintenance.

**Community and Economic Development.**—This activity promotes the economic vitality of American Indians and Alaska Natives through job placement and training, economic development, and community development programs.

**Executive Direction and Administrative Services.**—This activity supports the management of finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of General Services Administration rentals and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with federally recognized Indian Tribes to run tribal and Federal programs. Funding also supports BIA or Bureau of Indian Education oversight and technical assistance for these activities in the central and regional offices.

This appropriation was established in 1999 and received appropriations between 1999–2010 to fund a program to consolidate fractional interests in Indian lands. Funds were used to purchase small interests in parcels of land from willing individual Indian landowners and convey those interests to the Tribe on whose reservation the land is located. Current funding activity in this account reflects ongoing legacy activities funded through reimbursable work. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374) and other authorities.

*Indian Land Consolidation.*—The 2022 Budget proposed to reestablish the Indian Land Consolidation Program with modifications. The reestablished program will consolidate fractional interests in Indian lands. Funds will be used to purchase small interests in parcels of land from willing individual Indian landowners and convey those interests to the Tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's cost for managing Indian lands and promote conservation on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other

authorities. This program is independent of the Land Buy Back Program for Tribal Nations, and any provision of the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462) that requires or otherwise relates to application of a lien shall not apply to the acquisitions funded by this account.

The Selis-Qlispe Ksanka Settlement Trust Fund was established in the Montana Water Rights Protection Act (P.L. 116-260). The Act settles claims to water rights in Montana for the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation. The Act authorizes annual payments of \$90,000,000 to the Trust Fund out of any Funds in the Treasury not otherwise appropriated starting in fiscal year 2021 through fiscal year 2030 for a total of \$900,000,000. The Act also authorizes discretionary appropriations of \$1,000,000,000 for deposit in the Trust Fund. The Trust Fund includes two accounts: the Salish and Kootenai Compact Account and the Salish and Kootenai Settlement implementation Account. Funds deposited into the account are adjusted to reflect fluctuations in costs occurring after the date of enactment of the act up to the day of deposit to the Fund. The Trust Fund is interest bearing.

## ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs and the Bureau of Indian Education may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding Public Law 87–279 (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or the Bureau of Indian Education for central office oversight and Executive Direction and Administrative Services (except Executive Direction and Administrative Services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or the Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103–413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs or the Bureau of Indian Education, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education, or more than one grade to expand the elementary grade structure for Bureau-funded schools with a K-2 grade structure on October 1, 1996. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106–113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101–301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic

facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction, or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Funds made available for Tribal Priority Allocations within Operation of Indian Programs and Operation of Indian Education Programs may be used to execute requested adjustments in tribal priority allocations initiated by an Indian Tribe.

## BUREAU OF TRUST FUNDS ADMINISTRATION

## Federal Funds

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established a trust land consolidation Fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The Fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the Fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), and the American Indian Probate Reform Act of 2004 (P.L. 108–374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement. The funds are scheduled to expire in November, 2022. In FY 2022 and in early FY 2023, the program will commence an orderly shutdown of the program to fulfill the requirements of the Settlement. This account is managed by the Bureau of Trust Funds Administration.

## INDIAN EDUCATION SCHOLARSHIP HOLDING FUND

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established this Fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests would be quite low in many cases. Program contributions reached the maximum of \$60 million in 2017 and were transferred from the Trust Land Consolidation Fund to this Fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the Settlement agreement. This account is managed by the Bureau of Trust Funds Administration.

Under the Mineral Leasing Act (MLA), States receive fifty percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State. Separate statutes cover revenue sharing payments from the National Petroleum Reserve-Alaska and the 1002 Area of the Arctic National Wildlife Refuge, where the traditional MLA fifty-percent state share applies. To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act of 2013 permanently amended the MLA to deduct two percent from the required payments to States under the Act.

These payments are administered by Interior's Office of Natural Resources Revenue.

These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

Since May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003 (P.L. 108-188), continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as Public Law 99-658, and was implemented on October 1, 1994. Financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, however, under the 2010 Compact Review Agreement (CRA) the United States agreed to provide continued economic assistance to the Government of Palau through 2024.

Public Law 94–565 (31 U.S.C. 6901–07), as amended, authorizes Payments in Lieu of Taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, the National Park Service, the Fish and Wildlife Service, and the Bureau of Reclamation. Additionally, PILT payments cover Federal lands administered by the U.S. Forest Service, U.S. Army Corps of Engineers, and the Utah Reclamation Mitigation and Conservation Commission. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

From the inception of the PILT program in 1977 through 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008–2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112–141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113–79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113–235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114–113) provided discretionary PILT funding within the Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The Consolidated Appropriations Act, 2017 (P.L. 115–31) provided discretionary PILT funding within Department-wide Programs. Congressional appropriations for 2018 (P.L. 115–141), 2019 (P.L. 116–6), 2020 (P.L. 116–94), and 2021 (P.L. 116–260) each provided PILT funding at the full authorized levels. The Extending Government Funding and Delivering Emergency Assistance Act; Division A, Continuing Appropriations Act of 2022 (P.L. 117–43; as amended by P.L. 117–70 and P.L. 117–86) extended PILT payment authority through March 11, 2022. The 2023 Budget proposes discretionary funding for PILT payments within Department-wide Programs.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the System Unit Resource Protection Act (54 U.S.C. 100721). Since 1992, amounts received by the United States and its State and tribal co-trustee partners from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

## EXXON VALDEZ RESTORATION PROGRAM

The 2023 Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

**Preparedness.**—Funds the non-emergency and predictable aspects of the Department of the Interior's (DOI) wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—Funds the emergency and unpredictable aspects of DOI's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. This activity includes emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage. Generally, emergency stabilization actions may be performed within one year of containment of a fire; however, exceptions to this time limit are allowed under certain circumstances. In fiscal years 2010 through 2017, funding for the ten-year average of inflation-adjusted suppression obligations was split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The 2023 Budget request fully funds suppression operations at the ten-year average of obligations as reported in the 2015 President's Budget, in accordance with the Consolidated Appropriations Act, 2018 (P.L. 115–141). This Act also amended the Balanced Budget and Emergency Deficit Control Act to provide additional new budget authority for fiscal years 2020 through 2027. This additional budget authority is provided in the Wildfire Suppression Operations Reserve Fund account and made available subject to the requirements in P.L. 115–141. This additional new budget authority will help ensure that adequate resources are available to the Departments of the Interior and Agriculture to fight wildland fires, protect communities, and safeguard human life during the most severe wildland fire seasons. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Fuels Management.**—Funds the application of fuels treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. This activity may also conduct treatments that improve the integrity and resilience of our forests and rangelands. The Fuels Management activity will contribute to community adaptation to fire and improve the ability to safely and appropriately respond to wildfire. Funding for the Fuels Management activity covers the planning, operational aspects, and monitoring of fuels treatments. The program will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

**Other Operations.**—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance

of facilities to house firefighters and equipment used in wildland firefighting and fuels management activities. The Burned Area Rehabilitation program begins the recovery process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years, or up to five years under certain circumstances, following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

## FLAME WILDFIRE SUPPRESSION RESERVE FUND

In 2010 through 2017, amounts in the FLAME Fund included the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary is authorized to permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event DOI has exhausted its suppression resources due to an active fire season. Funds have not been appropriated to the FLAME account since 2017, and remaining FLAME balances were transferred to the Wildland Fire Management account in 2018.

## WILDFIRE SUPPRESSION OPERATIONS RESERVE FUND

(INCLUDING TRANSFERS OF FUNDS)

In addition to the amounts provided under the heading "Department of the Interior—Department-Wide Programs—Wildland Fire Management" for wildfire suppression operations, \$340,000,000, to remain available until transferred, is additional new budget authority in excess of the average costs for wildfire suppression operations for purposes of a concurrent resolution on the budget: Provided, That such amounts may be transferred to and merged with amounts made available under the headings "Department of Agriculture—Forest Service—Wildland Fire Management" and "Department of the Interior—Department-Wide Programs—Wildland Fire Management" for wildfire suppression operations in the fiscal year in which such amounts are transferred: Provided further, That amounts may be transferred to the "Wildland Fire Management" accounts in the Department of Agriculture or the Department of the Interior only upon the notification of the House and Senate Committees on Appropriations that all wildfire suppression operations funds appropriated under that heading in this and prior appropriations Acts to the agency to which the funds will be transferred will be obligated within 30 days: Provided further, That the transfer authority provided under this heading is in addition to any other transfer authority provided by law.

Note.—A full-year 2022 appropriation for this account was not enacted at the time the Budget was prepared; therefore, the Budget assumes this account is operating under the Continuing Appropriations Act, 2022 (Division A of Public Law 117–43, as amended). The amounts included for 2022 reflect the annualized level provided by the continuing resolution.

This budget authority is available for fire suppression requirements in a severe fire season when annual appropriations are close to depletion. The additional budget authority will help ensure adequate resources are available to the Departments of the Interior and Agriculture to fight wildland fires, protect communities, and safeguard human life during the most severe wildland fire seasons.

The Great American Outdoors Act (P.L. 116–152) established the National Parks and Public Land Legacy Restoration Fund to reduce deferred maintenance at the Department of the Interior and the U.S. Forest Service. The Fund supports restoration of deteriorating assets through an allocation of 70 percent to the National Park Service, 5 percent to the U.S. Fish and Wildlife Service, 5 percent to the Bureau of Land Management, 5 percent to the Bureau of Indian Education, and 15 percent to the U.S. Forest Service. The Fund is supported by the deposit of 50 percent of all Federal energy development revenue from the prior year that would otherwise be credited or deposited as miscellaneous receipts to the Treasury, subject to an annual limit of \$1.9 billion for five years (2021–2025). The Departments of the Interior and Agriculture annually submit projects to Congress, execute projects, and monitor results/program performance. This Fund makes a significant investment in the facilities which support the important missions of the Department of the Interior and the U.S. Forest Service and help maintain America's national treasures for future generations.

The 2023 budget includes appropriated funds for the Energy Community Revitalization Program (ECRP) for programs and activities authorized by Section 40704 of P.L. 117–58 (30 U.S.C. 1245) and Section 349 of the Energy Policy Act of 2005 (42 U.S.C. 15907), as amended. The ECRP provides grants to States and Tribal communities impacted by abandoned hard rock mining and orphaned oil and gas wells. The program provides resources to States and Tribes to address the sites where the companies that created them have left and are no longer viable to address the needed cleanup and closure. This program will create jobs in these communities to repair the damage from these legacy activities and in doing so, improve the environment, restore water quality, and make the community safer.

In addition, the ECRP provides critical funding to address the hundreds of thousands of abandoned hardrock mines and orphan oil and gas wells scattered across Federal lands. The Federal program assists Interior bureaus to inventory, assess, and prioritize these sites for cleanup. The primary focus of 2023 requested funds will be to remediate abandoned hardrock mines posing the highest risks to the environment and physical safety on Department lands. The ECRP is also responsible for executing funds made available for orphaned oil and gas well activities enacted in the Infrastructure Investment and Jobs Act (P.L. 117–58).

The Justice Information Sharing Technology (JIST) appropriation provides resources to the Department of Justice (DOJ) Chief Information Officer (CIO) to ensure progress towards DOJ's strategic goals in supporting agents, attorneys, analysts, and administrative staffs across the world in support of their missions. The CIO is also responsible for ensuring these and other IT investments align with DOJ's overall IT strategy, as well as its technical reference and enterprise architectures. JIST resources will fund the following programs in FY 2023: cybersecurity, IT transformation, IT architecture and oversight, and innovation engineering.

**Cybersecurity.**—Enhancing DOJ's cybersecurity posture remains a top priority for the Department and its leadership, as DOJ supports a wide

range of missions, including national security, law enforcement investigations, prosecution, and incarceration. The systems supporting these critical missions must secure sensitive information, enable critical mission workflows, and protect the integrity of data and information guiding vital decisions.

**IT Transformation.**—IT transformation is an ongoing commitment to evolve DOJ's IT environment by driving toward shared commodity infrastructure services and seeking simplified design and implementation of tools to advance the mission. These efforts allow DOJ to shift from custom, government-owned solutions, to advanced industry-leading offerings at competitive pricing. The OCIO recognizes modernization as an ongoing activity, requiring IT strategies to adapt as technology changes.

**IT Architecture and Oversight.**—OCIO provides guidance on IT objectives and serves as a central aggregation point for reporting on activities from across components to help ensure compliance with enterprise architecture (EA) requirements from OMB and the Government Accountability Office. OCIO provides support to a wide range of IT planning, governance, and oversight processes such as IT investment management and Capital Planning and Investment Control (CPIC), as well as the DOJ Investment Review Council and Investment Review Board, which allow OCIO to ensure alignment of investments across the Department. The EA repository contains information on all departmental system, aligns investments to these systems, and maintains the Department's IT asset inventory in compliance with OMB Circular A-130. Oversight of the DOJ's IT environment by the CIO is vital given the role of technology in supporting DOJ's varied legal, investigative, and administrative missions. JIST resources fund the DOJ-wide IT architecture governance and oversight responsibilities of the OCIO. These efforts support the CIO's responsibilities in complying with FITARA, the Clinger-Cohen Act, and other applicable laws, regulations and Executive Orders covering Federal information technology management.

**Innovation Engineering.**—OCIO facilitates adoption of new and innovative technologies to support DOJ mission requirements. By creating partnerships with DOJ components, Federal agencies, and industry for the exploration of these new technologies, OCIO is responsible for leading the ideation, design, planning, and execution of enterprise-wide IT innovations to enhance DOJ user experiences, while ensuring alignment with DOJ architectures and strategic priorities.

The Executive Office for Immigration Review (EOIR) was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees approximately 70 Immigration Courts nationwide, the BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit Division is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit Division also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations Division investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This Division also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections Division conducts program and management reviews that involve on-site inspection, statistical analysis, and other techniques to review Department programs and activities and makes recommendations for improvement.

The Oversight and Review Division investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning Division provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, telecommunications, records management, quality assurance, internal controls, and general support.

The Information Technology Division executes the OIG's IT strategic vision and goals by directing technology and business process integration, network administration, implementation of computer hardware and software, cybersecurity, applications development, programming services, policy formulation, and other mission-support activities.

The United States Parole Commission is responsible for 1) making parole release and revocation decisions for all parole-eligible Federal and District of Columbia Code offenders; 2) setting and enforcing the conditions of supervised release for District of Columbia Code offenders; 3) making release decisions for United States citizens convicted of a crime in another country who voluntarily return to the United States for service of sentence; 4) performing parole-related functions for certain military and State offenders; and 5) exercising decision-making authority over State offenders who are on the State probation or parole, and are transferred to Federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers, and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105–33).

The following Department legal activities are financed from this appropriation:

**Supreme Court Proceedings and Appellate Matters.**—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

**General Tax Matters.**—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

**Criminal Matters.**—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

**Claims, Customs, and General Civil Matters.**—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

**Environment and Natural Resource Matters.**—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

**Legal Opinions.**—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

**Civil Rights Matters.**—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination

laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

**INTERPOL Washington.**—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian, and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts; and coordinating and integrating information for investigations of an international nature.

**Office of The Pardon Attorney.**—The Office of the Pardon Attorney (OPA) receives and evaluates clemency petitions for federal crimes and prepares letters of advice for the President for each application with approval from the Deputy Attorney General. In addition, OPA responds to inquiries concerning executive clemency petitions and the clemency process from applicants, their legal representatives, members of the public, and Members of Congress; prepares all necessary documents to effect the President's decision to grant or deny clemency; and provides advisory services to White House Counsel concerning executive clemency procedures.

**Office for Access to Justice.**—The Office for Access to Justice helps the justice system efficiently deliver outcomes that are fair and accessible to all, irrespective of wealth and status by working with Federal agencies and state, local, and tribal justice system stakeholders to increase access to legal assistance and to improve the justice delivery systems that serve people who are unable to afford lawyers.

**Reimbursable Programs.**—This reflects reimbursable funding for the following:

**Civil Division.**—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

**Criminal Division.**—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

**Environment and Natural Resources Division.**—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency for Superfund enforcement litigation; and,

**Civil Rights Division.**—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department of Justice Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino fees, are collected by the FTC and split evenly between the two agencies. In 2023, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners, and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for security and relocation of protected witnesses, the Organized Crime Drug Enforcement Task Forces Program for multi-agency drug investigations, and the Department of Health and Human

Services for protecting the Strategic National Stockpile. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

For 2023, the USMS requests program increases totaling \$137.8 million. These program increases support the Administration's goals of keeping our country safe by protecting national security, countering domestic terrorism, combating violent crime, and fighting violent drug trafficking gangs and cartels. To strengthen USMS district offices, respond to increasing workload, and fight violent crime, including fugitive apprehension and enforcement operations, the USMS requests \$64.5 million; requested funding will also be used to establish a national recruitment and strategic outreach branch that will facilitate hiring and diversity by attracting the highest caliber applicants. To update USMS information technology infrastructure, the USMS requests \$11.7 million to transition on-premise hardware to the cloud and expand the capabilities of the USMS-proprietary SHIELD operational mobile application to incorporate judicial security functionality. To further strengthen judicial security, the USMS requests \$5.0 million to update Physical Access Control Systems in Federal courthouses. To support the implementation of the Task Force Officer and Deputy U.S. Marshal body worn camera program, the USMS requests \$42.5 million; requested funding will enhance the video management solution and provide necessary personnel for program development, implementation, oversight, management, and external reporting. Finally, the USMS requests \$14.1 million to address increased operational requirements related to the transfer of felony cases from Oklahoma state jurisdiction to Federal courts following the U.S. Supreme Court decision in *McGirt v. Oklahoma*.

The Construction appropriation provides resources to modify spaces controlled, occupied, and/or utilized by the United States Marshals Service for prisoner holding and related support.

For 2023, the USMS requests program increases totaling \$4.3 million. To increase base funding for USMS construction projects including congressionally approved new courthouses, critical courthouse renovations, and unscheduled maintenance, the USMS requests \$2 million. To establish funding for the Capital Security Program, the USMS requests \$2.3 million; requested funding will improve physical security in older courthouses occupied by the Federal judiciary and the USMS by separating circulation areas for the public, judiciary, and detainees.

The Federal Prisoner Detention (FPD) appropriation is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD appropriation provides for housing, subsistence, transportation, medical care, and medical guard service of Federal detainees in State, local, and private facilities.

The Federal Government utilizes various methods to house detainees. The USMS acquires detention bed space for Federal detainees through several means, using the most appropriate method to maximize efficiency and effectiveness for the Government:

- 1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility, funded through the Federal Bureau of Prisons (BOP) appropriation;
- 2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized via a negotiated daily rate paid to those jurisdictions; and
- 3) Private performance-based contract facilities, where an individual daily rate or contract minimum rate is paid. In response to the President's Executive Order (EO) 14006, "Reforming Our Incarceration System to

## FEDERAL PRISONER DETENTION—Continued

*Eliminate the Use of Privately Operated Criminal Detention Facilities,"* the USMS began the process of discontinuing its private detention facility contracts in March 2021.

Over 80 percent of the USMS detainee population placed in government facilities will be housed under IGAs.

For 2023, the USMS requests one program increase of \$106.2 million. Due to uncertainties regarding the COVID-19 pandemic and an ongoing backlog of sentenced prisoners awaiting transfer to BOP facilities, the request supplements the USMS projected detention funding requirement to allow for unforeseen upward adjustments to current cost estimates. This request increases the probability the FPD appropriation will have sufficient funding in FY 2023.

Public Law 114–113 provided \$4.6 billion starting in 2017 for the settlement of claims related to the September 11th attacks. Per Section 410, a new Treasury account was established called the "Victims Compensation Fund." This fund is available for the settlement of claim determinations issued after December 17, 2015. After all claims in the September 11th Victim Compensation Fund were resolved, \$813 million in remaining funding became available in the new Victims Compensation Fund.

On July 29, 2019, the President signed into law the Never Forget the Heroes: James Zadroga, Ray Pfeifer, and Luis Alvarez Permanent Authorization of the September 11th Victim Compensation Fund, Public Law 116–34. The Act extends the VCF's claim filing deadline to October 1,

2090, and appropriates such funds as may be necessary in each fiscal year through fiscal year 2092 to pay all eligible claims.

The United States Trustee Program (USTP or Program) supervises the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigates against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of

## UNITED STATES TRUSTEE SYSTEM FUND—Continued

1986 (P.L. 99–554) expanded the pilot trustee program to a 21 region, nationwide program encompassing 88 judicial districts (bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts). The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005, (P.L. 109–8) expanded the Program's responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. The August 2019 enactment of the Small Business Reorganization Act (P.L. 116–54) gave the Program additional responsibilities regarding small business debtors.

USTP appropriations are offset primarily by revenues deposited into the United States Trustee System Fund from filing fees paid by consumer and business debtors as well as quarterly fees based on disbursements made by most chapter 11 debtors. In October 2017, the Bankruptcy Judgeship Act of 2017 (P.L. 115–72) was enacted, adjusting quarterly fees for the largest chapter 11 debtors beginning January 1, 2018 and through September 30, 2022, depending on the balance of the Fund. Following the enactment of the Bankruptcy Administration Improvement Act (BAIA), (P.L. 116–325) in January 2021, quarterly fees were further amended beginning April 1, 2021 through December 31, 2025. The BAIA reduces quarterly fees paid in almost all chapter 11 cases, does not increase quarterly fees for any case, and simplifies the fee structure. Under the new law, the USTP's FY 2023 appropriation is anticipated to be fully offset by bankruptcy fees collected and on deposit in the United States Trustee System Fund. Further, the law continues funding for bankruptcy judgeships and uses surplus fees for additional private chapter 7 bankruptcy trustee compensation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E). The 2023 Budget proposes a cancellation of unobligated balances of \$100 million.

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal detainees and prisoners in the custody of the United States Marshals Service or the Bureau of Prisons. JPATS transports both pretrial detainees and sentenced prisoners via coordinated air and ground systems without sacrificing the safety of the public, Federal employees, or those in custody. JPATS also transports detainees and prisoners on a reimbursable space-available basis for the Department of Defense, other participating Federal departments, and State and local agencies. Customers are billed based on the number of flight hours and the number of seats used to move their detainees/prisoners.

The Organized Crime Drug Enforcement Task Forces (OCDETF) program identifies, disrupts, and dismantles major domestic and transnational criminal organizations (TCOs) that engage in drug trafficking, violence, and money laundering activities which threaten the public safety and economic and national security of the United States. OCDETF accomplishes this mission by synthesizing the resources and expertise of 11 Federal law enforcement agency members, the Department of Justice's Criminal Division, United States Attorneys' Offices, and State and local law enforcement. The OCDETF task force approach effectively coordinates two primary activities: investigation and prosecution.

**Investigation.**—This activity includes resources for the direct investigative, intelligence, and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major TCOs. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, U.S. Secret Service, U.S. Postal Inspection Service, and Homeland Security Investigations. This activity also includes resources for the OCDETF Fusion Center (OFC), a multi-agency intelligence center which analyzes fused law enforcement financial and human intelligence information. The OFC produces actionable intelligence for use by OCDETF member agencies to disrupt and dismantle major criminal organizations and their supporting financial structures. In addition, the OFC creates strategic intelligence products that enhance TCO threat analyses and support national strategic efforts against transnational organ-

ized crime. OCDETF also maintains 19 Co-Located Strike Forces and supports transnational organized crime investigations through its International Organized Crime Intelligence and Operations Center (IOC-2). IOC-2 is a multi-agency intelligence center with a mission to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple Federal agencies participate in IOC-2 activities and related investigations.

**Prosecution.**—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest levels of drug trafficking, violence, and money laundering by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys and the Department of Justice's Criminal Division.

The mission of the Federal Bureau of Investigation (FBI) is to protect the American people and uphold the Constitution of the United States.

The FBI's enterprise strategy includes several integrated components. The vision outlines the FBI's desired strategic position, which it aims to accomplish by continuously evolving to mitigate existing threats and anticipate future threats. To focus efforts across the enterprise, the FBI developed strategic objectives, operational mission priorities, through its Integrated Program Management process.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, DC, provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and approximately 350 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates 63 Legal Attache offices and 29 sub-offices in 73 foreign countries around the world. Additionally, there are several specialized facilities and analytical centers within the FBI that are located across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Terrorist Explosive Device Analytical Center and Hazardous Devices School in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are carried out on reimbursable bases. For example, the FBI is reimbursed for its participation in the Organized Crime Drug Enforcement Task Force program and by other Federal agencies for certain intelligence and investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-Federal agencies.

For 2023, the FBI is requesting \$10.7 billion in Salaries and Expenses funding. Specifically, the FBI requests program increases of \$52.0 million to bolster its cyber investigative program, \$48.8 million to counter acts of mass violence and threats to public safety, \$42.2 million to address core counterintelligence needs and other national security priorities, \$20.6 million to combat crime and corruption, \$17.8 million to bolster its Civil Rights program, \$36.9 million to defend the organization against cybersecurity threats, \$16.9 million to bolster the organization's IT networks, \$27.4 million to support the implementation of the organization's body-worn camera program for FBI Special Agents, \$39.4 million to support the substantial personnel, structural, and security requirements of newly constructed buildings in Huntsville, Alabama, and \$22.5 million to address increased responsibilities in Oklahoma stemming from the Supreme Court's *McGirt v. Oklahoma* decision.

For 2023, the FBI is requesting a total of \$61.9 million in Construction funding for the Secure Work Environment program and for renovations at the FBI Academy in Quantico, Virginia.

The Administration also recognizes the critical need for a new FBI headquarters. The J. Edgar Hoover building can no longer support the long-term mission of the FBI. The Administration has begun a multi-year process of constructing a modern, secure suburban facility from which the FBI can continue its mission to protect the American people. During the next year, FBI and GSA will work to identify a location to construct a Federally-owned, modern and secure facility for at least 7,500 personnel in the suburbs. Over the next year, FBI and GSA will finalize an updated program of requirements for a secure suburban campus, including the final number of personnel, to inform a 2024 Budget request for funding for the new facility. GSA will also begin initial steps to acquire, if necessary, the site for the new suburban location. Additionally, FBI and GSA will work to identify a Federally-owned location in the District of Columbia to support a presence of approximately 750–1,000 FBI personnel that would support day-to-day FBI engagement with DOJ headquarters, the White House, and Congress.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. The DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply, including heroin. The DEA also considers it a high priority to target the financial infrastructure of major drug trafficking organizations, and members of the financial community who facilitate the laundering of their proceeds. In FY 2021, the DEA denied drug traffickers \$48.8 billion in revenue through the seizure of both assets and drugs.

The DEA's primary focus has always been and continues to be enforcing the nation's drug laws. However, we recognize that community outreach and support are important not only in preventing drug misuse, but also in developing community connections that assist enforcement efforts. The DEA's community outreach efforts provide websites, publications, exhibits, educational programs, presentations, and collaboration through the domestic field divisions and in partnerships with dozens of Federal, state, and local organizations that have the common cause of preventing substance misuse.

The DEA has 238 domestic offices organized in 23 divisions throughout the United States. Internationally, the DEA has 92 offices in 69 countries and is responsible for coordinating and pursuing U.S. drug investigations abroad. Federal, State, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 43 years, the DEA has led a task force program that today includes approximately 3,000 task force officers participating in 379 task forces. DEA's Special Operations Division (SOD) and the El Paso Intelligence Center (EPIC) are vital resources for Federal, State, and local law enforcement. Additionally, through the Office of National Security Intelligence (ONSI), the DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, the DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, State and local task forces, other Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. DEA's objectives for Domestic Enforcement include:

## SALARIES AND EXPENSES—Continued

—Identifying and targeting the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

—Systematically disrupting or dismantling targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

—Working with international offices to dismantle domestic organizations directly affiliated with Transnational Criminal Organizations

**International Enforcement.**—The DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. DEA's objectives for International Enforcement include:

—Identifying and targeting the most significant international drug and chemical trafficking organizations;

—Disrupting and dismantling the networks, financial infrastructures, operations, and resource bases of targeted international drug and chemical trafficking organizations; and

—Preventing drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—The DEA provides clandestine laboratory training and meets the hazardous waste cleanup needs of the U.S. law enforcement community. The DEA supports State and local law enforcement with assistance and training so that State and local agencies can better address the environmental threat of clandestine laboratories in their communities. As a result, DEA's nationwide contracts, container program, and established training programs allow the DEA to provide State and local clandestine lab and hazardous environment cleanup and training assistance in a cost-effective manner.

For 2023, the DEA requests \$31.1 million to transform how the DEA exploits, stores, and integrates data to enhance its investigations; \$19.8 million to establish an agency-wide Body Worn Camera program; \$8.0 million for cyber investigative support; \$3.0 million to implement Cybersecurity Maturity Model improvements; and \$3.3 million to provide additional staffing support to the DEA's Tulsa, Oklahoma Resident Office in response to Supreme Court's decision in *McGirt v. Oklahoma*.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration (DEA) under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), the DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. The registrant community, physicians, prescribers, and pharmacists, can be seen as the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of abuse and illicit use. Investigations conducted by the Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. DEA's objectives for diversion control include:

—Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support, and assistance from the regulated industry;

—Educating the public on the dangers of prescription drug abuse and proactive enforcement measures to combat emerging drug trends; and,

—Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

The Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF) is the U.S. law enforcement agency dedicated to protecting our Nation from the illicit use of firearms and explosives in violent crime and acts of terrorism. The ATF protects our communities from violent criminals and criminal organizations by investigating and preventing the illegal use and trafficking of firearms, the illegal use and improper storage of explosives, acts of arson and bombings, and the illegal diversion of alcohol and tobacco products. The ATF regulates the firearms and explosives industries from manufacture and/or importation through retail sale to ensure that Federal Firearms Licensees and Federal Explosives Licensees and permittees conduct business in compliance with all applicable laws and regulations.

For FY 2023, the ATF requests \$123.2 million for targeted efforts to fight violent crime and promote gun safety, which includes \$20.1 million for Industry Operations Investigator support for regulatory enforcement and diversion control; \$53.7 million for Combating Gun Violence; \$21.2 million for the National Integrated Ballistics Information Network and Crime Gun Intelligence; \$14.4 million for modernization of the National Tracing Center; and \$13.7 million to enhance community policing efforts through the Body Worn Camera Program.

Federal Prison Industries, Inc. (FPI), was created by the Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self-sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal Departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reappplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112–55), FPI received two new authorities to increase inmate employment. The first enables FPI to recap-ture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program, which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2023 Budget requests \$88 million for the Office of Justice Programs (OJP) Research, Evaluation, and Statistics appropriation. This appropriation provides nationwide support for criminal justice professionals and decision-makers through programs that provide grants, contracts, and cooperative agreements for research, development, and evaluation, and support development and dissemination of quality and relevant statistical and scientific

information. The information and technologies developed through OJP's research and statistical programs improve the efficiency and effectiveness of criminal justice programs at all levels of government.

**Research, Development, and Evaluation Program.** - The 2023 Budget proposes a total of \$43 million for the National Institute of Justice (NIJ) to support high-quality research, development, and evaluation in the forensic, social, and physical sciences. Of this funding, at least \$1 million will be dedicated to school safety research and \$10 million will support research on domestic radicalization, and \$2 million will research violence against American Indians and Alaskan Natives at extractive industry sites. In addition, the 2023 Budget supports a transfer of no less than 2 percent from the Federal Bureau of Prisons (BOP) First Step Act funding to support NIJ's research and evaluation of First Step Act related programs and activities.

**Criminal Justice Statistics Program.** - The 2023 Budget proposes \$45 million for the Bureau of Justice Statistics (BJS) to carryout national statistical collections supporting data-driven approaches to reduce and prevent crime and to assist state, local and tribal governments in enhancing their statistical capabilities, including improving criminal history records and information systems. Current programs provide statistics on: victimization, corrections, law enforcement, Federal justice systems, prosecution and adjudication (courts), criminal histories and recidivism, and tribal communities.

**2.5% Research, Evaluation and Statistics Set Aside.** - The 2023 Budget requests a set-aside of up to 2.5 percent for research, evaluation, and statistics. The set-aside amount from OJP discretionary programs supports the base programs for NIJ and BJS.

The 2023 Budget requests \$2.518 billion for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. State, local, and tribal law enforcement and criminal justice professionals are responsible for the majority of the Nation's day-to-day crime prevention and control activities. The programs supported by this account help OJP partners throughout the Nation to advance work that promotes civil rights, increases access to justice, supports crime victims, protects the public from crime and evolving threats, and builds trust between law enforcement and the community. These programs include a combination of formula and discretionary grant programs, coupled with robust training and technical assistance activities designed to address the most pressing crime-related challenges of confronting the criminal justice system. Priority programs in the 2023 Budget will promote criminal and juvenile justice system reform, advance innovation and the use of science, research, and statistics, prevent and reduce violent crime, combat the growing threat of hate crimes, and identify and promote services to victims. They include:

**Byrne Justice Assistance Grants (JAG).**—The Byrne Justice Assistance Grants program awards grants to state, local, and tribal governments to support a broad range of activities that prevent and control crime, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2023 Budget proposes \$533.5 million for this program. Included in this amount is \$40 million for Project Safe Neighborhoods, which supports expanding the nationwide initiative that identifies the most pressing state and local violent crime problems and develops comprehensive strategies to address and prevent them. The Community Oriented Policing Services (COPS) Office advances the practice of community policing by the Nation's state and local law enforcement agencies through information sharing and grant resources. COPS develops programs that respond directly to the emerging needs of law enforcement agencies to shift focus from reacting to preventing crime and disorder.

To advance this mission, COPS develops training and technical assistance to enhance law enforcement officers problem-solving and community interaction skills, promotes collaboration between law enforcement and community members to develop innovative initiatives to prevent crime, and provides cost-effective service delivery to grantees to support community policing. COPS awards grants to hire community policing professionals, develop and test innovative policing strategies, and provide training and technical assistance to community members, local government leaders, and all levels of law enforcement. Since 1994, the COPS Office has invested more than \$14 billion to help advance community policing, supporting over 13,000 of the Nation's 18,000 law enforcement agencies.

The 2023 Presidents Budget requests \$651 million for COPS programs, including \$537 million for the COPS Hiring Program. Within this amount, \$40 million is for tribal law enforcement; \$35 million is for Community Policing Development and the Just Policing Program; \$20 million is for collaborative reform; and \$6 million is for the Tribal Access Program.

The Budget additionally proposes to implement reforms that seek to more closely align the COPS Hiring program with evidence-based strategies to reduce violent crime in partnership with communities. This includes new priorities for jurisdictions that support Community Violence Intervention (CVI) programs, for jurisdictions that seek to hire officers to engage directly with CVI teams and other community stakeholders to ensure those groups are involved in strategic operations and planning, and for jurisdictions seeking to implement hiring practices to help agencies mirror the racial diversity of the communities that they serve.

The mission of the Office on Violence Against Women (OVW) is to provide Federal leadership in developing the Nation's capacity to reduce domestic violence, dating violence, sexual assault, and stalking through the implementation of the Violence Against Women Act (VAWA).

Since its inception in 1995, OVW has awarded over \$9.0 billion in grants and cooperative agreements, and has launched a multifaceted approach to implementing VAWA. By forging state, local, and tribal partnerships among police, prosecutors, judges, victim advocates, health care providers,

faith leaders, organizations that serve culturally specific and underserved communities and others, OVW grant programs help provide victims with the protection and services they need to pursue safe and healthy lives, while simultaneously enabling communities to hold offenders accountable for their violence.

The 2023 Budget proposes \$1 billion for programs administered by OVW to prevent and respond to violence against women, including domestic violence, dating violence, sexual assault, and stalking. The language reflects that this entire amount is requested as directly appropriated funding and eliminates a funding transfer from the Crime Victims Fund.

The 2023 Budget requests \$226.8 million for the Office of Justice Programs' Public Safety Officers' Benefits (PSOB) Program, of which \$192 million is a mandatory appropriation for death benefits and \$34.8 million is a discretionary appropriation for disability and education benefits. This appropriation supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a partnership between the Department of Justice, national public safety organizations, and public safety agencies at the state, local, and tribal levels. The PSOB program oversees three types of benefits:

**Death Benefits.**—This program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

**Disability Benefits.**—This program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

**Education Benefits.**—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

The Crime Victims Fund (CVF) provides formula grants to states and territories to support compensation and services for victims of crime. CVF funding also supports training, technical assistance, and demonstration grants designed to improve the capabilities and capacity of victims services providers throughout the Nation. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2023 Budget proposes to provide \$1.75 billion from collections and balances for crime victim compensation, services, and related needs. Of this amount, \$50 million is also proposed to support a new victim advocate program and up to \$87.5 million for the Office for Victims of Crime for Tribal Victims Assistance Grants.

The proposed obligation cap level will prevent the depletion of the Fund. The 2023 Budget also eliminates the funding transfer to the Office on Violence Against Women (OVW) that has been included as part of the CVF appropriations language in recent years. The elimination of this set aside will provide more victim assistance and compensation dollars to the states, and more support for grant programs to address issues critical to the Administration, such as improving the accessibility of services to victims in underserved communities and expanding hospital-based services to crime victims. Additionally, in 2020, OVC established a 60-month grant period for Tribes funded under the tribal set-aside from the CVF. This longer project period, which effectively allows tribal grantees more time to drawn down and expend grant funds, will continue to provide Tribes some flexibility in using their existing grant funds to mediate the reduction in the Tribal set-aside.

The Justice for Victims of Trafficking Act of 2015 (Public Law 11422) created the Domestic Victims of Trafficking Fund (DVTF) and authorizes grants to expand and improve services for victims of trafficking in the U.S. and victims of child pornography as authorized by the Victims of Child Abuse Act of 1990, the Trafficking Victims Protection Act of 2000, and the Trafficking Victims Protection Reauthorization Act of 2005. All programs supported by DVTF are administered by the Office of Justice Programs in consultation with the Department of Health and Human Services. The 2023 Budget proposes a total of \$6.5 million (including \$5 million in funding transferred from the Department of Health and Human Services and \$1.5 million in collections from the Federal court system) to support grants under this program.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

*Adult employment and training activities.*—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

*Youth activities.*—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

*Dislocated worker employment and training activities.*—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. Includes competitive grants for POWER+, which will support community-led workforce transition, layoff aversion, job creation, and other strategic initiatives designed to ensure economic prosperity for workers and job seekers in the coal, oil, and gas industries. Also includes sector-based training grants to provide workers with in-demand training that leads to high-quality jobs. Also includes grants that will strengthen community colleges' capacity to provide effective training programs.

*Reentry Employment Opportunities.*—Supports activities authorized under section 169 of the WIOA to help individuals exiting incarceration make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department also provides competitive grants for a range of young adults who have been involved with the criminal justice system or who left high school before graduation, particularly those in high-poverty, high-crime areas, with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for serving individuals leaving incarceration. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out this program.

*Apprenticeship.*—Activities that support and expand Registered Apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

*YouthBuild.*—Grants to provide academic training and occupational skills training, mentoring, and supportive services to eligible at-risk youth, with a specific focus on attaining construction skills through building or rehabilitating affordable housing for low-income or homeless families in their own neighborhoods.

*Indian and Native American Program.*—Grants to provide employment, education, intensive training, and supportive services to tribes, tribal consortia, and nonprofit Indian organizations.

*Migrant and Seasonal Farmworkers.*—Grants to provide employment and training services to migrant and seasonal farmworkers (MSFW) and their dependents. The program provides career, training, housing assistance, youth, and other related assistance services to MSFWs.

*National Youth Employment Program.*—Competitive grants to operate summer and year-round youth employment programs through partnerships with employers in high demand industries and occupations. In addition to employment, programs will provide supportive services, such as transportation and childcare, necessary for youth participation in summer and year-

round employment programs and will connect youth with additional skill-building opportunities that enable them to enter on-ramps to careers.

**Veterans' Clean Energy Training.**—Competitive grants to prepare eligible veterans, transitioning service members, and spouses of veterans and transitioning service members for careers in clean energy sectors and occupations.

**Civilian Climate Corps.**—A multi-Departmental initiative to mobilize the next generation of conservation and resilience workers and maximize the creation of accessible training opportunities and good jobs.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113-128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military. Job Corps participants must be economically disadvantaged youth, between the ages of 16-24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture.

**Unemployment compensation.**—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claim workloads increase above levels specified in the appropriations language.

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well as for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

**Foreign Labor Certification.**—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, CW-1 temporary, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

**Federal Administration.**—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

**State grants.**—State grants provides grants to State workforce agencies in 50 States and 5 U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Activities include State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

**Workforce Information, Electronic Tools, and System Building.**—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under the Workforce Innovation and Opportunity Act. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs, or to the Extended Unemployment Compensation Account or the Federal Unemployment Account in the UTF for benefit costs.

The Coronavirus Aid, Relief, and Economic Security Act (Public Law 116–136) provided as an incentive for states to enact state Short-Time Compensation (STC) programs and promote the use of STC, 100 percent reimbursement of STC benefit costs paid under state law for weeks ending on or before December 31, 2020. The Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116–260) extended the 100 percent STC reimbursements to include weeks of unemployment ending on or before March 14, 2021, and the American Rescue Plan Act (Public Law 117–2) further extended the 100 percent STC reimbursements to include weeks of unemployment ending on or before September 6, 2021. Grant funding was also available to states whose permanent STC laws meet the Federal definition.

This account provides mandatory general revenue funding for Federal Pandemic Unemployment Compensation (FPUC), a temporary program established under the Coronavirus Aid, Relief, and Economic Security Act (Public Law 116–136). This program paid a supplement of \$600 on every week of unemployment compensation through July 31, 2020. It was then reauthorized by the Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116–260) and modified to provide \$300 per week in supplemental benefits for weeks of unemployment beginning after December 26, 2020, and ending on or before March 14, 2021. In addition to reestablishing the FPUC program, the Continued Assistance for Unemployed Workers Act of 2020 established the Mixed Earners Unemployment Compensation (MEUC) program, which paid a \$100 supplemental to certain claimants with self-employment income for weeks of unemployment ending on or before March 14, 2021. The FAUC account also provides funding for the MEUC program. The American Rescue Plan Act (Public Law 117–2) extended the FPUC program at \$300 per week and the MEUC program at \$100 per week for certain claimants for weeks of unemployment ending on or before September 6, 2021.

## ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

*For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, 2024.*

Note.—A full-year 2022 appropriation for this account was not enacted at the time the Budget was prepared; therefore, the Budget assumes this account is operating under the Continuing Appropriations Act, 2022 (Division A of Public Law 117–43, as amended). The amounts included for 2022 reflect the annualized level provided by the continuing resolution.

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended

Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110–343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance (TAA) for Workers program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the UTF. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA if it runs short of funds, and the borrowing authority will enable the ESAA to cover its obligations despite seasonal variations in the account's receipts.

The Department estimates that \$3 billion will be borrowed during Fiscal Year 2022 and an additional \$3 billion will be borrowed in Fiscal Year 2023. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF or the BLDTF.

To address the potential need for significant and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The Fiscal Year 2023 request continues this authority.

#### PROGRAM ADMINISTRATION

*For expenses of administering employment and training programs, \$153,793,000, together with not to exceed \$68,840,000 which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund.*

Note.—A full-year 2022 appropriation for this account was not enacted at the time the Budget was prepared; therefore, the Budget assumes this account is operating under the Continuing Appropriations Act, 2022 (Division A of Public Law 117–43, as amended). The amounts included for 2022 reflect the annualized level provided by the continuing resolution.

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating the foreign labor certification programs. For several employment-based visa categories, the foreign labor certification programs help ensure that employers proposing to hire foreign workers have verified that there are an insufficient number of able, willing, and qualified U.S. workers available for the job and that the foreign workers will be appropriately compensated and not disadvantage similarly employed U.S. workers. The ability to charge fees in these programs would give the Department a more reliable, workload-based funding source for this function, similar to the fee-based funding structure in place at the Department of Homeland Security. The proposal would reduce reliance on annual discretionary appropriations and impose the cost of operations on the employers that use and most benefit from the foreign labor certification programs.

The proposal would authorize the Department to charge fees for its prevailing wage determinations, permanent labor certification program, H-2B nonagricultural workers program, and CW-1 Northern Mariana Islands transitional workers program, as well as retain and adjust the fees already collected for H-2A labor certifications, which are currently deposited in the U.S. Treasury's General Fund. The fee levels, including possible expedited processing fees, would be set via regulation to ensure that the amounts are subject to review and reflect the cost to DOL of operating the programs. Given the DOL Office of the Inspector General's (OIG) important role in investigating fraud and abuse, the proposal also includes a mechanism to provide funding for OIG's work in the foreign labor certification programs.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has two accounts for the railroad unemployment insurance system but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 states, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands) and four Federal accounts. The state and jurisdiction accounts receive funds from a state unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts — the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA) — while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employees Compensation Account (FEC Account), are revolving accounts.

Except for FEC Account balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. The FUTA payroll tax is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to the EUCA which pays for certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) from the FUA to States and jurisdictions when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable and nonrepayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

## UNEMPLOYMENT TRUST FUND—Continued

The FEC Account in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse the FEC Account for benefits paid to their former employees. The FEC Account is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FEC Account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's accounts in the UTF to meet expenses.

The Bipartisan Budget Act of 2018 (P.L. 115–123) amended the Social Security Act and permanently authorized the Reemployment Services and Eligibility Assessments (RESEA) program, authorizing \$117 million in annual base funding, plus an allocation adjustment level, previously referred to as a discretionary cap adjustment. The allocation adjustment level provides for an increasing level of funding up to a specified amount each year. Multiple research studies have found that the RESEA service delivery model leads to reduced unemployment insurance durations, and thereby benefit savings, among other improvements in employment outcomes.

The FY 2023 President's Budget includes projected savings generated by the allocation adjustment funding from the operation of RESEA. These savings are based on the projected reduction in claimant durations due to the RESEA provisions and the associated benefits savings due to fewer weeks paid. The savings also indirectly impact state unemployment tax revenues, as state tax collections are largely determined by benefit outlays and trust fund reserves, and lower benefit outlays translate into slightly lower tax rates and collections over the 10-year projection period.

The FY 2023 Budget proposes to provide the Department with \$275,000,000 over 10 years, in mandatory funding for EBSA and SOL, to increase capacity for the agency to perform audits related to mental health and substance abuse (including investigating reimbursement rates as Non-Quantitative Treatment Limitations) and take action against non-compliant actors. These enhanced oversight and compliance efforts would increase the number of large group market health plans and issuers that are complying with the mental health parity requirements under the Mental Health Parity and Addiction Equity Act. Additionally, the Budget proposes to authorize EBSA to assess civil monetary penalties for parity violations.

The Pension Benefit Guaranty Corporation (PBGC or the Corporation) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by over 33,000,000 of America's workers and retirees participating in more than 25,000 private-sector defined benefit pension plans. The Single-Employer Program protects about 22,700,000 workers and retirees in about 23,900 pension plans. The Multiemployer Program protects about 10,900,000 workers and retirees in about 1,360 pension plans. The Corporation's two insurance programs are legally separate and operationally and financially independent.

The Single-Employer Program is financed by insurance premiums, investment income, and recoveries from companies formerly responsible for the plans. Congress sets PBGC premium rates.

The Multiemployer Program is financed by premiums and investment income. The American Rescue Plan (ARP) Act of 2021 - a historic law passed by Congress and signed by President Biden on March 11, 2021 - established the Special Financial Assistance (SFA) Program for certain financially troubled multiemployer plans. The SFA Program is financed by general taxpayer funds provided by the U.S. Treasury.

PBGC is requesting \$493,314,000 in spending authority for administrative expenses in 2023. The request includes spending authority of \$9,979,000 for Strengthening Cybersecurity and Modernization of Enterprise Systems, \$3,973,000 for Implementing Federal Safety and Security Protocols, \$11,473,000 for Cost-of-Living Adjustments, \$4,600,000 for Modernizing Enterprise Risk Management Capabilities and Strengthening Internal Control, and (-\$2,000,000) program decrease for a one-time cost to upgrade Oracles Federal Financial eBusiness Suite applications.

**Plan Preservation Efforts.**—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. PBGC encouraged companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In 2021, PBGC:

—Paid \$230,000,000 in financial assistance to 109 insolvent multiemployer plans covering 80,786 participants receiving guaranteed benefits,

—Performed audits of seven multiemployer plans covering nearly 10,000 participants to evaluate the timeliness and accuracy of benefit payments to all participants, compliance with laws and regulations, and the effectiveness and efficiency in management of the remaining assets in terminated and insolvent plans.

**Stepping in to Insure Pensions When Plans Fail.**—When plans do fail, PBGC steps in to ensure that basic benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 current and future retirees in trustee pension plans. In 2021, PBGC:

—Paid \$6,400,000,000 in benefits to 970,000 retirees in single-employer plans; and

—Performed standard termination audits of single-employer plans that resulted in additional payments of \$2,600,000 to 1,462 people.

**Single-employer benefit payments.**—Through its Single-Employer Program, PBGC is directly responsible for the benefits of about 1,500,000 current and future retirees in trustee pension plans. The Single-Employer Program covers defined benefit pension plans that generally are sponsored by a single employer. When an under-funded single-employer plan terminates, PBGC steps in to pay participants' benefits up to legal limits set by law. This typically happens when the employer sponsoring an underfunded plan goes bankrupt, ceases operation, or can no longer afford to keep the plan going. PBGC takes over the plan's assets, administration, and payment of benefits up to the legal limits. In some instances, plans can choose to voluntarily terminate by filing a standard termination if the plan has enough money to pay all benefits owed to participants. In FY 2021, PBGC:

—Took responsibility for 47 single-employer plans that provide the pension benefits to an additional 34,000 workers and retirees;

—Protected 99,345 single-employer plan participants from employers emerging from bankruptcy.

**Multiemployer financial assistance.**—The Multiemployer Program covers about 10,900,000 participants in about 1,360 insured plans. A multiemployer plan is a pension plan sponsored by two or more unrelated employers under collective bargaining agreements with one or more unions. Multiemployer plans cover most unionized workers in the trucking, retail food, construction, mining, garment, and other industries. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, PBGC provides insolvent multiemployer plans with financial assistance, in the statutorily required form of loans, sufficient to pay PBGC guaranteed benefits and reasonable administrative expenses.

Under the SFA Program, PBGC expects to provide financial assistance to more than 250 eligible plans covering over 3,000,000 people. PBGC provides one-time payments to eligible plans to enable them to pay benefits at the plan level.

**Investment management fees.**—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are driven by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

**Consolidated Administrative Budget.**—PBGC's administrative budget comprises all expenditures and operations that support:

—Benefit payments to pension plan participants;

—Financial assistance to distressed multiemployer pension plans; and

—Stewardship and accountability.

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering procurement, financial management, human resources, facilities management, communications, legal support, and information technology infrastructure. These funds support the operations of the Participant and Plan Sponsor Advocate. They also support the required functions and efforts of the Office of the Inspector General, including training and participation in Council of the Inspectors General on Integrity and Efficiency (CIGIE) activities.

## PENSION BENEFIT GUARANTY CORPORATION FUND

(Legislative proposal, subject to PAYGO)

The Budget calls for the repeal of the provision accelerating FY 2026 premiums into FY 2025. This provision creates unnecessary confusion and burden on insured plans because they are forced to pay premiums early for just one year. The provision will also create additional accounting and management costs for both the plans and PBGC given the high likelihood of late payments. Repealing this provision will be budget neutral, enhance compliance, and avoid unnecessary administrative costs for pension plans and the PBGC.

**Federal Employees' Compensation Act benefits.**—The Federal Employees' Compensation Act (FECA) program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2023, the FECA program projects to create 100,000 cases for Federal workers or their survivors; 15,400 Federal employees are projected to submit initial wage-loss claims; and 37,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

The remainder is provided from the Special Workers' Compensation Fund, which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

*Energy Employees Occupational Illness Compensation Act of 2000 (EEOICPA) benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses. This program is EEOICPA Part B.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudica-

tion, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program Part E, to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107–275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The Black Lung Disability Trust Fund (BLDTF) consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on coal mined and used domestically. These monies are used to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the BLDTF pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. Because excise tax receipts were insufficient to cover the BLDTF's expenses, the fund borrowed monies necessary to meet the shortfall from the U.S. Treasury, subject to repayment with interest. This led to the fund accumulating a large amount of debt. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid. Due to a decline in coal production and other factors, however, the Trust Fund's debt has continued to grow.

*Note.—Between January 1, 2019 and December 31, 2019, the coal excise tax rates on underground-mined coal were \$0.50 per ton or 2 percent of the sales price (whichever is lower) and \$0.25 per ton or 2 percent of the sales price (whichever is lower) on surface-mined coal. Congress restored the higher 2018 tax rates on underground-mined coal of \$1.10 per ton or 2 percent of the sales price (whichever is lower) and \$0.55 per ton or 2 percent of the sales price (whichever is lower) on surface-mined coal from January 1, 2020 to December 31, 2021 in the Further Consolidated Appropriations Act, 2020 and the Consolidated Appropriations Act, 2021. Tax rates again reverted to the lower 2019 levels effective January 1, 2022.*

The trust fund consists of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

The trust fund is available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Office of Federal Contract Compliance Programs (OFCCP) enforces, for the benefit of job seekers and wage earners, the affirmative action and equal employment opportunity obligations required of those who do business with the Federal government. OFCCP administers and enforces three equal employment opportunity laws: Executive Order 11246, as amended (Executive Order); Section 503 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 793 (Section 503); and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, 38 U.S.C. 4212 (VEVRAA).<sup>1</sup> Collectively, these laws, as amended, make it unlawful for contractors and subcontractors doing business with the federal government to discriminate in employment because of race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or status as a protected veteran. In addition, contractors and subcontractors are prohibited from discriminating against applicants or employees because they inquire about, discuss, or disclose their compensation or that of others, subject to certain limitations, and may not retaliate against applicants or employees for engaging in protected activities. OFCCP conducts compliance evaluations and complaint investigations of federal contractors' and subcontractors' personnel policies and procedures. OFCCP also offers compliance assistance to federal contractors and subcontractors to help them understand the regulatory requirements and review process. The 2023 Budget proposes to enable OFCCP to ensure it has the increased capacity to: 1) support OFCCP's increased enforcement responsibility over the growing number of contractors receiving Infrastructure Investment and Jobs Act (IIJA) investments; 2) strengthen its development and resolution of systemic discrimination cases, and 3) engage in effective cross-regional collaboration.

The Office of Labor-Management Standards (OLMS) administers the Labor-Management Reporting and Disclosure Act (LMRDA) and related laws. The LMRDA was enacted to protect union members by ensuring that unions have the transparency, democracy, and financial integrity members need to make informed decisions about their membership in a union as well as its operations and to ensure that members and employees who are engaged in organizing activities know the sources of their employers' messages urging them not to organize. These laws were enacted to strengthen labor unions by protecting union members from individuals, organizations, and influences that do not function in their best interests. While the vast majority of America's labor unions and their leaders operate for the benefit of the hard working people who comprise their membership, OLMS is tasked with protecting the union members by administering the LMRDA. OLMS also administers employee protections under various federally sponsored transportation programs that require fair and equitable protective arrangements for mass transit employees when federal funds are used to acquire, improve, or operate a transit system.

The FY 2023 funding level provides an additional \$2,173,000 to restore OLMS' staffing level to provide unionized workers with the protections to which they are entitled under the LMRDA. Additionally, the FY 2023 funding level provides \$1,000,000 to support review of additional Infrastruc-

ture Investment and Jobs Act-related Federal Transit Administration grant applications.

**Safety and Health Standards.**—This activity provides for the protection of worker safety and health through the development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is cost effective when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) process, that small business concerns are considered in the process of developing standards.

**Federal Enforcement.**—This activity provides for the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to a focus on specific high-hazard industries and worksites. Enforcement is prioritized by the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards.

**Whistleblower Programs.**—This activity provides for the enforcement of 25 whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of 24 other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities, tax, antitrust, and anti-money laundering laws.

**State Programs.**—This activity supports states that assume responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities. There are 28 approved State Plans.

**Technical Support.**—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or manmade disasters. This activity also provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a broad range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and

health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employer and employee stakeholder groups to share compliance assistance information, resources, and tools, and to plan, coordinate, and participate in meetings, conferences, training events, and outreach activities in support of the agency's key initiatives, including enforcement and rulemaking activities, outreach campaigns, and other priority initiatives. OSHA also works with employers and employees through cooperative programs, such as the Voluntary Protection Programs to recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships, which commit organizations to proactively collaborate with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including online.

**State Compliance Assistance: Consultation Grants.**—This activity supports OSHA's On-Site Consultation Program, which offers no-cost and confidential occupational safety and health services to small- and medium-sized businesses in all 50 states, the District of Columbia, and several U.S. territories, with priority given to high-hazard worksites. On-Site Consultation services are separate from enforcement and do not result in penalties and citations. Consultants from state agencies or universities work with employers to identify workplace hazards, provide advice for compliance with OSHA standards, and assist in establishing and improving safety and health programs. Designated state agencies or universities enter into cooperative agreements that provide a 90 percent federal fundingmatch.

**Training Grants.**—This activity supports safety and health grants to organizations that provide face-to-face training, education, and technical assistance; and develop educational materials for employers and employees. These grants address education needs for workers with limited access to occupational safety health training, including young workers, temporary, minority, low literacy, domestic, limited English speaking, or other hard-to-reach workers; and specific high-risk topics and industries identified by the agency.

**Safety and Health Statistics.**—This activity supports the agency's information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These services are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive Direction and Administration.**—This activity supports overall leadership, direction, and support for agency operations. This includes developing strategic and agency priorities, coordination of policy, planning and evaluation, audit, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Program Direction and Support.**—The Program Direction and Support (PDS) activity provides leadership and direction for the various DOL agencies. As part of its responsibilities, the PDS activity oversees a program of analysis and general research on issues affecting America's workforce,

and also evaluates the effectiveness of Departmental programs. The PDS activity includes funding for the following organizations: Office of the Secretary; Office of the Deputy Secretary; Office of the Assistant Secretary for Policy; Office of Congressional and Intergovernmental Affairs; Office of Public Affairs; Office of Public Liaison; and the Centers for Faith and Opportunity Initiatives.

**Legal Services.**—The Office of the Solicitor (SOL) provides the Secretary of Labor and departmental program officials with the legal services required to accomplish the Department's mission. SOL litigates worker protection enforcement and other cases in Federal and other tribunals, including bankruptcy courts and various administrative forums throughout the nation. SOL has direct civil litigation authority in most programs, but there are occasions where SOL works hand-in-hand with DOJ; and SOL plays a significant role in the development of many criminal investigations referred to DOJ. SOL's legal services are significant to the Department's rulemaking efforts, both in the development and then the defense of rules. SOL provides legal advice to the Department's agencies, including orders, written interpretations, opinions and legislation, as well as legal services to Departmental management with respect to issues like appropriations, procurement, data privacy, FOIA, ethics, and employment law. SOL also supports the Department's enforcement efforts by providing legal advice on individual investigations of labor violations.

**International Labor Affairs.**—The Bureau of International Labor Affairs (ILAB) safeguards dignity at work, both at home and abroad, by strengthening global labor standards; enforcing labor commitments among trading partners; promoting racial and gender equity; and combating international child labor, forced labor, and human trafficking. ILAB combines monitoring and enforcement of labor provisions in U.S. trade agreements and preference programs, bilateral and multilateral engagement, research, and technical cooperation to carry out the international responsibilities of the Department of Labor.

**Administration and Management.**—Exercises leadership in all departmental administrative and management programs and services and ensures efficient and effective operation of Departmental programs; provides policy guidance on matters of personnel management, information resource management and procurement; and provides for consistent and constructive internal labor-management relations throughout the Department.

**Adjudication.**—Renders timely decisions on appeals of claims filed before four different components, which include the Office of Administrative Law Judges, the Administrative Review Board, the Benefits Review Board, and the Employees' Compensation Appeals Board. The Office of Administrative Law Judges also serves as the tribunal of first instance.

**Women's Bureau.**—Serves as the only Federal agency mandated by Congress to work exclusively on issues that affect women in the workplace and to represent the needs of wage-earning women in the public policy process. The Women's Bureau deploys its research, statistics, advocacy and grantmaking capacity to advising the Secretary, the Administration, and sister DOL agencies on policy and regulatory issues facing working women.

**Civil Rights.**—Ensures compliance with certain Federal civil rights statutes and Executive Orders, and their implementing regulations, including Titles VI and VII of the Civil Rights Act of 1964, Sections 504 and 508 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, and Section 188 of the Workforce Innovation and Opportunity Act. These laws apply to and protect Department of Labor (DOL) employees, DOL applicants for employment, and individuals who engage the Nation's workforce programs or otherwise interact with DOL-supported programs and activities.

**Chief Financial Officer.**—Created as a result of the CFO Act of 1990, provides financial management leadership and direction to all DOL program agencies on financial matters arising from legislative and regulatory mandates such as the CFO Act, GMRA, FFMIA, FMFIA, Clinger-Cohen, The Reports Consolidation Act, IPIA, Treasury Financial Manual guidance and OMB Circulars.

**Program Evaluation.**—The Office of the Chief Evaluation Officer is charged with coordinating and overseeing rigorous evaluations of the Department of Labor's programs, ensuring high standards in evaluations undertaken and funded by the Department, and in leading implementation of the Department's evidence-building agenda. Through its development and dissemination of rigorous scientific knowledge, the office builds evaluation capacity and expertise to ensure that evaluation and research findings are available and accessible for policy and program decision-makers in a timely and user-friendly way.

**Jobs for Veterans State grants.**—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the state workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, grants are allocated to the states according to the statutory formula to support Disabled Veterans'

Outreach Program (DVOP) specialists and Local Veterans' Employment Representative (LVERs) staff.

DVOP specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment. LVER staff (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable state employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the state employment service delivery system and to the state Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the state's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

**Transition Assistance Program (TAP).**—(10 U.S.C. 1144, 38 U.S.C. 4113) This program provides employment workshops for separating service members and their spouses to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to facilitate the transition from military to civilian employment. VETS coordinates with Federal agencies including the Departments of Defense, Veterans Affairs, Education and Homeland Security, and also the Small Business Administration and the Office of Personnel Management to provide transition services to military service members separating from active duty. The 2019 National Defense Authorization Act instructed responsible agencies to improve TAP and directed DOL to deliver a mandatory one-day employment planning workshop for all transitioning service members, as well as optional days of instruction on general employment preparation and Vocational Training for transitioning service members interested in apprenticeship opportunities and technical careers. VETS also serves veterans and veteran spouses through the Off Base Transition Training pilot at selected states, to further serve and support underserved populations in locations away from active duty installations.

**National Veterans' Training Institute (NVTI).**—NVTI develops and supplies competency-based training to Federal and state providers of services to veterans (38 U.S.C. 4109). NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation and ongoing staff development so they can effectively assist job-seeking veterans.

**Homeless Veterans' Reintegration Program (HVRP).**—HVRP (38 U.S.C. 2021, 2021A and 2023) provides grants to states or other public entities, as well as to non-profits, including faith-based organizations. Grantees operate employment programs to assist homeless veterans reintegrate into meaningful employment and stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the U.S. Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans.

**Federal management.**—VETS' Federal management budget activity supports the Federal administration of 38 U.S.C. 41, 42, and 43. This allows VETS to carry out programs and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). This activity provides for the salary and benefits, travel, and training for all VETS' current staff in the national office, six regional offices, and offices in each state, the District of Columbia, and Puerto Rico. In addition, this activity provides for outreach and engagement with Federal, state, and local governments; private sector employers and trade associations; institutions of higher learning; non-profit organizations; and Veteran Service Organizations to help service members, returning veterans, and families reintegrate into the workforce.

It also enables VETS to discharge its responsibilities to administer, interpret, and enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. 4301–4335, by providing tech-

nical assistance and investigating complaints received from veterans and service members who believe their employment and reemployment rights were violated. This budget activity enables VETS to investigate complaints received from veterans who claim a violation of their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment Opportunities Act of 1998 (VEOA), 5 U.S.C. 3330a. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. 4212. These responsibilities involve the administration of a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans.

Resources under the Federal management activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration (38 U.S.C. 2021). VETS personnel provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

Federal management supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). Through outreach and education efforts, such as job fairs, VETS staff raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported through this budget activity. In addition, through fee collection, the federal management activity fund administrative processes associated with the Honoring Investments in Recruiting and Employing American Military Veterans Act of 2017 (HIRE VETS Act or the Act).

Diplomatic Programs (DP) is financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which are to remain available until expended. DP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2023 request includes base funding for the State Department operations in Iraq, Pakistan, and other High Threat Posts (HTP) as well as the remaining overhead costs associated with the suspension of operations in Afghanistan.

Funds are requested in the following categories:

*Human Resources.*—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

*Overseas Programs.*—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2023 will support 276 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings, and other multilateral activities in the United States and abroad. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

*Diplomatic Policy and Support.*—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Funds to support the work of the Global Engagement Center (GEC) are also included in this category. The GEC's mission is to direct, lead, synchronize, integrate, and coordinate efforts of the Federal Government to recognize, understand, expose, and counter foreign state and foreign non-state propaganda and disinformation efforts aimed at undermining or in-

fluencing the policies, security, or stability of the United States, United States allies, and partner nations. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in DP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

**Security Programs.**—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security (DS), to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, H and L Visa Fraud Prevention and Detection Fees, Affidavit of Support fees, use of J Waiver Fees starting in FY 2021, and full use of Expedited Passport Fees (EPF) starting in FY 2022. In FY 2017 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The Consolidated Appropriations Act of FY 2017 enacted a new standalone account to display fee-funded consular programs independent of the larger Diplomatic Programs (formerly Diplomatic and Consular Programs) account that began in FY 2019. This change enables the Department to provide greater transparency and accountability in financial reporting on these fees and surcharges, facilitate budget estimates for these fees and surcharges, and more easily make the information available to users of budget information and other stakeholders.

Section 7025(i)(1) of the general provisions provides a permanent extension of the Western Hemisphere Travel Initiative Surcharge. Section 7062 provides for the recovery of costs of consular services not otherwise subject to visa fees and surcharges retained by the Department. Section 7063 provides legislative language expanding the authorities of the Border Crossing Card and Passport Security Surcharge. Finally, Section 7052 provides the ability to use the Fraud Prevention and Detection fees for the costs of providing consular services.

These consular fees and surcharges support an array of activities that are vital to ensuring strong U.S. border security, including routine and emergency services for U.S. citizens overseas; the issuance of secure passports to U.S. citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's consular systems. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides for the conduct or supervision of all audits, investigations, and inspections of the Department's programs and operations as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office of the Inspector General are to: improve the economy, efficiency, and effectiveness of the Department's operations; detect and prevent fraud, waste, abuse, and mismanagement; and evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The Office also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's Inspector General also serves as Inspector General of the U.S. Agency for Global Media and has partial oversight of Department of State-managed foreign assistance resources, as mandated by law. In addition, this appropriation funds the Office of the Special Inspector General for Afghanistan Reconstruction (SIGAR). SIGAR provides independent oversight of programs and operations funded with amounts made available for the reconstruction of Afghanistan. SIGAR performs this oversight through audits, field inspections and investigations of potential waste, fraud and abuse in coordination with, and receiving the cooperation of, the Inspectors General of the Department of State, Department of Defense and the United States Agency for International Development.

This appropriation provides funding to the Bureau of Educational and Cultural Affairs (ECA) for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, security policy objectives and to advance U.S. influence overseas. These goals are addressed by building increased

mutual understanding through international exchange and professional development activities. Programs under this appropriation include:

**Academic Programs.**—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. In addition, educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad, and the American Spaces Program supports more than 600 open-access cultural centers that freely share American books, movies, and programs that demonstrate American values with foreign audiences in more than 140 countries to connect the world with the United States.

**Professional/Cultural Exchanges.**—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. The Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders. The Citizen Exchanges Program also includes the TechCamp Program, which leverages cutting-edge communications and private sector expertise to build networks of influential activists around the world to advance shared policies to include countering disinformation, supporting good governance, and mitigating violent extremism.

**Youth Leadership Initiatives.**—Includes programs targeting young private, public, and civil sector leaders in Africa, Southeast Asia, and the Americas.

**Program and Performance.**—Includes the U.S. Speakers Program that connects professional foreign audiences with American experts on topics of strategic importance to the United States and collaborates with U.S. embassies and consulates around the world to develop and implement customized programs. Funds also support opportunities for ECA program alumni to build on participant experiences and maximize the return on investment in people-to-people connections by turning exchange experiences into enduring relationships that are part of a growing network of active alumni associations across the globe, as well as on-going evidence-based program performance measurements and independent evaluations to strengthen ECA's ability to monitor, evaluate, learn, and innovate.

**Exchanges Support.**—Includes all domestic staff, overseas Regional Language Officers, and operational support costs managed by ECA, and provides government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2023, the Department will manage the nineteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. The 2023 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. Both programs are funded within a combined CSCS-MCS program in FY 2023. Funding sources include ESCM appropriations, interagency contributions, and consular fee revenues.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of

U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2023 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSNDCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, which is available without fiscal year limitations and is authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool, operations and dispatch agencies operations, inter-agency co-operative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act. In FY 2023 the Department plans to add a new service center for Real Property Management.

The International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998 using the Working Capital Fund. ICASS allows more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at

an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The Foreign Service Retirement and Disability Fund (FSRDF) was established in 1924 to provide pensions to retired and disabled members of the Foreign Service. The FSRDF's revenues consist of contributions from active participants and their U.S. Government agency employers; appropriations; and interest on investments. Monthly annuity payments are made to eligible retired employees or their survivors. The FSRDF includes the operations of two separate retirement systems—the Foreign Service Retirement and Disability System (FSRDS) and the Foreign Service Pension System (FSPS). This appropriation provides mandatory funding for the Foreign Service Retirement and Disability Fund (FSRDF) as prescribed in the Foreign Service Act of 1980 as authorized in Section(s) 821 and 822.

This appropriation provides the United States' treaty mandated assessments and expenses to 19 international commissions and organizations including three bilateral commissions (the Great Lakes Fisheries Commission, the International Pacific Halibut Commission, and the Pacific Salmon Commission), nine multilateral bodies, two marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The first phase of the President's Emergency Plan for AIDS Relief (PEPFAR), from 2004 to 2008, was the largest ever global public health initiative by a single country to fight the HIV/AIDS epidemic. Funding was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

#### FUNDS APPROPRIATED TO THE PRESIDENT

#### GLOBAL HEALTH PROGRAMS

For necessary expenses to carry out the provisions of chapters 1 and 10 of part I of the Foreign Assistance Act of 1961, for global health activities, in addition to funds otherwise available for such purposes, \$3,956,000,000, to remain available until September 30, 2024, and which shall be apportioned directly to the United States Agency for International Development: Provided, That this amount shall be made available for training, equipment, and technical assistance to build the capacity of public health institutions and organizations in developing countries, and for such activities as: (1) child survival and maternal health programs; (2) immunization and oral rehydration programs; (3) other health, nutrition, water and sanitation programs which directly address the needs of mothers and children, and related education programs; (4) assistance for children displaced or orphaned by causes other than AIDS; (5) programs for the prevention, treatment, control of, and research on HIV/AIDS, tuberculosis, polio, malaria, and other infectious diseases including neglected tropical diseases, and for assistance to communities severely affected by HIV/AIDS, including children infected or affected by AIDS; (6) disaster preparedness training for health crises; (7) programs to prevent, prepare for, and respond to, unanticipated and emerging global health threats, including zoonotic diseases; and (8) family planning/reproductive health: Provided further, That funds appropriated under this paragraph may be made available for a United States contribution to The GAVI Alliance: Provided further, That none of the funds made available in this Act nor any unobligated balances from prior appropriations Acts may be made available to any organization or program which, as determined by the President of the United States, supports or participates in the management of a program of coercive abortion or involuntary sterilization: Provided further, That any determination made under the previous proviso must be made not later than 6 months after the date of enactment of this Act, and must be accompanied by the evidence and criteria utilized to make the determination: Provided further, That none of the funds made available under this Act may be used to pay for the performance of abortion as a method of family planning or to motivate or coerce any person to practice abortions: Provided further, That nothing in this paragraph shall be construed to alter any existing statutory prohibitions against abortion under section 104 of the Foreign Assistance Act of 1961: Provided further, That none of the funds made available under this Act may be used to lobby for or against abortion: Provided further, That in order to reduce reliance on abortion in developing nations, funds shall be available only to voluntary family planning projects which offer, either directly or through referral to, or information about access to, a broad range of family planning methods and services, and that any such voluntary family planning project shall meet the following requirements: (1) service providers or referral agents in the project shall not implement or be subject to quotas, or other numerical targets, of total number of births, number of family planning acceptors, or acceptors of a particular method of family planning (this provision shall not be construed to include the use of quantitative estimates or indicators for budgeting and planning purposes); (2) the project shall not include payment of incentives, bribes, gratuities, or financial reward to: (A) an individual in exchange for becoming a family planning acceptor; or (B) program personnel for achieving a numerical target or quota of total number of births, number of family planning acceptors, or acceptors of a particular method of family planning; (3) the project shall not deny any right or benefit, including the right of access to participate in any program of general welfare or the right of access to health care, as a consequence of any individual's decision not to accept family planning services; (4) the project shall provide family planning acceptors comprehensive information on the health benefits and risks of the method chosen, including those conditions that might render the use of the method inadvisable and those adverse side effects known to be consequent to the use of the method; and (5) the project shall ensure that experimental contraceptive drugs and devices and medical procedures are provided only in the context of a scientific study in which participants are advised of potential risks and benefits; and, not less than 60 days after the date on which the USAID Administrator determines that there has been a violation of the requirements contained in paragraph (1), (2), (3), or (5) of this proviso, or a pattern or practice of violations of the requirements contained in paragraph (4) of this proviso, the Administrator shall submit to the Committees on Appropriations a report containing a description of such violation and the corrective action taken by the Agency: Provided further, That in awarding grants for natural family planning under section 104 of the Foreign Assistance Act of 1961 no applicant shall be discriminated against because of such applicant's religious or conscientious commitment to offer only natural family planning; and, additionally, all such applicants shall comply with the requirements of the previous proviso: Provided further, That for purposes of this or any other Act authorizing or appropriating funds for the Department of State, foreign operations, and related programs, the term "motivate", as it relates to family planning assistance, shall not be construed to prohibit the provision, consistent with local law, of information or counseling about all pregnancy options: Provided further, That information provided about the use of condoms as part of

The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID). Global health programs seek to improve health outcomes by increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

**Global Health Programs-State.**—The Global Health Programs (GHP-State) account supports the goal of controlling the HIV/AIDS epidemic through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2023 Budget requests \$6,620.0 million in the GHP-State account for global HIV programming. PEPFAR is led and coordinated by the Office of the Global AIDS Coordinator (S/GAC) in DOS, which draws upon the expertise and experience of other U.S. government partners including USAID, the Department of Health and Human Services, the Department of Defense, and the Peace Corps to align resources, activities, and expertise at the country level in the fight against global AIDS. Programs work through expanded partnerships to build capacity for efficient, effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, S/GAC supports strong monitoring evaluation and accountability systems to set benchmarks for outcomes and programmatic efficiencies

through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$2,000.0 million to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in GHP-State for the seventh replenishment, with the United States offering to match \$1 for every \$2 contributed by other donors. \$45 million is requested for a United States contribution to the United Nations Joint Program on HIV/AIDS (UNAIDS) in support of the Sustainable Development Goal 3 to end AIDS by 2030 through strategic direction, normative guidance through WHO, civil society advocacy and technical support. The request also includes \$250 million and the authority for a new international financing facility to support global health security and pandemic preparedness.

**Global Health Programs-USAID.**—The 2023 Budget requests \$3,956.0 million in the GHP-USAID account for a comprehensive and integrated approach to prevent child and maternal deaths, combat infectious disease threats, and control the HIV epidemic. This approach strives to maximize impact and to expand its reach by building upon previous investments made through maternal and child health, nutrition, family planning and reproductive health, vulnerable children, tuberculosis, neglected tropical diseases, global health security, the President's Emergency Plan for AIDS Relief, and the President's Malaria Initiative. This approach will continue to save millions of lives while fostering sustainable health care delivery systems that can address the full range of developing country health needs including preparing for, and responding to, the next global disease outbreak or pandemic. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and other public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. The Budget provides \$290 million to support a multi-year (2020–2023), \$1.16 billion contribution to Gavi, the Vaccine Alliance. It also provides \$250 million for contributions to multilateral organizations leading the global COVID response through the Act-Accelerator platform, \$90 million to replenish the Emergency Reserve Fund, and \$10 million for the Health Resilience Fund for global health activities in challenging environments and countries in crisis.

**Overseas Assistance.**—The majority of the Migration and Refugee Assistance (MRA) account addresses the protection and assistance needs of refugees, conflict victims, stateless persons, and vulnerable migrants worldwide. Funds primarily support the programs of international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), the United Nations Relief and Works Agency for Palestine Refugees in the

Near East (UNRWA), and the International Organization for Migration (IOM), as well as non-governmental organizations (NGOs).

**Humanitarian Migrants to Israel.**—These funds assist humanitarian migrants resettling in Israel.

**U.S. Refugee Admissions.**—MRA funds overseas processing, transportation, and initial placement for refugees and certain other categories of special immigrants resettling in the United States. These activities are carried out primarily by NGO partners and the International Organization for Migration (IOM).

**Administrative Expenses.**—These funds finance the salaries and operating expenses for the Bureau of Population, Refugees, and Migration in Washington, D.C. and overseas. (Note: Funds for the salaries and support costs of the positions dedicated to international population policy and coordination are requested under the Department of State's Diplomatic and Consular Programs appropriation.)

In FY 2023, the MRA account will support ongoing as well as new needs.

The Complex Crises Fund (CCF) account supports programs to prevent or respond to emerging or unforeseen complex crises overseas. USAID deploys CCF when there is an anticipated and overwhelming urgent need or window of opportunity where a U.S. Government response will help stem the rise of violent conflict and instability or advance the consolidation of peace and democracy. CCF funding allows the U.S. Government to respond to rapidly changing, complex crises that include a combination of humanitarian, political, and security dimensions and contributes to overarching U.S. foreign policy or national security goals.

International Narcotics Control and Law Enforcement (INCLE) advances U.S. national security interests by supporting bilateral, regional, and global programs that enable partners and allies to manage and address transnational threats at their source. INCLE programs mitigate security threats posed by all forms of transnational crime, including production and trafficking of narcotics, and strengthen partner countries' criminal justice systems. These programs improve the ability of partner countries to cooperate effectively with U.S. law enforcement, and address the underlying conditions, such as corruption and weak rule of law, that foster state fragility and spur irregular migration to the United States.

Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) partners with low and low-middle income countries to reduce poverty through economic growth. MCC provides large grants to developing countries that meet rigorous standards for good governance, from fighting corruption to respecting democratic rights, as evaluated by MCC's scorecard. MCC takes a business-like approach, with bedrock commitments to data, accountability, and evidence-based decision making. Since its inception, MCC has signed 38 compacts and 30 threshold program agreements, totaling an investment of \$13.9 billion dollars. In addition to providing large grants, MCC works with countries to advance policy and institutional reforms to create the enabling conditions for private sector-led growth. MCC's evidence-based approach leads to compacts that drive partner country ownership, including financial accountability and transparent and fair procurement practices, and measurable development impact to ensure that MCC assistance is used responsibly and effectively. In FY 2023, MCC will build on its rigorous, evidence-based model and will focus on the strategic areas of climate change, inclusion and gender, and catalyzing private investment as well as sustainable infrastructure investments that are aligned with the Build Back Better World (B3W) initiative.

Focusing on these priority areas will enable MCC to expand impact and further strengthen its ability to deliver on its mission to reduce poverty through sustainable and inclusive economic growth.
