The Food and Drug Administration (FDA) promotes and protects public health by overseeing the safety, efficacy, quality, and security of human and veterinary drugs, biological products, medical devices, foods, cosmetics, and products that emit radiation. FDA also has responsibility for regulating the manufacturing, marketing, and distribution of tobacco products to protect public health and to reduce tobacco use by minors. FDA advances public health by helping to advance innovations that make medicines more effective, safe, and affordable and by helping the public get the accurate, science-based information they need to use medicines and foods to maintain and improve their health. FDA supports the Nation's counterterrorism capability by ensuring the security of the food supply and by fostering the development of medical products and countermeasures to respond to deliberate and naturally emerging public health threats. The FY 2023 Budget includes \$6.8 billion in total resources for FDA. The Budget invests in priority activities including inspections modernization, critical food safety efforts, medical device cybersecurity, public health employee pay costs, alternative methods to animal testing, and Cancer Moonshot.

Resources displayed here support grants and contracts managed by Health Resources and Services Administration (HRSA). These activities include support for Health Centers, treatment and care for those living with HIV/AIDS, health workforce training, maternal and child health care services, promotion of organ and bone marrow donation, rural health activities, and the medical malpractice claims funds, which pay malpractice claims filed against employees of federally-supported health centers and free clinics. HRSA is also responsible for oversight of the 340B Drug Discount Program.

HRSA administers the following revolving loan programs: Health Professions Student Loans (HPSL), Nursing Student Loans (NSL), Primary Care Loans (PCL) and Loans for Disadvantaged Students (LDS). These programs are financed through revolving accounts (Federal Capital Contribution) and do not receive annual appropriations. Through these revolving fund accounts, funds are awarded to institutions that in turn provide loans to individual students. As borrowers pay back loans, the program's revolving account gets replenished, and the collected funds are then used to give out new loans in the following academic years. If the program's revolving account has excess funds that will not be used to provide new loans, these excess funds are returned to HRSA. Funds returned to HRSA are then awarded to programs that are in need of additional funds. The information below reflects Academic Year 2020–2021 data reported in the FY 2021 Annual Operating Report.

FUNDING FOR INDIAN HEALTH SERVICES

(Legislative proposal, subject to PAYGO)

The Budget proposes to shift the four IHS accounts from discretionary to mandatory. After FY 2023, IHS funding would grow to keep pace with healthcare costs and population growth and gradually close longstanding service and facility shortfalls. The net score forgoes discretionary funding for mandatory to provide IHS stable and predictable funding.

The Centers for Disease Control and Prevention (CDC) works to protect the health and safety of all Americans. The agency has played a key role in protecting Americans from recent health emergencies including COVID-19, opioid overdose, Zika, and HIN1. Key programs of the CDC include immunization and respiratory diseases; HIV/AIDS, viral hepatitis, STD, and tuberculosis prevention; emerging and zoonotic infectious diseases; chronic disease prevention and health promotion; public health and scientific services; injury prevention and control; environmental health; global health; programs that reduce the occurrence of birth defects and developmental disabilities; public health preparedness and emergency response; and cross-cutting CDC-wide activities and program support, including public health infrastructure. The FY 2023 Budget continues to increase foundational investments in core public health capacities that are essential prepare for and response to public health emergencies and to the effective and efficient functioning of public health system. These include a request for \$600 million for dedicated funding to invest in public health infrastructure and capacity, and \$50 million to support the Center for Forecasting and Outbreak Analytics, which will sustain efforts begun in FY 2021 with COVID-19 emergency supplemental appropriations. The FY 2023 Budget also provides \$310 million for CDC to undertake the fourth year of the Ending the HIV Epidemic in the U.S. initiative, and \$200 million to continue CDC's Public Health Data Modernization efforts. The FY 2023 Budget provides \$353 million for global public health protection activities to protect Americans through partnerships and other activities that support public health capacity improvements in countries at risk for uncontrolled outbreaks of infectious diseases. In addition, the FY 2023 Budget includes several policy proposals to allow CDC to more efficiently respond to public health emergencies, including a proposal to modernize CDC's budget structure by consolidating the existing 13 Treasury accounts, including "Buildings and Facilities", into a single "CDC-Wide Activities and Program Support" account. Nearly all existing budget lines are maintained within the proposed single account structure.

The FY 2023 Budget for CDC establishes a new Vaccines for Adults (VFA) program, which will provide uninsured adults with access to all vaccines recommended by the Advisory Committee on Immunization Practices (ACIP) at no cost. As a complement to the successful Vaccines for Children (VFC) program, the VFA program will reduce disparities in vaccine coverage and promote infrastructure for broad access to routine and outbreak vaccines. The FY 2023 Budget also includes mandatory funding for significant investments in pandemic preparedness and biodefense across HHS, including CDC. These investments will allow CDC to transform medical defenses, ensure situational awareness, strengthen public health systems and build core capabilities.

Implemented in fiscal year 2014, CDC's Working Capital Fund has extended availability and serves as the funding mechanism to finance centralized business services support across CDC. Services rendered under the fund are performed at pre-established rates that are used to cover the full cost of operations and future investments. Contributions are collected for services, thereby creating market-like incentives to maximize efficiency and quality.

HHS, along with CDC, began implementing provisions of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) on July 1, 2011, to provide monitoring and treatment benefits to eligible responders and survivors. CDC serves as the Program Administrator for the World Trade Center (WTC) Health Program. The WTC Health Program provides quality care for WTC-related health conditions, conducts WTC research, and maintains a health registry to collect data on victims of the September 11, 2001, terrorist attacks. The WTC Health Program has been extended through FY 2090 under the James Zadroga 9/11 Health and Compensation Reauthorization Act of 2015 (P.L. 114-113, Division O, Title III). The amounts included for 2022 and 2023 in the Budget reflect estimated Federal obligations for the WTC Health Program.

The Balanced Budget Act of 1997 (P.L. 105-33) established the Children's Health Insurance Program (CHIP) under title XXI of the Social Security Act. Title XXI provides Federal matching funds to States to enable them to extend coverage to uninsured children from low-income families. States are able to use title XXI funds for obtaining health benefit coverage for uninsured children through a separate CHIP program, a CHIP Medicaid expansion program, or a combination of both. The Children's Health Insurance Program Reauthorization Act of 2009 (P.L. 111-3, CHIPRA) reauthorized the CHIP program and appropriated funding for CHIP through fiscal year 2013. CHIPRA made some modifications to the program, including increased funding for States and territories, and support for child health quality and outreach activities. CHIPRA also created a contingency fund in a separate account to assist States who project spending above their available allocated CHIP funds. The Patient Protection and Affordable Care Act of 2010 (P.L. 111-148) and the Medicare Access and CHIP Reauthorization Act of 2015 (P.L. 114-10) extended CHIP funding through fiscal year 2015 and 2017, respectively. The HEALTHY KIDS Act (P.L. 115-120) and the Advancing Chronic Care, Extenders, and Social Services Act (P.L. 115-123) extended CHIP funding through fiscal year 2023 and 2027, respectively.

The Children's Health Insurance Program Reauthorization Act of 2009 (P.L. 111-3) established the Child Enrollment Contingency Fund under title XXI of the Social Security Act. Beginning in 2009, a State may qualify for a Contingency Fund payment if it projects a funding shortfall for the fiscal year and if its average monthly child enrollment exceeds its target average number of enrollees for the fiscal year. The Patient Protection and Affordable Care Act of 2010 (P.L. 111-148) and the Medicare Access and CHIP Reauthorization Act of 2015 (P.L. 114-10) extended the Contingency

Fund through fiscal years 2015 and 2017, respectively. The HEALTHY KIDS Act (P.L. 115–120) and the Advancing Chronic Care, Extenders, and Social Services Act (P.L. 115–123) extended the Contingency Fund through FY 2023 and FY 2027, respectively.

The Fund receives an appropriation equal to 20 percent of the CHIP national allotment appropriation under section 2104(a) of the Social Security Act. The Contingency Fund is invested in interest bearing securities of the United States, and the income derived from these investments constitutes a part of the fund.

This account funded the Pre-Existing Condition Insurance Plan program (PCIP), which made health insurance available to people who had been unable to purchase insurance due to a pre-existing condition. Enrollees paid monthly premiums similar to those charged in the commercial individual market, and the Federal government paid for remaining costs that exceeded enrollee contributions. The funding for this program, including operating costs, was provided in the Patient Protection and Affordable Care Act (P.L. 111-148). The PCIP program ended in fiscal year 2014, and outlays in subsequent fiscal years reflect program close out and claims run out costs, as well as allowable administrative costs in the current year.

Section 1343 of the Patient Protection and Affordable Care Act (P.L. 111-148) established a permanent risk adjustment program for non-grandfathered plans in the individual and small group markets. Risk adjustment is budget neutral within each state and market, such that charges collected from plans with lower than average actuarial risk are used to make payments to plans with higher than average actuarial risk. Risk adjustment may be operated by a State, or by the Federal government in the event a State chooses not to operate risk adjustment. Payments and charges are made in the year following the plan year for which they are calculated.

Section 1341 of the Patient Protection and Affordable Care Act (P.L. 111-148) established a transitional three-year reinsurance program to minimize the impact of high-cost enrollees in plans in the individual market for plan years 2014, 2015, and 2016. The Centers for Medicare & Medicaid Services assessed contributing entities a per enrollee fee to fund the reinsurance program and made payments to issuers in the individual market for enrollees whose medical costs exceed a certain threshold, up to a reinsurance cap. Reinsurance collections and payments were made in the year following the plan year for which they were applicable. Reinsurance collections ended in FY 2019 and outlays in subsequent fiscal years reflect remaining payments, refunds, and allowable administrative activities.

Section 1322 of the Patient Protection and Affordable Care Act (P.L. 111-148) authorized and appropriated funding for the Consumer Operated and Oriented Plan (CO-OP) Program. The CO-OP Program fosters the creation of qualified nonprofit health insurance issuers that operate with a strong consumer focus to offer qualified health plans in the individual and small group markets in the States. The Secretary awarded loans to qualified nonprofit issuers to fund start-up costs and reserves, which enabled qualified issuers to meet state solvency requirements. The Secretary issued the final round of loans in December 2014.

Beginning in FY 2011, a total of 20 percent of the funds appropriated or credited to the PCORTF was transferred each year to the Department of Health and Human Services (HHS). In FY 2020, PCORTF was extended through FY 2029. As authorized in section 937 of the Public Health Service Act, HHS will disseminate research findings from the Patient-Centered Outcomes Research Institute and other government-funded comparative clinical effectiveness research and coordinate Federal health programs to build research and data capacity for comparative clinical effectiveness research. The HHS Service and Supply Fund (SSF) provides a wide range of logistical and support services to components of the Department and other Federal agencies. The Program Support Center includes activities, such as personnel and payroll support, information technology, financial management operations, and administrative services, including acquisitions management, building and property management, telecommunication services, medical supplies repackaging and distribution services, and the Federal Occupational Health Service. The Office of the Secretary activities include the Service and Supply Fund Manager's Office, departmental contracts, audit resolutions, Commissioned Corps force management, web management, claims, acquisition integration and modernization, acquisition reform, small business consolidation, grants tracking, the physical security component of the Department's implementation of Homeland Security Presidential Directive 12, and commercial services management.

Most Commissioned Corps officers work for agencies in the Department of Health and Human Services and are reflected in the agencies' personnel summaries. However, some officers are assigned to other Federal agencies. The allocation account section in the following personnel summary shows officers assigned to other agencies, which are paid directly by that agency, either through an allocation account or by directly citing that agency's appropriation.

The mission of the Office of Inspector General (OIG) is to protect the integrity of the U.S. Department of Health and Human Services (HHS) programs and the health and welfare of the people they serve. As established by the Inspector General Act of 1978, OIG is an independent and objective organization that fights fraud, waste, and abuse and promotes efficiency, economy, and effectiveness in HHS programs and operations. OIG works to ensure that Federal dollars are used appropriately and that HHS programs well serve the people that use them. OIG fulfills its mission through a broad range of audits, evaluations, investigations, and enforcement and compliance activities. In addition to discretionary appropriations, OIG receives funds through the Health Care Fraud and Abuse Control (HCFAC) account created by the Health Insurance Portability and Accountability Act of 1996.

Within 60 days of bringing such a facility online, and monthly thereafter, the Secretary shall provide to the Committees on Appropriations of the House of Representatives and the Senate a report detailing the total number of children in care at the facility, the average length of stay and average length of care of children at the facility, and, for any child that has been at the facility for more than 60 days, their length of stay and reason for delay in release.
