President Biden's Bipartisan Infrastructure Law is Delivering in American Samoa

As of July 2022

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of American Samoa. To date, \$40 million in Bipartisan Infrastructure Law funding has been announced and is headed to American Samoa. This year alone, American Samoa will receive more than \$8 million for transportation to invest in roads, bridges, public transit, ports and airports and nearly \$31 million for clean water. And, as of today, more than 2,000 households across the territory are receiving affordable internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across American Samoa, the law makes critical investments that will improve lives for the people of American Samoa and position the region for success.

Roads and Bridges: One in five miles, or 173,000 total miles, of our highways and major roads and 45,000 bridges across the United States are in poor condition. Bridges in poor condition pose heightened challenges in communities in American Samoa, which often may rely on a single bridge for the passage of emergency service vehicles. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Through the Territorial Highway Program, American Samoa would expect to receive approximately \$24 million over five years to rebuild its roads and bridges.

- **Announced funding to date:** To date, American Samoa has been allocated \$4.6 million through the Territorial Highway Program.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. American Samoa will receive a minimum allocation of at least \$25 million to help ensure

high-speed internet coverage across the territory. Additionally, the Bipartisan Infrastructure Law's Affordable Connectivity Program cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program.

- **Progress to date:** About 2,000 households in American Samoa are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: Currently, up to 10 million American households across the country connect to water through lead pipes and lack access to clean, safe drinking water. The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, approximately \$31 million is available in fiscal year 2022 to provide clean and safe water across the territory. Of this funding, over \$10 million is dedicated to lead pipe and service line replacement, with another \$6.7 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, American Samoa would expect to receive more than \$7.5 million over five years under the Bipartisan Infrastructure Law to improve public transit across the territory.¹

- **Announced funding to date:** To date, American Samoa has been allocated nearly \$1.5 million to improve public transportation options across the territory in fiscal year 2022.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, and carbon capture, as well as a historic \$3.5 billion investment in weatherization to

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, more than \$820,000 has been allocated to American Samoa in 2022 for weatherization and more than \$698,000 to help prevent outages and make the power grid more resilient in 2022. Additional grid funding will be made available in the coming months.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports and airports – ultimately helping our country move goods and people more quickly and at lower cost.

- **Announced funding to date:** To date, American Samoa has received more than \$1.2 million in 2022 for airports.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, \$300,000 has been allocated to American Samoa for infrastructure resilience in 2022.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

AMERICAN SAMOA PROJECT SPOTLIGHTS

Resilience Project Spotlight

Overview: The U.S. Army Corps of Engineers awarded \$250,000 for a storm damage reduction and resilience project on Ofu Island. In addition, the Army Corps also awarded \$50,000 to complete a feasibility study for a resilience project on Tau Harbor.

See [here](#) for the full list of U.S. Army Corps projects announced earlier this year.
