President Biden's Bipartisan Infrastructure Law is Delivering in Guam

As of November 2022

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of Guam. To date, \$90 million in Bipartisan Infrastructure Law funding has been announced and is headed to Guam. Since the Bipartisan Infrastructure Law passed, Guam is set to receive nearly \$30 million for transportation to invest in roads, bridges, public transit, ports, and airports and more than \$26 million for clean water. And, as of today, 1,030 households across Guam are receiving affordable internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across Guam, the law makes critical investments that will improve lives for residents and position Guam for success.

Roads and Bridges: One in five miles, or 173,000 total miles, of our highways and major roads and 45,000 bridges across the United States are in poor condition. Bridges in poor condition pose heightened challenges in communities in Guam, which often may rely on a single bridge for the passage of emergency service vehicles. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Guam is expected to receive approximately \$96 million over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, Guam has been allocated \$18.4 million through the Territorial Highway Program funding in 2022.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. Guam will receive a minimum allocation of at least \$25 million to help ensure high-speed internet coverage across Guam. Additionally, the Bipartisan Infrastructure Law's

Affordable Connectivity Program cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program.

- **Progress to date:** 1,030 households in Guam are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: Currently, up to 10 million American households across the country connect to water through lead pipes and lack access to clean, safe drinking water. The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, approximately \$26 million is available in fiscal year 2022 to provide clean and safe water across Guam. Of this funding, \$10 million is dedicated to lead pipe and service line replacement, with another \$6 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, Guam would expect to receive more than \$11 million over five years under the Bipartisan Infrastructure Law to improve public transit across the territory.¹ This funding will expand healthy, sustainable transportation options in Guam.

- **Announced funding to date:** To date, Guam has been allocated \$2.2 million to improve public transportation options in fiscal year 2022.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, and carbon capture, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

- **Announced funding to date:** To date, approximately \$4.8 million has been allocated to Guam for clean energy, energy efficiency, and power in 2022. This includes:
 - \$1.3 million for weatherization;
 - \$2.6 million through the State Energy Program;
 - \$870,000 to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the US become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhances traveler experience.

- **Announced funding to date:** To date, Guam has received more than \$6.3 million in 2022 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and reimagination. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports— ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, Guam has received \$810,000 in 2022 for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. The Bipartisan Infrastructure Law makes a \$50 billion investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, \$100,000 has been allocated to Guam for infrastructure resilience in 2022.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans

live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

GUAM PROJECT SPOTLIGHTS

Airport Project Spotlight

Guam International Airport

Overview: The Department of Transportation (DOT) awarded \$6.3 million to Guam International Airport to improve the airport. This flexible funding can support projects to modernize infrastructure, improve safety, or address maintenance needs.

See [here](#) for the full list of Airport Infrastructure Grant projects announced earlier this year.

Ports and Waterways Project Spotlight

Agana Small Boat Harbor

Overview: The U.S. Army Corps of Engineers will invest \$810,000 into the Agana Small Boat Harbor for maintenance and repairs to protect structures.

See [here](#) for the full list of U.S. Army Corps projects announced earlier this year.

Roads and Bridges Project Spotlight

Guam Marine Transportation Enhancement Initiative

Overview: \$5.7 million in America's Marine Highway Grant funds, administered by DOT, will go towards expanding the Port's fleet of specialized container yard equipment. The equipment includes two 40-ton loaded container handlers; three 10-ton empty container handlers; five 5.5-ton forklifts; one 180-foot boom lift; nine container yard tractors; and two 40-plug mobile reefer generators.

See [here](#) for the full list of America's Marine Highway Grant recipients.
