The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service-provider missions and technical support to missions currently providing services.

OVERSEAS PRIVATE INVESTMENT CORPORATION PROGRAM ACCOUNT—Continued

modernizes and reforms the U.S. Government's development finance capabilities—primarily the Overseas Private Investment Corporation (OPIC) and the Development Credit Authority (DCA) of the U.S. Agency for International Development (USAID)—into a new agency: the United States International Development Finance Corporation (DFC), which launched on January 2, 2020. DFC continues to finalize the transfer process of OPIC accounts to DFC accounts. Upon completion, all future OPIC activity will be presented in the DFC accounts.

OPIC encouraged the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its credit program provided investment financing through loans and guaranteed loans. As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The FY 2024 request for the U.S. Trade and Development Agency (USTDA) of \$117.5 million will strengthen the Agency's ability to help U.S. companies create jobs through the export of U.S. goods and services for priority development projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project preparation activities, pilot projects and reverse trade missions that create sustainable infrastructure and foster economic growth in its partner countries. In carrying out its mission, USTDA prioritizes activities where there is a high likelihood for the export of U.S. goods and services that can match the development needs of the Agency's overseas partners.

The size and complexity of DFC's portfolio and its expanded development mandate requires a dedicated OIG. DFC OIG audits, investigations, inspections, and evaluations prevent, detect, and deter fraud, waste, abuse, and mismanagement of DFC investments, projects, systems, employees, and contractors. The OIG also provides advice and assistance to agency management, the DFC Board of Directors, and Congress; and strives to promote efficiency, effectiveness and economy in DFC programs and operations.

The President's Budget requests \$7.200 million for DFC OIG to be funded from the General Fund. This will allow the OIG to independently oversee DFC through audits, investigations, inspections, and evaluations that identify improvements to the management and execution of DFC's operations and programs.

to-people ties. The Peace Corps enters a country upon invitation of the host country government. The Volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps also promotes mutual understanding between the peoples of the developing world and the United States and helps develop the next generation of American leaders who return home and leverage their leadership and entrepreneurial skills to serve communities across the United States. Peace Corps Volunteers work primarily in the areas of agriculture, community economic development, education, environment, health and HIV/AIDS, and youth in development.

The Peace Corps Office of Inspector General provides independent oversight in accordance with the Inspector General Act of 1978, as amended. Through audits, evaluations and investigations the office prevents and detects waste, fraud, abuse and mismanagement; provides advice and assistance to agency management; and promotes efficiency, effectiveness and economy in agency programs and operations.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) invests directly in community-designed and community-led development across Latin America and the Caribbean to create more prosperous, peaceful, and democratic communities. The agency provides small grants to local leaders, innovators, and entrepreneurs working to address their communities' needs and seize development opportunities. IAF works to address critical issues in the region and advance the inclusion of historically marginalized populations, including women, youth, Indigenous peoples, African descendants, LGBTQI+, and persons with disabilities, in economic and civic life. The IAF's deep ties and more than half a century of expertise working with civil society complement the efforts of other U.S. foreign assistance agencies and advance the strategic, economic, and security interests of the United States.

The United States African Development Foundation (USADF) is a Federally funded public corporation that invest in African grassroots organizations, entrepreneurs, and small- and medium-sized enterprises (SMEs). USADF's investments promote African-designed and African-delivered local economic development by increasing incomes, revenues, and jobs and by creating pathways to prosperity for underserved communities. Working through a community-led development model, USADF provides grant capital of up to \$250K, capacity-building assistance, and convening opportunities to develop, grow, and scale African enterprises and entrepreneurs. These investments improve lives and livelihoods while addressing some of Africa's biggest challenges around food insecurity, insufficient energy access, and unemployment, particularly among women and youth. USADF furthers U.S. priorities in these areas to ensure critical development initiatives enacted by Congress, such as the Global Food Security Act, Electrify Africa Act, and the African Growth and Opportunities Act, extend to rural populations.

The United States is a member of the International Monetary Fund (IMF) through its quota subscription to the IMF, denominated in Special Drawing Rights (SDRs). An IMF member's quota subscription determines the maximum amount of financial resources that the member must commit to the IMF. Under reforms to IMF quotas decided in 2010 and implemented by the IMF in early 2016 after Congress passed the necessary legislation, the U.S. quota at the IMF increased by SDR 40,871,800,000 (approximately \$58 billion using the current exchange rate) and is presently SDR 82,994,200,000 (approximately \$115 billion using the current exchange rate). Quotas are the IMF's first line of financial resources and the main metric used by the IMF to determine members' voting shares and access to IMF financing.

The use of U.S. quota resources at the IMF constitutes an exchange of monetary assets and does not result in budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

See the "Loans to International Monetary Fund" account for additional information about the 2020 "New Arrangements to Borrow" (NAB) Decision.

5116 New Arrangements to Borrow	72,192	79,394	79,394

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB), which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998. It is now the second line of defense for IMF resources after a prior arrangement, the General Arrangements to Borrow (GAB), lapsed on December 25, 2018. The amounts authorized for the GAB were also authorized to be used for the NAB.

In 2019, the United States joined other key countries and IMF leadership in advancing a package of actions to maintain the overall level of IMF resources in conjunction with reforms to IMF governance and lending. As part of this package, the IMF and NAB participants agreed to double the size of the NAB, while the IMF reduced its bilateral borrowing agreements by a similar amount. Congress authorized Treasury to double the size of the United States' NAB participation in the 2020 Coronavirus Aid, Relief, and Economic Security (CARES) Act. The new NAB reforms, which include our increased participation, took effect at the IMF in January 2021 and remains in effect until December 31, 2025.

A total of 40 countries and institutions participate in the NAB for a total of SDR 361 billion (about \$515 billion), of which the current U.S. share is approximately SDR 56 billion (about \$80 billion). In order for the IMF to access resources in the NAB, the NAB must be activated pursuant to the procedures set for in the Executive Board decision governing the NAB. The NAB is currently not activated, which means that at present the IMF is relying on quota resources for current financing needs.

With respect to this account, resources provided by the United States under the NAB constitute an exchange of monetary assets and do not result in any budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. (See the *Analytical Perspectives* for additional information.)

Contributions to IMF Facilities and Trust Funds

The International Monetary Fund (IMF) maintains several facilities, some in the form of trust funds, to provide assistance to the world's poorest countries. The Poverty Reduction and Growth Trust (PRGT) is the IMF's concessional lending facility for low-income countries (LICs). Through the PRGT, the IMF makes subsidized loans (currently at zero percent interest) to the world's poorest countries in the context of longer-term economic adjustment programs. During the COVID-19 pandemic crisis and following Russia's invasion of Ukraine, the PRGT has provided essential resources to help LICs—which generally lack reliable access to global capital markets and some of which are facing acute balance of payment stresses—respond to the pandemic and the economic spillovers from Russia's war to prevent economic collapse. Since the start of the pandemic, the IMF has lent about \$265 billion to countries in need. Of this amount, the PRGT provided about \$21.5 billion in concessional financing to about 60 poor countries, roughly a fivefold increase in annual lending from the PRGT's pre-pandemic average. A U.S. contribution to the PRGT would help sustain the PRGT with the resources it needs to continue to help countries respond to and recover from the pandemic and mitigate economic scarring, and it would particularly benefit the most vulnerable populations in these countries.

The United States, the IMF, and the rest of the international community are also exploring ways for major economies to provide additional support through the IMF to vulnerable countries in need. The United States has led the design of a proposed new IMF trust fund, the Resilience and Sustainability Trust (RST), which the Executive Board of the IMF approved in April 2022, and which has been in operation since May 2022. The RST provides affordable, long-term financing alongside a regular IMF program for countries facing current or potential balance of payments gaps resulting from reforms taken to improve their resilience to macroeconomic shocks related to pandemics and natural disasters, including through energy security. By providing affordable, longer-term financing alongside regular IMF programs, RST lending will benefit from IMF lending safeguards, including strong governance requirements on borrowers, and will be overseen and approved by the IMF's Executive Board. A U.S. contribution to the RST would help establish the fund with the resources it needs to lend to vulnerable countries.

The Special Defense Acquisition Fund (SDAF) helps expedite the procurement of defense articles for provision to foreign nations and international organizations. The 2024 request reflects \$900 million in new SDAF obligation authority, to be funded by a combination of offsetting collections and previous SDAF procurements, referred to as SDAF reimbursements. In 2024, offsetting collections will be derived from the FMS sales of stock as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The 2024 request will support advance purchases of high-demand equipment that has long procurement lead times, which is often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

It oversees the acquisition and deployment of vehicles which are battery electric, plug-in electric hybrid, and hydrogen fuel cell vehicles. It will also ensure to acquire the necessary vehicle charging and refueling infrastructure. These acquisitions are a significant step towards eliminating tailpipe emissions of greenhouse gases (GHG) from DOT's fleet and aligning the fleet operations with the goal of achieving a fully ZEV federal fleet.

The Aviation Manufacturing Jobs Protection (AMJP) Program is a program created in March 2021, under the American Rescue Plan Act. The AMJP Program provided funding to eligible businesses, to pay up to half of their compensation costs for certain categories of employees, for up to six months. In return, businesses had to make several legal commitments, including a commitment not to conduct involuntarily layoffs, furloughs, or reductions in pay or benefits for the covered employees. The statute established a six-month timeframe for DOT to make awards. DOT is continuing to administer the awards made prior to the statutory deadline. The AMJP Program funds expire at the end of 2023.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the Federal Aviation Administration (FAA) to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service (EAS) Program and rural airport improvements. In addition, the FAA Modernization and Reauthorization Act (P.L. 112-95) requires that, in any fiscal year, overflight fees collected in excess of \$50 million will be available to carry out the EAS Program.

The Working Capital Fund finances common administrative services and other services that are centrally performed in the interest of economy and efficiency. The fund is financed through agreements with the Operating Administrations and other customers. In 2024, the Working Capital Fund is projected to obligate nearly \$746 million across DOT, including \$20 million to continue the Department's implementation of a shared services environment for commodity information technology (IT) investments. The IT shared services initiative will modernize IT across DOT and improve mission delivery by consolidating separate, overlapping, and duplicative processes and functions. In 2024, DOT will continue consolidating commodity IT services across Operating Administrations. As a key part of this effort, the Office of the Chief Information Officer will focus on investment-level commodity IT as well as IT security and compliance

Through 1997, the Essential Air Service (EAS) Program was funded from the Airport and Airway Trust Fund. Starting in 1998, the Federal Aviation Administration reauthorization funded it as a mandatory program supported by overflight fees under the EAS and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the Essential Air Service Program.

The 2024 Budget requests \$12.741 billion for Federal Aviation Administration (FAA) operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space transportation industry, as well as FAA policy oversight and overall management functions.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). In December 2014, the Congress sunset part of the aviation insurance program. Specifically, the Congress returned U.S. air carriers to the commercial aviation market for all of their war risk insurance coverage by ending the FAA's authority to provide war risk insurance for a premium. Pursuant to 49 U.S.C. 44305, the FAA may provide insurance without premium at the request of the Secretary of Defense, or the head of a department, agency, or instrumentality designated by the President, when the Secretary of Defense, or the designated head, agrees to indemnify the Secretary of Transportation against all losses covered by the insurance. The "non-premium" aviation insurance program was authorized through September 30, 2023 in the National Defense Authorization Act for 2020.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. The purchase of right-of-way is an eligible expense of the Federal-Aid Highway program.

This program was terminated by the Transportation Equity Act for the 21st Century of 1998, but will continue to be shown for reporting purposes as loan balances remain outstanding. No new budgetary resources are requested in 2024.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax, and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law. Per the Cash Management Improvement Act of 1990, this account reflects the net of State interest liability and adjusted Federal interest liability payments to or from States.

The following is the status of Highway Trust Fund.

Cash balances.—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand (i.e., uninvested balance). Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

Revenues.—The Budget presentation includes estimated receipts from existing Highway Trust Fund excise taxes, which would continue to be deposited into the Highway and Mass Transit Accounts of the Highway Trust Fund in the same manner as current law.

General Fund transfers. In 2022, the Infrastructure Investment Jobs Act transferred from the General Fund \$90 billion to the Highway Account of the Highway Trust Fund and \$28 billion to the Mass Transit Account of the Highway Trust Fund.

The Federal-aid Highways (FAH) program is designed to aid in the development, operations, and management of an intermodal transportation system. All programs included within the FAH program are financed from the Highway Account of the Highway Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations provide the authority for outlays resulting from obligations of contract authority. The Infrastructure Investment and Jobs Act authorized funding for the FAH program in fiscal years 2022 through 2026. This includes \$60.8 billion in 2024.

(d) The Secretary shall submit consolidated reports of the information provided by the States and territories annually to the House and Senate Committees on Appropriations.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act of 1999 (P.L. 106–159). Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation, and reduce truck and bus crashes. The Agency accomplishes this mission by reducing fatalities and property losses associated with commercial motor vehicles through education, regulation, enforcement, research, and innovative technology, thereby achieving a safer and more secure transportation environment. FMCSA is also responsible for enforcing Federal motor carrier safety and hazardous materials regulations for all commercial vehicles entering the United States along its southern and northern borders.

Motor Carrier Safety Grants provide funding to eligible States so they may conduct compliance reviews, identify and apprehend traffic violators, conduct roadside inspections, and support safety audits on new entrant carriers. FMCSA also supports States by conducting training for State agency personnel to accomplish motor carrier safety objectives. In addition, FMCSA reviews State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and actively engages with industry and other stakeholders through Innovative Technology programs to improve the safety and productivity of commercial vehicles and drivers.

The Operations and Programs account provides the necessary resources to support program and administrative activities for motor carrier safety. The Federal Motor Carrier Safety Administration (FMCSA) will continue to improve safety and reduce severe and fatal commercial motor vehicles crashes by requiring operators to maintain standards to remain in the industry, and by removing high-risk carriers, vehicles, drivers, and service providers from operation. Funding supports Nation-wide motor carrier safety and consumer enforcement efforts, including the continuation of the Compliance, Safety and Accountability Program; regulation and enforcement of movers of household goods; and Federal safety enforcement activities at the borders to ensure that foreign-domiciled carriers entering the U.S. are in compliance with FMCSA regulations. Resources are also provided to fund regulatory development and implementation; investment in research and technology with a focus on research regarding highly automated vehicles and related technology; information technology and information management; safety outreach; and education.

The Vehicle Safety programs support activities to reduce highway fatalities, prevent injuries, and reduce their associated economic toll by developing, setting, and enforcing Federal Motor Vehicle Safety Standards and rooting out safety-related defects in motor vehicles and motor vehicle equipment. These programs also set and enforce fuel economy standards for motor vehicles. These activities play a key role in advancing the President's Agenda on climate and energy policy and has significant societal and economic impacts. The National Highway Traffic Safety Administration's (NHTSA) efforts to develop and set new fuel economy standards are guided by the best science and protected by governed processes that ensure the integrity of Federal decision-making. NHTSA supports research into cutting-edge technologies, including complex safety-critical electronic control systems, vehicle cybersecurity, and new and emerging Automated Driving System technologies. Additional research areas include biomechanics, heavy vehicles safety technologies, and vehicle safety issues related to fuel efficiency and alternative fuels. The Operation and Research program supports a broad range of initiatives, including the development of rulemaking and safety standards, such as the motor vehicle fuel economy standards, harmonization efforts with international partners, and modernizing the New Car Assessment Program. This funding also supports compliance programs for motor vehicle safety and fuel economy standards, investigations of safety-related motor vehicle defects, enforcement of Federal odometer law, and oversight of safety recalls. NHTSA also leverages this funding to collect and analyze crash data to identify safety trends and develop countermeasures.

The 911 Grant Program was authorized by the Next Generation 911 Advancement Act of 2012, which allows eligible entities to utilize funds to implement and operate 911 services, and to train public safety personnel. The program helps 911 call centers upgrade to Next Generation 911 (NG911) capabilities, such as providing digital and network capabilities and implementing advanced mapping systems that will make it easier to identify a 911 caller's location. NG911 also helps 911 call centers manage call overloads and funds for training costs directly related to NG911 implementation. The program is funded by the Public Safety Trust Fund. The authority to expend these funds expired on September 30, 2022. The schedule above shows the remaining activity associated with the completed grant program. No new funds are requested for this program in 2024.

Several new initiatives in the Infrastructure Investment and Jobs Act (IIJA) will expand, improve, and enhance NHTSA's crash data program. The funding supports revision of NHTSA's crash data programs to collect information on personal conveyances (scooters, bicycles, etc.) in crashes, update the Model Minimum Uniform Crash Criteria (MMUCC), collect additional data elements related to vulnerable road users, and coordinate with the Centers for Disease Control and Prevention on an implementation plan for States to produce a national database of pedestrian injuries and fatalities. This will allow the agency to identify, analyze, and develop strategies to reduce these crashes. The Crash Investigation Sample System (CISS) will be transformed by increasing the number of sites and adding more researchers which will expand the scope of the study to include all crash types and increase the number of cases. This will enable the agency to make more timely and accurate assessments of automated driving in real-world crash scenarios. While many States are interested in participating in electronic data transfer, and several pilot States are already transferring data successfully, some States crash data systems are not advanced enough to enable full electronic data transfer. Additional IIJA funding will

support a grant program for States to upgrade and standardize their crash data systems to enable electronic collection, intra-State sharing, and transfer to NHTSA; all of which would increase the accuracy, timeliness, and accessibility of the data for all users.

Vehicle Safety and Behavioral Research funding will support increased behavioral safety program efforts including research, communication, evaluation, and national leadership activities. These projects will provide data, analysis, and other insights to inform strategies to combat the risky driving behaviors that have increased during the pandemic and to implement a Safe System Approach. This funding supports data collection on alcohol and drug use, research to develop passive alcohol detection technology, as well as emergency medical services data collection and analysis. The funding will also support state grants to develop and implement processes for informing vehicle owners and lessees of the open recalls. Further, the program will support public education and awareness campaigns such as the risks of speeding, protecting pupil transportation safety and child passenger safety.

Funding also supports additional vehicle safety research, particularly in the critical areas of vehicle electronics and cybersecurity, and automated driving systems. Cutting-edge technologies, including complex safety-critical electronic control systems, vehicle cybersecurity, and new and emerging Automated Driving System technologies will also be evaluated. Additional research areas include biomechanics, heavy vehicles safety technologies, and vehicle safety issues related to fuel efficiency and alternative fuels. NHTSA's research advances vehicle and road user safety by informing the development of regulations and safety standards.

NHTSA provides grants to States for activities related to highway traffic safety. The State and Community Safety Grants Program (Section 402) supports multi-faceted State highway safety programs designed to reduce traffic crashes and the resulting deaths, injuries, and property damage. The Agency will continue to implement the use of performance measures and data-driven targets as a condition of approval in these programs and to ensure efficient and effective use of funds. NHTSA also will use dedicated funds from the program to support high visibility enforcement campaigns that promote the use of seat belts and the reduction of impaired and distracted driving. The National Priority Safety Programs (Section 405) allow the Agency to make grant awards to States to address national priorities, such as impaired driving, occupant protection, distracted driving, and non-motorized safety, among others.

FEDERAL RAILROAD ADMINISTRATION

The Federal Railroad Administration (FRA) oversees the safety of the U.S. railroad industry by carrying out a robust regulatory enforcement and technical assistance program. FRA also administers a broad portfolio of grants aimed at improving safety and the condition of the Nation's railroad infrastructure, while enhancing the operating performance of both intercity passenger and freight rail service. Finally, these railroad safety and investment programs are supported by research and development, through which FRA advances technology innovations and new practices to improve rail safety and efficiency.

Funding requested in the Railroad Research and Development Program is focused on improving railroad safety. It provides scientific and engineering support for the Federal Railroad Administration's rail safety enforcement and rulemaking efforts. It also identifies and develops emerging technologies for the rail industry to adopt voluntarily. The outcomes of the research and development reduce accidents and incidents. In addition to improving safety, the program contributes significantly towards activities to achieve and maintain a state of good repair, promote job creation and economic growth, and improve energy efficiency and reduce emissions of rail transportation.

The program focuses on the following areas of research:

Track Program.—Reducing derailments due to track related causes.
Rolling Stock Program.—Reducing derailments due to equipment failures, to minimize the consequences of derailments, and to minimize hazardous material releases.
Train Control and Communication.—Reducing train to train collisions and train collisions with objects on the line and at grade crossings.
Human Factors Program.—Reducing accidents caused by human error.
Railroad System Issues Program.—Prioritizing Research and Development projects on the basis of relevance to safety risk reduction and other DOT goals, energy and emissions research, and workforce development.

The National Railroad Passenger Corporation (Amtrak) was established in 1970 through the Rail Passenger Service Act. Amtrak is operated and managed as a for-profit corporation. Amtrak is not an agency or instrument of the U.S. Government, although, since the railroad's creation Congress has provided annual funding for operating, capital and debt service costs.

Prior to 2006, FRA received annual appropriations in this account for grants to Amtrak. Since then, several one-time appropriations or funding transfers have been directed to this account, including \$1.3 billion in funds under the American Recovery and Reinvestment Act of 2009; \$112 million from the Disaster Relief Appropriations Act of 2013 (P.L. 113-2) for recovery efforts from super storm Sandy; \$185 million transfer from the Federal Transit Administration

The Public Transportation Emergency Relief Program helps transit agencies restore needed transportation services immediately following disaster events. Both capital and operating costs are eligible for funding following an emergency; however, this program does not replace the Federal Emergency Management Agency's capital assistance program. FTA administers the \$10.9 billion supplemental appropriation (adjusted to \$10.2 billion after sequestration and the transfer of funds to the Office of the Inspector General and the Federal Railroad Administration) provided by the Disaster Relief Appropriations Act, 2013 (Public Law 113-2) following Hurricane Sandy through this account. The Bipartisan Budget Account of 2018 (Public Law 115-123) also provided \$330 million for eligible capital and operating costs for areas affected by Hurricanes Harvey, Irma, and Maria. The Supplemental Appropriations for Disaster Relief Act, 2019 (Public Law 116-20) also provided \$10.5 million for transit systems affected by major declared disasters occurring in calendar year 2018. The Consolidated Appropriations Act, 2023 (Public Law 117-328) provided \$214 million for transit systems affected by major declared disasters occurring in calendar years 2017, 2020, 2021, and 2022.

The Infrastructure Investment and Jobs Act (IIJA) of 2021 provided funding for the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. Grant funds are made available to a municipality or community owned utility (not including for-profit entities) to repair, rehabilitate, or replace its natural gas distribution pipeline system or portions thereof or to acquire equipment to (1) reduce incidents and fatalities and (2) avoid economic losses. With the replacement of legacy gas distribution pipelines, these systems will operate more safely, reduce methane emissions, and will serve as the building blocks of the infrastructure to transport fuels of the future.

PHMSA oversees the safe transportation of energy products and hazardous materials through pipelines. PHMSA's Pipeline Safety program regulates an expansive network of more than 3.4 million miles of gas and hazardous liquid pipelines within the United States, as well as facilities that liquefy natural gas and store natural gas underground. PHMSA establishes and enforces pipeline safety standards and conducts safety inspections in collaboration with State partners to monitor the construction and operating safety of pipelines. The Pipeline Safety program is funded by fees collected from pipeline and underground natural gas storage facility operators, as well as an annual allocation from the Oil Spill Liability Trust Fund.

The Maritime Security Program provides direct payments to U.S. flag ship operators engaged in foreign commerce to partially offset the higher operating costs of U.S. registry. The purpose of the program is to establish and sustain a fleet of active ships that are privately owned, commercially viable, and militarily useful to meet national defense and other emergency sealift requirements. Participating operators are required to make their ships and commercial transportation resources available upon request by the Secretary of Defense during times of war or national emergency. Commercial transportation resources include ships, logistics management services, port terminal facilities, and U.S. citizen merchant mariners to crew both commercial and Government-owned merchant ships. The program will also sustain a base of U.S. Merchant Mariners to support national security requirements during times of urgent need.

Trillions of dollars are accounted for and processed by the Department of the Treasury's information technology (IT) systems and therefore these systems are a constant target for sophisticated threat actors. The Cybersecurity Enhancement Account (CEA) allows Treasury to more proactively and strategically protect Treasury systems against cybersecurity threats. The account supports enterprise-wide services and capabilities. The CEA budgetary resources will be used to address new cybersecurity requirements outlined in Executive Order 14028—*Improving the Nation's Cybersecurity*—and associated guidance at the enterprise level as well as targeted bureau-specific cyber investments.

The Office of Inspector General (OIG) conducts audits and investigations designed to promote integrity, efficiency, and effectiveness in programs and operations within the Department and

across the OIG's jurisdiction, as well as to keep the Secretary and the Congress fully informed of problems and deficiencies in the administration of such programs and operations. The OIG conducts audits and investigations of Treasury programs and operations except those under jurisdictional oversight of the Treasury Inspector General for Tax Administration, the Special Inspector General for the Troubled Asset Relief Program, and the Special Inspector General for Pandemic Recovery. In addition, the Treasury Inspector General functions as Chair of the Council of Inspectors General on Financial Oversight. The Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act tasked the OIG with oversight of all projects, programs, and operations of the Gulf Coast Restoration Trust Fund (Trust Fund), which extends to the Gulf Coast Ecosystem Restoration Council.

The Budget request for the OIG will be used to fund audit, investigative, and mission support activities to meet the requirements of the Inspector General Act, as well as other statutes relating to: 1) cyber threats; 2) Bank Secrecy Act, anti-money laundering, and anti-terrorist financing enforcement; 3) spending transparency and improper payments; 4) administration of the Trust Fund; and 5) pandemic response programs. Specific mandates include audits of the Department's financial statements, compliance with the Federal Information Security Modernization Act of 2014 (FISMA), and actions in implementing cybersecurity information sharing. In its oversight of the Office of the Comptroller of the Currency, OIG conducts material loss reviews of failed national banks and trusts insured by the Federal Deposit Insurance Corporation. With resources available after mandated requirements are met, the OIG will conduct audits and reviews of the Department's highest risk programs and operations. The OIG will also respond to stakeholder requests.

The Office of Audit expects to complete 100 percent of statutory audits by the required deadline and to complete 78 audit products in 2024, as well as provide oversight, on a reimbursable basis, of the State Small Business Credit Initiative and the Small Business Lending Fund.

In 2024, the Office of Investigations will continue to investigate all reports of fraud, waste, abuse, and criminal activity affecting Treasury programs and operations. It will also continue proactive efforts to detect, investigate, and deter electronic crimes and other threats to Treasury's physical and IT critical infrastructure, and will continue current efforts to aggressively investigate, close, and refer cases for criminal prosecution, civil litigation, or corrective administrative action in a timely manner.

This account also supports the oversight of COVID response programs, such as the Coronavirus Relief Fund, Emergency Rental Assistance, and the Homeowner Assistance Fund pursuant to the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Division N of the Consolidated Appropriations Act, 2021, and the American Rescue Plan Act of 2021.

The Treasury Inspector General for Tax Administration (TIGTA), an independent office within the Department of the Treasury, was established by Congress under the Internal Revenue Service (IRS) Restructuring and Reform Act of 1998 (RRA 98). It provides oversight of IRS activities by conducting independent audits, investigations, and inspections and evaluations necessary to prevent and detect waste, fraud, and abuse in IRS programs and operations. TIGTA also identifies and recommends strategies to address IRS management challenges and implement the Department's priorities.

TIGTA's Office of Audit focuses on the major management and performance challenges confronting the IRS by prioritizing statutory audit coverage and audit work in high-risk tax administration areas. Statutory coverage includes audits mandated by RRA 98 and other statutory authorities involving computer security, taxpayer rights and privacy issues. Through its audit programs, TIGTA promotes efficiency and effectiveness in the administration of internal revenue laws. TIGTA is dedicated to the prevention and detection of fraud, waste, and abuse affecting tax administration.

TIGTA's Office of Investigations (OI) concentrates on three areas: 1) employee integrity; 2) employee and infrastructure security; and 3) external attempts to corrupt tax administration. OI's performance model uses a ratio of those investigations that have the greatest impact on IRS' operations and/or the protection of Federal tax administration to the total number of investigations conducted. Investigations in these areas protect IRS personnel, data, and facilities, as well as the public's confidence in the tax system.

TIGTA's Office of Inspections and Evaluations (I&E) identifies opportunities for improvements in IRS and TIGTA programs by performing inspections and evaluations that report timely, useful, and reliable information to decisionmakers and stakeholders. The oversight activities of I&E include inspecting the compliance of the IRS with established system controls and operating procedures, as well as evaluating the Agency's operations for high-risk systemic inefficiencies.

This account also supports the oversight of Economic Impact Payments and other fast and direct relief pursuant to Division N of the Consolidated Appropriations Act, 2021, and the American Rescue Plan Act of 2021, as well as the IRS's implementation of Inflation Reduction Act of 2022.

The Terrorism Risk Insurance Program Reauthorization Act of 2019 (P.L. 116–94) reauthorized and revised the program established by the Terrorism Risk Insurance Act of 2002 (TRIA) (P.L. 107–297). The 2019 Act extended the Terrorism Risk Insurance Program (TRIP) for seven years, through December 31, 2027. The Budget baseline includes the estimated Federal cost of providing payments in connection with terrorism risk insurance losses. There have been no prior payments under the Program. While the Budget does not forecast any specific payment triggering events, the Budget includes estimates representing the weighted average of payments over a full range of possible scenarios, most of which include no notional payment triggering events and some of which include notional triggering events of varying magnitude. Relying upon this methodology, the Budget baseline projects net spending associated with the current reauthorization of \$473 million over the 2024–2033 period. Mechanisms in TRIA result in

Treasury's relative share of any covered losses decreasing over time as premiums in the insurance market increase. The budget estimate reflects this projected decrease in Treasury's share.

The mission of the Treasury Forfeiture Fund (Fund) is to affirmatively influence the consistent and strategic use of asset forfeiture by law enforcement bureaus that participate in the Fund to disrupt and dismantle criminal enterprises. The Fund supports Federal, State, and local law enforcement's use of asset forfeiture to disrupt and deter criminal activity. Proceeds from non-tax forfeitures made by participating bureaus of the Department of the Treasury and the Department of Homeland Security are deposited into the Fund. Such proceeds are available to pay or reimburse certain costs and expenses related to seizures and forfeitures that occur pursuant to laws enforced by the bureaus and other expenses authorized by 31 U.S.C. 9705. Forfeiture proceeds can also be used to fund Federal law enforcement-related activities based on requests from Federal agencies and evaluation by the Secretary of the Treasury.

The Office of Financial Research (OFR) and the Financial Stability Oversight Council (Council), whose expenses are paid for out of the Financial Research Fund, were established under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) (P.L. 111-203).

The OFR was established to serve the Council, its member agencies, and other stakeholders by improving the quality, transparency, and accessibility of financial data and information, by conducting and sponsoring research related to financial stability, and by promoting best practices in risk management. The OFR is an office within the Department of the Treasury.

The Council is comprised of 10 voting members, including the heads of all Federal financial regulators, and five non-voting members. The Secretary of the Treasury serves as Chairperson of the Council. The Council's purpose is to identify risks to the financial stability of the United States, promote market discipline, and respond to emerging threats to the stability of the U.S. financial system.

As required under Section 210(n)(10) of the Act, the Council's expenses also include reimbursement of certain reasonable expenses incurred by the Federal Deposit Insurance Corporation in implementing Orderly Liquidation Authority, provided by Title II of the Act.

Since July 2012, OFR and the Council have been funded through assessments on certain bank holding companies and nonbank financial companies supervised by the Board of Governors. Expenses of the Council are considered expenses of, and are paid by, the OFR. Projected fees and assessments are estimates and may change.

Individual Federal income tax returns include an optional Federal income tax designation of \$3 that an individual may elect to be paid to the Presidential Election Campaign Fund (PECF). The Department of the Treasury collects the income tax designations and makes distributions from the PECF to qualified presidential candidates. Amounts not made available to and used by qualified candidates are transferred to the 10-Year Pediatric Research Initiative Fund, which was established in 2014 by the Gabriella Miller Kids First Research Act.

The Federal Election Commission administers the public funding program, determines which candidates are eligible, the amount to which they are entitled, and audits their use of the funds.

Under the law governing the Exchange Stabilization Fund (ESF), section 10 of the Gold Reserve Act of 1934, as amended, codified at 31 U.S.C. 5302, the Secretary of the Treasury, with the approval of the President, is authorized to deal in gold, foreign exchange, and other instruments of credit and securities, as the Secretary considers necessary, consistent with U.S. obligations in the International Monetary Fund regarding orderly exchange arrangements and a stable system of exchange rates. All earnings and interest accruing to the ESF are available for the purposes thereof. U.S. holdings of Special Drawing Rights (SDRs) are credited to the account of, and administered as part of the fund. By law, the fund is not available to pay administrative expenses.

Since 1934, the principal sources of the fund's income have been earnings on investments held by the fund, including interest earned on fund holdings of U.S. Government securities. In the wake of the COVID-19 pandemic, Treasury used funds in the ESF to invest and provide other support to the Commercial Paper Funding Facility (CPFF) and the Money Market Mutual Fund Liquidity Facility (MMLF) established by the Federal Reserve to enhance liquidity and support the flow of credit to households, and businesses. The investments in these two Federal Reserve facilities were unwound in accordance with their terms in 2021, and the ESF received interest and other earnings from these transactions.

The amounts reflected in 2023 estimates entail only projected net interest earnings on ESF assets. The estimates are subject to considerable variance, depending on changes in the amount and composition of assets and the interest rates applied to investments. In addition, these estimates make no attempt to forecast gains or losses on SDR valuation or foreign currency valuation.

The CARES Act (P.L. 116-136) authorized the Department of the Treasury to make up to \$500 billion in loans and other investments in support of and to provide liquidity to eligible businesses, nonprofits, states, and municipalities impacted by the COVID-19 pandemic. This included investments in facilities established by the Board of Governors of the Federal Reserve System pursuant to Section 13(3) of the Federal Reserve Act to provide liquidity to the financial system. The CARES Act also authorized Treasury to use up to \$46 billion of these funds to make loans to passenger and cargo air carriers, certain other aviation businesses, and businesses critical to maintaining national security. As required by the Federal Credit Reform Act of 1990, as amended, this account records the subsidy costs associated with these loans and investments, which are estimated on a present value basis. The Consolidated Appropriations Act, 2021 (P.L. 116-260) Sec. 1003 rescinded \$478.8 billion in budget authority from this program in 2021 and the Infrastructure Investment and Jobs Act (PL 117-58) Sec. 90007 further rescinded \$1.4 billion in 2022.

The Consolidated Appropriations Act, 2023 (P.L. 117-328) Division LL, Section 102(d) reduced the amounts available for administrative expenses from \$100 million to \$61 million from this account and made remaining balances for this account's administrative expenses also available for expenses necessary for Treasury's administration of other pandemic recovery programs.

The Coronavirus Aid, Relief, and Economic Security Act (P.L. 116-136) Section 4112 (CARES Act), Consolidated Appropriations Act, 2021 (P.L. 116-260) Division N Section 402, and the American Rescue Plan Act of 2021 (P.L. 117-2) Section 7301 each authorized the Secretary of the Treasury to provide financial assistance to the aviation industry for the continued payment of employee wages, salaries, and benefits. The CARES Act provided financial assistance to passenger air carriers, cargo air carriers, and airline contractors. The two subsequent laws provided additional financial assistance only for passenger air carriers and airline contractors. The Infrastructure Investment and Jobs Act (P.L. 117-58) Section 90007 rescinded \$3 billion from CARES Act Section 4120 budget authority, which corresponded with a lack of demand for the program among cargo airlines, as well as \$200 million from the P.L. 116-260 Division N Sec. 411 budget authority.

The Consolidated Appropriations Act, 2023 (P.L. 117-328) Division LL, Section 102(d) reduced the amounts available for administrative expenses from \$100 million to \$67 million from this account and made remaining balances for this account's administrative expenses also available for expenses necessary for Treasury's administration of other pandemic recovery programs.

The Consolidated Appropriations Act, 2021 (P.L. 116-260) Section 421 authorized the Secretary of the Treasury, in consultation with the Secretary of Transportation, to make grants available to eligible providers of transportation services that suffered revenue loss due to the coronavirus pandemic. Eligible companies provided charter, local, commuter, school, and tour bus services. The Consolidated Appropriations Act, 2023 (P.L. 117-328) Division LL, Section 102(d), made remaining balances for this account's administrative expenses also available for financial assistance to eligible revenue sharing consolidated governments under the Local Assistance and Tribal Consistency Fund (section 605(g) of the Social Security Act, as added by section 103 of Division LL of P.L. 117-328). Remaining balances for this account's administrative expenses are also available for expenses necessary for Treasury's administration of other pandemic recovery programs.

The Special Inspector General for Pandemic Recovery (SIGPR) was established by Section 4018 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

SIGPR has the duty to conduct, supervise, and coordinate audits, evaluations, and investigations of the making, purchase, management, and sale of loans, loan guarantees, and other investments made by the Secretary of the Treasury under programs established by the Secretary, as authorized by Section 4018(c) of the CARES Act, and the management by the Secretary of programs, as authorized by Section 4018(c) of the CARES Act.

By express incorporation, SIGPR also has the duties, responsibilities, powers, and authorities granted inspectors general under the Inspector General Act of 1978, including broad subpoena authority.

The role and mission of SIGPR is to safeguard the people's tax dollars appropriated by Congress through the CARES Act. SIGPR strives to ensure that the American taxpayer gets the best return on investment by efficiently rooting out fraud, waste, and abuse. In carrying out its mission, SIGPR's goal is to treat everyone with respect, to operate with the utmost integrity, and to be fair, objective, and independent.

The CARES Act provided an initial appropriation of \$25 million to SIGPR derived from amounts made available under section 4027 and Congress provided additional appropriations in 2022 and 2023. The Budget proposes appropriations language to provide SIGPR an additional \$16 million to carry out section 4018 of the CARES Act. This funding would support SIGPR's audit and investigative services identify waste, fraud, and abuse, protect the integrity of CARES Act funds, and aid in the conviction of perpetrators of unlawful activity, while collecting remuneration for the U.S. Treasury.

The Community Development Financial Institutions (CDFI) Fund promotes economic and community development through investment in and assistance to CDFIs (including community development banks, credit unions, loan funds, and venture capital funds) to expand the availability of financial services and affordable credit for underserved populations and communities. The 2024 Budget provides funding for the CDFI Program, the Healthy Food Financing Initiative, the Native American CDFI Assistance Program, the Bank Enterprise Award Program, and the Small Dollar Loan Program. The Budget proposes to eliminate funding for the AmeriCorps CDFI Economic Mobility Corps program.

The CDFI Fund's Bond Guarantee Program (BGP) was originally authorized in the Small Business Jobs Act of 2010 (P.L. 111-240) to provide a source of long-term capital in low-income and underserved communities. The Budget proposes an annual commitment authority of \$500 million. The Budget also proposes to establish a credit subsidy of up to \$10 million for the Bond Guarantee Program (BGP) to better support long-term financing in underserved communities.

The Consolidated Appropriations Act, 2021 (P. L. 116-260) provided \$3 billion to deliver immediate assistance to CDFIs in communities impacted by the COVID-19 pandemic. In the spring of 2021, the CDFI Fund awarded \$1.25 billion of these funds through its CDFI Rapid Response Program (CDFI RRP), which was designed to quickly deploy capital to CDFIs through a streamlined application and review process.

In 2023, the CDFI Fund will continue implementing P.L. 116-260 through its newly established CDFI Equitable Recovery Program (CDFI ERP) which will award \$1.73 billion in grant funds for CDFIs to expand their lending, grant making, or investment activity in low- or moderate-income minority communities and to minorities that have significant unmet capital or financial service needs.

The Emergency Capital Investment Program (ECIP) invests in either perpetual preferred equity or subordinated debt (with a maturity of fifteen or thirty years) issued by eligible financial institutions consistent with ECIP's terms. Eligible institutions be: 1) Community Development Financial Institutions or Minority Depository Institutions; 2) insured depository institutions, bank or savings and loan holding companies, or federally insured credit unions; and 3) supportive of low-and middle-income communities. Dividend yields or interest paid on ECIP securities decrease when institutions reach lending goals established at the time of their participation. Division N, Section 522 of the Consolidated Appropriations Act, 2021 (P.L. 116-260) established ECIP by amending the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4701 et seq.) and provided \$9 billion for the program.

The Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343) authorized the establishment of the Troubled Asset Relief Program (TARP) and the Office of Financial Stability (OFS) to purchase and insure certain types of troubled assets for the purpose of providing stability to and preventing disruption in the economy and financial system and protecting taxpayers. The Act gave the Secretary of the Treasury broad and flexible authority to purchase and insure mortgages and other troubled assets, as well as inject capital by taking limited equity positions, as needed to stabilize the financial markets. This account provides for the administrative costs of OFS, which oversees and manages TARP.

Treasury's Home Affordable Modification Program (HAMP) offered mortgage modifications to homeowners at risk of foreclosure under the authority of sections 101 and 109 of the Emergency Economic Stabilization Act of 2008, as amended (EESA) (P.L. 110-343). HAMP closed to new applications on December 30, 2016, but incentive payments continue to be made on

modifications entered into on or before December 1, 2017. Additionally, the Hardest Hit Fund has allocated \$9.6 billion under EESA to State housing finance agencies in 18 States and the District of Columbia for foreclosure prevention programs. Funds under EESA also support a Federal Housing Administration (FHA) refinance program that helps homeowners refinance into a new FHA-insured loan if their existing mortgage holders agree to write down principal.

The mission of the Office of the Special Inspector General for the Troubled Asset Relief Program (SIGTARP) is to prevent and detect fraud, waste, and abuse in the more than \$442 billion in funds and programs from the Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343) and \$2 billion in funds from the Consolidated Appropriations Act of 2016, and to promote economy, efficiency, effectiveness, and accountability in these economic stability programs. SIGTARP received an initial appropriation of \$50 million in permanent, indefinite budget authority in EESA. The Public-Private Investment Program Improvement and Oversight Act of 2009 (12 U.S.C. 5231a) provided \$15 million in supplemental funding. Since 2010, SIGTARP has received annual appropriations to fund its operations. The Budget estimates that SIGTARP will have sufficient balances to conclude orderly wind down activities in FY2024 and does not request additional funding.

The Small Business Lending Fund (SBLF) was established by the Small Business Jobs Act of 2010 (P.L. 111-240) and is a dedicated investment fund that encourages lending to small businesses by providing capital to qualified community banks and community development loan funds (CDLFs). In total, the SBLF provided \$4.0 billion to 281 community banks and 51 CDLFs in 2011. For institutions that still participate in the program, CDLF securities matured by 2021. As of December 1, 2022, 327 institutions with aggregate investments of \$3.95 billion have fully redeemed their SBLF investments and exited the program. As of September 30, 2022, five institutions remain in the program; two that are operating, two in bankruptcy, and one has been written off. The two banks in operation plan to eventually redeem, but have yet to decide when to purchase their outstanding perpetual preferred shares from Treasury. One of these institutions has partially redeemed \$1.25 million (or 25 percent of its SBLF securities) while continuing to participate in the program. Of the two institutions in bankruptcy, one is a CDLF and the other is a bank. The fifth institution never entered into bankruptcy; however, it is no longer in operation and Treasury has written off the investment.

The Social Impact Partnerships to Pay for Results Act (SIPPPRA) was included as part of the Bipartisan Budget Act of 2018 (P.L. 115-123). SIPPPRA created a ten-year \$100 million fund to support social impact partnership projects by State and local governments to encourage new and innovative ways to solve entrenched social problems. The program funds social programs at the State or local level that achieve demonstrable, measurable, and scalable results, by making payment of funds contingent on positive outcomes.

In 2008, under temporary authority granted by section 1117 of the Housing and Economic Recovery Act of 2008 (P.L. 110-289), Treasury entered into agreements with Fannie Mae and Freddie Mac (the GSEs) to purchase senior preferred stock of each GSE and to provide up to \$100 billion when needed to ensure that each company maintains a positive net worth. In May 2009, Treasury increased the Senior Preferred Stock Purchase Agreement (PSPA) funding commitment caps to \$200 billion for each GSE, and in December 2009 Treasury modified the funding commitment caps in the PSPAs to be the greater of \$200 billion or \$200 billion plus cumulative net worth deficits experienced during 2010-2012, less any surplus remaining as of December 31, 2012. Based on the financial results reported by each GSE as of December 31, 2012, and under the terms of the PSPAs, the combined cumulative funding commitment cap for Fannie Mae and Freddie Mac was set at \$445.5 billion. Treasury's authority to purchase obligations or other securities of the GSEs or to increase the funding commitment expired on December 31, 2009. Under the PSPAs, Treasury has maintained the solvency of the GSEs by providing \$191.5 billion of investment to the GSEs. For additional discussion of the GSEs, please see the *Analytical Perspectives* volume of the Budget.

Established by the Housing and Economic Recovery Act of 2008 (HERA) (P.L. 110-289), the Capital Magnet Fund (CMF) awards grants to CDFIs and qualified non-profit housing organizations to finance affordable housing activities, as well as related economic development activities and community service facilities. Organizations that receive Capital Magnet Fund awards are required to produce housing and community development investments at least ten times the size of the award amount. Funding is provided by the Government-Sponsored Enterprises, Fannie Mae and Freddie Mac, which are required to set aside an amount equal to 4.2 basis points of each dollar of the unpaid principal balance of their total new business purchases and to allocate and transfer those funds to CMF and the Housing Trust Fund. The Budget proposes legislation authorizing the Secretary of the Treasury to administratively amend CMF program requirements, including required leverage ratios and project commitment deadlines, to ensure effective utilization of funds across diverse geographies.

FINANCIAL INTEGRITY FUND

As amended by the Consolidated Appropriations Act, 2023, 31 U.S.C. 5323 establishes the Financial Integrity Fund (Fund) for the payment of awards to eligible individuals who report to the Financial Crimes Enforcement Network certain violations of the Bank Secrecy Act (BSA) and U.S. economic sanctions. Monetary sanctions collected by the Secretary of the Treasury or the Attorney General under title 31 of the United States Code; Chapter 35 or section 4305 or 4312 of title 50; or the Foreign Narcotics Kingpin Designation Act (21 U.S.C. 1901 et seq.), are deposited into the Fund (unless the Fund balance exceeds \$300,000,000 when the collection is made). However, required deposits into the United States Victims of State Sponsored Terrorism Fund or the Crime Victims Fund are made prior to the deposit of collections into the Financial Integrity Fund. If amounts deposited into the Fund are not sufficient to pay a whistleblower award, an additional amount, corresponding to an unsatisfied balance of a covered sanction, is transferred from the general fund.

The mission of the Fiscal Service is to promote the financial integrity and operational efficiency of the U.S. Government through exceptional accounting, financing, collections, payments, and shared services. The Fiscal Service engages in efforts to streamline the Government's audit processes, and to reduce intra-governmental accounting differences that stand in the way of a clean audit opinion on the Financial Report of the U.S. Government.

The Budget ensures the viability of the Government's National Financial Critical Infrastructure (NFCI) that finances Federal operations, collects revenue, disburses payments, and reports on the Government's financial position. Included in the Budget are resources to improve the accuracy and availability of financial information, implement new, innovative financial practices, strengthen the resiliency of our infrastructure, and enhance the customer value and experience.

Because of Fiscal Service's central role in Government-wide financial operations, the Budget supports Treasury's leadership in transforming Federal financial management to become more efficient, more accurate and deliver better service to citizens.

The Debt Collection Fund was authorized in the Debt Collection Improvement Act of 1996 to hold debt collection fee revenue available to cover costs associated with the implementation and operation for such activities, including centralized debt collections services Government-wide, managing the Government's delinquent debt portfolio, and collecting delinquent debts owed to the United States. Delinquent debts are collected in several ways, including offsetting Federal payments, sending demand letters to debtors, entering into payment agreements, withholding wages administratively, referring debts to the Department of Justice for action, reporting credit to bureaus, and contracting for services of private collection agencies.

This account pays interest on the invested balances of guaranteed and direct loan financing accounts. For guaranteed loan financing accounts, balances result when the accounts receive up-front payments and fees to be held in reserve to make payments on defaults. Direct loan financing accounts normally borrow from Treasury to disburse loans and receive interest and principal payments and other payments from borrowers. Because direct loan financing accounts generally repay borrowing from Treasury at the end of the year, they can build up balances of payments received during the year. Interest on invested balances is paid to the financing accounts from the general fund of the Treasury, in accordance with section 505(c) of the Federal Credit Reform Act of 1990.

U.S. Customs and Border Protection, Department of Homeland Security, collects duties assessed pursuant to a countervailing duty order, an antidumping duty order, or a finding under the Antidumping Act of 1921. Under a provision enacted in 2000 CBP, through the Treasury, distributes certain of these duties to affected domestic producers. These distributions provide an additional subsidy to producers that already gain protection from the increased import prices, including tariffs. The authority to distribute assessments on entries made after October 1, 2007,

has been repealed. Assessments on entries made before October 1, 2007, will be disbursed as if the authority had not been repealed. Assessments collected on eligible entries are to be disbursed within 60 days of the end of the fiscal year in which they were collected.

This Fund was established as a permanent, indefinite appropriation in order to maintain adequate funding of the Check Forgery Insurance Fund. The Fund facilitates timely payments for replacement Treasury checks necessitated due to a claim of forgery. The Fund recoups disbursements through reclamations made against banks negotiating forged checks.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorser of the checks. If the U.S. Treasury is unable to recover funds through reclamation procedures, the Fund sustains the loss.

Public Law 108-447 expanded the use of the Fund to include payments made via electronic funds transfer. A technical correction to the Fund's statutes to ensure and clarify that the Fund can be utilized as a funding source for relief of administrative disbursing errors was enacted by P.L. 110-161, Division D, section 119.

This fund was established by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act). It will receive 80 percent of the civil and administrative penalties collected after July 6, 2012, from parties responsible for the *Deepwater Horizon* oil spill. Funding will be used by Federal, State, and local governments for activities to restore and protect the ecosystems and economy of the Gulf Coast region, research and monitoring, and related oversight and management responsibilities. The current estimates represent known settlement amounts; additional funds may become available through future court judgments or settlements. BP Exploration & Production Inc. is expected to make annual civil penalty payments through mid-2031 pursuant to a consent decree entered on April 4, 2016 under the Federal Water Pollution Control Act (Clean Water Act).

The Federal Financing Bank (FFB) was created in 1973 to reduce the costs of certain Federal and federally-assisted borrowing and to ensure the coordination of such borrowing from the public in a manner least disruptive to private financial markets and institutions. With the implementation of the Federal Credit Reform Act of 1990 agencies finance such loan programs through direct loan financing accounts that borrow directly from the Treasury. The FFB finances these Federal direct loans to the public which are fully guaranteed by a Federal agency. FFB loans are also used to finance activities of the U.S. Postal Service.

Lending by the FFB may take one of three forms, depending on the authorizing statutes pertaining to a particular agency or program; 1) the FFB may purchase agency financial assets; 2) the FFB may acquire debt securities that the agency is otherwise authorized to issue and 3) the FFB may provide direct loans on behalf of a Federal agency by disbursing loans directly to private borrowers and receiving repayments from the private borrower guaranteed by the agency. Because the law requires that transactions by the FFB be treated as a means of financing agency obligations, the budgetary effect of the third type of transaction is reflected in the Budget in the following sequence: a loan by the FFB to the agency, a loan by the agency to a private borrower, a repayment by a private borrower to the agency, and a repayment by the agency to the FFB.

In 2022, FFB's net inflows were \$65 million. In addition to its authority to borrow from the Treasury (Fiscal Service), the FFB has the statutory authority to borrow up to \$15 billion from other sources. Any such borrowing is exempt from the statutory ceiling on Federal debt. The FFB used this authority most recently in October 2015.

The following tables show (1) the annual net lending by the FFB by agency and program and the amount outstanding at the end of each year and (2) principal repayments from the borrower in excess of principal repaid to the Fiscal Service each year.

The Bureau of Engraving and Printing (BEP) produces and delivers U.S. currency notes for the Federal Reserve System ordered by the Board of Governors of the Federal Reserve and other security products for the Federal Government. BEP began printing currency in 1862 and operates on the basis of authority conferred upon the Secretary of the Treasury by 31 U.S.C. 321(a) (4) to engrave and print currency and other security documents. Operations are financed through a revolving fund established in 1950 in accordance with Public Law 81-656. The fund is reimbursed for direct and indirect costs of operations, including administrative expenses, through product sales. In 1977, Public Law 95-81 authorized BEP to include an amount sufficient to fund capital investment and to meet working capital requirements in the prices charged for products, eliminating the need for appropriations from Congress. In 2019, Public Law 116-6 authorized the use of the revolving fund for acquisition of necessary land for, and construction of, a replacement currency production facility.

The Bureau has three strategic goals: to safely and timely deliver quality products to stakeholders in a cost-effective and environmentally responsible manner; to create innovative designs, processes, and products that exceed stakeholders' expectations and to achieve overall excellence by balanced investment in people, processes, facilities, and technology. Other activities at BEP include engraving plates and dies; manufacturing inks used to print security products; purchasing materials, supplies, equipment; and storing and delivering products in accordance with customer requirements. In addition, BEP provides technical assistance, advice, and production services to other Federal agencies in the development of security documents that require counterfeit deterrent features due to their innate value or other characteristics. BEP supports the Treasury goals to Boost U.S. Economic Growth and Achieve Operational Excellence.

BEP's 2024 priorities include: (1) meeting the needs of the Nation for currency; (2) designing the next family of notes to include security feature development and currency design/development; (3) modernizing facilities, including the new DC Production Facility and Western Currency Facility Expansion; and (4) retooling manufacturing processes with state-of-the-art intaglio printing presses, electronic inspection systems, and finishing equipment. In 2023, the Federal Reserve Board (Board) established a minimum quantity of 4.486 billion notes with a ceiling up to 8.550 billion notes.

The United States Mint mints and issues circulating coins, produces and distributes numismatic items, and provides security and asset protection. Since 1996, the Mint's operations have been funded through the Public Enterprise Fund (PEF) established by section 522 of Public Law 104-52 (31 U.S.C. 5136). The operations of the Mint are divided into two major components, circulating coinage and numismatic products. Finances for the two components are accounted

UNITED STATES MINT PUBLIC ENTERPRISE FUND—Continued

for separately; Receipts from circulating coinage operations are not used to fund numismatic operations and receipts from numismatic operations are not used to fund circulating coinage operations. The Mint generates revenue through the issuance of circulating coins to the Federal Reserve Banks (FRBs) and the sale of numismatic products to the public and bullion coins to authorized purchasers. The Mint submits annual audited financial statements to the Secretary of the Treasury and to the Congress in support of the operations of the PEF. In 2022, the Mint transferred \$534 million to the General Fund.

Circulating Coinage.— This activity funds the minting and issuance of circulating coins to the FRBs in amounts that the Secretary of the Treasury determines are necessary to meet the needs of the United States. The 2023 Budget reflects production volumes that correspond to expected demand and raw materials costs, which are driven by commodity prices and volumes. The Mint receives funds from the Federal Reserve equal to the face value of the circulating coins shipped to the FRB. The Mint is credited with the full cost of producing and distributing the coins that are put into circulation, including the depreciation of manufacturing facilities and equipment. The difference between the face value of the coins and the full cost of producing the coins is called seigniorage, which is a means of financing the deficit and transferred periodically to the General Fund. The annual appropriations bill includes a statutory cap on Mint expenditures on circulating and protection capital investments. The cap for 2024 is \$50 million. The Budget proposes legislation enabling changes to coin metal composition if they: a) reduce cost; b) are seamless; and c) have as minimal an adverse impact as possible on stakeholders and the public.

Numismatic Items.— This activity funds the manufacturing of numismatic items, which include collectible coins and sets, medals, bullion coins, and other products for sale to collectors and other members of the public who desire high-quality or investment-grade versions of the Nation's coinage. These products include annual proof and uncirculated sets; investment-grade silver and gold bullion coins; uncirculated silver and gold coins; proof silver, gold, platinum and palladium coins; and commemorative coins and medals that are authorized to commemorate events, individuals, places, or other subjects. Prices for numismatic products are based on the estimated product cost plus a reasonable margin to assure that the numismatic program operates at no net cost to the taxpayer. Similarly, bullion coins are priced based on the market price of the precious metals plus a premium to cover manufacturing, marketing, and distribution costs. Making numismatic products accessible, available, and affordable to Americans who choose to purchase them is the highest priority of the Mint's numismatic operations.

INTERNAL REVENUE SERVICE

The Internal Revenue Service (IRS) collects the revenue that funds the Government and administers the Nation's tax laws. During 2022, the IRS processed 260 million tax forms and collected \$4.9 trillion in taxes (gross receipts before tax refunds), which is nearly all the revenue that the federal government collects. The IRS taxpayer service program assists millions of taxpayers in understanding and meeting their tax obligations. The IRS tax enforcement and compliance program deters taxpayers inclined to evade their responsibilities while pursuing those who violate tax laws. The 2024 Budget provides \$14.1 billion for the IRS to administer the tax

code and implement key strategic priorities designed to enhance the quality of service provided to the taxpayer.

The Inflation Reduction Act (IRA) (P.L. 117-169) provided robust multi-year funding, which will allow the IRS to significantly improve service to taxpayers, address the tax gap, expand its enforcement reach to address large corporate and global high-net-worth taxpayers, large pass-through entities, and multinational taxpayers, and grant the opportunity to accelerate information technology modernization and digitalization priorities. The IRS is working to implement the wide range of tax law changes in the IRA and is developing plans to implement this funding in the most effective and responsible manner.

Taxpayer Service Account.— The Budget includes funding for Taxpayer Services that will allow the IRS to continue delivering services to taxpayers using a variety of in-person, telephone, and web-based methods. These tools help taxpayers understand their obligations, correctly file their returns, and pay taxes due in a timely manner with as little burden as possible. In fiscal year 2022, the IRS processed more than 168 million individual tax returns and issued more than 110 million federal tax refunds totaling more than \$359.5 billion.

Enforcement Account.— The Enforcement account funds activities that protect revenue by identifying fraud and preventing issuance of questionable refunds including those related to identity theft; increasing compliance by addressing offshore tax evasion; strengthening examination and collection programs, including return preparer; and addressing compliance issues in the tax-exempt sector. During 2022, the IRS achieved 2,552 criminal investigations completed with a conviction rate of 90.6 percent.

Operations Support Account.— The Budget includes funding for the overall planning, direction, operations and critical infrastructure activities, including the IT and cybersecurity that keep tax systems running and protect taxpayer data, the financial management activities that ensure effective stewardship of the Nation's revenues, and the physical infrastructure of IRS facilities. For example, in 2022, the IRS reduced the percentage of aged hardware within the IT environment from 9.3 percent at the end of 2021 to 7.1 percent through refreshing employee workstations, upgrading aged server operating systems and related aged hardware, and phasing out old equipment.

Business Systems Modernization Account.— IRS modernization efforts focus on building and deploying advanced information technology systems, processes, and tools to improve efficiency and enhance productivity. Modernizing is necessary to maintain the integrity of the Nation's voluntary tax system and collect trillions of dollars in tax revenue. With improved online services, taxpayers will be able to receive notifications, check their account balance, set up payment plans, and connect with an IRS representative through a single, online session. Other projects will help the IRS manage its caseload, increase the productivity of its workforce, and ensure the security of taxpayer information.

This account provides resources for overall planning, direction, operations, and critical infrastructure activities for the IRS. These activities include IT and cybersecurity that keep tax systems running and protect taxpayer data, the financial management activities that ensure effective stewardship of the nation's revenues, and the physical infrastructure that help IRS employees serve customers in office, campus, and Taxpayer Assistance Center sites. Telecommunications, human resource, and communications infrastructure are also critical components of this appropriation and are vital to maintaining adequate levels of customer service and the post-filing processes necessary for the tax system to properly function.

The Budget proposes mandatory funding for the IRS for 2032 and 2033 to supplement the annual appropriations for the agency's Operations Support account. The proposal would provide \$2.5 billion in 2032 and \$2.6 billion in 2033 to cover extensions of IRA-funded enforcement and compliance initiatives and investments.

The American Recovery and Reinvestment Act of 2009 (P.L. 111-5), section 1531, allows State and local governments to issue Build America Bonds through December 31, 2010. These tax credit bonds, which include Recovery Zone Bonds, differ from tax-exempt governmental obligation bonds in two principal ways: 1) interest paid on tax credit bonds is taxable; and 2) a portion of the interest paid on tax credit bonds takes the form of a Federal tax credit. The bond

issuer may elect to receive a direct payment in the amount of the tax credit for obligations issued before January 1, 2011. This account reflects the continuing interest payments over time.

The Earned Income Tax Credit (EITC) was enacted by the Tax Reduction Act of 1975 (P.L. 94-12) and made permanent by the Revenue Act of 1978 (P.L. 95-600). The amount of EITC a taxpayer may receive depends on, among other factors, the number of qualifying children the taxpayer has. The amount of EITC a taxpayer may receive initially increases as the taxpayer earns more income, then remains constant over a range of income, and then decreases as income increases further. The credit phases out based on the greater of (1) earned income and (2) adjusted gross income. As provided by law, there are instances where the EITC exceeds the amount of tax liability owed through the individual income tax system, resulting in a potential refund to the taxpayer.

Sections 9621 through 9626 of the American Rescue Plan Act of 2021, (P.L. 117-2) (American Rescue Plan) modified the EITC. For Tax Year 2021 only, the American Rescue Plan, generally, (i) reduced from 25 to 19 the general minimum age to claim the EITC with no qualifying children (Childless EITC); (ii) eliminated the upper-age limit for the Childless EITC; (iii) increased the credit and phaseout percentages for the Childless EITC; (iv) increased the earned income and phaseout amounts; and (v) allowed individuals to use their earned income from Tax Year 2019 instead of their earned income from Tax Year 2021, if earned income from Tax Year 2021 is less, for purposes of calculating the EITC for Tax Year 2021. The American Rescue Plan also permanently modified the rules, beginning in 2021, regarding, (i) children who fail to meet certain identification requirements; (ii) separated spouses; (iii) the disqualified investment income test; and (iv) the application of the EITC to the U.S. Territories.

The Budget proposes to permanently increase the Earned Income Tax Credit for individuals with no qualifying children. Beginning in tax year 2023, it would (i) increase to 15.3 percent the credit and phaseout percentages for individuals with no qualifying children, (ii) reduce to age 19, in general, the minimum age for eligibility for the credit, and (iii) eliminate the maximum age for eligibility for the credit. For tax year 2023, for individuals with no qualifying children, the earned income amount would be \$10,840, and the phaseout amount would be \$12,820. These dollar amounts would be indexed for inflation thereafter using the Chained Consumer Price Index for All Urban Consumers.

The Child Tax Credit (CTC) was enacted by The Taxpayer Relief Act of 1997 (P.L. 105-34). The Tax Cuts and Jobs Act (P.L. 115-97) (TCJA) increased the credit to \$2,000 per qualifying child under age 17 for tax years 2018-2025. The CTC phases out for higher-income taxpayers with modified AGI in excess of \$400,000 for joint taxpayers, and \$200,000 for other qualifying taxpayers. Taxpayers with insufficient tax liability to claim the entire CTC may receive up to \$1,400 (indexed) per child as a refundable credit, known as the Additional Child Tax Credit (ACTC). TCJA also provided that, in order to receive the CTC and/or ACTC, a taxpayer must include on the tax return a Social Security number for each qualifying child for whom the credit is claimed.

Sections 9611 and 9612 of The American Rescue Plan Act of 2021 (P.L. 117-2) (American Rescue Plan) amended the Internal Revenue Code (Code) to modify the CTC generally for 2021 only. Section 9611 of the American Rescue Plan amended Section 24 of the Code to make the entire amount of the CTC refundable and extended the CTC to cover qualifying children 17 years old and younger. The legislation also increased the amount of the CTC from \$2,000 to \$3,600 for qualifying children under age 6, and to \$3,000 for other qualifying children under age 18. The amount of this increase in the CTC (that is, \$1,600 in the case of qualifying children under age 6 and \$1,000 in the case of other qualifying children under age 18) is reduced by \$50 for each \$1,000 (or fraction thereof) by which the taxpayer's modified adjusted gross income exceeds certain thresholds. These thresholds are (i) \$150,000 for joint filers and surviving spouses, (ii) \$112,500 for heads of household, and (iii) \$75,000 in all other cases. The remainder of the credit phases out as under TCJA. In addition, the American Rescue Plan amended the Code to require advance payments of the CTC to be made periodically throughout 2021, beginning after July 1, based on certain information shown on the taxpayer's 2020 or 2019 tax returns, in an aggregate amount equal to 50 percent of the estimated amount of the taxpayer's refundable

PAYMENT WHERE CHILD TAX CREDIT EXCEEDS LIABILITY FOR TAX—Continued

CTC. Section 9612 of the American Rescue Plan amended Section 24 of the Code to remove the requirement for bona fide residents of Puerto Rico to have three qualifying children to claim the CTC. For 2021 and years thereafter, bona fide residents of Puerto Rico need only one qualifying child to claim the CTC. In addition, section 9612 of the American Rescue Plan amended Section 24 of the Code to provide that certain residents of American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, or the U.S. Virgin Islands, may have been eligible to receive from their territory tax agency advance Child Tax Credit payments under the expanded, refundable CTC for 2021.

The Budget proposes, beginning in tax year 2023, to permanently make the Child Tax Credit fully refundable. Beginning in tax year 2024, the entire amount of the Child Tax Credit would be paid in advance through monthly payments. This monthly advance payment program would be extended to Puerto Rico for the first time, as well as any other U.S. territory that elects to establish an advance payment program. In addition, beginning in tax year 2024, the proposal would make eligibility determined on a monthly basis instead of a taxable year basis, would make eligibility based primarily on the source of care rather than on familial relationship, and would provide authority to the Secretary to automatically enroll specified children for the credit. For tax years 2023 through 2025 only, the proposal would increase to age 17 the maximum age an individual may be claimed for the credit and would increase the maximum yearly credit amount to \$3,600 for each specified child under age 6 and to \$3,000 for each other specified child under age 18.

The Health Coverage Tax Credit (HCTC) is a refundable tax credit that pays 72.5% of qualified health insurance premiums for eligible individuals and their families (as provided in Internal Revenue Code 35(a)). Those eligible include certain recipients of Trade Adjustment Assistance (TAA) and beneficiaries of the Pension Benefit Guaranty Corporation who are aged 55 through 64. Individuals cannot claim both HCTC and a premium tax credit or a COBRA credit for the same coverage. The credit can be paid in advance. The HCTC was created in the Trade Act of 2002 (P.L. 107-210), subsequently extended, temporarily eliminated in 2014 (P.L. 112-40, section 241), then later reinstated for 2014 through December 31, 2019 (P.L. 114-27, section 407). The Further Consolidated Appropriations Act, 2020 (P.L. 116-94, div. Q, title I, section 146) extended the credit through December 31, 2020, and the Consolidated Appropriations Act, 2021 (P.L. 116-260, div. EE, title I, section 134) extended the credit through December 31, 2021.

Employee Retention Credit.—Section 2301 of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act, P.L. 116-136) created the employee retention credit, a refundable tax credit against certain employment taxes equal to 50 percent of the qualified wages certain businesses and tax-exempt employers pay to employees (up to \$10,000 per employee) after March 12, 2020, and before January 1, 2021. Eligible employers could get immediate access to the credit by reducing employment tax deposits they were otherwise required to make and by requesting an advance of the credit.

Section 206 of the Taxpayer Certainty and Disaster Tax Relief Act of 2020, enacted as Division EE of the Consolidated Appropriations Act, 2021 (P.L. 116-260) amended and made technical changes to section 2301 of the CARES Act retroactive to the section 2301's original effective date including permitting an employer that received a Paycheck Protection Program (PPP) loan to be eligible to claim an employee retention credit under section 2301, provided the wages reported in support of the forgiveness of the PPP loan are not the same wages for which the credit is claimed.

Section 207 of the Taxpayer Certainty and Disaster Tax Relief Act of 2020 extended the employee retention credit to qualified wages paid after December 31, 2020 and before July 1, 2021; increased the maximum credit amount that may be claimed per employee (making it equal to 70 percent of \$10,000 of qualified wages paid to an employee per calendar quarter); limited eligibility for and amount of the credit advance; and expanded the category of employers that may be entitled to claim the credit, among other technical amendments.

Section 9651 of the American Rescue Plan (ARP) Act of 2021 (P.L. 117–2) enacted section 3134 of the Internal Revenue Code of 1986, which extended the availability of the employee retention credit to wages paid after June 30, 2021, and before January 1, 2022. Section 3134 generally maintained the structure of the employee retention credit as provided under section 2301 of the CARES Act, as amended, with certain changes.

Employers in a U.S. Territory that otherwise qualify for the employee retention credit can claim the credit. Payments of wages by employers in U.S. Territories are wages within the meaning of section 3121(a) and therefore employers eligible to claim the credit include employers in the U.S. Territories that pay qualified wages and otherwise meet the requirements for the credit.

Section 80604 of the Infrastructure Investment and Jobs Act of 2021 (P.L. 117–58) amended section 3134 of the Internal Revenue Code to provide that the employee retention credit under section 3134 shall apply only to wages paid after June 30, 2021, and before October 1, 2021 (or, in the case of wages paid by an eligible employer which is a recovery startup business, January 1, 2022).

Paid Leave Credits.—Sections 7001 and 7003 of Division G of the Families First Coronavirus Response Act (FFCRA, P.L. 116–127) created refundable tax credits against certain employment taxes for small and midsize employers to reimburse them for the cost of providing required paid sick and family leave wages to their employees for leave related to COVID-19 as set forth under Division E, the Emergency Paid Sick Leave Act (EPSLA) and Division C, the Emergency Family and Medical Leave Expansion Act (Expanded FMLA) of the FFCRA. Sections 7002 and 7004 of the FFCRA created similar credits for certain self-employed persons in similar COVID-related circumstances. An employer is eligible for credits for qualified sick leave wages up to \$511 per day and \$5,110 in the aggregate (for up to 10 days of leave) and up to \$200 per day and \$10,000 in the aggregate (for up to 10 weeks of leave) for qualifying COVID-related leave reasons. Eligible employers could get immediate access to the credit by reducing employment tax deposits they are otherwise required to make and by requesting an advance of the credit. The requirement to provide leave under the EPSLA and Expanded FMLA expired on December 31, 2020, but the credits for paid leave that otherwise would have satisfied the requirements under the EPSLA and Expanded FMLA were later extended through September 30, 2021.

Sections 286, 287 and 288 of the COVID-related Tax Relief Act of 2020, enacted under Division N of the Consolidated Appropriations Act, 2021 (P.L. 116–260) extended the credits for periods of leave from January 1, 2021, through March 31, 2021, and made certain technical improvements to the FFCRA credit provisions.

Section 9641 of the ARP enacted sections 3131, 3132, and 3133 of the Internal Revenue Code to extend the credits through the period from April 1, 2021 through September 30, 2021; expand the category of employers eligible for the credit; reset the limitations on the amount of qualified wages that may be taken into account for purposes of the credits (and increased the aggregate cap for paid family leave wages from \$10,000 to \$12,000); expand the category of qualifying reasons for paid leave wages eligible for the credits (including leave to receive and recover from a COVID-19 vaccine), and make other technical amendments. (Sections 9642 and 9643 of the ARP amended and extended the equivalent tax credits for certain self-employed individuals for April 1, 2021, through September 30, 2021.)

Employers in a U.S. Territory that otherwise qualify for the paid leave credits can claim the credit. Payments of wages by employers in U.S. Territories are wages within the meaning of section 3121(a) and therefore employers eligible to claim the credit include employers in the U.S. Territories that pay qualified wages and otherwise meet the requirements for the credit.

COBRA Credit.—Section 9501 of the ARP required certain employers to offer free Consolidated Omnibus Budget Reconciliation Act (COBRA) coverage to certain qualified individuals for periods of coverage from April 1, 2021 through September 30, 2021. The ARP enacted section 6432 of the Internal Revenue Code that provided a refundable tax credit against certain employment taxes to offset the cost of the COBRA coverage. The ARP provision subsidized 100 percent of COBRA premiums for six months for individuals who lost employment involuntarily or had reduced hours.

The Patient Protection and Affordable Care Act (P.L. 111–148), section 1421, allows certain small employers (including small tax-exempt employers) to claim a credit when they pay at least half of the health care premiums for single health insurance coverage for their employees. Small employers can claim the credit for the first two consecutive years of having coverage purchased through the small business health options program. Generally, employers that have no more than 25 full-time equivalent employees and pay wages averaging less than \$50,000 (as adjusted for inflation) per employee per year may qualify for the credit.

PAYMENT WHERE CERTAIN TAX CREDITS EXCEED LIABILITY FOR CORPORATE TAX—Continued

This account shows the outlays for the provision that allows certain businesses to accelerate the recognition of a portion of certain other credits in lieu of taking bonus depreciation. The Housing and Economic Recovery Act of 2008 (P.L. 110–289), section 3081, amended section 168(k) of the Internal Revenue Code (Code) to allow certain businesses to accelerate the recognition of a portion of their unused pre-2006 alternative minimum tax (AMT) or research and development (R&D) credits in lieu of taking bonus depreciation. The portion of the unused credit that can be accelerated under this provision is capped at the lesser of \$30 million or 6 percent of eligible AMT and R&D credits. The accelerated credit amount is refundable. The American Recovery and Reinvestment Act of 2009 (P.L. 111–5), section 1201(b), extended this temporary benefit through 2009. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111–312), section 401(c), extended this temporary benefit through the end of 2012, but only with respect to AMT credits. The American Taxpayer Relief Act of 2012 (P.L. 112–240), section 331(c), extended this temporary benefit through 2013 only with respect to AMT credits. The Tax Increase Prevention Act, Title I—Certain Expiring Provisions (P.L. 113–295), section 125(c), extended this temporary benefit through 2014 only with respect to AMT credits. The Protecting Americans from Tax Hikes (PATH) Act of 2015 (P.L. 114–113), extended this provision through 2015 only with respect to AMT credits. The PATH Act also extended and modified this provision for 2016 through 2019 only with respect to AMT credits.

The Tax Cuts and Jobs Act (P.L. 115–97) (TCJA) repealed the corporate alternative minimum tax. To conform to this repeal, the election to accelerate AMT credits in lieu of taking bonus depreciation was repealed, effective for property placed in service after September 27, 2017. Further, the TCJA amended the AMT credit limitation in section 53 of the Code to allow unused AMT credits to fully offset the regular federal income tax liability for any taxable year beginning after 2017. The TCJA also added section 53(e) to the Code to treat unused AMT credits as refundable for any taxable year beginning after 2017 and before 2022 in an amount equal to 50 percent (100 percent in the case of taxable years beginning in 2021) of the excess of the unused AMT credit as of the beginning of the taxable year over the amount of the credit allowable for the year against regular federal income tax liability. The Coronavirus Aid, Relief, and Economic Security Act (P.L. 116–136) (CARES Act) retroactively amended section 53(e) of the Code to allow unused AMT credits to be fully refunded in tax years beginning in 2018 or 2019. The refundable corporate minimum tax credit claimed under sections 53 and 168(k)(4) of the Code as in effect for taxable years beginning before Jan. 1, 2018, is not direct spending under the Balanced Budget and Deficit Control Act, as amended, and thus is not subject to sequestration.

Section 9631(a) of the American Rescue Plan Act of 2021 (P.L. 117–2) (American Rescue Plan) amended Section 21 of the Internal Revenue Code (Code) to provide special rules for the Child and Dependent Care Tax Credit (CDCTC) solely for Tax Year 2021. Specifically, the American Rescue Plan made the CDCTC fully refundable. In addition, the maximum credit rate of the CDCTC increased from 35 percent to 50 percent. The amount of expenses that are eligible for the CDCTC was increased from \$3,000 to \$8,000 for one qualifying dependent (from \$6,000 to \$16,000 for two or more qualifying dependents). The American Rescue Plan increased the phase-out threshold of the CDCTC from \$15,000 of AGI to \$125,000. The credit rate is phased down, but not below 20 percent, by 1 percentage point for each \$2,000 (or fraction thereof) by which the taxpayer's adjusted gross income (AGI) exceeds this threshold. The American Rescue Plan further phased down the credit rate of 20 percent by 1 percentage point for each \$2,000 (or fraction thereof) by which the taxpayer's AGI exceeds \$400,000. Section 9631(b) of the

American Rescue Plan amended Section 21 of the Code to authorize payments to U.S. Territories with mirror code tax systems and to U.S. Territories with non-mirror code tax systems.

Section 9632(a) of the American Rescue Plan amended Section 129(a)(2) of the Code to increase, for Tax Year 2021 only, the maximum amount of employer-provided dependent care assistance that may be excluded from gross income. This increase doubles the generally applicable amounts that is, \$5,000 (or \$2,500 in the case of a married individual filing a separate return) such that an eligible employee for Tax Year 2021 can receive an exclusion of up to \$10,500 (or \$5,250 in the case of a married individual filing a separate return).

The American Opportunity Tax Credit (AOTC) was enacted by the American Recovery and Reinvestment Act of 2009 (Public Law 111–5), was extended temporarily by Public Laws 111–312 and 112–240, and was made permanent by Public Law 114–113. A taxpayer may claim an AOTC of 100 percent of the first \$2,000 of qualified tuition, fees, and course materials paid by the taxpayer for each eligible student and 25 percent of the next \$2,000 of these qualifying expenses. Up to 40 percent of the otherwise eligible credit is refundable. For each eligible student, the AOTC may be claimed for only four years and for only the first four years of post-secondary education. The AOTC phases out for higher income taxpayers as the taxpayer's income increases.

The American Taxpayer Relief Act of 2012 (P.L. 112-240), section 310, extended the calendar year limitation of \$400 million through tax year 2013 (a two-year extension). The Tax Increase Prevention Act, Title I—Certain Expiring Provisions (P.L. 113-295), section 120, extended the calendar year limitation of \$400 million through tax year 2014 (a one-year extension). The Protecting Americans from Tax Hikes Act of 2015 (P.L. 114-113), extended the calendar year limitation of \$400 million through tax year 2016 (a two-year extension).

The Hiring Incentives to Restore Employment Act (P.L. 111-147), section 301, amended section 6431 of the Internal Revenue Code of 1986 by adding a new subsection (f) allowing issuers of Qualified Zone Academy Bonds to irrevocably elect to issue the bonds as specified tax credit bonds with a direct-pay subsidy. The issuer of such qualifying bonds receives a direct interest payment subsidy from the Federal Government. Bondholders receive a taxable interest payment from the issuer in lieu of a tax credit.

The Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (P.L. 111-312) amended section 6431 (f)(3)(A)(iii) to provide that direct pay treatment for Qualified Zone Academy Bonds is not available for Qualified Zone Academy Bond allocations from the 2011 national limitation or any carry forward of the 2011 allocation.

Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections that must be refunded. The Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248) provides for daily compounding of interest. Under the Tax Reform Act of 1986 (P.L. 99-514), interest paid on Internal Revenue collections will equal the Federal short-term rate plus three percentage points (two percentage points in the case of a corporation), with such rate to be adjusted quarterly.

The Patient Protection and Affordable Care Act (PPACA) of 2010 (P.L. 111–148) established the Premium Tax Credit. This credit is an advanceable, refundable tax credit designed to help eligible individuals and families with low or moderate income afford health insurance purchased through a Health Insurance Exchange, beginning in 2014. The credit can be paid in advance to the taxpayer's insurance company to lower the monthly premiums, or it can be claimed when a taxpayer files their income tax return for the year. If the credit is paid in advance, the taxpayer must reconcile the advance credit payments with the actual credit computed on the tax return and repay any excess advance credit payments, subject to certain caps.

The American Rescue Plan Act of 2021 (P.L. 117–2) increased the Premium Tax Credit in three ways. For 2021 and 2022, the legislation increased the Premium Tax Credit for currently eligible individuals and families, providing access to free benchmark plans for those earning 100 to 150 percent of the Federal poverty level, and expanded eligibility to newly include individuals and families with income above 400 percent of the federal poverty level for 2021 and 2022. The Inflation Reduction Act (P.L. 117–169) extended the increased Premium Tax Credit and expanded the eligibility provision through 2025.

This account includes state innovation waiver pass-through payments in lieu of the Premium Tax Credit to qualifying states under section 1332(a)(3) of the PPACA, as well as payments to states under the Basic Health Program established under section 1331 of PPACA.

The Budget makes permanent the Inflation Reduction Act (P.L. 117–169) expansion of health insurance premium tax credits. The proposals also build on existing consumer protections and improve access to behavioral health services by doing the following: require coverage of mental health and substance use disorder benefits for all plans and issuers; require coverage of three primary care visits and three behavioral health visits without cost-sharing; limit utilization management controls for behavioral health; amend the Mental Health Parity and Addiction Equity Act (MHPAEA; P.L. 110–343) to authorize the Treasury and Labor Secretaries to regulate behavioral health network adequacy for all plans and issuers; authorizes the Secretaries to issue regulations with respect to reimbursement rates. The Budget also extends surprise billing protections to ground ambulances and limits cost-sharing for insulin at \$35 per month.

This account reflects the funds that the IRS is allowed to retain and expend for qualified tax collection contracts with private collection agents and the special compliance personnel program. The American Jobs Creation Act of 2004 (P.L. 108-357) allowed the IRS to use private collection contractors to supplement its own collection staff efforts to ensure that all taxpayers pay what they owe. The statute authorized the Treasury to retain and use an amount not in excess of 25 percent of the amount collected under any qualified tax collection contract for payments to private collection agents, and an amount not in excess of 25 percent of the amount collected for enforcement activities of the IRS (26 U.S.C. 6306). The IRS used this authority to contract with several private debt collection agencies starting in 2006. In March 2009, the IRS allowed its private debt collection contracts to expire, thereby administratively terminating the program in accordance with Omnibus Appropriations Act, 2009 Administrative Provisions—Internal Revenue Service, Section 106 (P.L. 111-8). This provision stated that none of the funds made available in this Act maybe used to enter into, renew, extend, administer, implement, enforce, or provide oversight of any qualified tax collection contract as defined in section 6306 of the Internal Revenue Code of 1986.

Section 32102(a) of the Fixing America's Surface Transportation Act of 2015 (P.L. 114-94), amended section 6306 of the Internal Revenue Code (IRC) and requires the Secretary of the Treasury to enter into one or more qualified tax collection contracts for the collection of all outstanding inactive tax receivables. These agreements are applicable to tax receivables as identified by the Secretary after December 4, 2015. Section 6306 of the IRC prohibits the payment of fees for all services in excess of 25 percent of the amount collected under a tax collection contract for payments to private collection agents. In addition, up to 25 percent of the amount collected may be used to fund the special compliance personnel program account under section 6307.

Inactive tax receivables, as redefined by the Taxpayer First Act (P.L. 116-25), are defined as any tax receivable: 1) removed from the active inventory for lack of resources or inability to locate the taxpayer; 2) for which more than two years has passed since assessment and no IRS employee has been assigned to collect the receivable; or 3) for which a receivable has been assigned for collection but more than 365 days have passed without interaction with the taxpayer or a third party for purposes of furthering the collection. Tax receivables are defined as any outstanding assessment that the IRS includes in potentially collectible inventory. The Taxpayer First Act also made certain receivables of individual taxpayers ineligible for collection, including

taxpayers whose income substantially consists of disability insurance benefits or supplemental security income benefits or whose adjusted gross income does not exceed 200 percent of the applicable federal poverty level.

As provided by law (26 U.S.C. 7623), the Secretary of the Treasury may make payments to individuals who provide information that leads to the collection of Internal Revenue taxes. The Taxpayer Bill of Rights of 1996 (P.L. 104-168) provides for payments of such sums to individuals from the proceeds of amounts collected by reason of the information provided, and any amount collected shall be available for such payments. This information must lead to the detection of underpayments of taxes, or detection and bringing to trial and punishment of persons guilty of violating the Internal Revenue laws. This provision was further amended by the Tax Relief and Health Care Act of 2006 (P.L. 109-432) to provide for mandatory payments in certain circumstances and to encourage use of the program. A reward payment typically ranges between 15 and 30 percent of the collected proceeds for cases where the amount of collected proceeds exceeds \$2 million. Lower payments are allowed in certain circumstances, including cases in which information is provided that was already available from another source. Section 41108 of the Bipartisan Budget Act of 2018 (P.L. 115-123) expanded the definition of proceeds to include proceeds arising from the laws for which the Internal Revenue Service is authorized to administer, enforce, or investigate. Section 41108 further provides that the expanded definition of proceeds shall be used to determine eligibility for a mandatory award under section 7623(b)(5) and states that the amount of proceeds are to be determined without regard to whether such proceeds are available to the Secretary.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. During the process of collecting unpaid taxes, the Government may place a tax lien on real estate in order to protect the Government's interest and this account provides the resources to administer the program.

PAYMENT WHERE ADOPTION CREDIT EXCEEDS LIABILITY FOR TAX

(Legislative proposal, subject to PAYGO)

The Budget proposes to make the adoption credit fully refundable beginning in tax year 2024. In addition, taxpayers with unused carryforward amounts from eligible expenses from earlier adoptions would be able to claim the full amount of any unused carryforward on their 2024 tax return. The proposal would also allow families who enter into a guardianship relationship with a child that meets certain requirements to claim a refundable credit for the expenses related to establishing the guardianship relationship in the year such requirements are satisfied.

The Office of the Comptroller of the Currency (OCC) was created by Congress to charter national banks; oversee a nationwide system of banking institutions; and ensure national banks are safe and sound, competitive and profitable, and capable of serving in the best possible manner the banking needs of their customers. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665), rewritten and reenacted as the National Bank Act of 1864, provided for the chartering and supervising functions of the OCC. Income of the OCC is derived principally from assessments paid by national banks and interest on investments in U.S. Government securities. The OCC receives no appropriated funds from Congress.

As of September 30, 2022, the OCC supervised 778 national bank charters, 49 Federal branches of foreign banks, and 257 Federal savings associations. In total, the OCC supervises approximately \$15.9 trillion in financial institution assets.

As of September 30, 2022, the net position of the OCC was \$1,776 million. The OCC allocates a significant portion of the net position to its financial reserves to cover undelivered orders and capital investments. Financial reserves are integral to the effective stewardship of the OCCs resources, and the OCC has a disciplined process for reviewing its reserve balances and allocating funds appropriately to support its ability to accomplish the agency's mission. The OCCs financial reserves are available to reduce the impact on the OCCs operations in the event of a significant fluctuation in revenues or expenses. In 2018, the OCC established a new receivership contingency fund of \$86.6 million within its financial reserves to facilitate the conduct of receiverships of uninsured federal branches or agencies of a foreign banking organization. In 2017, the OCC established a contingency of \$100 million within its reserves to act as receiver of those national trust banks which are not FDIC-insured.

Medical Care.—The Budget separates the Department of Veterans Affairs (VA) Medical Care as a third category within the discretionary budget based on a recognition that VA Medical Care has grown much more rapidly than other discretionary spending over time, largely due to systemwide growth in health care costs. In 2024, the Budget reflects \$128.1 billion in enacted discretionary advance appropriations for the VA Medical Care program, together with a proposed cancellation of \$7.1 billion in available discretionary unobligated balances, for a discretionary total of \$121.0 billion in 2024. The Medical Care program consists of four appropriations: Medical Services, Medical Community Care, Medical Support and Compliance, and Medical Facilities. Each year, VA updates its budget estimates to incorporate the most recent data on healthcare utilization rates, actual program experience, and other factors, such as economic trends in unemployment and inflation. As a result of these updates, the adjusted budget estimates more accurately reflect the projected medical demands of veterans enrolled in the VA healthcare system.

This year, the Budget also reflects enactment of the Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022, or the Honoring our PACT Act of 2022, (Public Law 117-168; "PACT Act"), which created the Cost of War Toxic Exposures Fund ("TEF") to ensure that there is sufficient funding available to cover costs associated with providing health care and benefits to veterans exposed to environmental hazards, without shortchanging other elements of veteran care and services. Consistent with the PACT Act, the Administration proposes mandatory VA Medical Care funding in the TEF of \$17.1 billion in 2024 and \$21.5 billion in 2025.

In 2024, the Budget makes robust investments in VA Medical Care programs, including: \$3.1 billion for veterans' homelessness programs and \$16.6 billion for veterans' mental health care services, including \$559 million for veteran suicide prevention initiatives. The Budget also includes \$715 million for VA's Opioid Prevention and Treatment programs, including programs in support of the Jason Simcakoski Memorial and Promise Act.

For 2025, the Budget requests \$112.6 billion in discretionary advance appropriations for VA Medical Care. This request for discretionary advance appropriations, in conjunction with the Toxic Exposures Fund request, fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

With the resources requested for 2024 and 2025, VA will provide the highest quality healthcare services for veterans. VA estimates it will treat 7.4 million patients in 2024 and 7.4 million patients in 2025. Operation Enduring Freedom, Operation Iraqi Freedom, and Operation New Dawn (OEF/OIF/OND) veterans are expected to be 1.3 million in 2024 and 1.4 million in 2025.

Medical Services.—For Medical Services, the Budget reflects the 2024 discretionary advance appropriation request of \$74.0 billion and the 2025 discretionary advance appropriation request of \$71.0 billion. This appropriation provides for the component of VA's comprehensive, integrated healthcare delivery system that addresses the needs of eligible veterans and beneficiaries in VA facilities. In 2024, to realign funding among multiple funding sources, the Budget proposes a cancellation of \$4.9 billion in available unobligated balances.

WORKLOAD

Estimated obligations and workload for seven categories of healthcare services are shown below: outpatient care, inpatient care, mental healthcare, long term services and supports, prosthetics care, dental care, and rehabilitation care. In addition, estimated obligations and workload are also shown for six programs: CHAMPVA and other dependent programs, readjustment counseling, Caregivers, pharmacy, the Camp Lejeune Family Member, and State Homes. Estimated obligations reflect only the funding provided through the Medical Service and Medical Community Care appropriations, as applicable. Estimated workload reflects total workload, as funded by all sources, both discretionary and mandatory, including the Cost of War Toxic Exposures Fund, as applicable.

veterans with conditions related to mental illness, including alcohol and other substance use disorders. Mental health services and operations ensure the availability of a range of services, from treatment of a variety of common mental health conditions in primary care to more intensive interventions in specialty mental health programs for more severe and persisting mental health conditions. Specialty services such as evidence-based psychotherapies, intensive outpatient programs, residential rehabilitation treatment, and inpatient care are available to meet the range of veterans' needs.

Camp Lejeune Family Member Program.—Obligations in Medical Community Care for 2024 are estimated to be \$3.7 million for the Camp Lejeune Family Member program. The Honoring America's Veterans and Caring for Camp Lejeune Families Act of 2012 (P.L. 112-154) extended eligibility for VA hospital care and medical services to certain veterans who were stationed at Camp Lejeune, North Carolina, for at least 30 days between 1957 and 1987. Family members of such veterans who resided, or were in utero, at Camp Lejeune for at least 30 days during that period are eligible for reimbursement of hospital care and medical services for 15 specified illnesses and conditions, and VA is the payer of last resort.

State Home Programs.—Obligations in Medical Community Care for 2024 are estimated to be \$1,496 million for State Home Programs. State Veterans Homes are facilities approved by VA that a State has established primarily for the care of veterans disabled by age, disease, or otherwise, who, because of such disability, are incapable of earning a living. The Medical Community Care appropriation provides funding for community care services to eligible veterans and other beneficiaries, which has been an essential part of the Department of Veterans Affairs (VA) healthcare system for decades.

The Budget reflects the following discretionary appropriation funding: the 2024 advance appropriation request of \$33 billion and the 2025 advance appropriation request of \$20.4 billion. In 2024, to realign funding among multiple funding sources, the Budget reflects a transfer of \$3.9 billion from Medical Community Care to Medical Facilities and a proposed cancellation of \$1.9 billion in available unobligated balances.

The 2025 request for a discretionary advance appropriation, in conjunction with the Toxic Exposures Fund request, fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

Medical Support and Compliance finances the expenses of management, security, and administration of the Department of Veterans Affairs (VA) healthcare system through the operation of VA medical centers, other facilities, Veterans Integrated Service Network offices and facility director offices, chief of staff operations, quality of care oversight, legal services, billing and coding activities, procurement, financial management, and human resource management.

For Medical Support and Compliance, the Budget reflects the following discretionary appropriation funding: the 2024 advance appropriation request of \$12.3 billion and the 2025 advance appropriation request of \$11.8 billion. In 2024, to realign funding among the four Medical Care accounts, the Budget reflects a transfer of \$850 million from Medical Support and Compliance to Medical Facilities.

The 2025 request for a discretionary advance appropriation, in conjunction with the Toxic Exposures Fund request, continues the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

The purpose of the Department of Defense-Veterans Affairs Health Care Sharing Incentive Fund, often referred to as the Joint Incentive Fund (JIF), is to enable the Departments to carry out a program to identify and provide incentives to implement creative sharing initiatives at the facility, intra-regional and nationwide levels. The JIF promotes collaboration and new approaches to problem solving to enable the Departments to improve the coordination of health care services. The Departments have established the fund and developed processes and criteria to solicit and select projects. Section 721 of the National Defense Authorization Act for Fiscal Year 2003, Public Law 107-314, established the fund and requires the Departments to establish a joint incentive program. In 2024, each Secretary shall contribute a minimum of \$15 million to the fund after the appropriation is enacted.

Medical Facilities provides for the operations and maintenance of the capital infrastructure required to provide healthcare to the Nation's veterans. These costs include utilities, engineering, capital planning, leases, laundry services, grounds maintenance, trash removal, housekeeping, fire protection, pest management, facility repair and maintenance, and property disposition and acquisition.

For Medical Facilities, the Budget reflects the following discretionary appropriation funding: the 2024 advance appropriation request of \$8.8 billion and the 2025 advance appropriation request of \$9.4 billion. In 2024, the Budget proposes a \$4.8 billion cancellation from advance appropriations transferred from Medical Community Care and Medical Support and Compliance to Medical Facilities, with a corresponding reappropriation of the same amount (\$4.8 billion) with a five-year period of availability. This funding will provide for a significant investment in VA's non-recurring maintenance program to further improve VA's medical facilities infrastructure.

The 2025 request for a discretionary advance appropriation fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

Section 707 of the Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022 (Public Law 117–168; PACT Act) appropriated \$1.88 billion in fiscal year 2023 and a total of \$3.63 billion in fiscal years 2024 - 2031, to be available until expended, for major medical facility leases authorized by section 702.

Section 705 of the PACT Act appropriated \$922 million in fiscal year 2022 for the Department's enhanced-use lease (EUL) program, to be available until expended. The Department allocated \$275 million of this funding to the Medical Facilities account.

For 2024, the total budgetary resources of over \$2.4 billion is comprised of \$938 million in discretionary appropriations, \$46 million in mandatory appropriations from the Toxic Exposure Fund, \$832 million in medical care support such as physicians' pay, utilities and other overhead, \$540 million in Federal grants and other non-Federal resources, and \$61 million in reimbursements. The Department of Veterans Affairs (VA) research program will support an estimated 4,829 full time equivalents through direct appropriations and reimbursable resources. These combined resources will support approximately 3,012 research projects.

This account is an intramural research program with outstanding success leading to critical clinical achievements that improve the health and quality of life for veterans and the Nation. As a health research program focused exclusively on the needs of veterans, VA research continues to play a vital role in the care and rehabilitation of our men and women who have served in uniform. Building on more than 90 years of discovery and innovation engaging veterans as research volunteers, VA research has a proud track record of transforming VA healthcare by bringing new evidence-based treatments and technologies into everyday clinical care. The 2024 request builds upon the investments from the 2023 request to continue to increase funding to advance the Department's research missions in military toxic exposures, traumatic brain injury,

cancer and precision oncology, and mental health. This request supports our six cross-cutting clinical priorities: suicide prevention; pain management and opioid use; traumatic brain injury (TBI), posttraumatic stress disorder (PTSD); Gulf War illness and military toxic exposures; and cancer, with a focus on precision oncology.

The Veterans Access, Choice, and Accountability Act of 2014 ("Veterans Choice Act"), Public Law 113-146, provided \$10 billion in mandatory funding to establish a temporary program ("Veterans Choice Program") improving veterans' access to health care by allowing eligible veterans who met certain wait time or distance standards to use eligible healthcare providers outside the Department of Veterans Affairs (VA) system. The law directed that this funding be deposited in the Veterans Choice Fund. In July 2015, the Congress passed Public Law 114-41, the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015, which gave VA temporary authority, ending October 1, 2015, to use a certain level of Veterans Choice Fund dollars for pharmaceutical expenses related to treatment of Hepatitis C and for Care in the Community.

Public Law 115-26 amended the Veterans Choice Act to eliminate the original August 7, 2017, sunset date for the Veterans Choice Program and allowed the program to operate until all of the funds in the Veterans Choice Fund were expended.

Public Law 115-46, the VA Choice and Quality Employment Act of 2017, provided \$2.1 billion in mandatory funding for the Veterans Choice Fund, to remain available until expended. In 2018, Public Law 115-96 provided \$2.1 billion more in mandatory funding, to remain available until expended; and Public Law 115-182, the MISSION Act, provided an additional \$5.2 billion in mandatory funding, to remain available without fiscal year limitation. The MISSION Act provided VA with flexibility, beginning on March 1, 2019, to use Veterans Choice Fund dollars for community care. In addition, the MISSION Act sunset the Choice Program in June 2019 and established the new Veterans Community Care Program. The Further Consolidated Appropriations Act, 2020 (Public Law 116-94) transferred \$615 million from the 2020 start of year unobligated balances in the Veterans Choice Fund account to the Medical Community Care account.

For 2025, the Budget requests \$181,390,281,000 in advance appropriation for Compensation and Pensions. This request satisfies the requirement created by the Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235) and prevents our Nation's veterans from being adversely affected by budget delays.

This appropriation provides for the payment of compensation, pension, and burial benefits to veterans and survivors.

Compensation is paid to veterans for disabilities incurred in or aggravated during active military service. Dependency and Indemnity Compensation is paid to survivors of servicepersons or veterans whose death occurred while on active duty or as a result of service-connected disabilities. Compensation and vocational rehabilitation is provided to the children of Vietnam veterans who were born with certain birth defects. The Secretary may pay a clothing allowance to each veteran who uses a prescribed medication for a service-connected skin condition or wears a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Secretary, tends to damage or tear the clothing of such veteran.

Miscellaneous benefits provided for are:

- (a) payments for claims made pursuant to the provision of the World War Adjusted Compensation Act of 1924, as amended;
- (b) a special allowance (38 U.S.C. 1312) to dependents of certain veterans who died after December 31, 1956, but who were not fully and currently insured under the Social Security Act; and
- (c) payments authorized by the Equal Access to Justice Act.

The appropriation also provides for a program to allow the Department of Veterans Affairs (VA) to perform income matches for certain compensation recipients.

In accordance with Public Law 97-377, the Reinstated Entitlement Program for Survivors (REPS) program restores Social Security benefits to certain surviving spouses or children of veterans who died of service-connected causes.

Legislation is proposed to provide a cost-of-living adjustment comparable to the annual Social Security increase to recipients of disability compensation, dependency and indemnity compensation, and clothing allowances. The increase, effective with payments made on January 1, 2024, is expected to be 3.6 percent.

There is no disability requirement for survivor cases or veterans age 65 or older. Income support is provided at established benefit levels.

An automatic annual cost-of-living increase comparable to the annual social security increase is provided for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. The increase, effective with payments made on January 1, 2024, is expected to be 3.6 percent.

Remove matches performed to prevent duplication of benefits in accordance with the prohibitions specified in 38 U.S.C. 5304 from the Privacy Act definition of "matching agreement."—The Privacy Act, under 5 U.S.C. 552a, generally requires government entities to provide individualized notice before acting on information received from a data "matching agreement." However, the Privacy Act also contains certain exceptions to what is considered a matching agreement. This proposal seeks to amend the Privacy Act statute to include as an exception matches of information between VA and the Department of Defense for purposes of preventing, reducing, or ameliorating any duplication of benefits, in accordance with the prohibitions specified by 38 U.S.C. 5304.

For 2025, the Budget requests \$11,523,134,000 in advance appropriation for Readjustment Benefits. This request satisfies the requirement created by the Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235) and prevents our Nation's veterans from being adversely affected by budget delays.

This appropriation finances educational assistance allowances for certain servicemembers, veterans, and for eligible dependents of those: (a) veterans who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicemembers who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation, specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. Voluntary contributions by eligible servicemembers and matching contributions provided by the Department of Defense are included in the Post-Vietnam Era Veterans Education Account.

The Post-9/11 GI Bill (Chapter 33).—P.L. 110-252 greatly expanded education benefits beginning on August 1, 2009. Based on length of active duty service and training rate, trainees may be entitled to benefits including: tuition and fees, housing allowance, books and supplies stipend, kickers, and Yellow Ribbon matching payments. Certain active duty members of the Armed Forces may transfer benefits to a spouse or children.

Survivors and Dependents Educational Assistance (Chapter 35).—Benefits are provided to children and spouses of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total. In addition, dependents of servicemembers missing in action or interred by a hostile foreign government for more than 90 days are also eligible. The table below provides a comparison of trainees and costs for the Dependents Educational Assistance.

All Volunteer Force Educational Assistance Program (Montgomery GI Bill).—P.L. 98-525, enacted October 19, 1984, established two new educational programs: an assistance program for veterans who enter active duty during the period beginning July 1, 1985; and an assistance program for certain members of the Selected Reserve. The Readjustment Benefit appropriation

pays the basic benefit allowance for veterans, except for certain Post-Vietnam Era Veterans Education participants who transferred to the Montgomery GI Bill program. Supplementary educational assistance, Post-Vietnam Era Veterans Education converters, and reservists are financed by payments from the Department of Defense. Due to P.L. 116-315, the Montgomery GI Bill will be phased out starting in 2030.

Veteran Employment Through Technology Education Courses (VET TEC).—P.L. 115-48 established a high technology pilot program to provide eligible veterans who are entitled to educational assistance under chapter 30, 32, 33, 34, or 35 of title 38, United States Code, or chapter 1606 or 1607 of title 10, United States Code, with the opportunity to enroll in high technology programs of education that VA determines provide training and skills sought by employers in a relevant field or industry.

Veteran Rapid Retraining Assistance Program (VRRAP).—P.L. 117-2 established the VRRAP program and appropriated \$386 million for benefits payments. P.L. 117-16 made further improvements to the program. VRRAP offered education and training to Veterans who were unemployed because of the COVID-19 pandemic. This program stopped accepting new enrollments after December 10, 2022.

The following table shows a caseload and cost comparison for these beneficiaries under existing legislation.

Veteran Readiness and Employment (VR&E, Chapter 31).—VR&E provides servicemembers and veterans with service-connected disabilities receive the assistance necessary to help them prepare for, obtain, and maintain suitable employment. Comprehensive assessments may include interest and aptitude testing as well as specialized assessments such as functional capacity examinations. During the training phase of the program, eligible servicemembers and veterans are provided assistance for necessary training such as tuition, fees, books and supplies at colleges, technical schools and other training programs. A veteran enrolled in training receives a monthly subsistence allowance. Eligible veterans may also receive specialized or adaptive equipment to help them overcome a disability or enable them to compete with non-disabled individuals. At the completion of training, veterans are provided with employment and placement services, including supplies and equipment needed to enter employment, adaptive equipment and workplace accommodations, incentives to employers to reimburse them for hiring and training veterans with disabilities, and two final months of subsistence allowance.

Tuition Assistance.—Public Law 106–398, enacted October 30, 2000, allows the military services to pay up to 100 percent of tuition and expenses charged by a school for servicemembers. If a service department pays less than 100 percent, a servicemember eligible for the Montgomery GI Bill Active-duty (MGIB) or the Post–9/11 GI Bill (Chapter 33) can elect to receive VA benefits for all or a portion of the remaining expenses. Public Law 108–454 established a program that provides availability of education benefits for payment for national admissions exams and national exams for credit at institutions of higher education.

The National Exams.—The benefit allows VA to reimburse for the fee charged for national tests for admission to institutions of higher learning and national tests providing an opportunity for course credit at institutions of higher learning.

Licensing and Certification Test Payments.—Under Public Law 106–419, veterans and other eligible persons may receive up to \$2,000 to pay fees required for civilian occupational licensing and certification examinations needed to enter, maintain, or advance in employment in a vocation or profession, effective March 1, 2001.

Work Study.—Certain veterans, reservists, and dependents pursuing a program of rehabilitation, education or training, who are enrolled as full-time students, can work up to 250 hours per semester, receiving the Federal (\$7.25 as of July 24, 2009) or State minimum wage rate, whichever is higher.

Payments to States.—State approving agencies are reimbursed for the costs of inspecting, approving, and supervising programs of education and training offered by educational institutions and training establishments in which veterans, dependents, and reservists are enrolled or are about to enter.

Reporting Fees.—Reporting fees are paid to education and training institutions to help defray the costs of certifying education enrollment for veterans enrolled in training during a calendar year.

Create entitlement charge parity between degree programs and non-degree programs: Amend 38 U.S.C. 3313(g)(5), to authorize the Secretary of the Department of Veterans Affairs (VA) to determine the entitlement charge calculation for benefits paid under section 3313(g) in the same manner as section 3313(d)(3).

Create One GI Bill: Amend 38 U.S.C. chapters 30, 32, 33, 35, and 36, and chapter 1606 of title 10 U.S.C., to consolidate the Montgomery GI Bill-Active Duty, Montgomery GI Bill-Selected Reserves, Post-Vietnam Era Veterans Educational Assistance Program, and Dependents Educational Assistance programs into one education program, the Post–9/11 GI Bill program.

Extend authority for the Specially Adapted Housing Assistive Technology grant program: This proposal would extend the authority of the Secretary of VA to award SAH Assistive Technology (SAHAT) grants and administer the program through September 30, 2027. Section 203 of P.L. 111–275 (Veterans Benefits Act of 2010), codified at 38 U.S.C. 2108, established the SAHAT grant program with a sunset date of September 30, 2016. Congress has since extended the sunset date five times. Most recently, Congress extended the program authority through September 30, 2024, via the Continuing Appropriations and Ukraine Supplemental Appropriations Act, 2023 (P.L. 117–180), Division E, Title II, section 205.

Extend authority for the Specially Adapted Housing temporary residence adaptation (SAH TRA) grant: This proposal would extend the authority of the Secretary of VA to award SAH TRA grants through September 30, 2032. Section 101 of the Veterans Housing Opportunity and Benefits Improvement Act of 2006, codified at 38 U.S.C. 2102A, established the TRA grant with a sunset date of 5 years from enactment. P.L. 109–233, section 101, 120 Stat. 397 (2006). Congress has since extended the sunset date three times. Most recently, Congress extended the program authority through December 31, 2024, via the Continuing Appropriations and Ukraine Supplemental Appropriations Act, 2023 (P.L. 117–180), Division E, Title II, section 204.

Permit full allocation of State Approving Agency funding including the cost-of-living adjustment at the beginning of the fiscal year: Amend 38 U.S.C. 3674(a)(5)(B) to authorize the Secretary of VA to increase the amount made available for reimbursement to SAAs by the same percentage as the annual increase in the benefit amounts payable under title II of the Social Security Act that was in effect the preceding calendar year.

Prevent VA from providing unlimited amounts of payment for flight training at public schools: Amend 38 U.S.C. 3313(c) and add new section (m) to impose tuition and fee payment caps at Institutions of Higher Learning with flight training programs and establish a maximum allowable fee structure for all VA funded flight programs.

Expand and clarify entitlement to Post–9/11 Educational Assistance and Montgomery GI Bill Select Reserve (MGIB-SR) benefits for active duty Public Health Service (PHS) Commissioned Corps officers who are part of the uniformed services: The proposed legislation would amend 38 U.S.C. 3301(1) to expand educational assistance under the Post–9/11 GI Bill to members of the Ready Reserve component of the PHS Commissioned Corps who are called to active duty service under subparagraph (B), (C), or (D) of section 203(c)(2) of the Public Health Service Act (42 U.S.C. 204(c)(2)) or section 216 of such Act (42 U.S.C. 217). Currently, full-time PHS Commissioned Corps officers are already deemed active military service for the purposes of Department of Veterans Affairs educational benefits; however, the current statutory language omits the Ready Reserve component of the PHS Commissioned Corps. This proposal would remedy this omission and align the Ready Reserve Corps with the reserve components of the Armed Forces. The proposal would also amend 38 U.S.C. 3311 by replacing "in the Armed Forces" with "in the uniformed services" throughout the section. The proposal would also extend MGIB-SR educational assistance benefits to members of the Selected Ready Reserve component of the PHS Commissioned Corps, to align with the benefits provided to Selected Reserve of the Armed Forces, under 10 U.S.C. CFR 16131. The proposed legislation would apply with respect to service occurring on or after March 27, 2020.

For 2024, the Budget requests \$12,701,000 which shall be in addition to funds previously appropriated. Additionally, the Budget requests \$135,119,422 in advance appropriation for Veterans Insurance and Indemnities (VI&I). This request satisfies the requirement created by the Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235) and prevents our Nation's veterans from being adversely affected by budget delays.

Note.—Department of Veterans Affairs insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

The insurance business line administers seven life insurance programs, including two trust funds, three public enterprise revolving funds, a trust revolving fund, and Veterans' Mortgage Life Insurance (VMLI); and supervises four additional programs for the benefit of servicemembers, veterans, and their beneficiaries through contracts with a commercial company. All programs are operated on a commercial basis, to the extent possible, consistent with all applicable statutes. The insurance appropriation is the supplemental funding mechanism for the following Government life insurance activities: National Service Life Insurance (NSLI); Service-Disabled Veterans Insurance Fund (S-DVI); and VMLI.

National Service Life Insurance (NSLI).—Payments are made to the NSLI fund for certain World War II veterans for: (a) extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for NSLI; and (c) death claims on policies under the waiver of a premium while the insured was on active duty.

Payment to Service-Disabled Veterans Insurance Fund (S-DVI).—Payments are made to the S-DVI fund to supplement the premiums and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities.

Veterans' Mortgage Life Insurance (VMLI).—Payments are made to mortgage holders under this program, which provides mortgage protection life insurance to veterans who have received a grant for specially adapted housing due to severe disabilities. The trend in the number and amount of insurance policies in force appears in the following table.

The Filipino Veterans Equity Compensation Fund was established under the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act of 2009 (P.L. 110-329), to make payments to eligible persons who served in the Philippines during World War II. Payments were subsequently authorized by the Congress in the American Recovery and Reinvestment Act of 2009 (P.L. 111-5). Original funding of \$198,000,000 was supplemented by a transfer of \$67,000,000 authorized by Public Law 111-212 that remains available until expended. Payments to citizens of the United States are \$15,000. Payments to non-U.S. citizens are \$9,000.

Cost of War Toxic Exposures Fund.—The Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022 (Public Law 117-168; PACT Act) represents the most significant expansion of VA healthcare and disability compensation benefits for veterans exposed to burn pits and other environmental exposures in 30 years. As part of the PACT Act, Congress authorized the Cost of War Toxic Exposures Fund (TEF) to fund increased costs above 2021 funding levels for healthcare and benefits delivery for veterans exposed to a number of environmental hazards to ensure there is sufficient funding available to cover these costs, without shortchanging other elements of veteran medical care and benefit delivery. The Budget provides \$20.3 billion for the TEF in 2024. This amount includes \$17.1 billion for medical care; \$1.8 billion for disability benefits claims processing and automation strategies; \$1.2 billion for information technology support; \$90 million for support services including stakeholder outreach, hiring initiatives, and legal services; \$46 million for research activities; and \$4 million for claims appeals. The Budget also provides \$21.5 billion for the TEF in 2025.

The Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022 (Public Law 117-168; PACT Act) authorized the Cost of War Toxic Exposures Fund (TEF) to provide mandatory funding to VA for the increased costs above 2021 funding levels for healthcare and benefits delivery for veterans exposed to a number of environmental hazards to ensure there is sufficient funding available to cover these costs, without shortchanging other elements of veteran medical care and benefit delivery. The Budget includes legislative proposals affecting VA healthcare programs, for which a portion of the estimated costs may be paid from the TEF and the remaining portion from discretionary appropriations. In 2024, the total estimated cost of the healthcare legislative proposals that may be paid for from the TEF is \$16 million.

The Insurance Act of 1951 established the Service-Disabled Veterans Insurance (S-DVI) program for veterans with service-connected disabilities. S-DVI will remain open to new policy issuances through December 31, 2022, for veterans who separated from the service on or after April 25, 1951. This fund finances the payment of claims on existing life insurance policies and remains open for new issues at standard rates to veterans having service-connected disabilities.

OPERATING COSTS

Death claims.—Represents payments to designated beneficiaries.

All other.—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

Capital investment.—A policyholder may borrow up to 94 percent of the value of his or her policy.

Administration.—Represents the administrative costs of claims processing and account maintenance.

The trend in the number and amount of policies in force is indicated in the following table.

POLICIES AND INSURANCE IN FORCE

	2022 actual	2023 est.	2024 est.
Number of policies (EOY)	273,933	260,981	244,192
Insurance in force (dollars in millions) (EOY)	\$2,883	\$2,774	\$2,618

Financing.—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans Insurance and Indemnities appropriation, instead of direct appropriations to this fund.

Operating results and financial condition.—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$1,602 million by September 30, 2023. The expected deficit is financed by additional funds from the above-mentioned Veterans Insurance and Indemnities appropriations.

Note.—Department of Veterans Affairs insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

The Veterans' Reopened Insurance Fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: 1) service-disabled standard insurance; 2) service-disabled rated insurance; and 3) nonservice-disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other government insurance.

Budget program:

Death claims.—Represents payments to designated beneficiaries.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—This represents resources for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

Policy loans made.—A policyholder may borrow up to 94 percent of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemembers' Group Life Insurance (SGLI) Act of 1965, as amended. SGLI is a program for servicemembers on active duty, ready reservists, members of the National Guard, members of the Commissioned Corps of the National Oceanic and Atmospheric Administration and the Public Health Service, cadets and midshipmen of the four service academies, and members of the Reserve Officer Training Corps. SGLI coverage is available in \$50,000 increments up to the maximum of \$500,000. Veterans' Group Life Insurance (VGLI) is a program of post-separation insurance which allows servicemembers to convert their SGLI coverage to renewable term insurance. Family Servicemembers' Group Life Insurance (FSGLI) is a program extended to the spouses and dependent children of members insured under the SGLI program. FSGLI provides up to a maximum of \$100,000 of insurance coverage for spouses, not to exceed the amount of SGLI the insured member has in force, and \$10,000 of free coverage for dependent children. Spousal coverage is issued in increments of \$10,000.

The Servicemembers' Group Life Insurance Traumatic Injury Protection Program (TSGLI) became effective December 1, 2005. TSGLI provides for payment between \$25,000 and \$100,000 (depending on the type of injury) to any member of the uniformed services covered by SGLI who sustains a traumatic injury that results in certain serious losses.

Veterans Affairs (VA) Housing Program Account.—The housing program helps eligible veterans, active duty personnel, surviving spouses, and members of the Reserves and National Guard purchase, retain, and adapt homes in recognition of their service to the Nation. When a borrower purchases a home, the program operates by substituting the Federal Government's guaranty for a down payment that might otherwise be required.

Under 38 U.S.C. 3703, the guaranty amount for a borrower with full entitlement (first-time users of the program or users whose entitlement is fully restored) is as follows:

- (a) 50 percent for loans of \$45,000 or less;
- (b) \$22,500 for loans greater than \$45,000, but no more than \$56,250;
- (c) the lesser of \$36,000 or 40 percent of the loan amount for loans greater than \$56,250, but not more than \$144,000; or
- (d) 25 percent of the loan amount for loans of \$144,001 or greater.

This appropriation provides for the corporate leadership and operational support to VA's Housing business line. The Housing Program facilitates the extension of private capital, on more liberal terms than generally available to nonveterans, to assist veterans and servicemembers in obtaining housing credit, and assist veterans in retaining their homes during periods of temporary economic difficulty through intensive supplemental mortgage loan servicing.

Guaranteed transitional housing loans for homeless veterans.—Established as a pilot project by the Veterans Benefits Improvement Act of 1998 (Public Law 105-368), this program does not require any new loan subsidy funding. The program has originated no new loans since 2009. The program was canceled in 2012. The existing loan will continue to be serviced within the program's financing account.

The Native American Veteran Housing Loan program provides direct loans to veterans living on trust lands under 38 U.S.C. chapter 37, section 3761. These loans are available to purchase, construct, or improve homes to be occupied as the veteran's residence. This program began as a pilot in 1993 and was made permanent on June 15, 2006, through Public Law 109-233.

The Vocational Rehabilitation Loan Program provides temporary loans to veterans who would otherwise be unable to begin or continue in a rehabilitation program without such assistance in conjunction with service-connected disability benefits provided to veterans participating in the Department of Veterans Affairs' Veteran Readiness and Employment Program as authorized by chapter 31 of title 38, United States Code. Repayment of these loans is made in monthly installments, without interest, through deductions from future payments of compensation, pension, subsistence allowance, educational assistance allowance, or retired pay.

The National Service Life Insurance Fund was established in 1940. It is for the World War II servicemembers' and veterans' insurance program. Over 22 million policies were issued under this program. Activity of the fund reflects a declining claim workload. The trend in the number and amount of policies in force is shown as follows:

POLICIES AND INSURANCE IN FORCE

Number of policies	63,983	46,190	33,221
Insurance in force (dollars in millions)	\$807	\$559	\$363

This fund is operated on a commercial basis to the extent possible. The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans Insurance and Indemnities appropriation.

Assets of the fund, which are largely invested in special interest-bearing Treasury securities and in policy loans, are expected to decrease from an estimated \$773 million as of September 30, 2023 to \$520 million as of September 30, 2024. The actuarial estimate of policy obligations as of September 30, 2024, totals \$496 million, leaving a balance of \$24 million for contingency reserves.

The United States Government Life Insurance Fund (USGLI) was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. The general decline in the activity of the fund is indicated in the table below. All USGLI program policies have reached the maturity age. However, the program will continue to disburse insurance annuity benefits to beneficiaries.

POLICIES AND INSURANCE IN FORCE

	2022 actual	2023 est.	2024 est.
Number of policies	1	1	0
Insurance in force (dollars in millions)	\$.001	\$ 0	\$ 0

The fund is operated on a commercial basis to the extent possible. The income of the fund is derived from interest on investments. Effective January 1, 1983, premiums were discontinued because reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from \$1.4 million as of September 30, 2023, to \$1.2 million as of September 30, 2024, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of September 30, 2024, totals \$0.7 million, leaving a balance of \$0.6 million for contingency reserves.

VA MISSION Act of 2018 (P.L. 115–182), Title II, section 202 established an independent commission, the "Asset and Infrastructure Review Commission" (the Commission) with members appointed by the President with the consent of the Senate. The Commission was intended to review recommendations made by the Secretary of the Department of Veterans Affairs (VA) to modernize or realign Veterans Health Administration (VHA) facilities, including leased facilities, on the basis of criteria published in the Federal Register in accordance with Title II. Funding in this account was intended to provide for support staff to conduct in-depth field hearings and receive input from Veterans, Veterans Service Organizations, local VA providers, local governments, and the public. In 2022, the Senate declined to confirm members of the Commission. The 2023 appropriations bill rescinded 2022 funding and provided no funding in 2023 for the Commission. No funds are requested for the work of the Commission in 2024.

The mission of the Board of Veterans' Appeals (Board or BVA), as set forth in 38 U.S.C. 7101(a) is to conduct hearings and consider appeals for benefits and services properly before the Board in a timely manner. The Board's goal is to issue quality decisions in compliance with the requirements of the law, including the precedential decisions of the United States Court of Appeals for Veterans Claims and other federal courts. The Board makes final decisions on behalf of the Secretary on appeals from decisions of the agencies of original jurisdiction with the Department of Veterans Affairs offices. The Board reviews all appeals for entitlement to veterans' benefits, including claims for service connection, increased disability ratings, total disability ratings, pension, insurance benefits, educational benefits, home loan guaranties, vocational rehabilitation, dependency and indemnity compensation, memorial benefits, and healthcare delivery to include a program of comprehensive assistance for family caregivers. The Veterans Appeals Improvement and Modernization Act of 2017, enacted on August 23, 2017, became effective on February 19, 2019. This law reformed the current appeals process and replaced it with a new, simpler process that uses easy to understand language and gives veterans choice and control of their appeal.

The Veterans Electronic Health Care Record appropriation funds necessary expenses related to the development and deployment of a new Veterans Electronic Health Record (EHR) system. This new EHR will allow the Department of Veterans Affairs (VA) to move toward a single common health record that has full integration between the Department of Defense and VA, as well as community providers. From the veteran perspective, the new system will provide a single, accurate, lifetime health record while improving patient care and safety.

The mission of the National Cemetery Administration (NCA) is to honor veterans with final resting places in national shrines and with lasting tributes that commemorate their service to our Nation. The NCA's vision is to serve all veterans and their families with the utmost dignity, respect, and compassion. VA national cemeteries inspire visitors to understand and appreciate the service and sacrifice of our Nation's veterans. NCA accomplishes this mission and vision through operational and benefit programs and services that include: 1) burying eligible veterans and their eligible family members in national cemeteries and maintaining memorial areas and gravesites as national shrines; 2) administering cemetery grants to establish, expand, improve, or operate veterans cemeteries owned and operated by State, Tribal, and other grantees; 3) administering Legacy grants for development of educational materials and hosting the Veterans Legacy Memorial platform, all of which help VA tell the stories of veterans interred in VA national and VA-grant-funded cemeteries; 4) providing burial headstones and markers for the unmarked graves of eligible veterans and memorial headstones markers for eligible decedents whose remains are unavailable for burial; 5) providing medallions signifying the graves of eligible veterans interred in private cemeteries to be affixed to their privately purchased headstones or markers; 6) providing Presidential Memorial Certificates to family and friends of deceased eligible veterans, recognizing their qualifying service to the Nation; 7) providing graveliners or partial reimbursement for a privately purchased outer burial receptacles for each new grave in open national cemeteries administered by NCA or in VA-grant funded cemeteries; 8) providing reimbursement for caskets and urns used to inter veteran remains in VA national or VA-grant-funded cemeteries when there is no next of kin or sufficient resources for a casket or urn; 9) providing an urn or commemorative plaque for an eligible deceased veteran in lieu of a headstone or marker; and 10) recording First Notice of Veteran Deaths into VA electronic files to ensure timely termination of benefits and next-of-kin notification of possible entitlement to survivor benefits.

Additionally, NCA reflects budget information for the National Cemetery Gift Fund and the Facilities Operation Fund. Through the Gift Fund, the Secretary is authorized to accept gifts and bequests which are made for the purpose of beautifying national cemeteries or are determined to be beneficial to such cemeteries.

FRANCHISE FUND—Continued

The Department of Veterans Affairs (VA) Franchise Fund was established under the authority of the Government Management Reform Act of 1994 and the VA and Housing and Urban Development and Independent Agencies Act of 1997. VA was selected by the Office of Management and Budget in 1996 as one of the six executive branch agencies to establish a franchise fund pilot program. Created as a revolving fund, the VA Franchise Fund began providing common administrative support services to the VA and other Government agencies in 1997 on a fee-for-service basis. In 2006, under the Military Quality of Life and Veterans Affairs Appropriations Act (P.L. 109-114), permanent status was conferred upon the VA Franchise Fund. The Franchise Fund concept is intended to increase competition for Government administrative services, resulting in lower costs and higher quality.

This appropriation funds the construction, replacement, rehabilitation, and expansion of water resources projects whose principal purpose is to provide commercial navigation, flood and storm damage reduction, or aquatic ecosystem restoration benefits to the Nation, and related efforts.

This account allocates funds on a performance basis to high-performing projects. The Budget funds those investments within the three main mission areas of the Corps civil works program—commercial navigation, flood and storm damage reduction, and aquatic ecosystem restoration—as well as related efforts that provide the best economic, environmental, and public safety returns to the Nation. In developing the Budget, consideration was given to advancing three key objectives including: 1) increasing infrastructure and ecosystem resilience to climate change and decreasing climate risk for communities based on the best available science; and 2) promoting environmental justice in disadvantaged communities in line with Justice40 and creating good paying jobs that promote a chance to join a union.

This account includes \$408.9 million for work under the Comprehensive Everglades Restoration Plan (CERP), which represents approximately 20.3 percent of the total amount in this account and approximately 5.5 percent of the total amount in the civil works program. Funding CERP at this level would not have a significant impact on the overall civil works program in 2024. Construction account funding for CERP in future years will depend on the availability of funds, so the impact of such future funding on the overall civil works program cannot be determined at this time. Funding for the Department of the Interior (DOI) includes an additional \$8.5 million for work under CERP. This account also includes approximately \$6.1 million for other ecosystem restoration work by the Corps in South Florida, including the Everglades ecosystem. Funding for DOI includes \$61.7 million for such non-CERP work. The Budget for the two agencies includes a total of \$485 million for ecosystem restoration work in South Florida, of which \$417.4 million is for CERP and \$67.8 million is for non-CERP work (P.L. 106-541 section 601).

The Budget also includes \$350 million for replacement of the Cape Cod Canal Bridges and an authorizing legislation that would allow the Corps to implement those funds by transferring them to the Commonwealth of Massachusetts for the design and construction of these bridges. The legislative proposal would authorize the Corps to transfer funds to state and local agencies to facilitate the transfer of bridges the Corps currently owns. The state and local agencies would then own, operate, and maintain the bridges. In support of this legislative proposal, the Budget

CONSTRUCTION—Continued

shows that the Corps will fully outlay the \$350 million in 2024 by transferring this funding to the Commonwealth of Massachusetts.

This appropriation also funds the Corps continuing authorities programs, which involve the planning, design, and construction of smaller projects that do not require specific authorizing legislation.

This appropriation funds inspection, operation, maintenance, and related activities for water resources projects operated and maintained by the Corps. These projects include navigation channels, navigation locks and dams, structures to reduce the risk of flood and storm damage (e.g., levees), and multi-purpose projects, as authorized in River and Harbor, Flood Control, and Water Resources Development Acts and other laws. Key infrastructure that is of central importance to the Nation and the continued safety of the public is given the highest priority for funding in this account.

This appropriation funds all of the costs associated with protecting Corps facilities from potential security threats. It also funds the national emergency preparedness program under Executive Order 11490.

In developing the Budget, consideration was given to advancing two key objectives including: 1) increasing infrastructure and ecosystem resilience to climate change and decreasing climate risk for communities based on the best available science; and 2) promoting environmental justice in disadvantaged communities in line with Justice40 and creating good paying jobs that provide the free and fair chance to join a union and collectively bargain.

This revolving fund provides for the acquisition, operation, and maintenance of plant and equipment used by the civil works program and for temporary financing of services chargeable to the civil works program. The fund also initially finances Corps district office operating expenses, which the districts later reimburse with project-specific funds. In addition, payments are made into the fund when other agencies or entities use plant and equipment acquired by the fund.

The Harbor Maintenance Trust Fund is authorized under the Harbor Maintenance Revenue Act of 1986 (P.L. 99-662, Title XIV), as amended. Under current law, revenue is derived from a 0.125 percent ad valorem tax imposed upon commercial users of specified U.S. ports, Saint Lawrence Seaway tolls, and investment interest. The Budget proposes to execute these appropriations within the Harbor Maintenance Trust Fund rather than to transfer and execute them in the Construction, Operation and Maintenance, and Mississippi River and Tributaries accounts.

The Harbor Maintenance Revenue Act authorizes expenditures from this fund to finance up to 100 percent of eligible Corps harbor operation and maintenance costs, including the operation and maintenance of Great Lakes navigation projects. The fund fully finances eligible operation and maintenance costs of the Saint Lawrence Seaway Development Corporation. The Water Resources Development Act of 1996 (P.L. 104-303, section 201) authorizes the fund to pay the Federal share of the costs for the construction of dredged material disposal facilities that are necessary for the operation and maintenance of coastal or inland harbors, the dredging and disposal of contaminated sediments that are in or affect the operation and maintenance of Federal navigation channels, the mitigation of impacts resulting from Federal navigation operation and maintenance activities, and the operation and maintenance of dredged material disposal facilities.

The North American Free Trade Agreement Implementation Act (26 U.S.C. 9505(c)(3)) authorizes the fund to pay all expenses of administration incurred by the Department of the

Treasury, the Corps, and the Department of Commerce related to the administration of the harbor maintenance tax (under 26 U.S.C. 4461 et seq.), but not in excess of \$5 million for any fiscal year.

In 1998, the U.S. Supreme Court excluded all U.S. exports from the harbor maintenance tax. The Court found that the tax violated Article I, section 9, clause 5 of the constitution because the value of the cargo, which is the basis for calculating this tax, does not fairly match the use of port services and facilities by exporters.

The proposed appropriations language for eligible operation and maintenance costs for inland harbors on the lower Mississippi River is intended to only apply to: Helena Harbor, Phillips County, AR; Baton Rouge Harbor, Devil Swamp, LA; Greenville Harbor, MS; Vicksburg Harbor, MS; and Memphis Harbor, McKellar Lake, Memphis, TN.

The Inland Waterways Trust Fund is authorized under the Inland Waterways Revenue Act of 1978 (P.L. 95-502), as amended by the Water Resources Development Act (WRDA) of 1986 (P.L. 99-662). The fund is used to pay 35 percent of the costs associated with the construction, replacement, rehabilitation, and expansion of Federal inland waterways projects, except as otherwise specifically provided for in law. Section 109 of WRDA 2020 (Division AA of P.L. 116-260), as amended specifically provides that for a project for navigation receiving a construction appropriation during fiscal years 2021 through 2022, 35 percent of the costs of construction of the project shall be paid from the fund until such construction of the project is complete. Section 8157 of WRDA 2022 (Division H, Title LXXXI of P.L. 117-263) amended Section 102 to increase the share of construction and related costs paid from the IWTF from 50 percent to 65 percent, beginning October 1, 2022, for any project for navigation on the inland waterways that was new or ongoing on or after October 1, 2022. Under current law, revenue is derived from an excise tax imposed on diesel fuel for commercial vessels on most of the inland waterways, plus investment interest. The Budget proposes to execute these appropriations within the Inland Waterways Trust Fund rather than to transfer and execute them in the Construction account.

The 2024 payment to the Military Retirement Fund includes funds for the amortization of the unfunded liability for all retirement benefits earned by Department of Defense military personnel for service prior to 1985 and Coast Guard military personnel for service prior to 2023. The amortization schedule for the unfunded liability is determined by the Department of Defense Retirement Board of Actuaries. Included in the unfunded liability are the consolidated requirements of the military departments to cover retired officers and enlisted personnel of the Army, Navy, Marine Corps, Air Force, Space Force and Coast Guard; retainer pay of enlisted personnel of the Fleet Reserve of the Navy and Marine Corps; and survivors' benefits.

The 2004 National Defense Authorization Act (P.L. 108-136) created additional benefits for certain retirees who receive disability compensation from the Department of Veterans Affairs and moved the responsibility for payments under the Combat-Related Special Compensation program to the Military Retirement Fund. Any additional funding requirements for retirees with service prior to 1985 will be included in this payment.

The 2016 National Defense Authorization Act (P.L. 114-92) enacted substantial changes to the current military retirement system. The new retirement system, which took effect January 1, 2018, is a blend of several components, including a defined retired pay benefit, a defined contribution to the Thrift Savings Plan, and a bonus (continuation pay) paid to the member to maintain Service retention requirements. Currently serving members will remain grandfathered under the legacy retirement system.

The 2021 National Defense Authorization Act (P.L. 116-283) added the Coast Guard and their survivors to the Military Retirement Fund effective 2023. Service in the Coast Guard performed before 2023 is the original Coast Guard unfunded liability of the fund.

Public Law 98-94, amended by Public Law 116-283, provided for accrual funding of the Department of Defense military retirement system and for the establishment of a Department of Defense Military Retirement Fund in 1985. The fund has three sources of income. The first is payments from the Department of Defense military personnel accounts and the Coast Guard retired pay account, which cover the accruing costs of the future retirement benefits being earned by today's service members. The second source is interest on investments of the fund. The third source is made up of two payments from the general fund of the Treasury. The first Treasury payment covers a portion of the accrued unfunded liability for all Department of Defense and Coast Guard retirees and their current members who had earned benefits before entering into the accrual funding system. The second Treasury payment covers the liability for concurrent receipt of Department of Defense and Coast Guard military retired pay and disability compensation paid by the Department of Veterans Affairs. This benefit was added in the 2004 National Defense Authorization Act.

Public Law 106-398 provides for accrual funding for health care to Medicare-eligible retirees. The statute establishes an accrual health care fund which has three sources of funding. The first is contributions from employing agencies, which cover the liability for future benefits accruing to current service members. The second is an annual payment from the general fund of the Treasury on the accrued unfunded liability, and the third source is income from the investment of fund balances.

The 1985 Department of Defense Authorization Act, Public Law 98-525, as amended by Public Laws 100-48 and 108-375, and the Post 9/11 Veterans Educational Assistance Improvements Act of 2010, Public Law 111-377, provide for the accrual funding of certain education benefits for active duty military personnel under the authority of Chapters 30 and 33, Title 38 U.S.C., and to selected Reserve personnel under the authority of Chapters 1606 and 1607, Title 10 U.S.C. Chapter 1607 was sunset by Public Law 114-92, although the statute allows members who were receiving Chapter 1607 benefits before the statute was enacted to continue to receive these education benefits through November 2019. The fund is financed through actuarially determined Government contributions from the Department of Defense military personnel appropriations and interest on investments. Funds are transferred to the Department of Veterans Affairs to make benefit payments to eligible personnel. The status of the fund is as follows:

Public Law 101-510 created an Armed Forces Retirement Home (AFRH) Trust Fund to finance the AFRH—Gulfport and the AFRH—Washington Homes. The Homes are financed by appropriations drawn from the Trust Fund. AFRH provides residences and related services for certain retired and former members of the Armed Forces and the Coast Guard. The members receiving domiciliary and hospital care are:

	2022 actual	2023 est.	2024 est.
Domiciliary care	484	532	540
Hospital care	127	140	150
Totals	611	672	690

Both AFRH facilities (Gulfport, MS and Washington, DC) are accredited in all areas by The Joint Commission (TJC) and Commission on Accreditation of Rehabilitation Facilities (CARF). AFRH is accredited with TJC for the wellness clinics (Ambulatory Care), nursing care (Assisted Living, Memory Support, Long Term Care, and Independent Living Plus (Home Health Care)), and as an Assisted Living Community. For FY 2022, AFRH earned its 18th consecutive unmodified financial audit opinion with no weaknesses or deficiencies identified in the management letter. From March 2020 to March 2021, access at both AFRH campuses was restricted due to the COVID-19 pandemic. As a result, resident activities and new resident admissions were curtailed. In March 2021 the campuses began a phased reopening to safely restore activities, visitation, and new admissions. In November 2019, AFRH selected a development team for the 80-acre master planned parcel on the Washington campus with the goal of executing a lease agreement in FY 2020. The master plan authorizes 4.9 million square feet of mixed-use development (residential, commercial, retail, hotel) under a ground lease for AFRH to receive long-term revenue from previously underutilized property. In July 2020, AFRH executed a memorandum of understanding with the National Capital Planning Commission and the District of Columbia Office of Planning laying out the zoning process for private redevelopment on AFRH's federally-owned land. AFRH continues to work with the development team, National Capital Planning Commission, and the District of Columbia on Master Plan refinements, tax increment financing, zoning, traffic mitigation, environmental impacts and utilities planning.

The Selective Service System (SSS) registers young men when they reach age 18 and maintains an active database of over 92 million registrant records. The agency stands poised to deliver personnel to the Department of Defense (DoD) when directed by Congress and the President. In the event of a national emergency and call for conscription, the agency would mobilize, conduct the lottery process, issue induction notices, and transport the first draftees to military entrance processing stations. The law also requires the agency to manage a program for conscientious objectors in lieu of military service that contributes to the maintenance of the national health, safety, and interest of the United States.

While SSS continues to strengthen its national security partnership with the Armed Services, the agency pursues strong outreach initiatives and social media presence to inform men and their influencers of the importance of registration to achieve the most fair and equitable draft. The agency's critical national security capabilities provide young men with the opportunity to fulfill their civic duty and to serve their country if called.

The agency's strategy to modernize all operations to 21st century standards has enabled SSS to complete its mission from virtually anywhere and at anytime during this challenging period through state-of-the-art secure, agile, and redundant IT solutions. The agency strives to continually improve core business processes through best-in-class customer service, information technology and cyber services delivery, and continuous risk management. Our next generation of cloud-based solutions will deliver cost-efficient and secure data and agile applications to meet the agency's mission, while delivering robust security, higher bandwidth, and sustained services in support of more efficient and accurate registration processing and mobilization readiness.

This appropriation supports the Environmental Protection Agency's (EPA) core programs by providing funds for independent Office of Inspector General (OIG) audit, evaluation, and investigative products and advisory services. These products and services consistently provide significant positive monetary return on investment and contribute substantially to risk reduction, improved environmental quality and human health, streamlining business practices, operational efficiency, and accountability. Specifically, the OIG performs contract audits and investigations that focus on costs claimed by contractors and assess the effectiveness of contract management. Assistance agreement audits and investigations evaluate the award, administration, and costs of assistance agreements. Program audits, evaluations, and investigations determine the extent to which the desired results or benefits envisioned by the Administration and the Congress are being achieved. The OIG helps identify activities that could undermine the integrity, efficiency, and effectiveness of EPA programs. Financial statement audits review financial systems and statements to ensure that adequate controls are in place and EPA's accounting information is timely, accurate, reliable, and complies with applicable laws and regulations. Efficiency, risk assessment, and program performance audits review the economy, efficiency, and effectiveness of operations by examining EPA's structure and processes for achieving environmental goals. Some of these activities include assessing risk, setting priorities, developing implementation strategies, and measuring performance. Information resource management audits review EPA information technology and systems to test the integrity of data and systems controls, as well as compliance with a variety of Federal information security laws and requirements. Investigations prevent, detect, and seek prosecution for criminal activity and serious misconduct in EPA programs and operations. Major areas of audits and investigations include: financial fraud; infrastructure/terrorist threat; program integrity; employee integrity; cyber-crimes; and theft of intellectual or sensitive data. In addition, the EPA Inspector General serves as the IG for the U.S. Chemical Safety and Hazard Investigation Board, providing the full range of audit, evaluation, and investigative services specified by the Inspector General Act, as amended. Additional funds for audit, evaluation, and investigative activities associated with the Hazardous Substance Superfund are appropriated under that account and transferred to the Inspector General account.

This appropriation finances salary, travel, science, technology, environmental monitoring, research, and development activities including laboratory and center supplies, certain operating expenses (including activities under the Working Capital Fund), contracts, grants, intergovernmental agreements, and purchases of scientific equipment. In addition, the Administrator will employ persons in the Office of Research and Development (ORD) under the authority provided in 42 U.S.C. 209. The Budget proposes to maintain EPA's appointment ceiling under this authority. Furthermore, the Budget proposes to extend student contractor hiring authority for the Office of Chemical Safety and Pollution Prevention and the Office of Water through 2029. These activities prioritize robust science and strengthen the Environmental Protection Agency's (EPA) research and scientific analysis to inform EPA policy and regulatory development actions to ensure good stewardship and positive environmental outcomes. Specifically, in 2024, EPA will place emphasis on the following:

The Air, Climate, and Energy (ACE) research program will conduct a range of science and technology activities to develop and implement strategies to improve air quality and take action on climate change. These include: research to inform the review of the national ambient air quality standards to improve understanding of ozone, particulate matter, lead, sulfur dioxide, carbon monoxide, and nitrogen dioxide; system research and life cycle analysis to understand the production, operation, and impacts of energy systems on health and the environment; research on the generation, fate, transport, and chemical transformation of air emissions to identify individual and population health risks to inform clean air management decisions; research on the impacts of climate change on human health and the environment; development and evaluation of new approaches for monitoring levels of air pollutants (including air toxics); development of tools to provide technical assistance to State and local governments and Tribes to use in developing clean air plans to achieve air quality standards; and the production of information, decision support tools, and adaptation strategies to enable stakeholders to account for climate change when making decisions. EPA will continue to implement the renewable fuels provisions of the Energy Policy Act of 2005 (P.L. 109-58) and the Energy Independence and Security Act of 2007 (P.L. 110-140), and will develop, implement, and ensure compliance with regulatory programs that will significantly reduce emissions from highway and non-road sources.

The Safe and Sustainable Water Resources (SSWR) research program conducts research to meet the science needs in EPA's water program, including: evaluating groups of contaminants for the protection of human health and the environment; developing innovative tools, technologies, and strategies for managing water resources (including stormwater); and supporting a systems approach for protecting and restoring aquatic systems. The systems approach includes: research to inform setting water quality criteria; establishing measures to assess and manage watersheds; and developing effective source control and management methods, especially for urban uses. A major component of the research program is working to support EPA's Drinking Water Strategy. Within the SSWR program, research will assess, develop, and compile scientifically rigorous tools and models that will be used by the Agency, States, Tribes, and municipalities to address issues such as lead in drinking water and excess nutrient loading.

The Sustainable and Healthy Communities (SHC) research program, including Superfund research, implements system-based research to develop a new generation of smart technologies to address environmental conditions in a community. Superfund research costs are appropriated to the Hazardous Substance Superfund Trust Fund appropriation and transferred to this account to allow for proper accounting. The SHC research program develops decision support tools to enable communities' decision makers to solve complex human health and environmental problems. The program will identify health risks and stressors, especially those that disproportionately impact vulnerable populations such as children and the elderly. The decision support tools support critical policy, regulatory, and non-regulatory needs related to contaminated site remediation, children's health protection, waste management, and our economy's reliance on quality ecosystem goods and services. These tools account for the interrelationships between social, economic, health, ecological, and environmental factors with the aim to minimize unintended consequences that can result from decisions about land use, transportation, and solid waste management, as well as promote more robust and efficient infrastructure.

The Health and Environmental Risk Assessment (HERA) research program develops assessments and scientific products that are used extensively by EPA's Program and Regional offices, and other parties, to estimate the potential risk to public health from exposure to environmental contaminants, to develop regulatory standards, and to manage environmental clean-ups. This includes EPA's All Ages Lead Model which predicts lead concentration in body tissues and organs for a hypothetical individual, based on a simulated lifetime of lead exposure. The HERA research program provides the scientific foundation for Agency actions to protect public health and the environment.

The Homeland Security Research Program (HSRP) will continue to support research efforts on evaluating chemical, biological, and radiological (CBR) analytical methods. The HSRP will conduct research on decontamination and methods to manage potential public health consequences and develop methods to protect water infrastructures and assess threats and consequences. In 2023, decontamination research will continue to address existing scientific knowledge gaps in responding to and recovering from wide-area CBR attacks on urban centers and public areas. Water Infrastructure Protection Research will focus on developing and testing decontamination approaches for water infrastructure and on treating CBR contaminated water caused by terrorist attacks, natural disasters, and/or accidents. Research on real-time distribution system models and methods to isolate and treat contaminated water, clean distribution systems, redirect water, and return water systems to service quickly and affordably is in progress. EPA also will continue to support water sector-specific agency responsibilities to protect the Nation's critical water infrastructure.

EPA's Chemical Safety for Sustainability (CSS) research program is designed to strengthen the Agency's ability to evaluate and predict the potential environmental and human health impacts

from use of manufactured chemicals throughout their lifecycle. The CSS program supports the development and application of improved and new computational systems; models of pathways and tissues; rapid cost-efficient exposure models; and user-friendly web-based tools for analysis and decision support. The CSS program will continue to develop approaches for using toxicity and exposure data to inform screening and prioritization of the over 40,000 chemicals currently on the TSCA Active List and will continue to inform the Agency's implementation of key environmental regulations and to address contaminants of emerging concern, such as Per- and Poly-fluoroalkyl Substances (PFAS). As it relates to the Science and Technology account and the overall mission of EPA, the protection of human health includes: ensuring the availability of appropriate analytical methods for detecting pesticide residues in food and feed; ensuring suitability for monitoring pesticide residues; and enforcing tolerances. The program accomplishes this by developing and validating multi-residue pesticide analytical methods for food, feed, and water for use by other Federal and State laboratories and EPA's programs and regions. Laboratories further support the estimation of human health risks from pesticide use by operating the National Pesticide Standard Repository (NPSR).

EPA's Forensics Support program provides expert scientific and technical support for criminal and civil environmental enforcement cases, as well as technical support for the Agency's compliance efforts. EPA's National Enforcement Investigations Center (NEIC) is an environmental forensic center accredited for both laboratory and field sampling operations that generate environmental data for law enforcement purposes. It is fully accredited under International Standards Organization 17025, the main standard used by testing and calibration laboratories, as recommended by the National Academy of Sciences (see Strengthening Forensic Science in the United States: A Path Forward, National Academy of Sciences, 2009). The NEIC maintains a sophisticated chemistry laboratory and a corps of highly trained inspectors and scientists with expertise across media. The NEIC works closely with EPA's Criminal Investigation Division to provide technical support (e.g., sampling, analysis, consultation, and testimony) to criminal investigations. The NEIC also works closely with EPA's Program and Regional Offices to provide technical support, consultation, on-site inspection, investigation, and case resolution services in support of the Agency's Civil Enforcement program.

EPA's internal operations programs provide centralized management services to ensure that EPA is fulfilling its mission. The office and the functions it performs with the Science & Technology appropriation is: Office of Mission Support (facilities infrastructure and operations and information technology/data management).

Additional funds for science, technology, research, and development activities associated with the Hazardous Substance Superfund are appropriated under that account and transferred to the Science and Technology account.

This appropriation includes funds for salaries, travel, contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities and administrative activities of the operating programs, including activities under the Working Capital Fund. This appropriation supports core agency programs implementing environmental statutes.

To protect and improve air quality, the Environmental Protection Agency (EPA) applies a variety of approaches and tools. These include: developing and implementing strategies to attain ambient air quality standards for the six criteria pollutants; reducing regional haze through regional approaches where significant transport of pollutants occurs; and developing control measures for sources that are appropriately regulated at the Federal level. EPA develops and issues national technology-based and risk-based standards using a sector-based approach to reduce the quantity of toxic air pollutants emitted from industrial and manufacturing processes, as well as from urban sources. The Acid Rain program will continue its market-based approach to achieving reduced emissions of sulfur dioxide, primarily from electric utilities. The market-based approach also will be used in other programs, where permitted under the Clean Air Act, to reduce emissions of air pollutants. EPA will work with States and sources to implement the Greenhouse Gas Reporting Rule to update, streamline, and enhance the scope and quality of the Greenhouse Gas Reporting Program. In addition, EPA will develop and use public information and training to reduce public exposure to radiation. EPA will focus its domestic efforts to ensure that ozone-depleting substance production and import caps under the Montreal Protocol and Clean Air Act continue to be met.

EPA works to protect and restore our waters to ensure that drinking water is safe, and that aquatic ecosystems sustain fish, plants, and wildlife, as well as support economic, recreational, and subsistence activities. EPA will focus on core statutory requirements and water infrastructure. EPA will support the following Clean Water Act program components: water quality criteria, standards, and technology; National Pollutant Discharge Elimination System (NPDES); water monitoring; Total Maximum Daily Loads (TMDLs); watershed management; water infrastructure and grants management; core wetlands programs and Clean Water Act section 106 program management. EPA also will work with States and Tribes to reduce risks to drinking water contaminants, for example, through proposed revisions to the Lead and Copper Rule. In addition, EPA will continue work with States to transition to the next generation management and reporting tool, the Safe Drinking Water Information System (SDWIS) Prime used by the majority of state drinking water programs. The new SDWIS Prime management and reporting tool will provide improvements in program efficiency and data quality, greater public access to drinking water data, facilitation of electronic reporting, reductions in reporting burdens on laboratories and water utilities, reductions in data management burdens, and ultimately reduction in public health risk.

EPA's programs work to preserve land by ensuring proper management of waste under multiple environmental statutes. EPA will continue to assist States in putting in place and maintaining permits at facilities that treat, store, or dispose of hazardous waste. Although States are the primary implementers of the Corrective Action program, which requires facilities managing hazardous waste to clean up past releases, EPA directly implements the program in six States and provides technical support and oversight for State activities. EPA also works with Tribes to maintain tribal underground storage tank (UST) programs. EPA also supports the operations and management of the Brownfields program, including training and technical support to assist communities to address issues associated with redevelopment or reuse of properties that may be complicated by the presence of contamination. EPA works with State, local, and tribal partners to help protect the public and the environment from releases of hazardous substances from chemical handling facilities by helping them develop area-wide emergency response and contingency plans. EPA conducts audits and inspections of those facilities handling more than a threshold quantity of certain extremely hazardous chemicals and that are required to implement a Risk Management Program to prevent releases.

In collaboration with our tribal government partners, EPA works to strengthen human health and environmental protection in Indian Country. EPA works to ensure that its environmental protection programs are implemented in Indian Country either by EPA or by the Tribes. EPA will continue the direct implementation assessment to better understand EPA direct implementation responsibilities and activities on a program-by-program basis in Indian Country. Also, EPA provides resources and technical assistance for federally recognized Tribes to create and maintain effective environmental programs by collaborating with Tribes to develop long-term EPA-Tribal Environmental Plans (ETEP) for all federally recognized Tribes.

To ensure that food will be free from unsafe levels of pesticide residues, EPA applies strict health-based standards in establishing and reevaluating tolerances for residues in food or animal feed. EPA also works to expedite the registration of reduced risk pesticides when possible, and to ensure that older pesticides meet current health and environmental standards. To respond to emerging health issues, EPA develops methods to evaluate the efficacy of products intended to combat public health pests. EPA intends to reduce potential human and environmental risks from commercial and residential exposure to pesticides through programs that focus on farm worker protection, pollinator health and protection, endangered species protection, environmental stewardship, and integrated pest management. EPA's toxics program will continue to make substantial progress in protecting public health and the environment from potentially harmful industrial chemicals by assessing the safety of new and existing chemicals, reducing gaps in the availability of chemical data, strengthening management of chemical information, and providing easier and more complete public access to non-confidential chemical data. EPA will conduct existing chemical prioritization and evaluations under the provisions of the Toxic Substances Control Act (TSCA) as amended by the Frank R. Lautenberg Chemical Safety for the Twenty-First Century Act, and address any unreasonable risks identified through such evaluations.

EPA will engage both bilaterally and through multilateral institutions to improve international cooperation to prevent and address the transboundary movement of pollution and coordinate with other nations to protect the environment and human health.

Combined with public demand for information, unprecedented changes in information technology are altering the way EPA, States, and Tribes collect, manage, analyze, use, secure, and provide access to quality environmental information. EPA is working with the States and Tribes to strengthen our information quality, leverage information maintained by other government

organizations, and develop new tools that provide the public with simultaneous access to multiple data sets, allowing users to understand local, tribal, State, regional, and national environmental conditions. Key to achieving information quality will be the further development of the National Environmental Information Exchange Network, which is primarily an affiliation between EPA and the States and Tribes. EPA will continue to reduce reporting burdens, improve data quality, and accelerate data publications by accelerating the replacement of paper-based submissions with electronic reporting under the Toxic Release Inventory and other programs.

EPA works in partnership with State and tribal agencies to enforce and build compliance with Federal environmental laws passed by the Congress that ensure our communities have clean air, water, and land. EPA will enforce environmental laws to correct noncompliance and promote cleanup of contaminated sites. To improve compliance with environmental laws, EPA works to provide easy access to tools that help regulated entities, Federal agencies, and the public understand these laws and find efficient, cost-effective means for putting them into practice. EPA's enforcement program targets inspections and other compliance monitoring activities according to the degree of health and environmental risk. The program collaborates with the Department of Justice, States, local government agencies, and tribal governments to ensure consistent and fair enforcement of all environmental laws and regulations. The program seeks to aggressively pursue violations that threaten communities, ensure a level economic playing field by ensuring that violators do not realize an economic benefit from noncompliance, and deter future violations. The Civil Enforcement program develops, litigates, and settles administrative and civil judicial cases against serious violators of environmental laws. The Criminal Enforcement program enforces the nation's environmental laws through targeted investigations of criminal conduct, committed by individual and corporate defendants, that threatens public health and the environment. Bringing criminal cases sends a strong deterrence message to potential violators, enhances aggregate compliance with laws and regulations and protects our communities. To maximize compliance, the Agency will refocus efforts towards areas with significant noncompliance issues and where enforcement can address the most substantial impacts to human health and the environment.

The Budget identifies environmental justice priority areas that aim to expand EPA's work to ensure environmental justice in underserved communities and cumulative impacts of environmental pollution. It includes proposed authorization language to carry out new environmental justice grants aimed at reducing the disproportionate health impacts of environmental pollution and to establish an Environmental Justice Training Program charged with increasing the capacity of residents of underserved communities to identify and address disproportionately adverse human health or environmental effects.

EPA's internal operations programs provide centralized management services and leadership to ensure that EPA is fulfilling its mission. The offices and the functions they perform within the Environmental Programs and Management appropriation are: the Office of the Administrator (civil rights/Title VII compliance; congressional, intergovernmental and external relations; Science Advisory Board; children's health; Small Business Ombudsman; Small Minority Business Assistance; Environmental Justice; NEPA Implementation; and regulatory and economic management and analysis work); the Office of the Chief Financial Officer (strategic planning, annual planning, and budgeting, financial services, financial management, analysis, and accountability); the Office of General Counsel (FOIA management, civil rights/Title VI compliance, alternate dispute resolution, and legal advice); and the Office of Mission Support (facilities, infrastructure and operations; acquisition management; human resources management services; grants and interagency agreements; suspension and debarment; administrative law exchange network; information security; and information technology/data management). Since these centralized services provide support across EPA, many of these programs are funded across EPA's appropriations.

This appropriation supports core Environmental Protection Agency (EPA) programs through grants to States, Tribes, and U.S. districts and Territories. Funding is provided to assist State and tribal partners in implementing their environmental programs to protect human health and the environment. EPA is using common elements for State and tribal grant agreements, including Performance Partnership Grants.

The EPA will provide financial and technical assistance to assist States and Tribes in the development and management of their clean air plans and support solutions that address their local air quality management needs. EPA also will provide funds to States and Tribes using section 105 authority of the Clean Air Act to operate and maintain air monitoring networks to obtain data on emissions of criteria pollutants and air toxics. EPA has funded State and local fine particulate monitoring using the requirements of section 103 of the Clean Air Act, as authorized in annual appropriation bills. EPA also is committed to transitioning funding for fine particulate monitoring into the funding authorized by section 105 of the Clean Air Act. Section 103 provides full funding for pilot programs, demonstrations, research, and other one-time activities, whereas section 105 requires States and local agencies to provide matching funds of at least 40 percent of the amount required for the entire continuing State or local clean air program. Using funds provided by EPA under Clean Air Act sections 103 and 105, States and Tribes will prepare State Implementation Plans and Tribal Implementation Plans to achieve the National Ambient Air Quality Standards, implement monitoring requirements, and support the National Air Toxics Trends Stations monitoring network. Additionally, States may utilize funding to support States' collection, review, and use of greenhouse gas (GHG) emissions data and permitting of large sources of GHGs. EPA also will implement the Diesel Emissions Reduction Act Grant Program by providing funding through grants and rebates to continue to reduce diesel emissions in priority areas and areas of highly concentrated diesel pollution.

EPA also will support its partnerships with States, Tribes, and U.S. Territories through water grants and Performance Partnership Grants to carry out core statutory requirements of the Clean Water Act and the Safe Drinking Water Act. Funding supports work to reduce human exposure to contaminants in drinking water, fish and shellfish, and recreational waters and to protect and restore watersheds and aquatic ecosystems. Funding is provided through the Drinking Water State Revolving Fund (SRF) for States and Tribes to make low interest loans to public water systems to upgrade drinking water infrastructure to help them provide safe drinking water. In addition, Clean Water SRF funding provides low interest loans to communities and includes a set-aside for Tribes and U.S. Territories to construct wastewater treatment infrastructure, in addition to other projects that enhance water quality. In sum, the Federal Government has invested over \$72 billion in grants to help capitalize the SRFs. With the required State match, additional State contributions, and funds from program leveraging, funds made available for loans total over \$200 billion since their inception. EPA will continue to work with its partners to enhance the capacity of communities, States, and private investors to plan and finance drinking water and wastewater infrastructure improvements.

Direct grants also are provided to help address the significant water and wastewater infrastructure needs of Alaska Native Villages. EPA has implemented a management plan that optimizes the pace of the program. EPA will continue to strengthen State core water quality protection and water enforcement programs.

The Budget proposes funds for the America's Water Infrastructure Act and Water Infrastructure Improvements for the Nation Act grant programs that will assist in lead testing in schools, reducing lead in drinking water, increasing resiliency at drinking water systems, sewer overflow control, and water infrastructure workforce investment. These resources would complement State and local drinking water and wastewater infrastructure investments as well as funding provided through other Federal channels.

The Budget proposes funds for several new grants authorized by the Drinking Water Infrastructure Act of 2021 (DWWIA). DWWIA takes important steps towards providing everyone in this country with access to clean, safe, and affordable water. It authorizes increased funding for new and existing drinking water, wastewater, and stormwater programs that will help to provide critical resources to communities across the country. While much more needs to be done, including acting upon President Biden's ambitious proposals for addressing our water infrastructure problems, DWWIA makes important contributions to the tremendous task of fixing our failing infrastructure.

Consistent with the Biden-Harris Lead Pipe and Paint Action Plan, the Budget includes a lead pipe inventory of existing funding that tracks Administration-wide investments in lead pipe replacement. This crosscut can be found in the Supplemental Materials of the Analytical Perspectives published by the Office of Management and Budget.

EPA's Brownfields program supports land revitalization by providing grants to States, Tribes, and local communities to assess and clean up real property which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. EPA Brownfields assessment and clean-up projects assist local communities in paving the way for the productive reuse of contaminated properties and abandoned sites.

Hazardous and non-hazardous wastes on the land can migrate to the air, groundwater, and surface water, contaminating drinking water supplies, causing acute illnesses or chronic diseases, and threatening healthy ecosystems in urban, rural, and suburban areas. Under the Resource Conservation and Recovery Act of 1976, as amended, EPA provides grants to States to strengthen their ability to implement hazardous waste programs. When appropriate, EPA also may provide financial and technical assistance to eligible tribal governments and inter-tribal consortia to conduct hazardous waste work in Indian Country. The Budget includes resources for carrying out section 302(a) of the Save our Seas 2.0 Act.

In addition, EPA provides grants to assist States, Tribes, and other partners with worker safety activities, protection of endangered species and water sources, and promotion of environmental stewardship. To protect, sustain, or restore the health of people, communities and ecosystems, EPA focuses on the geographic areas with human and ecological communities at most risk. EPA is working to protect, sustain, and restore the health of natural habitats and ecosystems by

identifying and evaluating problem areas, developing tools, and improving community capacity to address problems.

Under Federal environmental statutes, EPA is responsible for protecting human health and the environment in Indian Country. EPA works with over 570 federally recognized Tribes located across the United States to improve environmental and human health outcomes. Indian Country totals more than 70 million acres, with reservations ranging from less than 10 acres to more than 14 million acres. EPA will provide funding to build and enhance the capacity of Tribes to address environmental and public health challenges in Indian Country, including lack of access to safe drinking water, sanitation, adequate waste facilities, and other environmental safeguards taken for granted elsewhere.

EPA will provide funding to States, U.S. Territories, Tribes, and inter-tribal consortia to help them develop their information management and technology capabilities. The purpose of this support is two-fold: to assist the Agency in providing ready access to real-time environmental information; and to allow States and Tribes to better integrate and share their environmental information.

To promote compliance with laws intended to protect human health and the environment, EPA will continue to award State and tribal grants to assist in the implementation of compliance and enforcement provisions of environmental laws. EPA provides funding to States and Tribes for compliance assurance activities including inspections and enforcement case support activities. EPA programs will provide Pesticide Program State and Tribal Assistance Grants that support pesticide product and user compliance with provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) through cooperative agreements with States and Tribes. The cooperative agreements support State and tribal compliance and enforcement activities under FIFRA.

Toxic Substance Compliance Grants are provided to States and Tribes to prevent or eliminate unreasonable risks to human health or the environment and to ensure compliance with toxic substance regulations. The grants support inspection programs associated with the Asbestos Hazard Emergency Response Act (AHERA), lead-based paint (402(a), 406(b), and the Renovation, Repair and Painting rule [RRP]), and polychlorinated biphenyls (PCBs). The compliance monitoring activities conducted by the States will be a cooperative endeavor addressing the priorities of the Federal Toxic Substances Control Act program and State toxics program issues.

EPA also will be implementing expansion of wildfire smoke monitoring support, including improving instrumentation, technical assistance, and outreach, with a focus on traditionally underserved or under-monitored communities.

This appropriation supports all activities necessary for the implementation of the Water Infrastructure Finance and Innovation program established by the Water Resources Reform and Development Act of 2014, Title V, Subtitle C. The program will provide low-interest Federal loans or loan guarantees to eligible entities for a wide range of nationally and regionally significant water and wastewater projects. Eligible assistance recipients include corporations, partnerships, government entities, and State Revolving Fund (SRF) programs, among others. Eligible projects include, among others: Clean and Drinking Water State Revolving Fund eligible projects; projects for enhanced energy efficiency at drinking water and wastewater facilities; brackish or seawater desalination, aquifer recharge, water recycling; acquisition of property if it is integral to the project or will mitigate the environmental impact of a project; bundled SRF projects under one application; and a combination of projects secured by a common security pledge. Of the total \$80.4 million request to implement the Water Infrastructure Finance and Innovation Act (WIFIA) program, \$8.5 million is for the Environmental Protection Agency's (EPA) management and operation of the program, including contract support and associated payroll. The WIFIA program will be administered by EPA's Office of Water.

TSCA Service Fees are authorized by section 26 of the Toxic Substances Control Act, as amended by Public Law 114-182, the Frank R. Lautenberg Chemical Safety for the 21st Century Act. Fees deposited in this account are paid by chemical manufacturers (including importers) and, in limited circumstances, processors who are required to: submit test data (TSCA section 4); submit notification of or information related to intent to manufacture a new chemical or significant new use of a chemical (TSCA section 5); manufacture a chemical substance that is subject to a risk evaluation (TSCA section 6); or request that the Environmental Protection Agency (EPA) conduct a risk evaluation on an existing chemical (TSCA section 6), subject to the agency's approval of the request. TSCA Service Fees are estimated to offset 25 percent of the costs to administer sections 4, 5, and 6 of the law as well as collecting, processing, reviewing, and protecting information about chemical substances from disclosure as appropriate under TSCA section 14. The statute requires that fees for manufacturer-requested risk evaluations offset 50 or 100 percent of the costs of those evaluations. EPA finalized a rule for the collection of TSCA fees on September 27, 2018. The final rule became effective in October 2018. A new TSCA fees rule was proposed in FY 2022.

In accordance with section 3024 of the Solid Waste Disposal Act (42 U.S.C. 6939g(c)), the Administrator of the Environmental Protection Agency is authorized to collect and obligate e-Manifest user fees. In 2024, EPA will continue to operate the e-Manifest system established by the Hazardous Waste Electronic Manifest Establishment Act (Public Law 112-195). Based upon authority to collect and spend e-Manifest fees provided by the Congress in annual appropriations bills, the Agency anticipates collecting and depositing approximately \$27 million in e-Manifest user fees into the Hazardous Waste Electronic Manifest System Fund. Fees deposited in this account will fully support the e-Manifest program, including operation of the system, necessary program expenses, and future development costs.
