
INVESTING IN AMERICA

President Biden's Bipartisan Infrastructure Law is Delivering in Nevada

As of May 2023

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of Nevada. To date, \$1.9 billion in Bipartisan Infrastructure Law funding has been announced and is headed to Nevada with over 145 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, approximately \$1.5 billion has been announced for transportation – to invest in roads, bridges, public transit, ports and airports – and roughly \$201 million has been announced for clean water. And, as of today, more than 202,000 households across the state are receiving affordable high-speed internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across Nevada – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for Nevadans and position the state for success.

Roads and Bridges: In Nevada, there are 28 bridges and over 1,090 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Nevada is expected to receive approximately \$2.7 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, \$1.1 billion has been announced in Nevada for roads, bridges, roadway safety, and major projects. This includes:
 - \$973.9 million in highway formula funding and \$90 million in dedicated formula funding for bridges in 2022 and 2023.
 - \$48.9 million through the RAISE program and \$88.9 million through the INFRA program in 2022 and 2023.

Announced Bipartisan Infrastructure Law funding is as of April 20, 2023

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 22% of Nevadans do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. Nevada will receive a minimum allocation of at least \$100 million to help ensure high-speed internet coverage across the state. Additionally, experts estimate that as many as 448,000 households in Nevada are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** To date, Nevada has received \$5 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. In addition, about 202,000 households in Nevada are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, \$163 million has been announced to Nevada to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$162 million available in fiscal years 2022 and 2023 to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$61.5 million is dedicated to lead pipe and service line replacement, with another \$42.7 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022 and 2023.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, Nevada would expect to receive approximately \$468 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand healthy, sustainable transportation options in Nevada, where non-white households are 2 times more likely to commute via public transportation and 7% transit vehicles in the state are currently past useful life.

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

- **Announced funding to date:** To date, Nevada has been allocated \$89.8 million to improve public transportation options across the state in fiscal year 2022 and 2023.

Clean Buses: The Bipartisan Infrastructure invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. This year alone, funding from the Bipartisan Infrastructure Law will help double the number of clean public transit buses on America's roads.

- **Announced funding to date:** To date, schools in Nevada have been awarded \$9.9 million through the Environmental Protection Agency's Clean School Bus Program. In addition, communities in Nevada were awarded \$6.7 million for clean transit buses and improved bus service through DOT's Low- and No- Emission Bus and Bus and Bus Facilities Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, Nevada should expect to receive roughly \$38 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** Nevada has been allocated \$13.7 million in 2022 and 2023 to build out a network of EV chargers across the state.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$155.8 million has been allocated to Nevada for clean energy, energy efficiency, and power in 2022 and 2023. This includes:
 - \$24.8 million for weatherization;

- \$4.7 million through the State Energy Program;
- \$5.3 million through the Energy Efficiency and Conservation Block Grant Program;
- \$13.1 million to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months; and
- \$107.7 million to help strengthen the battery supply chain.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the U.S. become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** To date, Nevada has received approximately \$149.3 million in 2022 and 2023 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports—ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, Nevada has received roughly \$150,000 in 2022 and 2023 for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, Nevada has experienced 13 extreme weather events, costing the state up to \$500 million in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$56.1 million has been allocated to Nevada for infrastructure resilience in 2022 and 2023 including \$130,000 through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These

sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** To date, approximately \$500,000 has been allocated to cleaning up brownfield sites.

Nevada Project Spotlights

Battery Materials Processing Project Spotlight

Large-Scale Demonstration of Domestic Manufacturing of Low-Cost and Low Environmental Impact Battery-Grade Lithium Hydroxide from Unconventional Domestic Sedimentary Resources

The Department of Energy awarded \$57.7 million to the American Battery Technology Company. American Battery Technology Company and partners will build, and operate a commercial-scale facility to demonstrate its novel process for manufacturing battery cathode grade lithium hydroxide from unconventional Nevada-based lithium-bearing sedimentary resources. Through this demonstration, the domestic U.S. lithium resource base can be expanded and create a more resilient U.S. battery manufacturing supply chain.

See [here](#) for the full list of Battery Materials Processing grant recipients.

INFRA Grant Program Project Spotlight

US-395 & Virginia Street North Valleys

The Department of Transportation awarded \$88.9 million to Washoe County to add two lanes along approximately three miles of US-395 with improved traffic control and other upgrades. The project will also create a complete street along a separate 2.5-mile stretch of North Virginia Street with added sidewalks and buffered bike lanes and/or shared-use path, pedestrian crossings with rectangular rapid flashing beacons, and improved transit stops. The project reconstructs deteriorating pavement in an area with high truck volumes accessing nearby industrial areas and distribution facilities, making

the area safer, efficient, and more attractive for developments. The improvements will alleviate congestion and improve safety.

See [here](#) for the full list of INFRA Grant recipients.

Airport Project Spotlight

Harry Reid International Airport

The Department of Transportation awarded \$31 million to Harry Reid International Airport as part of the Airport Terminal Program. The grant funds the upgrade of baggage handling systems in two terminals to enhance capacity, security, reliability and energy efficiency.

See [here](#) for a map and list of the Airport Terminal awards.

Community Wildfire Prevention Project Spotlight

Implementation of CWPP Priority Projects to Reduce Catastrophic Impacts of Unmitigated Wildfires

The Department of Agriculture's Forest Service has awarded over \$2.3 million to the Somerset Owners Association to mitigate the risks of wildfire by leveraging resources, increasing community awareness, and investing in fire fuel mitigation projects that will result in Hazardous Fuels reduction of approx. 900+ acres.

See [here](#) for more information on the Community Wildfire Defense Grants.

Superfund Cleanup Project Spotlight

Carson River Mercury Site

The Environmental Protection Agency has selected the Carson River Mercury Site for further cleanup efforts using BIL funding. The site's contamination comes from mercury used to process gold and silver over a century ago. An estimated 14 million pounds of mercury was released in the surrounding area. As part of the cleanup, the EPA will begin working with impacted communities to plan for additional sampling activities.

See [here](#) for more information on EPA Superfund cleanup work.

Reconnecting Communities Project Spotlight

Bonanza Road and F Street Complete Street Improvements

Announced Bipartisan Infrastructure Law funding is as of April 20, 2023

The Department of Transportation awarded a \$2 million grant to the City of Las Vegas to develop plans for improving the I-15/Bonanza Road and F Street in Las Vegas/ Historic Westside neighborhood. Improvements will include installation of wider sidewalks, shade trees, lighting and curb extensions to increase pedestrian safety.

See [here](#) for a full list of announced Reconnecting Communities Awards.

Resilience Project Spotlight

Numana Dam Fish Passage Project

The Department of the Interior awarded \$8.2 million for restoring fish and wildlife passage by removing in-stream barriers and providing technical assistance under the National Fish Passage Program. The goal is to construct a fish screen at Derby Dam that, for the first time in 85 years, will allow operation of a fishway to connect the lower Truckee River at Numana Dam to 65 miles of LCT spawning habitat.

Low- and No Emission Bus Grant Spotlight

Regional Transportation Commission of Southern Nevada

The Department of Transportation awarded \$6.7 million to the Regional Transportation Commission of Southern Nevada to buy hydrogen fuel cell electric buses.

See [here](#) for more information on Low or No Emission Bus programs that have been announced.
