
INVESTING IN AMERICA

President Biden's Bipartisan Infrastructure Law is Delivering in Washington

As of May 2023

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of Washington. To date, \$4.3 billion in Bipartisan Infrastructure Law funding has been announced and is headed to Washington with over 342 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, approximately \$3.1 billion has been announced for transportation – to invest in roads, bridges, public transit, ports and airports – and roughly \$359 million has been announced for clean water. And, as of today, more than 272,000 households across the state are receiving affordable high-speed internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across Washington – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for Washingtonians and position the state for success.

Roads and Bridges: In Washington, there are 416 bridges and over 5,469 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Washington is expected to receive approximately \$5.3 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, \$2.1 billion has been announced in Washington for roads, bridges, roadway safety, and major projects. This includes:
 - \$1.8 billion in highway formula funding and \$261.4 million in dedicated formula funding for bridges in 2022 and 2023.

Announced Bipartisan Infrastructure Law funding is as of April 20, 2023

- \$97.7 million through the RAISE program and \$25 million through the INFRA program in 2022 and 2023.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 15% of Washingtonians do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. Washington will receive a minimum allocation of at least \$100 million to help ensure high-speed internet coverage across the state. Additionally, experts estimate that as many as 1,046,000 households in Washington are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** To date, Washington has received \$5 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. In addition, about 272,000 households in Washington are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, \$331 million has been announced to Washington to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$322 million available in fiscal years 2022 and 2023 to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$92 million is dedicated to lead pipe and service line replacement, with another \$88.4 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022 and 2023.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, Washington would expect to receive approximately \$1.9 billion over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand healthy, sustainable transportation options in Washington, where non-white households are 1.7

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

times more likely to commute via public transportation and 16% transit vehicles in the state are currently past useful life.

- **Announced funding to date:** To date, Washington has been allocated \$368.2 million to improve public transportation options across the state in fiscal year 2022 and 2023.

Clean Buses: The Bipartisan Infrastructure invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. This year alone, funding from the Bipartisan Infrastructure Law will help double the number of clean public transit buses on America's roads.

- **Announced funding to date:** To date, schools in Washington have been awarded \$2.8 million through the Environmental Protection Agency's Clean School Bus Program. In addition, communities in Washington were awarded \$22 million for clean transit buses and improved bus service through DOT's Low- and No- Emission Bus and Bus and Bus Facilities Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, Washington should expect to receive roughly \$71 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** Washington has been allocated \$25.6 million in 2022 and 2023 to build out a network of EV chargers across the state.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$296.8 million has been allocated to Washington for clean energy, energy efficiency, and power in 2022 and 2023. This includes:

- \$47.1 million for weatherization;
- \$8.4 million through the State Energy Program;
- \$9.9 million through the Energy Efficiency and Conservation Block Grant Program;
- \$30 million to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months; and
- \$200 million to help strengthen the battery supply chain.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the U.S. become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** To date, Washington has received approximately \$243.9 million in 2022 and 2023 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports—ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, Washington has received roughly \$166.5 million in 2022 and 2023 for ports and waterways. Washington was awarded \$71.5 million for 5 port projects through the Port Infrastructure Development Program.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, Washington has experienced 15 extreme weather events, costing the state up to \$4 billion in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$448.2 million has been allocated to Washington for infrastructure resilience in 2022 and 2023 including \$246.4 million through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** To date, approximately \$7.4 million has been allocated to cleaning up brownfield sites.

Washington Project Spotlights

Community Wildfire Defense Spotlight

Kittitas County Conservation District, Kittitas County Resilient Landscapes

Overview: The United States Department of Agriculture awarded \$10 million to Kittitas County to a fuels mitigation project that will reduce wildfire risk while creating more resilient communities and forests in the project area. 92% of requested funds are for on-the-ground fuels work.

See [here](#) for more information about the Community Wildfire Defense Grant for Kittitas County.

Airport Funding Project Spotlight

Seattle-Tacoma International Airport Project

Overview: The Seattle-Tacoma International Airport has been awarded \$16 million from the Federal Aviation Administration. The funding will achieve a safer process for all coming through the security check points. This project will relocate security check point 1 from the ticketing level to the lower baggage claim level, which will provide additional screening capacity and improved wait times. The project will include energy efficient upgrades and will meet or exceed all applicable ADA standards.

See [here](#) for more information about Airport Funding for Seattle-Tacoma Airport.

Reconnecting Communities Project Spotlight

Reconnecting South Park Project

Overview: The Reconnecting South Park Project has been awarded \$1.6 million by the Reconnecting Communities Pilot Program. The funding will be used to remove or restructure SR-99 where it cuts through the South Park neighborhood of Seattle, interrupting local roads and connectivity. This project will accommodate local travel and improve accessibility.

See [here](#) for more information about Reconnecting Communities in Seattle Washington.

Airport Funding Project Spotlight

Spokane International Airport Project

Overview: The Spokane International Airport has been awarded \$15 million from the Federal Aviation Administration. This funding will expand and renovate the airport with additional gates which will assist with the demand. This project will provide for the expansion portion of the terminal renovation and expansion program. The phase will finalize construction of three additional gates by providing finishes and elevators. When complete it will provide a LEED certified facility with numerous energy efficient upgrades, an upgraded baggage system, and will meet all applicable ADA requirements.

See [here](#) for more information about Airport Funding for Spokane Airport.

Battery Materials Processing Grant Spotlight

Commercial Manufacturing of a Stable Silicon Anode Material toward Fostering a Strong U.S. Battery Supply Chain & Auto Scale Silicon Anode Plant 8

Overview: This inclusion of an Anode Plant and Commercial Manufacturing of Stable Silicon will move forward to foster a strong U.S. Battery Supply Chain. Not only will this grant help with creation of jobs but it will assist with making these batteries accessible. These batteries will reduce the emissions used since the integration of electric vehicle will emerge. This \$100 million project will make electric vehicle battery packs more energy-efficient and, eventually, cheaper.

See [here](#) for more information about the Battery Materials Processing Grant Awards.

Airport Funding Project Spotlight

Pullman-Moscow Regional Project

Overview: The Pullman-Moscow Regional Airport has been awarded \$6.35 million from the Federal Aviation Administration. The airport is currently constructing a new terminal. This project will provide for a third gate and boarding bridge in the new terminal which will provide additional boarding capacity and decreased wait times.

See [here](#) for more information about Reconnecting Communities in Seattle Washington.

INFRA Grant Program Project

Spotlight Salmon Bay Bridge Rehabilitation Project

Overview: The \$25 million DOT grant will rehabilitate the movable span of the Salmon Bay Bridge to extend the life of the span by 50 years, while also addressing design flaws that have caused stress on the existing infrastructure. The project will maintain a critical multimodal north-south connection, avoiding hundreds of miles of detour on this vital freight rail corridor that serves passenger and commuter rail lines. The project has 6 strong public-private partnership and will also utilize an innovative approach to bridge replacement, which minimizes disruptions during construction and allows spans to be replaced in 24 hours.

See [here](#) for the full list of 2022-23 INFRA Grant Recipients.

RAISE Grant Program Project Spotlight

Lummi Island Ferry Replacement and System Modernization Project

Overview: This \$25 million grant administered by the Department of Transportation (DOT) will replace a functionally obsolete 60-year-old ferry with an electric-battery hybrid ferry that provides service to and from the rural community of Lummi Island, which can only be accessed by boat. The project will improve safety standards to reduce accidents and vehicle damages, and will also adjust the terminal structures to accommodate the new ferry and install electrical charging infrastructure. Reduced emissions as well as noise pollution will improve the habitat for marine mammals.

See [here](#) for the full list of 2022 RAISE Grant Recipients.
