
INVESTING IN AMERICA

President Biden's Bipartisan Infrastructure Law is Delivering in Indiana

As of July 2023

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of Indiana. To date, \$4.6 billion in Bipartisan Infrastructure Law funding has been announced and is headed to Indiana with over 210 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, approximately \$3.1 billion has been announced for transportation – to invest in roads, bridges, public transit, ports and airports – and roughly \$324 million has been announced for clean water. As of today, more than 366,000 households across the state are receiving affordable high-speed internet due to the Bipartisan Infrastructure Law. To date, Indiana has received \$868.1 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across Indiana – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for Hoosiers and position the state for success.

Roads and Bridges: In Indiana, there are 1,040 bridges and over 4,118 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Indiana is expected to receive approximately \$6.9 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, \$2.8 billion has been announced in Indiana for roads, bridges, roadway safety, and major projects. This includes:
 - \$2.6 billion in highway formula funding and \$149.1 million in dedicated formula funding for bridges in 2022 and 2023.

Announced Bipartisan Infrastructure Law funding is as of July 7, 2023

- \$81.1 million through the RAISE program in 2022 and 2023.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 25% of Hoosiers do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. Additionally, experts estimate that as many as 1,000,000 households in Indiana are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** To date, Indiana has received \$868.1 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. In addition, about 366,000 households in Indiana are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, \$325 million has been announced to Indiana to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$325 million available in fiscal years 2022 and 2023 to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$108.5 million is dedicated to lead pipe and service line replacement, with another \$63.6 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022 and 2023.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, Indiana would expect to receive approximately \$673 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand healthy, sustainable transportation options in Indiana, where non-white households are 4.5 times

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

more likely to commute via public transportation and 39% of transit vehicles in the state are currently past useful life.

- **Announced funding to date:** To date, Indiana has been allocated \$128.8 million to improve public transportation options across the state in fiscal year 2022 and 2023.

Clean Buses: The Bipartisan Infrastructure Law invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. This year alone, funding from the Bipartisan Infrastructure Law will help double the number of clean public transit buses on America's roads.

- **Announced funding to date:** To date, schools in Indiana have been awarded \$5.3 million through the Environmental Protection Agency's Clean School Bus Program. In addition, communities in Indiana were awarded \$26.1 million for clean transit buses and improved bus service through DOT's Low- and No-Emission Bus and Bus and Bus Facilities Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, Indiana should expect to receive roughly \$100 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** Indiana has been allocated \$36 million in 2022 and 2023 to build out a network of EV chargers across the state.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$121.7 million has been allocated to Indiana for clean energy, energy efficiency, and power in 2022 and 2023. This includes:

- \$90.5 million for weatherization;
- \$9.5 million through the State Energy Program;
- \$7.4 million through the Energy Efficiency and Conservation Block Grant Program;
- \$9.2 million to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the U.S. become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** To date, Indiana has received approximately \$97.7 million in 2022 and 2023 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports— ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, Indiana has received roughly \$8 million in 2022 and 2023 for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, Indiana has experienced 34 extreme weather events, costing the state up to \$5 billion in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$80.1 million has been allocated to Indiana for infrastructure resilience in 2022 and 2023, including \$4 million through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These

sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** To date, approximately \$53.3 million has been allocated to Indiana in 2022 and 2023 for capping orphaned oil and gas wells and reclaiming abandoned mine lands and \$26.4 million has been allocated to cleaning up brownfield sites.

Indiana Project Spotlights

Bus Facilities and Low- and No-Emission (Low-No) Vehicle Spotlight

Illinois Department of Transportation

The Department of Transportation awarded approximately \$19 million to The Indianapolis Public Transportation Corporation (IndyGo) to buy diesel-electric hybrid buses that replace older diesel buses. These new clean, quiet, and modern vehicles will help eliminate emissions and improve air quality and service reliability.

See [here](#) for a full list of FY23 Bus and Low- and No-Emission Grant projects

Renew America's Schools Grant Spotlight

Matchbook Learning Schools

The Department of Energy awarded approximately \$5 million to Matchbook Learning Schools to rehabilitate existing school buildings and address deferred maintenance of mechanical, electrical, plumbing and lighting systems. Ninety percent of Matchbook students are eligible for free and reduced-price lunch, and 20% of students are homeless or from foster homes. This first-of-its-kind investment, will help school communities make energy upgrades that lower utility costs, improve indoor air quality, and foster healthier learning environments, while prioritizing high-need school communities.

See [here](#) to learn more about the Selectees for the Renew America's Schools grant

Brownfields Cleanup Project Spotlight

City of Huntington

Environmental Protection Agency awarded \$991,000 to the City of Huntington for the Brownfields Cleanup Grant. Grant funds will be used to clean up the former H.K. Porter site. From 1924 until 2000, the site was operated by Asbestos Manufacturing, Inc., which manufactured asbestos-containing automotive parts such as brake pads and clutch facings. The site is contaminated with inorganic contaminants. The funding will accelerate clean-up efforts of contaminated sites to spur economic redevelopment and build safer, more resilient communities.

See [here](#) for a list Multipurpose, Assessment, Revolving Loan Fund, and Cleanup (MARC) Grant projects.

Environmental Project Spotlight

Great Lakes Restoration Initiative

Through the Bipartisan Infrastructure Law, the Environmental Protection Agency announced \$1 billion to clean-up and restore the Great Lakes' most environmentally degraded sites across Indiana, Illinois, Michigan, Minnesota, Ohio, and Wisconsin. These projects will secure clean water and a better environment for millions of Americans in the Great Lakes region. In Indiana, this investment will prioritize the clean-up and restoration of the Grand Calumet River.

See [here](#) for more information on announced funding from the Environmental Protection Agency.

Buses and Bus Facilities Project Spotlight

Indianapolis Public Transportation Corporation Bus Maintenance Facility

The Department of Transportation's Federal Transit Authority awarded \$33 million to the Indianapolis Public Transportation Corporation to build a multi-purpose operations and maintenance facility that will also serve as the agency's headquarters. Once completed, the project will include charging facilities and allow IndyGo to expand its bus fleet to fully implement its network redesign and meet the current and future needs of riders.

See [here](#) for a full list of the 2022 Buses and Bus Facilities Grant recipients.

PHMSA Project Spotlight

Citizens Gas and Coke Utility Natural Gas Distribution Infrastructure Safety and Modernization Grants

Announced Bipartisan Infrastructure Law funding is as of July 7, 2023

The Department of Transportation awarded approximately \$7.5 million to the Citizens Gas and Coke Utility to replace 4.7 miles of cast iron natural gas distribution piping that was originally installed over 70 years ago. The project will help improve public safety, protect public health, and reduce methane emissions from natural gas distribution pipes in underserved communities.

See [here](#) for more information on Pipeline and Hazardous Materials Safety Administration (PHMSA) projects.

Superfund Cleanup Project Spotlight

Keystone Corridor Ground Water

The Environmental Protection Agency has selected the Keystone Corridor Ground Water Contamination site to receive federal funding for a site cleanup. The site consists of the Fall Creek well field as well as potential sources of the groundwater contamination. The groundwater has been affected by an approximately 4,500 foot long by 1,500-foot-wide plume contaminated with chlorinated solvents located near the intersection of East Fall Creek Parkway North Drive and Keystone Avenue. EPA is currently planning the remedial action.

See [here](#) for more information on EPA Superfund cleanup work.

RAISE Grant Program Project Spotlight

Ridge Road Complete Streets Project

The Department of Transportation awarded the city of Munster \$17.1 million to reconfigure 1.3 miles of Ridge Road from five lanes to three, making space for a 10-foot-wide multi-use path, more than 250 trees, and amenities including landscaping, wayfinding signage, and pedestrian seating. From 2016 to 2020, there were over 600 crashes on Ridge Road, among the highest of any Munster corridor. Complete street improvements will provide safer non-motorized access to the planned train station for commuters to Chicago. The project emphasizes both equity and union participation in construction and labor workforces

See [here](#) for more information on awarded grants through the RAISE program.

Reconnecting Communities Project Spotlight

Indianapolis I-65/I-70 Southeast Quadrant Inner Loop Planning Study

The Department of Transportation awarded Rethink Coalition Inc. with \$2 million through the Reconnecting Communities Pilot Program to study the opportunities and constraints of capping the recessed segment of the Interstate 65/70 Indianapolis Inner Loop. The project aims to create a southwest front door to Indianapolis with improved

intestate functionality, economic development and private investment. The intent of the proposal is to address the harmful effects of the construction of the Indianapolis Inner loop in the 1970's.

See [here](#) for a full list of announced Reconnecting Communities Awards.
