OMB BULLETIN NO. 23-01

TO THE HEADS OF EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

SUBJECT: Revised Delineations of Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and Guidance on Uses of the Delineations of These Areas

1. **Purpose:** This Bulletin and its Appendix (the Bulletin) establish revised delineations for the Nation's Metropolitan Statistical Areas, Micropolitan Statistical Areas, Combined Statistical Areas, and Metropolitan Division, collectively referred to as Core Based Statistical Areas.

This Bulletin updates and supersedes OMB Bulletin No. 20-01, issued on March 6, 2020. The delineations of the statistical areas shown in the Appendix's six lists take effect immediately. The Bulletin also provides guidance on the use of the delineations. This Bulletin does not affect any changes to the OMB standards.

2. **Background:** Pursuant to 44 U.S.C. § 3504(e)(3) & (10), 31 U.S.C. § 1104(d), and Executive Order No. 10253 of June 11, 1951, OMB delineates Core Based Statistical Areas for use in Federal statistical activities. These delineations reflect the *2020 Standards for Delineating Core Based Statistical Areas* ([“the 2020 Standards”](#)) published by the Office of Management and Budget (OMB) on July 16, 2021 (86 FR 37770), and the application of those standards to Census Bureau population and journey-to-work data (e.g., 2020 Decennial Census, American Community Survey, and Census Population Estimates Program data).
3. **Update of Statistical Areas:** The Appendix to this Bulletin provides the following lists of statistical areas that are recognized under the standards:

List 1 is an alphabetical list by title of all 935 Metropolitan Statistical Areas and Micropolitan Statistical Areas in the United States and Puerto Rico.

List 2 provides titles, codes, delineations, principal cities, and Metropolitan Divisions for all 393 Metropolitan Statistical Areas (387 in the United States and 6 in Puerto Rico).

List 3 provides titles, codes, and delineations for the 37 Metropolitan Divisions within their respective Metropolitan Statistical Areas.

List 4 presents the titles, codes, delineations, and principal cities for all 542 Micropolitan Statistical Areas (538 in the United States and 4 in Puerto Rico).

List 5 identifies all 184 Combined Statistical Areas in the United States and Puerto Rico and their 582 component Metropolitan Statistical Areas or Micropolitan Statistical Areas.

List 6 identifies in each state and Puerto Rico the Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas, and Combined Statistical Areas.

4. **Uses of Statistical Area Delineations:** All agencies that conduct statistical activities to collect and publish data for Core Based Statistical Areas should use this Bulletin, as the most recent delineations of these areas established by OMB.

OMB establishes and maintains the delineations of Core Based Statistical Areas solely for statistical purposes. This classification is intended to provide nationally consistent delineations for collecting, tabulating, and publishing Federal statistics for a set of geographic areas. The Core Based Statistical Area Standards do not equate to an urban-rural classification; many counties and county-equivalents included in Metropolitan and Micropolitan Statistical Areas, and many other counties, contain both urban and rural territory and populations.

As noted in the *Metropolitan Areas Protection and Standardization Act of 2021*, [Pub. L. No. 117-219 \(the MAPS Act\)](#), core-based statistical area delineations are *not* intended for any public or private sector non-statistical uses such as program administration or service delivery. However, OMB recognizes that these delineations may be used in order to implement other government programs. In periodically reviewing and revising the delineations of these areas, OMB does not take into account or attempt to anticipate any non-statistical uses that may be made of the delineations, nor does OMB modify the delineations to meet the requirements of any non-statistical program. Thus, OMB recommends that in the event that Core Based Statistical Area delineations are used to develop and implement Federal, state, or local non-statistical programs and policies, this should only occur upon full consideration of the effects of using these delineations for such purposes. These areas are not designed to serve as a general-purpose geographic framework for non-statistical activities, and they may or may not be suitable for use in program funding formulas.

OMB also recognizes that some legislation specifies the use of Metropolitan Statistical Areas for program purposes. In cases where there is no statutory requirement and an agency elects to use the Core Based Statistical Area delineations in non-statistical programs, it is that agency's responsibility to ensure that the delineations are appropriate for such use. When an agency is publishing for comment a proposed regulation that would use the delineations for a non-statistical purpose, the agency should seek public comment on the proposed use. Agencies should consult their General Counsel to ensure that any non-statistical uses of the Core Based Statistical Areas are consistent with the requirements in [the MAPS Act](#).

Finally, and in keeping with the discussion above, an agency using the statistical delineations in a non-statistical program may modify the delineations; however, such potential modification would apply only to the purposes of that program. In such cases, any deviations from the Core Based Statistical Areas delineated by OMB should be clearly identified as such, in order to avoid confusion.

5. **Lists of Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas, and Combined Statistical Area Delineations:** This Bulletin provide the six lists of statistical areas that are available electronically from the OMB website at: <https://www.whitehouse.gov/omb/information-for-agencies/bulletins/>; this update, historical delineations, and other information about population statistics are available on the Census Bureau's website at: <https://www.census.gov/programs-surveys/metro-micro.html>.
6. **Inquiries:** Inquiries concerning the Core Based Statistical Area Standards and the statistical uses of their delineations should be directed to Gabriel Amaro at gabriel.h.amaro@omb.eop.gov. Inquiries about uses of the statistical area delineations in program administration or regulation should be directed to the appropriate agency.

1. Brief Overview of the Classification

The Office of Management and Budget (OMB) published the 2020 *Standards for Delineating Core Based Statistical Areas* (CBSAs) (the “2020 Standards”) in a *Federal Register* Notice (86 FR 37770 - 37778) on July 16, 2021. (The standards are available at <https://www.federalregister.gov/documents/2021/07/16/2021-15159/2020-standards-for-delineating-core-based-statistical-areas>.) That Notice also provides information on the public review process that preceded the adoption of the 2020 Standards and an explanation of the key terms used in these standards. The 2020 Standards replaced and superseded the 2010 *Standards for Delineating Metropolitan and Micropolitan Statistical Areas*. OMB’s 2020 Standards provide for the identification of the following statistical areas in the United States and Puerto Rico:

- Metropolitan Statistical Areas (including Metropolitan Divisions, where applicable)
- Micropolitan Statistical Areas
- Combined Statistical Areas

Metropolitan Statistical Areas have at least one urban area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. **Micropolitan Statistical Areas** have at least one urban area of at least 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. Metropolitan and Micropolitan Statistical Areas are delineated in terms of whole counties or county equivalents. If specified criteria are met¹, a Metropolitan Statistical Area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as **Metropolitan Divisions**.

- The classification includes about 94.6 percent of the U.S. population – about 86.2 percent in Metropolitan Statistical Areas and about 8.4 percent in Micropolitan Statistical Areas.
- Of 3,144 counties in the United States, 1,186 are in the 387 Metropolitan Statistical Areas, and 658 counties are in the 538 Micropolitan Statistical Areas (1,300 counties are outside the classification).

If specified criteria are met, adjacent Metropolitan and Micropolitan Statistical Areas, in various combinations, may become the components of a set of complementary areas called **Combined Statistical Areas**. For instance, a Combined Statistical Area may

¹ <https://www.federalregister.gov/documents/2021/07/16/2021-15159/2020-standards-for-delineating-core-based-statistical-areas>

comprise two or more Metropolitan Statistical Areas, a Metropolitan Statistical Area and a Micropolitan Statistical Area, two or more Micropolitan Statistical Areas, or multiple Metropolitan and Micropolitan Statistical Areas that have social and economic ties as measured by commuting, but at lower levels than are found among counties within Metropolitan and Micropolitan Statistical Areas. Combined Statistical Areas can be characterized as representing larger regions that reflect broader social and economic interactions, such as wholesaling, commodity distribution, and weekend recreation activities, and are likely to be of considerable interest to regional authorities and the private sector.

OMB's 2020 Standards provide for the identification of one or more principal cities within each Metropolitan Statistical Area and Micropolitan Statistical Area. **Principal cities** encompass both incorporated places and census designated places (CDPs). In addition to identifying the more significant places in each Metropolitan and Micropolitan Statistical Area in terms of population and employment, principal cities are also used in titling Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, and Combined Statistical Areas. A principal city may be only a part, or piece, of an incorporated or census designated place if that place is not entirely within the Metropolitan Statistical Area or Micropolitan Statistical Area for which the place is principal.

The geographic components of Metropolitan and Micropolitan Statistical Areas and Metropolitan Divisions are **counties and equivalent entities** (e.g., boroughs, a city and borough, and a municipality in Alaska, planning regions in Connecticut, parishes in Louisiana, municipios in Puerto Rico, and independent cities in Maryland, Missouri, Nevada, and Virginia).

This Appendix includes the following six lists that provide information on the statistical areas that are recognized under the 2020 Standards using data from 2020 Decennial Census, the American Community Survey and Census Population Estimates Program for 2020 and 2021:

- List 1 is an alphabetical list by title of 935 Metropolitan Statistical Areas and Micropolitan Statistical Areas in the United States and Puerto Rico.
- List 2 provides titles, codes, delineations, principal cities, and Metropolitan Divisions for 393 Metropolitan Statistical Areas (387 in the United States and 6 in Puerto Rico).
- List 3 provides titles, codes, and delineations for the 37 Metropolitan Divisions within their respective Metropolitan Statistical Areas.
- List 4 presents the titles, codes, delineations, and principal cities for 542 Micropolitan Statistical Areas (538 in the United States and 4 in Puerto Rico).
- List 5 identifies 184 Combined Statistical Areas and their 582 component Metropolitan Statistical Areas or Micropolitan Statistical Areas.

- List 6 identifies in each state and Puerto Rico the Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas, and Combined Statistical Areas.

2. Guidance on Presenting Data for Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, and Combined Statistical Areas

Metropolitan and Micropolitan Statistical Areas represent the basic set of county-based areas delineated under this classification. If specified criteria are met, Metropolitan Divisions are delineated within Metropolitan Statistical Areas that have a single core with a population of at least 2.5 million. Not all Metropolitan Statistical Areas with urban areas of this size will contain Metropolitan Divisions.

The criteria used to determine what counties are included in a Metropolitan Statistical Area are different from the criteria that are used to group counties in Metropolitan Divisions, which represent the subdivisions of (larger) Metropolitan Statistical Areas. As a result, it is generally not appropriate to rank or directly compare Metropolitan Divisions with Metropolitan and Micropolitan Statistical Areas. However, because of the large population concentrations represented by Metropolitan Divisions, it may be desirable for some analyses, for example, to include Metropolitan Divisions in a table in which Metropolitan Statistical Areas are ranked. It would be appropriate to rank and compare Metropolitan Divisions with each other. Even though Metropolitan Divisions represent subdivisions of (larger) Metropolitan Statistical Areas, they often function as distinct areas within Metropolitan Statistical Areas. Researchers analyzing demographic and economic patterns, trends, and processes within large Metropolitan Statistical Areas should also take into consideration data for specific Metropolitan Divisions. Research and analyses that historically made use of data for Primary Metropolitan Statistical Areas should use data for Metropolitan Divisions.

Because Combined Statistical Areas represent groupings of Metropolitan and Micropolitan Statistical Areas (in any combination), they should not be ranked or compared with individual Metropolitan and Micropolitan Statistical Areas.

3. Codes for Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, and Combined Statistical Areas

Codes for Metropolitan and Micropolitan Statistical Areas and Metropolitan Divisions are 5 digits in length. Codes for Metropolitan and Micropolitan Statistical Areas and Metropolitan Divisions fall within the 10000 to 49999 range and are assigned in alphabetical order by area title. Metropolitan Divisions are distinguished by a 5-digit code ending in “4.”

Combined Statistical Area codes are 3 digits in length. Combined Statistical Area codes fall within the 100 to 599 range.
