
INVESTING IN AMERICA

President Biden's Bipartisan Infrastructure Law is Delivering in New Mexico

As of March 2024

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of New Mexico. To date, \$5.2 billion in Bipartisan Infrastructure Law funding has been announced and is headed to New Mexico with over 496 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, approximately \$2.3 billion has been announced for transportation – to invest in roads, bridges, public transit, ports and airports – and roughly \$1 billion has been announced for clean water and water infrastructure. New Mexico received \$1.2 billion to connect everyone in the state to reliable high-speed internet and, as of today, more than 184,000 New Mexico households are already saving on their monthly internet bill due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across New Mexico – including rural communities and historically underserved populations – the law makes critical investments that will improve the lives of New Mexicans and position the state for success.

Roads and Bridges: In New Mexico, there are 199 bridges and over 4,130 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, New Mexico is expected to receive approximately \$2.8 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** \$1.9 billion has been announced in New Mexico for roads, bridges, roadway safety, and major projects. This includes:
 - \$1.6 billion in highway formula funding and \$135 million in dedicated formula funding for bridges to date.

Announced Bipartisan Infrastructure Law funding is as of March 7, 2024

- \$59 million through the RAISE program to date.
- \$45 million through the INFRA program to date.
- \$59.8 million through the Rural Surface Transportation Grant Program to date.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet over 114,997 homes and small businesses in New Mexico do not have access to high-speed internet infrastructure. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to everyone in America. The Biden-Harris Administration worked with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime. Now, the Biden-Harris Administration is calling on Congress to extend this program through 2024. Without action from Congress, millions of Americans will lose their internet connection and the economic opportunities that come with it. See ACP enrollment for every state and territory [here](#).

- **Announced funding to date:** To date, New Mexico has received \$1.2 billion for high-speed internet. New Mexico has received \$675.4 million through the Broadband Equity, Access, and Deployment (BEAD) Program to provide access to high-speed internet to everyone in New Mexico. In addition, about 184,000 households in New Mexico are enrolled in the Affordable Connectivity Program.

Water: The Bipartisan Infrastructure Law represents the largest investment in water infrastructure in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** \$1 billion has been announced to New Mexico to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$204 million available to date to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$57 million is dedicated to lead pipe and service line replacement, with another \$62 million for safe drinking water investments that can also support lead pipe replacement.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, New Mexico would expect to receive approximately \$379 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand healthy,

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

sustainable transportation options in New Mexico and 24% of transit vehicles in the state are currently past useful life.

- **Announced funding to date:** New Mexico has been allocated \$182.8 million to improve public transportation options across the state.

Clean Buses: The Bipartisan Infrastructure Law invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. Announced funding to date will double the number of clean transit buses on America's roads.

- **Announced funding to date:** Schools in New Mexico have been awarded \$4.6 million through the Environmental Protection Agency's Clean School Bus Program. Communities in New Mexico were awarded \$28.6 million for clean transit buses and improved bus service through DOT's Low- and No- Emission Bus and Bus and Bus Facilities Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, New Mexico should expect to receive roughly \$38 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** \$89.8 million has been announced in New Mexico to date to build out a network of EV chargers in the state.

Clean Energy & Power: Power outages cost the U.S. economy about \$150 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** Approximately \$142.1 million has been allocated to New Mexico for clean energy, energy efficiency, and power. This includes:
 - \$22.1 million for weatherization;

- \$4.4 million through the State Energy Program;
- \$4 million through the Energy Efficiency and Conservation Block Grant Program;
- \$54.8 million to prevent outages and make the power grid more resilient.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the U.S. become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** New Mexico has received approximately \$78 million for airports.

Ports and Waterways: Our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports— ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** New Mexico has received roughly \$1.1 million for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, New Mexico has experienced 14 extreme weather events, costing the state up to \$3.2 billion in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** Approximately \$378.2 million has been allocated to New Mexico for infrastructure resilience including \$23.4 million through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans

overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** \$21.2 million has been allocated to cleaning up Superfund and brownfield sites. Approximately \$54.8 million has been allocated to New Mexico for capping orphaned oil and gas wells and reclaiming abandoned mine lands.

New Mexico Project Spotlights

Community Wildfire Defense Grant Spotlight

Colfax Collaborative Wildland Urban Interface Project

The U.S. Department of Agriculture has awarded approximately \$8 million to the Cimarron Watershed Alliance to create defensible space around homes, thin out forests to reduce hazardous fuel loadings, maintain existing fuel breaks, and create new fuel breaks to reduce wildfire risk. The project will treat about 150-175 properties per year and approximately 3,400 acres over the next five years.

See [here](#) for a map and list of Community Wildfire Defense Grants.

Resilience Project Spotlight

Eastern New Mexico Rural Water System Pipeline

The Department of Interior awarded a first installment of \$160 million in funding to support the completion of the Eastern New Mexico Rural Water System pipeline. The project will distribute water from the Ute Reservoir to Clovis, Portales, Cannon Air Force Base, Texico, and Elida.

See [here](#) for the full list of rural water projects announced.

Airport Project Spotlight

Albuquerque International Sunport (ABQ)

The Federal Aviation Administration awarded a total of \$19.8 million to the Albuquerque International Sunport Airport. In 2022, the airport received \$7 million to enhance accessibility and increase efficiency for new mechanical, electric, and lighting

Announced Bipartisan Infrastructure Law funding is as of March 7, 2024

systems. In 2023, the airport was awarded an additional \$7 million to refurbish passenger boarding bridges and ground power units. Both projects support safe, sustainable, and accessible airport terminals while improving the passenger experience. In 2024, the airport was awarded \$5.8 million to fund the environmental review and design of a new in-line baggage handling systems, hold rooms, and terminal interior and exterior space.

See [here](#) for a map and list of Airport Terminal awards.

Bus Facilities and Low- and No-Emission (Low-No) Vehicle Spotlight

City of Albuquerque

The Department of Transportation awarded approximately \$18 million to the City of Albuquerque to buy battery-electric buses and charging equipment, including on-route chargers, to replace aging diesel buses. The project will improve service and reliability, address air quality and noise pollution, and improve access to essential services for disadvantaged communities.

See [here](#) for a full list of FY23 Bus and Low- and No-Emission Grant projects.

INFRA Grant Program Project Spotlight

Border Highway Connector Project

The Department of Transportation awarded \$45 million to Doña Ana County to develop an approximately six-mile, four-lane, directionally-separated highway connecting the Santa Teresa Port of Entry (STPoE) with State Road 273 in Sunland Park. Increasing levels of commercial freight crossings at STPoE are leading to congestion that is negatively impacting local roads. The project will reduce congestion and facilitate the movement of goods by providing a direct route that will reduce the miles traveled and associated travel time, particularly for trucks traveling between the STPoE, Interstate 10 in El Paso, and the nearby Union Pacific Intermodal Facility.

See [here](#) for the full list of INFRA Grant recipients.

Charging and Fueling Infrastructure Spotlight

New Mexico Clean Fuel Build-Out Project along Interstate 10

The Federal Highway Administration has awarded approximately \$64 million to build two EV charging centers for medium- and heavy-duty commercial electric vehicles traveling along Interstate 10. Each center will have nine pull-through stalls and will serve as crucial links along the I-10 Electric Corridor, the nation's first network of high-

powered charging centers for heavy-duty trucks from San Pedro ports in southern California to El Paso, Texas.

See [here](#) for a full list of Charging and Fueling Infrastructure Grant projects.
