

Unleashes American Energy Dominance

The One Big Beautiful Bill delivers on the President's promise to restore American energy dominance— driving down Americans' cost of living.

Unleashes American Energy: Boosts American-made energy that will drive down energy costs and restore energy independence.

Ends Biden's War on American Energy: Reverses disastrous Biden-era policies that sent energy prices skyrocketing, killed U.S. jobs, and handed control to radical climate activists.

Refills the Strategic Petroleum Reserve: After Biden depleted our emergency supply, this bill restores our reserves to strengthen America's energy security. Energy security is national security.

Domestic Production Dominance: Reinstates quarterly onshore oil and gas lease sales.

Stops the Green New Scam: Rescinds BILLIONS of taxpayer dollars poured into the 'Green New SCAM,' ending handouts to special interests and radical climate activists.

Restores Consumer Choice and Affordability: Reverses Biden's EV mandates and CAFE standards, ensuring families can choose the car that fits their needs and budget.

Does

Unleash American energy and drive down prices for families.

End Biden's anti-energy agenda that raised costs.

Refill the Strategic Petroleum Reserve and restore energy security.

Reverse EV mandates and restore consumer choice.

Rescind billions in green corporate welfare.

Does Not

Lock up American resources to appease radical climate activists.

Continue forcing Americans to pay more for unreliable energy.

Leave America vulnerable with depleted emergency supplies.

Force families into unaffordable electric vehicles.

Keep subsidizing unreliable green energy at taxpayer expense.
