INTRODUCTION

The *2027 Federal Credit Supplement (Supplement)* provides summary information about Federal direct loan and loan guarantee programs subject to the Federal Credit Reform Act (FCRA) of 1990, as amended by the Balanced Budget Act of 1997. The credit activities of programs exempt from FCRA do not appear in the *Supplement*, such as the credit activities of certain agencies providing deposit insurance.

Tables 1 and 2 provide 2026 and 2027 subsidy rates, obligations, commitments, average loan size for direct loan and loan guarantee programs, and programs' respective classification as discretionary or mandatory spending under the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended. Programs and risk categories with legislative proposals are displayed with one line showing program data under existing law and a second line showing program data under the legislative proposal. For more information on the BBEDCA and credit reform concepts, see Chapter 6, "Budget Concepts," in the *Analytical Perspectives* volume of the 2027 Budget.

Tables 3 and 4 provide information about the major components of 2026 subsidy rates, including the characteristics of direct loans and loan guarantees, respectively. Tables 5 and 6 provide the same information for direct loans and loan guarantees included in the President's 2027 Budget request. The subsidy rate reflects the net present value cost for each dollar of credit assistance. The subsidy rate is comprised of four components: defaults, net of recoveries; interest; fees; and all other. Loan characteristics describe the terms of the loan agreement between the borrower and the agency or lender, as well as the estimated nominal default and recovery rates. Loan maturity and grace period data are expressed in years; all other characteristics are expressed as a percentage. The grace period data may be for repayment of principal and/or interest.

Tables 7 and 8 provide information on the lifetime reestimates of direct loan and loan guarantee cohorts from 1992 through 2025 by agency, bureau, program, and risk category. The tables show the following for each cohort: the original subsidy rate at the point of obligation or commitment; the current reestimated subsidy rate; the change in subsidy rates due to interest and technical updates; dollar reestimates for the current year; net lifetime reestimate data; lifetime disbursements through September 30, 2025; and the total principal outstanding as of September 30, 2025. Some cohorts displayed in the 2026 *Supplement* have closed—there are no outstanding direct or guaranteed loans in the cohort and no further activity is expected. These cohorts are identified with a footnote and will not be displayed in future *Federal Credit Supplement* volumes.

Tables 9 and 10 show the rates at which the 2027 cohorts of direct loans and guaranteed loans are expected to disburse.

Electronic versions of the *Supplement* in both PDF and Excel formats are available at <https://www.whitehouse.gov/omb/supplemental-materials/>.

GLOSSARY OF TERMS¹

Subsidy Rate, Obligations, and Average Loan Size (Tables 1 and 2):

Subsidy rate refers to the estimated lifetime cost to the Government of a direct loan or loan guarantee calculated on a net present value basis, and expressed as a percentage per dollars disbursed. This includes the sum of all components of the subsidy rate (*defaults, net of recoveries, interest, fees, and all other*).

Assumptions Underlying Subsidy Estimates (Tables 3 through 6):

All other (as a component of subsidy) refers to the portion of the subsidy rate that is not attributed to *interest, defaults, net of recoveries, or fees* as defined below. All other is primarily attributable to uncategorized inflows and outflows which vary by program.

Borrower rate refers to the estimated or average contractual interest rate paid by the borrower for a loan.

Defaults, net of recoveries (as a component of subsidy) refers to the portion of the subsidy rate attributable to payment defaults, net of projected recoveries, on a present value basis.

Default rate refers to the gross nominal amount of defaulted payments (for direct loans) or the gross nominal amount of claims (for guaranteed loans) divided by the amount of actual disbursements, excluding any actual or projected recoveries. Default rates and their underlying assumptions vary by program and risk category.

Fees (as a component of subsidy) refers to portion of the subsidy rate attributable to fees. This includes subsidy attributable to upfront, annual, or other fees paid to the Government.

Grace period refers to the number of years, before repayment of interest or principal payments begin, following initial disbursement for direct loans or obligation for loan guarantees. The specific terms of grace periods vary across programs and risk categories.

Interest (as a component of subsidy) refers to the portion of the subsidy rate attributable to the difference between the borrower's interest payments due to the Government and the Government's estimated cost to finance the direct loan on a present value basis. For guaranteed loans, this refers to the amount of the subsidy rate attributable to interest payments paid to a private lender from the Government, on behalf of a borrower, on a present value basis.

Loan maturity refers to the estimated time, in years, between initial disbursement and final repayment of the direct or guaranteed loan.

Percent guaranteed refers to the percentage of the face value of a loan which is guaranteed by the Government.

¹ Ordered by set of tables in which a term first appears.

Recovery rate refers to the projected gross, nominal payment defaults that are subsequently recovered, to projected payment defaults. In some cases this figure may exceed 100% due to the estimated recovery of fees, capitalized interest, or other amounts.

Subsidy Reestimates (Tables 7 and 8):

Reestimate refers to the difference between the estimated cost of a cohort and the estimated cost of the same cohort in the previous Budget. Each year, the reestimated amount is a reflection of updates for actual information about the cohort's performance since the previous year.

Current reestimate amount refers to the amount of reestimate dollars to be executed in the current fiscal year. Reestimate amounts may be positive or negative, indicating an increase or decrease over the prior year's lifetime cost estimate for a cohort of loans.

Current reestimated rate refers to the most current subsidy rate (see entry for *subsidy rate* above) reflecting the most current actual and expected performance of a cohort of direct or guaranteed loans.

Net lifetime reestimate amount refers to the total amount of reestimates for a given cohort since obligation. This figure is an indication of the total impact on the deficit of upward or downward adjustments to the cost estimate of a cohort to date.

Net lifetime reestimate amount excluding interest refers to the total amount of reestimates excluding interest effects. This figure is an indication of how far off the original subsidy obligation is from the current total cost estimate in nominal dollar amounts for a given cohort.

Outstanding balances refers to total outstanding principal, including capitalized interest as of September 30, 2025. For direct loans this represents loans receivable. For loan guarantees, this represents the face value of guaranteed debt outstanding. Outstanding balances may be zero under specific circumstances. For instance, in some guaranteed loans, outstanding amounts may have been written off, but further collections could still be possible. Outstanding balances may also exceed disbursements, for example, in the case of capitalized interest.

Percentage point change due to interest refers to the difference between the original subsidy rate and the current reestimated subsidy rate that is attributable solely to the difference between the Government's actual cost of financing (the applicable Treasury rates at the time of disbursement) and the cost of financing projected in the budget as part of the President's Budget economic assumptions.

Percentage point change due to technical assumptions refers to the difference between the original subsidy rate and the current reestimated rate that is attributable to changes in the actual and expected future performance of the direct or guaranteed loan for all factors other than the difference between actual and projected costs of funds (see *percentage point change due to interest*). This includes changes in borrower performance, expected default collections, or other changes that increase or reduce payments to and from the public resulting from the loan obligation.

* Less than \$500.

¹ Reestimates for some programs did not appear in the 2027 Appendix because they were \$500,000 or less. Information on all cohorts is provided in the electronic version of the Federal Credit Supplement at www.budget.gov.

² Cohort is closed as of the end of 2025.

³ Breakout between technical and interest reestimates is not available.

⁴ Reestimates have not yet been calculated.

⁵ The 2004 cohort for State Repatriation Loans includes activity for fiscal years 1992 through 2004.

⁶ In FY 2012, Ex-Im Bank changed the definition of cohorts. Ex-Im Bank is unable to provide net lifetime reestimates by cohort for direct loans or loan guarantees for cohorts prior to FY 2012. The total net lifetime reestimate excluding interest for all direct loans and loan guarantees was downward \$9,429 million. The total net lifetime reestimate including interest for all cohorts was downward \$11,917 million.

* Less than \$500.

¹ Reestimates for some programs did not appear in the 2027 Appendix because they were \$500,000 or less. Information on all cohorts is provided in the electronic version of the Federal Credit Supplement at www.budget.gov.

² Cohort is closed as of the end of 2025.

³ Breakout between technical and interest reestimates is not available.

⁴ Reestimates have not yet been calculated.

⁵ The 2024 cohort of Guarantees for Mortgage-backed Securities includes activities for fiscal years 1996 through 2025.

⁶ The disbursements and outstanding balance of Secondary Market Guarantee pools are secured by the guaranteed portion of 7(a) loans reported in other risk categories.

⁷ In FY 2012, Ex-Im Bank changed the definition of cohorts. Ex-Im Bank is unable to provide net lifetime reestimates by cohort for direct loans or loan guarantees for cohorts prior to FY 2012. The total net lifetime reestimate excluding interest for all direct loans and loan guarantees was downward \$9,429 million. The total net lifetime reestimate including interest for all cohorts was downward \$11,917 million.
